He has therefore applied to the Bishops of the American Episcopal Church, influenced by the repeated declarations of the Anglican Episcopate made in recent years that "Christian unity can only be restored by a return to the principles of unity exemplified by the undivided Catholic Church," and that they "see no reason why they should not admit the Old Catholics—both clergy and laity—to Holy Communion on the same terms as their own communicants," and has formally asked to be admitted to the Anglican fellowship and communion, sincerely and heartily accepting the terms offered by the Anglican Episcopate.

He asks this grace because he feels that he must have Catholic communion. He cannot ask their sympathy. The American Episcopal Church, the daughter of the Church of England, is such a centre of Catholic life that he can appeal to her for the friendship, advice and sympathy which he needs.

He maintains the ancient Catholic doctrine, refusing his assent to the modern additions, unauthorized by Catholic tradition, of the Imma-

culate Conception of St. Mary, and of Papal Infallibility.

The parties to the proposed union would maintain their own jurisdiction as Catholic Bishops, and there would be no mingling of property.

This movement of itself is most interesting, and still more so as evincing the plainness of the evidence as to the Catholic character of the Anglican Communion. The Bishops of the American Church at a recent meeting in Philadelphia received the formal request of Bishop Kozlowski with cordiality, and appointed a committee to prepare plans for union, to be presented to the next meeting of the General Convention, two years hence. There is little doubt that the proposed union will be effected.

SACERDOS CATHOLICUS.

NIPPON YUSEN KAISHA.

The following is a full translation of Mr. Kondo Rempel's speech at the last semi-annual meeting of the Nippon Yusen Kaisha:—

At the last half-yearly meeting of shareholders, I stated that, judging from the prevalence of trade depression, the income for the next half year would probably show a decrease. I am happy to say that my forecast has not been verified by events. The income for the half year shows an increase of over a hundred and thirty thousand *yen*. Thus, after setting aside the legal reserve, and after paying a regular dividend of 10 per cent. and a special dividend of 2 per cent., we are able to make an addition of eight hundred thousand *yen* to the fund for Extending Services and Improving the Fleet, which exceeds the appropriation of last term by a hundred thousand *yen*, and we are able to carry over seven hundred thousand to the next account, as set forth in the Report, which I now beg to submit. I think that these facts must be said to represent a satisfactory result, in consideration of the commercial depression that prevails. It must not be supposed, however, that this fortunate result constitutes any evidence of a revival of activity in the business world. The Report shows that our income from the carriage of goods decreased, and although the deficiency thus caused was partially balanced by an increased revenue from passenger traffic, the success we have achieved is largely attributable to comparative freedom from accidents and to administrative reforms resulting in reduction of expenses. The fact is that in consequence of the annual extension of the limits of the Company's business, mutually compensating factors are created. What is lost at home is gained abroad, and a deficiency in one direction is balanced by an increase in another, so that things average up to a good general result. But it can not be said that any signs of business revival are yet apparent, or that there is any reason to anticipate an improvement during the next three or four months. Moreover, if we examine the case of one of this Company's most important services, the European line, it appears that whereas formerly the freight on eastward cargo was at least 30/ per ton, a great increase in the number of vessels has now caused such keen competition that rates are steadily declining. Iron, for example, can not be obtained at a higher freight than 15/ or 16/ per ton. Australia, also, has long suffered so badly from drought that there is no appearance of a revival of business. Taking all things into consideration, we must undoubtedly anticipate a reduction in our freight returns for next half year, as compared with this. On the other hand, it is not impossible that the improvement witnessed in our passenger traffic during the past half year may be continued. Thus, the exhibition next year in Osaka will probably have the effect of augmenting the number of domestic and foreign travellers, and further owing to deficient crops in the north and east this year, there has recently been a large transport of rice in that direction from the south and west. It may, of course, be apprehended that these are merely temporary causes of improvement, but if the movement of goods should happily be maintained, our home prospects will not be without grounds of hope. On the whole,

however, I believe that any increase of our business in the next half year can not be anticipated, and I can only trust, as you, Gentlemen, doubtless do, that my forecast may prove erroneous.

Passing next to the question of the Directors whose terms of service is about to expire, I desire to say a word in the capacity of representative of the Directors now in office. Doubtless you have had many faults to find with their management of affairs, but owing to the confidence you have reposed in them, they have been able to discharge their duties, however imperfectly, and to bring their term to a successful conclusion, a result which they count very fortunate. In this context I trust you will permit me to submit a few details relating to the Company's business during that term.

In the first place, the Company's assets, as shown in the ledger on the closing day of the last term of service, namely, the 30th of September 1899, amounted to 34,660,000 *yen*, in round figures, whereas on the 30th of Sept. 1902, they aggregated 40,574,000 *yen*, an increase of over 5,900,000 *yen*, or an average growth of nearly 2 millions annually. Again, with regard to the Company's fleet, which, as a business instrument, constitutes its principal asset, the number of sea-going steamers on the last day of the previous term was 66, and their total tonnage was 195,535 tons, but on the last day of this term the number had increased to 70 vessels with a total tonnage of 221,871 tons. Thus there has been an increase of 4 in the number of steamers, and of 26,330 in the tonnage. These facts may fairly be regarded as evidence that the Company stands on a firm basis and that its business has developed.

In the next place, at the general meeting in May of last year the hitherto unlimited term of the ships' depreciation was for the first time given a limit of 25 years, a long entertained desire being thus realized and the Company's shipping system placed on a proper basis, to the profound satisfaction of the Directors. As a consequence of that decision, the ships' value which, at the end of the last term of office averaged 106 *yen* per ton in the assets, was reduced to 97 *yen* at the close of the present term, in spite of the fact that the cost of shipbuilding is increasing yearly. Further, where the ships' age, three years ago, averaged 14 years, it now averages 13 years, so that the fleet may be said to be growing younger as time goes by. Again, the average tonnage of the vessels was 2,963 tons at the close of the last term, but it is now 3,170 tons. In short, during the past three years, the ships have grown younger, the price has become cheaper and their size has increased, all of which results from having fixed a limit for the depreciation system. It is the custom with maritime experts to estimate the condition of a shipping company from the age of its vessels and the value at which they stand in its books. Happily this company has now reached a position which, I think, warrants it in feeling not merely no shame but even a sense of pride in the presence of other companies.

In accordance with a resolution adopted during the present term of office, a fund for the extension of services and improvement of the fleet has been formed, and eight hundred thousand *yen* being now added to the appropriations made in previous accounts, the fund totals two million *yen*. This fund is of the utmost importance from the point of view of the Company's business as well as from that of its assets, for it affords a means of replacing old ships by new, as well as of gradually improving the vessels and extending the services. It is, in fact, an indispensable fund, and I believe that its formation was a particularly suitable measure on the Company's part, having regard to the state of affairs in the shipping world.

The fund for the equalization of dividends stood at 660,000 *yen* at the close of the last term of service, whereas now by gradual appropriations it has been brought to 3,300,000 *yen*. The Company's business has its good years and its bad. Anything may happen at any moment. Should the earnings during a term prove insufficient to pay the usual dividend, this fund affords the means of doing so. It is consequently an asset

of the utmost importance and enables the average dividends to be kept up.

I remember that at the close of the last term of service, I spoke of the past as the period of the Company's growth, and comparing it to an effigy which had just been constructed but which still lacked the eyes, I explained that we were then entering the period of adjustment. I venture to think that during the term under review that aim has not been neglected, and that the pupils have been added to the eyes. At the same time, attention has been paid to reorganizing the business and economizing expenses. During the term a reform has been carried out, the result of which is a reduction of over 400 persons in the shore and sea staffs, which, supplemented by other measures of adjustment, is expected to produce an economy of expenditures to the extent of 180,000 *yen* during next term.

Further I have no hesitation in saying that the Company's credit has largely increased at home and abroad, and that a considerable addition has thus been made to one of its principal intangible assets. For we are now enabled to obtain from the Universities, or from the High Commercial College or from other educational institutions, public or private, graduates whom we can train so that they become by degrees conversant with our business and acquire competence to take satisfactory charge of our most important affairs, which fact represents an intangible asset of great value not to be purchased with money.

It is a source of no little pride to your Directors that, as results of the last term of their office, they are happily able to report increase of the Company's business, reorganization of its administration and improvement of the quality of its staff.

I have now to speak about the cardinal features of the Company's business and of its enterprises in the past.

As I have taken occasion at each general meeting since May of last year to make a detailed statement of the noticeable features in the world of maritime affairs, I need not repeat the facts now. Briefly summarized, the trend of the time is toward keen competition and the devotion of utmost strength to maritime affairs. Language may differ and terminology vary, but it is an indisputable fact that the tendency of each country is to give direct or indirect protection to its own shipping interests. Among the prominent events in the world of maritime affairs, none attracted more attention than the formation of a great steamship trust by the Morgan Combination. The vessels are to be transferred on the last day of the current year, and preliminary measures are now in rapid progress. Germany also is plainly bent upon employing national resources for the encouragement of shipping enterprise. The English Government alone seemed to be maintaining a tranquil attitude until last year, when the public at length became excited and in consequence of representations from chambers of maritime commerce, Parliament appointed a committee of inquiry. According to subsequent intelligence, a maritime company is about to be formed, or has already been formed, in England with a capital of 200 million *yen*. Further the British Government has virtually concluded with the Cunard Steamship Company an agreement under which the latter undertakes to build two steamers capable of developing a speed of from 24 to 25 knots, the Government lending the money at the extremely low rate of 2¼ per cent. interest, repayment to be made in twenty annual instalments, and the Company receiving an annual subsidy of one and a half million *yen*. Moreover, it has been arranged that there is to be a line of twenty-knot steamers between England and Canada, and that the Dominion and the Home Governments will between them grant for ten years a subsidy of 2¼ million *yen* annually. It is not yet certain whether the order will go to the Canadian Pacific Railway or to a Syndicate of lines, but as to the fact that the service is to be established, it has been definitely settled.

That England, who is called the Queen of the Ocean, should have taken up the question of maritime enterprise so keenly, can not fail to attract universal observation, and the effect in adding fuel to the world's maritime fever may be

foreseen without difficulty. It is in Germany that the fever reaches its highest point. A speech delivered by the President of the North German Lloyds at the launch of the *Kaiser Wilhelm the Second*—said to be the finest ship in the world—shows what a degree of zeal the Germans bring to maritime enterprise. He said in the course of his remarks:—"A French friend of mine lately asked me whether it was true that the Emperor of Germany gave such munificent assistance out of the privy purse to German steamship companies that they were able to build large ships and to extend their maritime enterprise. Moreover, I hear that at a meeting of the British Committee of Examination it was positively stated that German shipping companies are in receipt of large subsidies from the Government. All these assertions err as to the true significance of the facts. In accordance with agreements made with the Government the two great shipping companies of Germany have established regular lines in the Atlantic and to the Far East, and in consideration of these services they are in receipt of due subsidies from the State. But this is nothing more than compensation which the Government considers necessary in the interests of commercial development. As to the question of the Emperor's privy funds, the proper interpretation is that certain assistance comes from His Majesty's exchequer in accordance with the Imperial will. His Majesty, graciously desiring that facilities should be provided for Germans travelling on business and that the development of their commerce should be promoted, has been pleased to extend his munificent aid to the accomplishment of these ends, and we and other German subjects who are the humble recipients of the Imperial benevolence are bound to labour for the development of trade." Such language furnishes a sufficient indication of the spirit animating the German people in matters of maritime enterprise.

With regard to the sentiments of the English people, official and private, in these matters, the latest reports show that Mr. Gerald Balfour, now President of the Board of Trade, addressing a meeting of the Master Cutlers at Sheffield on the 30th of September, with reference to the Government's agreement with the Cunard Company, delivered an important speech which appeared in the English papers, and was subsequently copied by the journals of continental Europe, attracting apparently great attention. The gist of what he said was this:—

Englishmen are naturally jealous of everything that affects the British mercantile position and the interests of the British mercantile marine. It is to our mercantile marine that we owe erection of the great empire of which the ocean is the highway, and without which that empire could hardly continue to exist. It is not from the present year only that the transference of a considerable portion of our shipping in the Atlantic to American financial control dates. It began before this year. Before the formation of the Atlantic shipping combination the fleets of several of our great shipping companies had passed, not indeed away from the British flag—for the vessels of these companies continued to retain their British nationality—but into American ownership. This transfer had already excited considerable attention, and caused some uneasiness; but that uneasiness was greatly accentuated after it had become known that two other companies, including the famous White Star Line, with its magnificent fleet, containing some of the finest ocean liners afloat, had gone the same way as the companies to which I have referred. But when these companies had passed under the control of a single corporation domiciled in another country, and when this combination had also been joined by the two great German lines, the Anglo-American Line and the North-German Lloyd, feeling in this country was still further excited. Afterwards it became known that the terms on which the German companies had joined the combination were different from those on which the British companies had joined the combination; for it appeared that, while the British companies had been practically absorbed into the American combination, the German companies, on the other hand, preserved their identity, preserved their power of individual development, and had, in fact, entered really as an equal power into the alliance with the American combination, as an alliance which, after a certain period of years, might be brought to an end by either party to it. It was not surprising that these arrangements when they became known should have produced a deep impres-

sion upon the British public; and it was not unnatural that the British public should look to the Government, and should expect the Government to take some action in the matter.—(Cheers.) This question, moreover, had a naval aspect as well as a commercial aspect. The White Star Line contained some of the finest cruisers at the disposal of the Admiralty. An agreement, indeed, existed between the White Star Line and the Admiralty, which for a few years longer, placed its vessels at the disposal of the Admiralty. But we had no guarantee whatever that when that agreement came to an end these vessels, or any others that might be built, would be still at the disposal of the Admiralty, or even that they would continue to fly the British flag. What aggravated the position was that the great German lines which had entered into partnership with the combination possessed three vessels, and were building a fourth vessel, of a speed higher than any which was at the disposal of our own Admiralty to serve as merchant cruisers. Now, let me make for a few minutes a digression. The acquisition by the German companies of these vessels of 23½ knots has often been made as a reproach to the enterprise of our own shipping community, which had no vessel of the same class to set in comparison with them. I think that injustice is done there to our great shipping companies. The plain fact of the matter is that vessels of that high speed cannot be run so as to be commercially remunerative, except when aided by a heavy subsidy from the State. The White Star Line or the Cunard Line could undoubtedly have built and run such vessels if they had thought it commercially to their advantage to do so. If they have not done so it was because they did not think it commercially advantageous that such vessels should be constructed and run on such terms as existed. But, if it is desirable that we should possess such vessels, that we should have such vessels at the disposal of the Admiralty, that such vessels should be attached to the British Navy for possible services in time of war, I think you will see that from the naval point of view also a possible monopoly of the entire Atlantic trade by a foreign corporation was a serious matter which it was necessary to take seriously into account. That, my lords and gentlemen, was the situation with which the Government has had to deal. It will be for the country to judge whether it has dealt with it successfully. But what we have done is this. We opened negotiation both with Lord Inverclyde, the chairman of the Cunard Company, and with Mr. Pierpont Morgan, as representing the Atlantic Shipping Combination; and it is the barest justice to say of both these gentlemen that they have shown the utmost readiness to meet the wishes of the Government. We have been able to enter into an agreement, both with Lord Inverclyde and also with Mr. Pierpont Morgan, the general effect of which I shall be in a position to state to you now. I ought to add that, of course, the agreement made with Lord Inverclyde will have to be submitted to the shareholders of the Cunard Company; but I do not anticipate that their assent to the agreement is likely to be withheld.

The Cunard Company have pledged themselves to remain in every respect a British company, managed by British directors, with the shares not to be transferred to anybody but British subjects. Their ships are to be officered by British officers. They also engage to construct two vessels of 24 to 25 knots, that is to say, vessels a knot faster than any other in the fleet. These two vessels, as well as the entire Cunard fleet, will remain at the disposal of the Admiralty, the Admiralty being at liberty to charter or purchase any of them at any time on terms fixed in the agreement. I have already explained that the construction and running of these vessels cannot be effected on commercial principles. But in order to reduce the expenditure as far as possible the agreement provides that the capital necessary for the construction of these vessels should be advanced by the Government to the Cunard Company, of course on proper security and on proper conditions of repayment. The Cunard Company is also to receive from the Government a subsidy in lieu of the present Admiralty subvention amounting to £150,000 a year. This sum may perhaps appear at first sight a somewhat large one; but I can assure you that the point has been most carefully considered, and that we have come to the conclusion that this sum is not more than a fair remuneration for the services to be rendered. To the principle of paying a subsidy in excess of the remuneration fairly due to the services rendered by any shipping company the Government are perfectly opposed. Such subsidy we regard as merely bounty in disguise, and to the principle of giving bounties we are resolutely opposed.

Now I come to the agreement made with the Atlantic shipping combination. I have already indicated that it is not unnatural that the public should see in the Atlantic shipping combine a design of injuring British shipping and British commerce. I say that such a conclusion, having regard to all the circumstances, was not an unnatural one for the

public to form; but while, I say that, I feel bound to utter an expression of my firm conviction that no such design ever entered into the mind of Mr. Pierpont Morgan. He is a great believer in the principle of large trusts. He may be right or he may be wrong; on that I express no opinion whatever; but he is a great believer in the principle of trusts, and he also considers that the conditions of the Atlantic shipping trade were such as to make that principle peculiarly applicable, and owing to the American position he consented to that combination. But I am quite certain that he had no intention whatever of injuring the shipping or the commerce of this country; and the proof is the readiness with which he has met the Government on all these points in which the British interests might seem to be most endangered by the fact that this shipping combination had been called into existence. Well, we have made an agreement with Mr. Morgan, and the general effect of that agreement is to secure that the British companies in the combination shall remain British, not merely nominally, but in reality. These companies shall be kept alive, and the majority of their directors shall always be British subjects. The agreement further provides that every ship now flying the British flag, and half the ships hereafter to be built for the combination, shall continue to be British ships and shall continue to fly the British flag—that they shall be officered by British officers and manned in reasonable proportion by British crews. In other words, these British companies are to remain to all intents and purposes British companies, while the British Government on its side undertakes that they shall continue to be treated as heretofore on a footing of equality with other British companies in respect of any services, whether postal or military or naval, which his Majesty's Government may require from the British mercantile marine. As regards future construction, the combination has undertaken that at least half the tonnage hereafter built for the combination shall be built for the British companies, and shall continue to fly the British flag and be in all respects British vessels; and a provision has further been added enabling his Majesty's Government, in an event which I trust will not be realized of the combination pursuing a policy hostile to the British mercantile marine, or hostile to British trade, to terminate the agreement into which they have entered. I ought to say that both the agreement with the Cunard Company and the agreement with Mr. Morgan are for a period of 20 years. In the case of the Atlantic Shipping combine, this period of 20 years is to be prolonged with a notice of five years on either side. My lords and gentlemen, I have explained to you as well as I am able the agreement into which we have entered. I am afraid, in doing so, I must have put your patience to a severe test. If so, I can only plead the importance of the subject matter as my excuse. In judging of these agreements let me ask you to remember this. The interests of the mercantile marine, the interests of the carrying trade, are among the greatest of all British interests. But we cannot expect permanently to exclude everybody else from the carrying trade. In particular it would be most unreasonable to expect that our cousins on the other side of the Atlantic should not claim a fair and due share of the Atlantic trade. I would only ask you to consider the direction and volume of the trade. The goods America sends to this country are in point of value three to one. We are sending to America if measured not in value but in bulk, something more than that figure. In these circumstances it is impossible that we should expect that the Americans should be permanently content to remain without a considerable share in the Atlantic trade, nor is it, in my opinion, desirable that they should remain without a considerable share in that trade. But it is desirable that this inevitable development should take place with the least possible friction between the two peoples.

I think that these remarks of Mr. Balfour's furnish a sufficient indication of the action of the British Government towards the Atlantic Shipping combination, as well as of its future policy, and show also what is the sentiment of the English people in general.

The sum of the matter is that America, England and Germany are all employing formidable strength for the purpose of increasing their maritime business, and that hereafter, instead of confining their efforts to the Atlantic, they may be expected to extend them to the Far East and to invade the regions where we have our lines. Therefore no time must be lost in devising means to meet that contingency. In truth the receipt of these reports causes me great uneasiness whenever I reflect on the future of the Company's affairs. Assuredly it is a time not for tranquil assurance but for strenuous resolution. Nor does this apply to maritime enterprise only. A glance at

our country's condition shows that the same may be said of commerce, of industry and of all other trades, though the case of maritime enterprise forces itself most prominently into notice. I trust that I have not wearied you with these remarks and that they will be found to have some suggestive value.

LAW CASES.

BRETTEL v. JOVANSSEN.

In the Yokohama District Court, on Monday afternoon, before Judge Kano, and two assistant judges, the hearing was resumed of the action, adjourned from Oct. 31st, of the suit for confirmation of invalidity of marriage, brought by Rachel Brettel (Jovanssen) against Adolph Jovanssen. Mr. Otsuda and Mr. Ohashi appeared for the plaintiff and Mr. Ideura appeared for the defendant.

Mr. Ideura produced a copy of the marriage certificate issued to the parties by the priest of the church at Stockholm where the marriage was performed; as well as the court record of Dr. Lönholm's expert evidence regarding the validity of the ceremony. Counsel contended that this evidence proved the perfect validity of the marriage.

Mr. Otsuka refused to admit the evidence now produced, and Mr. Ideura applied for an adjournment pending arrival from the plaintiff's native province in France of a copy of the personal registration of the plaintiff and a certificate of the advertisement issued at the time the marriage took place.

Mr. Otsuka thought these documents unnecessary and the Court upheld his plea.

Mr. Ideura then asked that Mr. Steenackers, Acting French Consul in Yokohama, be called to ascertain the date of the registration of plaintiff as a French citizeness.

A short discussion arose on the point and the Court decided that it was unnecessary to call further witnesses.

Counsel then addressed the Court at some length for either side and at the close of their addresses it was announced that judgment would be delivered on the 8th inst.

EMBEZZLEMENT AT KOBE.

Fujii Yakuzo, who was brought up for trial on a charge of embezzlement, was found guilty on Friday in the Kobe Chiho Saibansho, says the *Kobe Herald*, and was sentenced to major imprisonment for three months. It will be recalled that the man was charged with embezzling yen 5,600 (not yen 8,200) which was given to him by Mr. Bardens to pay in as a deposit in connection with some rice transactions.

G. W. ROGERS v. SUZUKI.

In the Yokohama District Court on Monday before Judge Kano, the hearing was resumed of the action, adjourned from Nov. 21st., brought by Mr. G. W. Rogers, No. 55, Yokohama, against Mr. Suzuki Ichitaro. The claim was for payment of yen 246.50 on a dishonoured promissory note. Judgment was given for plaintiff by default.

JOVANSSEN v. CLUB HOTEL, LTD.

In the Yokohama District Court on Tuesday, before Judge Kano, was resumed the hearing of the claim for compensation brought against the Club Hotel, Ltd., by Adolphe Jovanssen, who declares he was wrongfully dismissed.

As arranged at a previous sitting of the Court, Mr. Louis Eppinger, Manager of the Grand Hotel, was called as a witness. He deposed to Jovanssen being in the employ of the Grand Hotel from the 1st of May until the previous night, when he left the service. He received yen 150 per month beside board and lodging. He was engaged by the month. His board would cost about yen 50 or yen 60 per month.

Mr. Sawada applied to have Mitoda Jihei, night watchman at the Club Hotel, called. And the Court then asked why evidence regarding the claim for yen 300 for board and lodging had not been brought.

Mr. Ideura said he would call Mr. Cotte, formerly in the service of the Club Hotel, for this purpose.

The Court decided to call both witnesses and adjourned to the 13th inst.

H. & S. BANK v. HIOKI.

On Wednesday morning, before Judge Kano, sitting in the Yokohama Chiho Saibansho, proceedings were resumed in the suit brought by the Hongkong & Shanghai Banking Corporation against Mr. Hioki, Bankruptcy Administrator in the estate of Mourilyan, Heimann & Co., claiming recovery of yen 3,905, said to have been paid by mistake. Mr. Masujima represented plaintiffs, while defendant appeared in person.

The only witness heard was Mr. F. E. White, who deposed that Messrs. Samuel Samuel & Co. carried on the Formosa Camphor monopoly independently but that Messrs. Mourilyan, Heimann & Co., by virtue of a certain contract, were to receive certain profits from the business, while if any losses were incurred they were liable for a share. In the books of Samuel Samuel & Co. dealing with this particular business yen 226,250 is entered as being defrayed by Mourilyan, Heimann & Co. as guarantee money in the monopoly business. The money was received from the Hongkong and Shanghai Bank, through Mourilyan, Heimann & Co., but there was no money invested by Mourilyan, Heimann & Co. so far as the books were concerned.

The Court decided to call Mr. E. C. Davis as a witness and also to order the production of his depositions made before Judge Naruse, Bankruptcy Commissioner.

The hearing was then adjourned to the 11th inst.

Mr. Le Prevost was admitted to bail on Tuesday evening, the amount being fixed at yen 3,000.

The four Japanese who were arrested in connection with the alleged silk frauds in Yokohama, and have been undergoing preliminary examination, were released from Negishi on bail on Wednesday afternoon. The amount of bail is not known.

Mr. A. Hoffmann, Manager of Messrs. H. Ahrens & Co., Nachf., and Consul for Belgium at this port, said the *Kobe Herald* of Dec. 1st, has instituted an action against the *Yorodzu Choho* of Tokyo at the Tokyo Chiho Saibansho. Proceedings were instituted on Saturday last. The Tokyo journal is charged with libel and Mr. Hoffmann claims yen 10,000 as compensation. Messrs. Sakurai and Handa represent the plaintiff.

SARDA v. BOISREGION.

Judge Kano, sitting in the Yokohama Chiho Saibansho on Thursday morning, resumed the hearing of the case in which Mr. Paul Sarda seeks to recover yen 368.465, with interest, from Mr. A. Boisregion, of R. Chauvin & Co., No. 250, Yokokama.

After hearing the evidence of a Japanese who built the premises at No. 179, which form the subject of dispute, the Court decided to appoint a valuer who should appraise the cost of certain restorations in the building which plaintiff claims should be done by defendant.

HIOKI v. SAMUEL SAMUEL AND CO.

Further progress was made on Thursday in the Yokohama Chiho Saibansho in the case brought by Mr. Hioki, Bankruptcy Administrator in the estate of Messrs. Mourilyan Heimann & Co., who seeks to recover certain moneys on behalf of the estate, alleged to have been advanced to Messrs. Samuel Samuel & Co., in connection with the Formosa Camphor Monopoly business.

Various documents were presented to the Court in support of the claim and it was further urged that Mr. E. C. Davis, who was admitted a partner in the firm of Samuel, Samuel & Co. this year, was the proper representative of the firm to sue. The Court heard arguments on the point and then adjourned *sine die*.

REVIEW.

The *Nihon Kogaku no Tetsugaku*. By Dr. Inoue Tetsujirō. Published by the Fuzambō Publishing Company, Tōkyō. Price 1 yen 60 sen.

Dr. Inoue Tetsujirō is a most earnest and indefatigable student of philosophy both Occidental and Oriental and his numerous essays on this subject all bear the marks of the most painstaking and scholarly research. It was our pleasant duty some two years ago to review in these columns his learned treatise on the Japanese section of Wang Yangmin's school of philosophy. Since the publication of that work Dr. Inoue has been engaged in the preparation of a minute history of the views of quite a distinct set of philosophers, the Conservative school, which were alike opposed to the school of Chutsz and the school of Yangmin. This history has now taken the form of a bulky volume covering over 700 pages, which, thanks to the courtesy of the author in forwarding to us a copy, we have been able to examine in a leisurely manner. In old Japan all thinkers of any note belonged to one of the three great schools of philosophy. They either adopted the imported teaching of Chutsz, known as Shushi in Japan, or the doctrines of Wang Yangmin, known here as Yōmeigaku, or they followed the teaching of the great leaders of the ancient school of thought, Yamaga Sokō, Itō Jinsai and Butsu Sorai. From the preface to the work we are now about to review we gather that later on Dr. Inoue will give us the history of the opinions and theories of by far the most powerful of the three schools, the Chutsz philosophers, who in the Tokugawa times were pre-eminent throughout the empire and whose influence on the life of the nation in numerous particulars was far greater than that wielded by their rivals. It is no small boon to scholars in these bustling times to possess such concise, systematic and exhaustive histories of ancient Japanese thought as those which Dr. Inoue's learned leisure and ripe scholarship have enabled him to prepare. The world of philosophy is Dr. Inoue's special sphere and we would recommend him to keep to it. His excursions into the religious world have, in our opinion, by no means shown him at his best, and his treatment of religion, has always appeared to us to reveal a lack of ability to comprehend the real nature of the problems that will ever attend that difficult subject. It is as an expositor of the thoughts of the great luminaries of the intellectual and moral world, Oriental and Occidental, ancient and modern, that we see him at his best. Without further preface we shall proceed to give as minute an account as space allows of this work, which is the most elaborate of all Dr. Inoue's histories of ancient philosophy in Japan, and which the author tells us has taken two years to prepare.

First in reference to the title, "The Ancient School of Philosophers," it originated in the fact that the men who figured as the leaders of this school revived philosophic teaching that had long been forgotten. Their doctrines were almost all a reproduction of the teaching of Confucius and Mencius, but they rejected the deductions which in China and Japan had been drawn from the words used by these great sages. Though they are called an "old school," in one sense, says Dr. Inoue, they were a "new school," the Protestants of Philosophy, who aimed at reverting to original teaching, at purifying thought by removing from it the accretions with which, it had become clogged in the course of ages. The history of the school under consideration consists of the history of the lives and teaching of the three great leaders, Yamaga, Itō, and Butsu and their followers, and this fact furnishes Dr. Inoue with a simple division of the material to be published. The work is divided into three parts. Part. I. deals with Yamaga Sokō (山鹿素行) and his followers; Part II. with Itō Jinsai (仁齋) and his disciples, and Part. III. with Butsu Sorai (物徂徠) and his school of thought. The three men differed from each other in character and proclivities. Sokō was a soldier and well versed in military affairs. The precepts and general teaching of Confucius he applied to the life of a warrior. Jinsai centred his thoughts on the

development of virtue in individuals, on making known by precept and practice the type of character embodied in the word *kunshi*—a title for which we have no very exact equivalent in English. Sorai was at heart a Utilitarian and spent his life in endeavouring to permeate literature and politics with the ethical principles which he championed. They were all three opposed to the Quietism (寂靜主義), *Jakusei-shiugi** of the Chutz school of philosophers and advocated activity and aggressiveness.

I. Yamaga Sokō.—(1622-1685). Sokō began life by studying military science, in which he subsequently attained to such proficiency that down to the very close of the Tokugawa era he was quoted as one of the great authorities on this subject. For some time he studied under Hayashi Razan and adopted the views of the Chutz school of philosophy, but at the age of 40 he came to the conclusion that Chutz's teaching was a perversion of the actual doctrines of Confucius, and so he laboured to revive interest in the original teaching and founded a school with this end in view. He encountered great opposition from the Bakufu, which in those days would brook no rival to the Chutz school of philosophy. He was placed under the Ako *daimyō*, Asano. By this baron he was treated with great consideration. As a return for the kind treatment he received, Sokō instructed Asano's retainers and made such an impression on them that a most powerful school of warrior-philosophers was founded in Harima, which in later times gave birth to the 47 *rōnin* type of heroes. Among Sokō's Chōshū followers was the noted Yoshida Shōin, under whom in their early days Marquis Itō and Yamagata both studied. Sokō's teaching on cosmogony and on the various attributes of natural forces differed essentially from that of the Sung school of thought. He contended that nature, 性, *sei*, is the result of the cooperation of the law of moral order, to which he applies the term 理 *ri*, and the vital energy, known as 氣, *ki*. In any sort of creation (*kaibyaku*) he never seems to have believed. He held that the whole universe had no beginning and that it can have no end. He thought that the language used in reference to nature's processes, such terms as life and death, growth and decay, are all misleading, and he boldly says that there is nothing to which the terms life and death should be applied, *shini iku to nazukubeki mono nashi*. But more interesting perhaps than his notions on the laws of the universe, which can only be very partially known and which when explained by resort to such extremely plastic terms as *ri*, *ki*, *sei* and *Ten* lack all scientific, and even philosophic, precision, are Sokō's ethical ideas. He was, as Dr. Inoue points out, a thorough-going Utilitarian. For many years the contemporary of the great English philosopher Hobbes, but without even knowing of his existence, Sokō reached the same conclusions as those arrived at by this deep thinker as to the principle which consciously or unconsciously guides men in their choice of courses of action to be followed. In commenting on the distinction drawn by Confucius between 義, *gi*, and 利, *ri*, that which is right and that which is beneficial to the person concerned, Sokō says that if a man aims at always doing what he thinks to be right benefit will come to him of itself. He goes on to observe that it is no use pretending that a man can treat with indifference his own gain or loss in pursuing a certain course of action. *Hito wa mina ri wo konomi gai wo nikumu, kono rigai no kokoro arazareba, kareki to onaji, hito ni arazu. Ninjō wa mukashi mo, ima mo, doko mo onaji koto*, 等々† This is equivalent to saying

* Dr. Inoue applies the term "quietism" to certain views of the philosophers of the Chutz school. But we doubt whether the use of the term in this sense is allowable. We have never met with an instance in the writings of English philosophers of such an application of a term used to denote the mystical doctrines of a sect of religious devotees originated by Molinos, a Spanish priest.—(REVIEWER.)

† "People all like that which benefits them and dislike that which harms them. If a person can be found who possesses not a mind that thinks of profit and loss, such a being is no better than a withered tree. Man he is not. The feelings of mankind in

that the Utilitarian standard of conduct has always been the ultimate one, though in another passage he guards against the danger of giving to the term utility too narrow a meaning. Sokō was a staunch nationalist and he condemned in strong terms the tendency of his contemporaries to praise everything that was foreign and to depreciate things native. "Our scholars," said he, "have an evil habit of believing their ears, but not their eyes, of rejecting what is near at hand and adopting what hails from a distance." All the transcendental and mystical notions that had been combined with Confucianism by the Sung school of philosophers he rejected, and affirmed that Confucius' teaching was only designed for practical use in political and social life and that philosophic theories are outside the proper scope of the Confucian ethical system. Dr. Inoue draws attention to the fact that Sokō was one of the great founders of the Bushidō. He speaks of him as the *verkörperung*, or incarnation, of the famous code. The books Sokō published on this subject, says Dr. Inoue, may be said to form a kind of Bushidō Constitution. As a philosopher Sokō's teaching was neither as positive nor as thorough as that of Jinsai and Sorai. He cannot be said to have given any very new ideas to the world, but nevertheless his personality was a very strong one, and what he believed he had the art of making others believe too. On p. 129 *et seq.* of Dr. Inoue's work will be found a full list of works of reference on the life and teaching of Yamaga Sokō.

II. Itō Jinsai.—Jinsai began to study under a teacher at the age of 11. When he had reached the age of 19 his proficiency was recognised to be something phenomenal. But it was not till 19 years later that he determined to reject what is known as the Sung teaching and do his best to concentrate men's minds on the unadulterated truths proclaimed by Confucius. Born in 1627, he lived to the ripe age of 78, and perhaps it is true to say that few men in old Japan wielded such a powerful influence over contemporaries and posterity as Jinsai. In reference to Jinsai's theories, on cosmogony he taught that all things may be traced to one source, that source being an all-pervading and all-powerful energy. This force he terms 元氣, *Genki* (original, vital energy). He speaks of the universe as *ichi dai kwatsubutsu*, a great living thing. It begets, but is not begotten. The followers of Chutz, Lautz and the Buddhists represent the universe as a dead thing. Jinsai's saying that the universe is a living thing is founded on the general teaching of the 易, *Yeh*, which describes the endless changes wrought by the above-named "original energy." This is no other than the eternal flux on which Heraclitus dwelt so much. "All things flow" said this Greek philosopher. Things exist only in transition was what he taught, and this is the doctrine of the *Yeh*.

The points of difference between the teaching of the philosophers known as the Sung school (called after the 宋, *Sung*, era, which included the followers of Chutz, Lautz and many Buddhist schools, and that of Jinsai are thus summarized by Dr. Inoue. The Sung philosophers held that the world began with a governing principle, 理, just as Plato taught that it began with an idea, and that the vital energy known as *ki* came afterwards. But Jinsai taught that the energy came first and that what the philosophers describe as the fundamental principle of the universe is nothing but the law that governs the working of the vital energy called *ki*. The *ri* has no existence as a producer of the universe nor does it actually control the operations of nature.* The fact is, however,

reference to this have in all places and all times been the same."

* Here it is hard to follow the reasoning of Jinsai; for it is evident that the designs of things exist before the things themselves and in very complicated structures and machines the design may be said to be more important than the energy that brings the creation of the mind into actual, substantial existence. The idea is the actual original, as the existence of the thing depends on the nature of the design.—(REVIEWER.)

remarks Dr. Inoue, Jinsai and his opponents, the Sung philosophers, use the term *ri* in different senses. Jinsai's *ri* is the equivalent of *rihō*, or natural law, which he maintained has no existence apart from the things and operations which it governs, but his opponents maintained that before the actual universe came into existence the principle on which it is based existed and that this existence was as real as is the existence of the universe itself.* Then the two schools differed as to the term of the existence of the universe. Jinsai taught that the universe is without beginning and without end. All accounts of creation, such as the one given by Chutz, are rejected by him. Then the two schools differed on the question as to whether nature is to be described as in a perpetual state of activity or whether in a perpetual state of quiet. Nature is ever begetting, ever transforming, ever reproducing old things in new forms, taught Jinsai. There is no such thing as death in reality—there is an identity in the apparent contradiction of all things. To all the operations of nature Jinsai attached great importance. The Sung school, on the other hand, regarded the material universe as quite unreal. Certain Buddhists whose teaching was followed by the philosophers of this school maintain that the true view is to regard emptiness as the final state of all things. To the Buddhists the material universe has no real existence. It is all described as 幻妄, *Genbō*, visionary, imaginary. Coming to ethics the definition given of the term *michi* or "way" by the two schools now under comparison differed considerably. The Sung school of philosophers said that the *michi* is 性 *sei*, nature. They also taught that it is *ri*, using the term as the equivalent of the rational or right rule of action.

Jinsai maintained that such a use of the various terms was most confusing; so he began by defining the word *michi* as the proper course of conduct for men to follow, and he said *michi wa jingi* (仁義) *nari*† He objected to a distinction being drawn between practical ethics and ideal ethics, between what men actually attained to and what they aimed at. The Sung philosophers spoke of an ideal path of virtue to which they gave the term 至道, *shidō*, the highest way. Jinsai said:—*Jōdō wa sunawachi shidō nari*. "The ordinary path of virtue (that is the everyday conduct of good men) is the highest path." He maintained that there is too much vagueness, uncertainty and unreality attached to the ideal ethics taught by the Sung philosophers. A thing which only exists in idea does not specially concern practical men, said Jinsai. What in these modern days we call humanity was the central idea of Jinsai's system of ethics. Jinsai knew of no learning disconnected with morals, and deemed no subject worth studying unless it were connected with the furtherance of virtue in oneself or in others. Some subjects such as economy he thought could not be studied without harm. He taught that politics and morals are inseparably connected with each other. His educational system in many ways resembled that advocated by Rousseau. He argued in favour of adapting teaching to the individual capacities and proclivities of the pupil. Teaching, he said, should be altered to suit the pupil rather than the pupil altered to suit the teaching. To produce different types of character was one of his aims in teaching.

Dr. Inoue thinks that Jinsai's theory of the activity of the universe resembled in some respects the modern theory of evolution, and that Jinsai's teaching regarding the possibility of a man's making his own virtuous conduct a principle of government resembles the doctrine of Green and Muirhead known as the theory of self-realization. Though Jinsai's thoughts are clear as far

* The various meanings given to 理 by different philosophers is most perplexing. With the Sung School it seems to have stood for the principle of organisation by which matter is preserved or the Power that inheres to direct it, which in Chinese books on philosophy is sometimes defined as 神, God.—(REVIEWER.)

† "The proper course for men to pursue is to act kindly and to act justly."—(REVIEWER.)

as they go, he is by no means logical, observes Dr. Inoue. Two of his great defects were over-confidence in individuals and the adoption of the Chinese mistaken view as to the identity of morality and ordinary subjects. His teaching on nature was perhaps materialistic in tendency, but his teaching on morals was undoubtedly idealistic.

On p. 322 *et seq.* of Dr. Inoue's work a list of reference books, including over 50 volumes on Jinsai's Life and Teaching will be found. Nothing could be more thorough or painstaking than the manner in which Dr. Inoue has compiled his history. Then follow short accounts of the schools of thought founded by Jinsai and biographical notices of Nakae Minzan, Itō Tōkai, Nami-kawa Temmin, Hara Sōkei and Hara Tōgaki.

III. *Butsu Sorai.* It is said that Sorai was able to read at the age of 5 and that at the age of 9 he composed poetry. He studied later on under Hayashi Shunsai and Hayashi Hōkō. His parents were very poor and for some time he subsisted on *tofu no kara* (bean-curd refuse). But nothing damped his ardour and he read book after book with astonishing eagerness. His studies covered a far wider area than those of Sokō and Jinsai. He read books on language, military science, economy, politics and music, and at Nagasaki he made a special study of Chinese and attained the art of reading and understanding Chinese in Chinese fashion without construing it into Sinico-Japanese, as is usually done, and he became a great opponent of the Japanese practice of altering the order of the words in a Chinese sentence, maintaining that the sense is affected by the adoption of this method of reading Chinese books. He attempted to inaugurate a general reform in this matter, but without much success. He became the master of a rare style, which possessed many of the superior qualities of classical Chinese. Born in 1666, Sorai died in 1728. His life was laid out on a wider scale than either of the two leaders whose lives are discussed above, and he aimed at turning out men of courage and character rather than moralists. In philosophy a perusal of the writings of Itō Jinsai persuaded him that the popular Chutz teaching was all on the wrong track, though subsequently he attacked Jinsai. Though Sorai's teaching is usually denominated *Sorai-gaku*, most of his tenets came from 荀子, Shuntsz. He disregarded the teaching of Mencius and followed Shuntsz implicitly. His doctrine that man's nature was originally evil, and his contention that morality originated with the teaching of certain sages or moralists were both derived from Shuntsz. His views on morals resembled in many particulars those of Thomas Hobbes.* Dr. Inoue goes into a comparison of Sorai's views with those of Shuntsz in confirmation of the above statements, for which we have no space here. The difference between the teaching of Sorai and that of Sokō and Jinsai was very marked. The moral system of the latter philosophers was essentially subjective and individualistic; that of Sorai was decidedly objective. He says, *Michi wa jimmin wo osamuru ni hitsuyō naru dōgu wo iu nari.* "Morality is nothing but the necessary means for controlling the subjects of the empire." It did not originate with nature nor with any impulses of man's heart, but it was devised by the superior intelligence of certain sages (*seijin*) and authority was given to it by the State. Morality may be regarded as a *jutsu*, a device or art for governing people. Sorai actually speaks of morality as *kodai dōjutsu* (the moral arts used by the ancients). Sages, says Sorai, is the name given to manufacturers, to the men who framed laws, rules, moral maxims and precepts for other men. These sages were in every way superior to ordinary men and no amount of study will

suffice to raise a man to the level of a sage.* There was in the character of these sages a combination of remarkable traits, and this combination it was that constituted their greatness. Their imitators may succeed in cultivating certain of their moral and intellectual qualities, but they cannot reproduce the type as a whole. In China Confucius had no equal. Such men as Chingtsz and Chutsz were but poor imitators of him and when men like our Jinsai and others aspire to figure as sages, we see how vain is the attempt, argued Sorai. They follow the great sage, but a long, long way off. To try and adopt the ideas of the great teacher and carry them out in daily life, this one can do, but this is very different from setting oneself up as an authority.

One of the distinctive features of Sorai's teaching was the changelessness of the fundamental traits of men's characters. Men are born, he said, good-tempered or bad-tempered, sanguine or phlegmatic. There are certain strong proclivities in the nature of every man. These may be modified, but they can not be eradicated. He said when speaking of this stability of character, *Kore henzubekarazu; shikaredomo utsuru mono nari.* "This can't be changed, but it alters (somewhat)." And, according to Sorai, it is this capability of limited alteration that affords an opportunity for the moralist to step in with his improving arts and devices. This doctrine of the permanency of character Sorai had the honour of being the first to proclaim in Japan, observes Dr. Inoue. Among Western philosophers it has been much dwelt on. It was a leading characteristic of Schopenhauer's teaching. Nietzsche warns us against pushing the doctrine too far. The changelessness is not absolute, he says. Wundt maintains that man's character consists of two distinct elements, one that is inherited and the other that comes from education and experience. The latter may change, but not the former. It is certainly one of the duties of a moralist to indicate clearly what he considers orthodox in teaching and what heterodox. This the Sung school of philosophy neglected to do, but in Sorai's writings this is done in the clearest manner. In the whole of the Sung teaching there is much that is left to conjecture. In defining virtue Sorai refers to the definition of Mencius thus. Mencius says, *Hossukeki, kore wo zen to iu.* "That which ought to be (is worthy of being) desired is virtue." But this is by no means the teaching of the sages. Then Sorai proceeds thus: *Oyoso hito wo riyekishi, tami wo sukubeki mono, mina kore wo zen to iu, kore shūjin (the many) no hossuru tokoro naru ga yuyē nari.* From this it appears that utility or the "greatest happiness," was the principle to which Sorai finally appealed. He held that actions are right in proportion as they tend to promote the highest welfare of the largest number of people, wrong when they tend to produce the reverse of happiness. So that Sorai recognises no standard of right and wrong apart from the well-being of the community in which each person lives. His system of morality was in contrast to the teaching of the whole Sung school of philosophers, and was full of public spirit and condemned the introspective, individualistic subjectivism which to a large extent characterised the teaching of Sokō and Jinsai. Sorai enjoined on his disciples a spirit of quiet acquiescence in the decrees of Heaven. Peace of mind, says he, comes from bowing to the will of Heaven in all things. Resignation is one of the virtues that all followers of Confucius ought to cultivate. To Sorai it appeared that the essence of Confucianism was political; that its chief object is the establishment of good government by the employment of men whose moral characters are in a high state of development.†

* This reminds one of a striking passage in Bk. IV. of the Analects of Confucius, which in the Japonicised version runs thus: *Umarete, shikōshite (or umare nagara ni shite) kore wo shiru mono wa, kami (上) nari; manande shikōshite kore wo shiru mono wa sono tsugi nari.* "He who is born with knowledge (the genius) ranks first; he who acquires knowledge by study comes next." It is the contention of Sorai that no amount of study or effort will raise the second class of men to the rank of the first. Great moralists, like great poets, are born, not made.—(REVIEWER.)

† The theory that good government depends

The following are among the points of difference between Sorai's teaching and that of the Sung School of philosophers enumerated by Dr. Inoue:—

SORAI.	THE SUNG PHILOSOPHERS.
(1) Source of knowledge, the teaching of the ancients.	(1) The deductions of reason.
(2) Morality consists in the cultivation of politeness, music and the observance of law and political principles (禮樂刑政).	(2) Morality consists in 理, <i>ri</i> .
(3) Morality was invented by the ancient sages.	(3) Morality is derived from man's original nature and is transcendental.
(4) Character is unchangeable.	(4) Character may be changed.
(5) Great attention should be paid to literary style and the like.	(5) Knowledge of one's own heart and the development of the reasoning faculties are more important than outward forms.
(6) The principle of activity.	(6) Quietism.
(7) The chief aim of teaching is good government.	(7) The chief aim of teaching is moral attainment.

The differences between the teaching of Jinsai and Sorai are thus stated by Dr. Inoue. (1) Jinsai made *jingi* benevolence and justice, the basis of his system of morality, but Sorai made *rei gaku, kei, sei* (ceremony, music, law and politics) his basis. (2) Jinsai rejected Utilitarianism; Sorai adopted it. (3) Jinsai maintained that morality evolves itself naturally. Sorai taught that it is an artificial production. (4) Jinsai accorded the highest honour to a virtuous life; Sorai thought the highest attainment was good government. (5) Jinsai advocated an investigation of principles of various kinds. Sorai discouraged this. (6) Jinsai aspired to follow in the path of the ancient sages; Sorai thought this unattainable. (7) Jinsai honoured Mencius, but Sorai had no regard for him whatever. The attitude of the two philosophers to the Sung school of thought was not the same. Though Sorai was directly opposed to it, Jinsai was by no means so. There were points on which he agreed with the philosophers of this school. What is known as the *Sung-gaku* was a compound of the teaching of Shaka and Lautsz. Both Jinsai and Sorai derived their teaching from Confucius, but they both used a medium. Mencius was Jinsai's medium and Shuntsz was Sorai's. As for originality of thought and suggestiveness, there is much more of this in the writings of Sorai than in those of Jinsai. Dr. Inoue enumerates on p. 632 five particulars in which Sorai's teaching was most clear and pronounced. (1) He was the first to expound the Utilitarian* basis of ethics. (2) He was the first to enunciate sociological principles. (3) He was the first to point out how much of the current morality is artificial, in the sense of being the product of human brains. (4) He was the champion of the principle of *laissez faire*, of non-interference with things that only concern special individuals, that is, he was an advocate of a certain amount of liberty of action. (5) He was in favour of positive principles. After observing that the sociological character which Sorai gave to morals renders him one of the brightest lights among Oriental philosophers, Dr. Inoue proceeds to compare the teaching of Thomas Hobbes and Sorai, showing by quotations that in four particulars the two philosophers were in substantial agreement.

In summing up the results of his investigations,

principally on the men employed rather than on laws and rules may be said to represent the conviction of modern English statesmen. Modern Egypt and modern India and other places that might be named have been to a very large extent the creations of highly endowed and strong-willed administrators. The much-laughed-at, antiquated Chinese knew the secret of government 2,000 years ago.—(REVIEWER.)

* The term utilitarian is comparatively modern. John Stuart Mill says in a note to his Essay on Utilitarianism: "The author of this essay has reason for believing himself to be the first person who brought the word utilitarian into use. He did not invent it, but adopted it from a passing expression in Mr. Galt's *Annals of the Parish*" (p. 97, Seventh Edition).—(REVIEWER.)

* Morality Hobbes regarded as the direct result of the Political State. That is good which is sanctioned by the absolute power in the State; the reverse, evil. He argues that religion and superstition have this in common that they both imply the fear of imaginary powers; the difference between them consists in the fact that the fear or worship of imaginary powers recognised by the State is religion; that of those not recognised, superstition. This was precisely the view of Sorai, as will appear later on.—(REVIEWER.)

among other things, Dr. Inoue says—The movement which was led by the Kogakuha was no other than our Japanese *renaissance*. Up to that time our learned world was ignorant of the fact that that which passed as Confucianism was not the genuine article. But what is to be regretted in this movement was the excessive worship of the personality of Confucius. If, as the Sung school of philosophers urged, the teachers whose lives we have been considering had borne in mind that truth is greater than even Confucius and had criticised his sayings and his personality they would have supplied to their generation germs of progress which it sadly needed. To proclaim the greatness of ideas is one thing; to associate these ideas with a single individual who lived a long time ago and to exalt that person to a pedestal that is declared to be unapproachable is quite another. This is no other than to make men worship the past and care little for the future. What was wanted then in Japan, and what is wanted now in China, is the severance of ideas from the association with any special person or time and the demonstration of their universal applicability. Dr. Inoue quotes Kant's views on the autonomic and heteronomic sides of morals and argues that these two aspects of ethics, which are expressed by the Japanese terms 自律, *jiritsu*, and 他律, *taritsu*, were fully recognised by Jinsai, though he never attempted to harmonise them. He thinks that Jinsai's *naibu* (内部) *teki* corresponded to Kant's *maxime* and his *gwaibuteki* to Kant's *moralische gesetz*. Dr. Inoue writes very fully on the merits and demerits of the leaders of the Kogakuha and his observations will doubtless prove of great value to Japanese scholars. On p. 731 *et seq* there is a long list of names of the graduates of the schools of the three great men whose teaching has been discussed, with dates. For only a few of these can we find space. Among the 47 *rōnin* were two of the followers of Yamaga Sokō, namely Oishi Yoshiō and Onodera Hidekazu. Among Itō Jinsai's followers, Itō Tōgai (1670-1737), Nakae Minzan (1655-1726) and Namikawa Tenmin (1679-1718) were the most noted; and among the disciples of Butsu Sorai the illustrious trio were Daizai Shundai (1680-1747), Yamagata Shunan (1687-1752) and Hattori Nankaku (1693-1759). Dr. Inoue's list extends over 10 pages and contains no less than 138 names. Dr. Inoue concludes the volume with the translation of a passage from Schopenhauer on the extreme rareness of genius, its grand superiority and the benefits it confers on mankind. We may say in conclusion that as regards style the book seems to us to leave nothing to be desired. We have been struck with the lucidity of every passage we have examined. Dr. Inoue certainly has the art of expressing learned ideas so that any ordinary, intelligent reader can understand them, that is, he knows how to explain uncommon things by the use of common words.

THE CHRISTIAN DAIMYO.

CHAPTER XIV.

State of the war in Korea.—Father Cespedes visits Konishi.—Tsukushi's baptism.—Trading in slaves prohibited by the Religious.—John Naito at the Court of Peking.—A Chinese embassy arrives in Konishi's camp.—Ukita and the staff decide to deceive the Taiko on the subject of the title which the Chinese sent him.—Kato opposes the peace negotiations.—The Taiko receives the embassy at Osaka.—His anger on learning that he is not named Emperor of China.—Hostilities recommence.—Reverse of the Japanese.

In Korea, matters had not advanced a step since the summer of 1593. Shut up in a dozen fortresses ranged in echelons along the coast, *daimyo* and *samurai* were consumed with grief at seeing the desperate aspect this war had assumed. On the other side, the Chinese generals, little desirous of exposing themselves to the blows of the Japanese, had at first kept at a respectful distance. Then, retiring to the peninsula of Liaotung (Port-Arthur), they induced the Koreans to persuade the Japanese to go home, if they wished to gain the favour of the Chinese Emperor. The Koreans had, indeed, made

some steps in this direction, but as the Japanese turned a deaf ear to them, nothing further was done.

Meanwhile Konishi, acting in concert with the other Christian *daimyo*, invited Father Cespedes to come and console them in their exile. The Religious in question set out at once with another of his companions and, visiting the different fortresses occupied by the Christians, he comforted to the best of his ability these unfortunates, who believed that they were condemned to die on foreign soil. Kuroda Yoshitaka, who also happened to be there at that moment, along with his son Nagamasa, kept the Religious in his fort and insisted that he should deliver there at least one discourse each day. Nagamasa profited by this occasion to instruct himself a little better in the Christian religion, which he had embraced, without knowing too well what it was.

During his sojourn in Korea, Father Cespedes baptized the eldest son of Tsukushi Hirokado, *daimyo* of Yamashita (Chikugo), with several of his *kerai* (44). Hirokado allowed himself to be persuaded by his son, and embraced the Faith some time after. Father Cespedes also went to congratulate Gotō Sumiharu who, on the death of his uncle in Korea, had at length become independent in his isles. Cespedes encouraged Gotō to re-establish the Christian religion in its former prosperity, as soon as he should have returned to the Gotō islands.

But, after a stay of two months in Korea, Father Cespedes had to leave suddenly. Kato Kiyomasa, who had become more and more hostile to Konishi, had accused him to the Taiko of having invited foreign preachers to come to the camps of the Japanese army. Konishi hastened to inform the Taiko that he had made the Religious come to Korea, in order to learn from him news of the vessel from the Indies, that had been long expected. The Taiko was content with this explanation, without pushing his enquiry further, but Konishi, fearing the malevolence of his enemies, counselled Father Cespedes to retire to Tsushima, to the house of his (Konishi's) daughter, Mary, the wife of So Yoshitomo. Father Cespedes left immediately and went to the island in question. So's wife profited by the presence of the Religious to have some fifty persons of her household baptized. When after some time Cespedes departed thence, Mary confided to him two young Koreans of distinction, whom her husband had sent her as slaves. Father Cespedes brought these two children with him, and had them educated with the other pupils of the college.

The unfortunate condition of these two Koreans brings us naturally to the question of the slavery, then practised in Japan. Despite the formal prohibition of the Taiko, this traffic had only developed, since the commencement of the Korean expedition. It is true that the *daimyo* had ceased to sell Japanese prisoners to the Portuguese: the peace that the Taiko had imposed on them had rendered this lucrative commerce impossible. But, on the other hand, they sold all of their subordinates that had been guilty of any crime. The wives and children of the condemned parties shared the same lot. Often also the Japanese, driven by misery, sold themselves, consenting to be transported to the different colonies of the Portuguese. Some of them returned at the end of several years, others—and they were in the majority—died abroad.

Needless to add that the Korean prisoners, who numbered thousands, did not fall under the law of the Taiko. And not only did the *daimyo*, who remained in Korea, devote themselves to the chase after slaves, but others undertook the passage with the sole object of carrying off Koreans, either men or women, to bring them to Nagasaki, where they exchanged them against the gold and silk of the Portuguese.

From the first the Jesuits had stood up against this inhuman traffic, and had menaced the Portuguese with the most severe penalties. The latter, in order to excuse themselves, alleged that the Japanese had willingly delivered themselves up to them, or were prisoners made in lawful warfare, and for whom servitude, among the Portuguese, was preferable to the unhappy

situation in which they would be placed in their own country. As to the Koreans, they pretended to render them happy by delivering them from the hands of the Japanese, their mortal enemies. Seeing that they were only losing their time discussing with men of such bad faith, the Jesuits, in a reunion presided over by Bishop Cerqueira, decided that all those, who carried on the traffic in slaves, should be cut off from the Christian community. Several Portuguese recoiled before this excommunication and ceased to deal in slaves, but others paid no heed to it, and here again was another of the principal causes, which produced dissent between the Religious and the merchants.

The Christian *daimyo* had from the beginning obeyed the injunctions of their pastors, and at once ceased this abominable traffic. They also liberated their Korean prisoners, who were henceforth confounded with their Japanese subjects. The Jesuits took pity on these unfortunates and taught them to read and to write in Japanese; moreover they had several books translated into Korean in order that, if such was the desire of the prisoners, they could instruct themselves in the Christian religion. From the number of those who became Christians, we can form an idea of the number of these prisoners: more than two thousand of them received baptism.

The conduct of the Christian *daimyo*, in regard to their Korean prisoners, was so much the more admirable, as the sale of these unfortunates was then a lucrative means to which the other *daimyo* had recourse to procure themselves the necessary resources for the interminable war in Korea. Most of these *daimyo* saw themselves reduced to the last extreme of misery. Whilst they spent their revenues in the up-keep of their soldiers in Korea, their domains, confided to stewards who often proved unfaithful, went to waste. Their families were dispersed and their subjects, discontented at having to pay new taxes every moment, got tired of cultivating the earth and prepared for revolt.

This was probably one of the reasons why the Taiko prohibited the carrying of swords by the peasants of Kiushiu, a privilege which they had enjoyed from time immemorial. What still further increased the despair of the *daimyo* was the uncertainty in which they found themselves. Whilst they wasted away in inaction in Korea, the Taiko, solely occupied with the construction of his new Palace, seemed to have completely forgotten his army on the other side of the sea.

Konishi, always in the van, was the sole person who seriously went to work to get the Japanese out of this unfortunate situation. Learning that the Chinese had rejected with disdain the Taiko's conditions, he conjured John Naito not to make matters worse by a sudden departure, but to remain among the Chinese and insist on their making at least some concessions to the Taiko, in view of the fact that the latter would not desist from his warlike intentions, till his vanity would have been satisfied to a certain point. Naito followed these instructions to the letter, and the Chinese, considering that peace was preferable to an endless war, decided to answer that they would recognize the Taiko as King of Japan, but that his troops must leave Korea, and that he must undertake never more to set foot there. This was all that Naito was able to obtain from the Court of Peking, which was convinced that the Taiko would be very pleased at the honour done him by the Emperor of China. The Chinese would only treat the Japanese as their tributaries, and would not recognise their claims to another treatment. It would have been not only useless, but even in the last degree insensate to make any protest against their answer. Naito understood this, and bowed to the inevitable. In our days, when we have seen the greatest Powers of the whole world occupying Peking as victors, and notwithstanding being regarded by the Chinese as savage hordes imploring pardon, one can easily imagine how small a figure must have been cut by poor Naito who, alone in this proud city, represented there a conquered people.

Japanese historians, however, unable to understand this state of things, do not know how to express their indignation on the subject of the response the Chinese dared to address to the Taiko. All their anger falls on Naito and

Konishi for having accepted it without protest. For very little they would stigmatize these two *daimyo* as traitors to their country.* Quite recently a publicist(45), treating of this question, has found the mistake of Konishi so incomprehensible that he has arrived at the conclusion that neither the latter nor Naito could read the Chinese characters, and were thus deceived by the Court of Peking. This supposition is rendered untenable by the very fact that Naito had been chosen for this mission precisely on account of his great knowledge of those characters. Later on, during the time of his exile in Manila, he furnished a striking proof of this by translating from Chinese into Japanese a great number of scientific and religious works.(46)

(TO BE CONTINUED.)

NEWS OF THE NEWS.

A pick-up game of football between Whites and Colours was played on Saturday afternoon. The play could hardly be termed interesting and resulted in victory for the Colours by three goals to nothing.

A telegram from the Japanese Minister in Bangkok, received by the Foreign Office, says that the Siamese Government has issued a notice prohibiting the free coinage of silver on and after Nov. 26th, with a view to adopting a gold monetary system.

The *Penang Gazette* records the death of Captain Smith (formerly master of the S.S. *Fitzpatrick*) which took place on board the *Hok Canton*. An hour after this vessel had left Edie, Captain was found dead in the cabin with a revolver lying by his side, and a bullet wound through the temple.

Rugby football has evidently taken a firm hold here says "Q.E.D." in the *Kobe Herald*, and I hear that already an International match has been practically arranged for the Christmas Week, to take place at Yokohama, and the Kobe boys are confident that they stand a good chance against the sister port's fifteen.

Mr. Charles O. Zeigenfuss, Editor of the *Manila American*, and part proprietor of that journal, committed suicide in San Francisco on the 7th inst. Mr. Zeigenfuss had a few months previously arrived in San Francisco from Manila, having contracted chronic dysentery during his stay of some two years in the latter city. He had gone to America with the object of seeking relief from terrible pain at the hot springs of California.

The Yokohama Police is in receipt of a communication from the Ibaraki Police, Ibaraki prefecture, to the effect that a pigeon, which has on its left foot a silver ring marked "E 19," was caught by a man called Hidaka Kumakichi of Wakamatsu-mura, Kajima district, Ibaraki prefecture, on Nov. 6th and that it is thought probable the bird belonged to some foreigner. The letter adds that the dove is being fed in Mr. Hidaka's house until its owner is forthcoming.

The Siamese Royal yacht *Mahachakri* went to dock on 28th Oct. to prepare for the coming voyage to meet the Crown Prince of Siam at Japan. All was to be ready on the 19th Nov. when the *Mahachakri* was to leave the Menam on her way to Japan under the command of Capt. Trolle. It is understood that there will be 11 European officers on board, including Surgeon-Major Heyward Hays. Luang Phatyat will represent the Royal Siamese Navy, and Choa Pya Dejo will represent the King and the Army.

The new steamer *Empire*, built for the Eastern and Australian Steamship Company to be run between Japan and Australasian ports, was thrown open to the public on Saturday from 2 to 6 p.m. For the convenience of visitors the vessel was brought alongside the Pier and during the afternoon a large number of residents went on board.

(45) Ariga Nagao in his *Teikoku-shi-ryaku*.

(46) Annals of Manila relating to the Japanese exiles.

To our previous description of the *Empire* may be added that in every direction on board of her there are proofs of her being specially fitted with a view to the climatic and other conditions which her passengers will experience. It is safe to say that she will be a comfortable and efficient ship so far as her accommodations and equipment are concerned, and we do not doubt that Capt. W. G. McArthur, her hospitable commander, and his courteous staff of officers will make her a popular and much sought-after vessel.

ST. ANDREW'S DAY.

After an interval of three years, the St. Andrew's Society gave a ball in the Kobe Gymnasium on Friday night. The circumstances which led to there being no celebration of the kind during the previous two years were the regrettable deaths of Mr. A. C. Sim and Mr. Ralston, but this year, happily, nothing occurred to put a stop to this annual celebration of the Scottish Saint. Outside the Gymnasium a Scottish design had been carried out with gas-jet effects, the words "Bonnie Scotland" and "For Auld Lang Syne" being conspicuous. The big hall had been decorated out of all recognition with bunting, Scottish badges and foliage, and the effect produced was very pleasing. On the ceiling there was a huge stretch of bunting with the St. Andrew's cross displayed on it. Between the stanchions there hung bead curtains which relieved the rather severe effect produced by the other decorations. Sprigs of heather had been kindly provided for all the guests and badges for members of the society, so that one could distinguish at a glance who was a Scot and who was not.

Several Scots turned up in their national dress, these being Dr. Miller, the president of the Society, Messrs. J. Hall, A. Cameron, J. L. Robertson, G. C. Murray, Gordon Brown and Master Young. Several of the ladies wore scarves of their tartan, and, according to the *Kobe Herald*, the appearance of the Scottish costumes was most charming.

Among the Scottish dances were the "Flowers of Edinburgh," the "Reel of Tulloch," the "Caledonians," Schottisches, etc., and as these had been practised they were well performed. There was also a haggis. Dancing finished at 4.15 a.m. The Committee were: Dr. Miller (President) Mr. J. Archer (Vice President) Mr. G. C. Murray (Hon. Sec.) and Messrs. J. Adamson, A. Cameron, J. Hall, J. M. Maitland and J. L. Robertson.

Oh, I want to win me hame
To my ain countrie,
The land frae whence I came
Far away across the sea:
But I canna find it there, on the atlas anywhere,
And I greet and wonder sair
Where the de'il can it be.
I hae never met a man
In a' the world wide.
Who has trod my native lan'
Or its distant shores espied:
But they tell me there's a place where my hypothetic
race
Its dim origin can trace—
Tipperary-on-the-Clyde.
But anither answers: "Nae,
Ye are varra far frae richt:
Glasgow Town in Dublin Bay
Is the spot ye saw the licht."
But I dinna find the maps bearing out these pawkie
chaps,
And I sometimes think perhaps
It has vanished out o' sight.
Oh, I fain wad win me hame
To that undiscovered lan'—
That has neither place nor name,
Where the Scoto-Irishman,
May behold the castles fair by his fathers builded
there,
Many, many ages ere
Ancient history began.

—Ex.

"My only excuse for having lived so long," says Admiral Sir Henry Keppel, who is nearly 100 years of age, "is a taste for Field Sports when not kept at sea."

AMERICAN TOPICS.

The Bertillon system of registering criminals is to be introduced into the Manila detective department.

Mr. Carnegie, after visiting the Ladies' College in Queen-street, Edinburgh, the oldest educational institution in connexion with the Merchants' Company, made the following entry in the visitors' book:—

Surprised, delighted, impressed. Ruskin says there is nothing in the world that equals the Scottish mother in the tried perfectness of her old age. This institution does the important part of starting the future mother well—a greater service it is impossible to render.—ANDREW CARNEGIE.

Mr. Carnegie himself, of course, had a Scottish mother, and no mother, as is well known, had ever a more devoted son.

The Behring Sea catch of the Victoria sealing fleet will be smaller this year than ever. It will be less than 6,000 skins, compared with 10,500 taken last year. The average per schooner, based on the catches of the eleven schooners of the fourteen that have reported their catches, will be 428 skins, compared with an average of 437 for each of the twenty-four schooners which hunted the year previous, and 467 for the year prior to that, when thirty-eight schooners took 17,577 skins in the Behring Sea. The stormy weather caused a great falling off in the catch this year. Sealing masters say they saw as many seals as ever, but the weather was too rough to reach them. The cruise off the British Columbia coast last spring resulted in a catch of 3173 skins, half that of last season. The Copper Island and Japan fleets took about 8,000 skins. All told the year's catch will be less than 20,000 skins, the lowest catch for years.

In recent reports of the Department of Indian Affairs of Canada, presented to the Dominion Parliament, it is interesting to note that the Indian population of Canada is increasing. Though the increase for the last reported year (ending June 30, 1901) was comparatively small—in round numbers about 500 in a total population of about 100,000 proportionately distributed throughout the Dominion—it is sufficient to indicate that, unlike the aborigines of Australia and the islands of the Pacific, the North American Indians are capable of civilisation without the danger of extermination following in its wake, if only the conditions be rendered reasonably favourable to their well-being. It is true that a certain proportion of the tribes still live a nomadic life; yet by far the greater number—more than 80,000—remain within the boundaries of the seven provinces and the organised territories, or at all events subject to the restraints of civilised government, and in more or less constant contact with the white man. Some indeed, own farms and are fully enfranchised citizens.

It is becoming somewhat of a scandal says a contemporary that the interests of the London travelling public should be juggled with as they are by company promoters and quarrelsome directors. For years the underground railways were rendered hopelessly inefficient because the directors in control could not personally agree. Now, two or three prominent operators are playing a game of beggar-my-neighbour over the tubes. The fine, comprehensive scheme that was to link East and West London and to tap the magnificent overground tramway system of the London United Electric Tramways Company is threatened with destruction by a clever stroke of those who control the underground railways; who are now Mr. Yerkes and his friends. Parliament read the East and West Bill (of the Morgan group) a second time on condition that it and the connecting scheme of the London United Tramways Company were made continuous. The Yerkes people then went to work to get hold of the London United scheme, and, having done so, they have withdrawn it, and have thus made it impossible for the Morgan group to carry out the condition of Parliament.

EUROPEAN NOTES.

It has transpired that each of the Kaiser's gifts to his English Regiments for the men's families was £500.

The *Irish Independent* declares that the dawn of a new era for Ireland has appeared. King Edward is displaying a keen personal interest in Irish affairs.

Despatches from Genoa report that Luccheni, the assassin of the Empress of Austria, has become a violent maniac. It is necessary to keep him continuously in a strait-jacket and in a small padded cell, where he will probably soon die.

A telegram to the *Independence Belge* says that the Portuguese railway which connects Goa with its port, Murmagao, being on the verge of bankruptcy, has transferred its rights to an English company, the Southern Mahratta Railway Company, for a period of five years. This transaction, says the informant, though financially favourable to the Portuguese colony, places it unreservedly in the hands of England.

Phya Sri Sahadheb, the Siamese Vice Minister of the Interior, who was intrusted with a Special Mission to Europe by King Chulalongkorn, was to embark on Oct. 28th on the North German Lloyd steamer *Bayern* for Singapore, en route for Siam. It is understood that Phya Sri Sahadheb has concluded the negotiations with which he was entrusted with the British Government, as well as with that of the French Republic.

From France is reported a movement for making barracks less unsightly and barrack life to that extent less distasteful, which might perhaps be profitably imitated elsewhere. The *Gaulois* states that a beginning is being made with the barracks of the Republican Guard in Paris, the long expanse of asphalted courts being transformed into green lawns, parterres, borders, and in all respects made to look as much like a park as possible. Similar efforts are being made at Limoges and several other garrison centres.

Although the command of the Channel Squadron will not be vacated by Vice-Admiral Sir A. K. Wilson until April, 1903, speculation is already busy in providing him with a successor says a London journal. The favourite just now is the new Vice-Admiral Lord Charles Beresford. It is an open secret that Lord Charles has set his heart on commanding the Channel Squadron, but it is the fact that if he is passed over in April next he has lost his chance for ever, for he will have two and a half years' seniority as vice-admiral when the next vacancy occurs, and a younger man is bound to be chosen.

There was recently, it will be remembered, a heated controversy in Glasgow as to whether women were to be allowed to serve at liquor bars. It was not a new question by any means. We notice that at the annual dinner of the Glasgow Trades House the other evening Mr. Bonar Law read a number of extracts dealing with old Glasgow, and one of these stated that in the year 1640 the General Assembly passed a decree that "for the general downbearing of sin" women were not to be allowed to serve in taverns, but only men and boys. Nothing new under the sun.

The other day Colonel Sturgess, of the Salvation Army in London, while interviewing the men at the Free Breakfast meeting, made some inquiries as to how many successive nights they had been bedless before coming to the breakfast. The following is the pitiable experience of twenty of them:—3 nights, 21 nights, 7 nights, 4 nights, 5 nights, 4 nights, 6 nights, 3 nights, 5 nights, 2 nights, 22 nights, 14 nights, 11 nights, 5 nights, 8 nights, 1 night, 35 nights, 3 nights, 25 nights, 5 nights. What a striking story the experiences of some of these homeless wanderers would make!

The new number of the *Author* contains a letter from Baron Tauchnitz giving some interesting particulars of the well-known Tauchnitz Library. The Baron says that 3,000 copies represent a very fair sale, which is never reached

by a considerable number of works published. A sale of 5,000 copies is only attained in the case of works by exceptionally popular authors, while a sale of 10,000 can only be recorded in the case of six books out of the 800 published during the last ten years. Most people, we imagine, had a very different opinion as to the circulation of these attractive little books.

"The Conversion of Sarah Bernhardt," over which the dramatic critics of the Continent are amusing themselves, does not mean that she has gone into a nunnery, but that she is going to perform at a Berlin theatre. Some years ago, when the patriotic French actress was invited to act in the Prussian capital, she replied that only one condition was necessary—the Germans must first restore Alsace and Lorraine to France, and then she would be delighted to perform in any German city. It appears that she has now erased this political clause from her dramatic covenant.

Lord Barrymore is the only individual in the South of Ireland who possesses the luxury of a private railway-station. The line between Cork and Queenstown runs directly through the most beautiful part of Lord Barrymore's lovely demesne at Fota, and of course somewhat disfigures the beauty of the place. By way of compensation the railway company undertook to build a railway station at Fota. No one can stop at this station without a written permit from Lord Barrymore or his agent—a concession readily enough obtained by those who wish to visit the beautiful place when Lord Barrymore is away from home.

The *Neue Wiener Journal* has a curious story about the late Mr. Cecil Rhodes. It says that in the early nineties Mr. Rhodes visited Paris and inspected Mr. Kahn's picture gallery. He was very much interested in a Rembrandt, which Mr. Kahn offered him for £1,000. Mr. Rhodes, however, was not in the buying mood, and made the following original bargain. Should Mr. Kahn die first the Rembrandt was to enter Mr. Rhodes' possession, while in the event of the latter's dying before Mr. Kahn, that gentleman would receive £6,000. The *Journal* states that on Mr. Rhodes' will being read it was found to contain a clause bequeathing that sum to Mr. Kahn.

An interesting ceremony took place on Oct. 22nd at the Panthéon, Paris, when ocular proof of the revolution of the earth was given by means of a pendulum under the auspices of the Astronomical Society of France. The experiment was a repetition of that of Foucault. The pendulum consisted of a ball weighing about 60 pounds attached by a wire about 70 yards long to the interior of the dome of the Panthéon. The Minister of Education, who presided, and M. Flammarion made speeches. The Minister then burned the string tying the weight to a pillar, and the immense pendulum began its journey. Sand was placed on the floor, and each time the pendulum passed over it a new track was marked in regular deviation, though the plane of the swing of the pendulum remained unchanged. The experiment was completely successful.

The White Star liner *Cedric*—the biggest ship in the world—was only launched a week when a model, the exact replica to the most minute detail of what the vessel will be like when completed in November, was placed in the company's office in Liverpool. It is the practice of the White Star Company to have models made of each class of vessel built for them. Thus they have a *Britannic* model, which also represents the *Germanic*. The *Cedric* represents the *Celtic*. The *Oceanic* is a class alone. The models, which are built by Harland and Wolff, and are exquisite pieces of workmanship, are nine or ten feet in length. The cost averages from twelve to fifteen hundred pounds. The cases in which they stand in some instances cost as much as £200.

The originator of halfpenny journalism in Paris, M. Marinoni, who has just retired owing to old age, has had a most picturesque career. In his young days, the *Taller* points out, he was a printer with no money but brilliant ideas.

For a long time he was unable to get the capital to perfect some of his most ingenious improvements in printing-machines, and it was with the intention of proving what a novel printing-press of his could do rather than of becoming a newspaper proprietor that he started the *Petit Journal*, the first souper ever published in Paris. The *Petit Journal*, however, prospered beyond all expectations, and its circulation soon exceeded 1,000,000 copies a day.

We read in London papers of Oct. 23rd that, Mr. Martin having asked the First Lord of the Treasury, "whether he will consider the advisability of issuing a warrant defining what is the correct flag to be flown on land by civilians, and what flag should be flown on public buildings and at schools in Great Britain and in the Colonies," has received from Mr. Balfour the following reply: "The questions which have been raised as to the proper use of flags have received careful consideration by the Government, but they are unable to adopt the course suggested. Nor does it appear desirable to undertake the legislation which would be necessary in order to regulate the general use by civilians, or any class of civilians, of any particular flag on land. It is a matter which is best left, as hitherto, to the guidance of custom and good taste."

Apropos of a letter received from the Rev. Stephen Gladstone at Glasgow the other day in which it is stated that Scotland is the "land of his [Mr. Gladstone's] birth," the following extract from a speech delivered by the late statesman at Barmouth in 1892 is to the point:—

I am a Scotchman by blood, I am a Lancashire man by birth, I am a kind of Londoner by living so long there. I belong to most parts of the country—(laughter)—but my wife, as most of you know, is a good Welshwoman, and I think that to a great extent she has infected me. (Laughter.)

Mr. Gladstone may or may not have been a Scotsman, but, as the right hon. gentleman said, Scotland was not "the land of his birth."

A despatch story comes from Mr. Chamberlain's department, which (writes "A. M." in the *St. James's Gazette*), for daring and audacity would not be easy to beat. A popular major was sent some years ago to establish order in a small township in Africa which had been placed temporarily in charge of the local military commandant, a man who had risen rapidly from the position of storekeeper, and who, not satisfied with his official elevation, had elevated himself on the day the major arrived by drinking too much. The first act of the major was to place the commandant under lock and key, but the inebriate managed to burst his bonds and invade the telegraph office, from which place he despatched this wire to the Colonial Office: "Chamberlain, London. Man here named Thorold questions my sobriety. Who is Thorold? Wire at once to avert bloodshed."

The following particulars with reference to M. Witte's recent trip across Asia have been published: M. Witte left St. Petersburg by the ordinary daily express for Moscow on September 23th, reaching there the following morning. An hour later he left by special train for Siberia. On October 9th he reached Vladivostok, having completed the long journey in 16 days. The distances are as follows: St. Petersburg to Moscow, 400 miles; Moscow to Irkutsk, 3,400 miles; Irkutsk to Baikal—the newly-named station on the West bank of Lake Baikal—40 miles; the lake itself, which has to be crossed by boat, or in winter, by horses on the ice, 40 miles; from the East bank of Lake Baikal, to the station Misovaja to Kaydalovo—the station where the line branches off to the Russian frontier—520 miles; thence to the Russo-Chinese frontier station, which is called Manchuria, and right across Manchuria to Vladivostok, not less than 1,400 miles. This makes a round total of 5,800 miles covered in 16 days, with stoppages.

Sir Frederick Treves' very interesting address at Liverpool University College the other day

dealt with what we are afraid is still a common but entirely erroneous conception of disease. Many people hold, with the author of "Religio Medici," that there is "nothing natural in any of the processes of disease and nothing beneficent in any of its manifestations." "If the patient vomited the vomiting must be stopped; if he coughed the cough must cease; if he failed to take food he must be made to eat." The physician of to-day, of course, knows better. Disease is the outcome of natural processes, and many of its manifestations and methods are marked by a beneficent purpose. Sir Frederic showed in some detail how this was the case in the particular ailment on which above all he is qualified to speak. Peritonitis, instead of being "one of the most deadly and most malignant of calamities," should be "hailed with thankfulness," as it was concerned only in effecting good. This is the sort of truth which people sometimes find it hard to believe, but it is none the less truth for all that.

Writing in the *Westminster*, Dr. Louis Elkind deals with the crusade against consumption which, he says was started in Germany. The first country to follow Germany's example to any considerable extent was the United States, and, with the practical sense so eminently characteristic of the American people, more attention was there shown to preventive measures than to curative. Many sanatoria—among which the oldest and best known is the Adirondack Cottage Sanatorium—have, of course, been provided for different classes of people, but the most notable feature of the American campaign against the disease is the putting into practice the old principle that prevention is better than cure. For it was in the United States that expectoration in the streets and other public places was first made an offence not merely against decency but against law. Then, also, in some States a dwelling or a room which a consumptive has occupied and died in is not allowed to be let to another person until it has been thoroughly disinfected, and if the family of the deceased still remain in the house they are strongly advised to allow precautionary measures to be taken. Further, the Board of Health of the different States publishes from time to time circulars and pamphlets containing the most important hygienic rules calculated to prevent the spread of the disease. That these and other similar measures which have been practised for about ten years have had good effect is shown by recent statistics, from which we learn that the death-rate from consumption has fallen from 22 per cent. of the total number of deaths to 16 per cent.

WIRELESS TELEGRAPHY.

The *Times* has received by the courtesy of Signor Marconi, a copy of the official report of the experiments in wireless telegraphy which were carried out on board the Italian warship *Carlo Alberto* during the months of July, August, and September of this year, from which we make the following extracts. The report is written by Lieut. Luigi Solari of that ship, and is signed by its commanding officer, Admiral Carlo Mirabello.

The transmitting station was Poldhu, in Cornwall, the place which had been chosen by Signor Marconi for his experiments in transatlantic telegraphy. After a few successful attempts at transmission over a short distance, the *Carlo Alberto* left English waters on a mission to Cronstadt, and a series of long distance messages was conveyed to her from Poldhu with almost unbroken success throughout her voyage. The main difficulty encountered seems to have been in atmospheric disturbances of the ordinary kind. Lieut. Solari writes:—

At one o'clock in the morning of July 23th, while the ship was on the north-east of the Island of Gothland in the Baltic, en route for Kiel, signs were obtained upon the telephone of the detector so distinctly that it was difficult to believe that 2,000 kilometres of land and sea were interposed between the *Carlo Alberto* and the transmitting station in Cornwall. At two o'clock, however, the reception of the messages began to

be broken by frequent atmospheric disturbances; it was no longer possible to receive the wave messages as they arrived with any certainty or regularity upon the receiver with coherer, but upon the telephone of the detector it was possible to distinguish fairly well, without any loss of force, the letters which arrived between the succeeding atmospheric disturbances, so that, giving the speed of transmission from Poldhu at about 15 words a minute, it was easy to decipher the telegrams sent from Cornwall.

Further experiments aided the operators in excluding the interference of atmosphere disturbance almost entirely; but in all such cases it would appear that the magnetic detector proved to be the most trustworthy machine, the ordinary receiver with coherer being too easily deranged by outside electric influence. The most striking results were those obtained off the Spanish coast and in the Mediterranean. While lying off Ferrol the *Carlo Alberto* regularly received news every day of the principal events in the world; a daily bulletin of this news was posted in the ship and quite put to shame the last intelligence of the Spanish newspaper.

SILK EXPORT OF JAPAN.

Messrs. Vivanti Bros. send the following statistics of the export of raw silk from 1st July, 1902, to 30th November, 1902:—

FIRMS.	AME.	EUROPE.	TOTAL.
Messrs. Jardine, Matheson & Co.	1,327	745	2,072

CORRESPONDENCE.

"THE EXTRAORDINARY RELIGIOUS MOVEMENT IN AMERICA."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I think your correspondent Sacerdos Catholicus, if he will take the trouble to investigate the history of the movement to which he has called our attention in your columns of to-day, will find that when the leader of the Polish recalcitrants against the authority of the Pope in America, obtained from the Catholic Bishops in Europe his consecration to the Episcopate he did it on the express condition that he was not to have anything to do with the Episcopal Church in England and America.

For these people now to seek the help of the Episcopal Church looks like a breach of contract which a Church like the Episcopal Church of America ought not to countenance. Or are contracts not binding in religion?

EXTRANEOUS.

MR. ANDREW CARNEGIE.

Any man who retires from business with a fortune of fifty millions sterling is an object of the greatest interest, for that reason alone. But when that man is in himself an interesting personality, and has amassed that mighty fortune in a commercial career that is almost a romance, his biography is bound to be a book to which dulness should be a stranger. This is so with "Andrew Carnegie: From Telegraph Boy to Millionaire," by Bernard Alderson. Biographies of the kind are apt to be slavish and fulsome rhapsodies, in which the great man and all his ancestors and relations, and all he ever said and did are extolled without shame or discrimination. Mr. Alderson has quite avoided this common error. He is appreciative without losing his critical sense; he is not afraid to speak his mind; and he knows how, while portraying the life of his subject, to place him in proper perspective and to effectively reproduce the man's environment. In this last respect some of his readers may see the greatest value of the book, for the chapters devoted to Mr. Carnegie's commercial methods, the conditions of labour in America, and international competition are written with clearness and evident knowledge of the subject.

"Responsibility," said Mr. Carnegie on one occasion, "thrown upon a young man, that is the thing to bring out what is in him." But he insisted that the youth himself should be thoroughly interested in his work, and be animated with a strong desire to succeed. "Concentration," he says, "is my motto—first honesty, then industry, then concentration," and he expected it to be the motto of his servants. If they did not give their whole energies to their work they lost their places or were degraded. On the other hand, hard work was promptly and handsomely rewarded, and when a subordinate was appointed to be a manager, Mr. Carnegie laid down that the test of his ability was not what he did himself, but what he could get others to do in co-operation with himself. "The great manager," he said, "is the man who knows how to surround himself with men much abler than himself."

Speaking of his ambitious young partners, Mr. Carnegie remarked:—"I do not believe any one man can make a success of a business nowadays. I am sure I never could have done so without my partners, of whom I had thirty-two, the brightest and cleverest young fellows in the world. No man will make a great business who wants to do it all himself, or to get all the credit for doing it. I believe firmly in youths as executive agents. Older heads should be reserved for counsel."

Mr. Carnegie does not advise workmen in comfortable circumstances to emigrate and take risks. If a man can make thirty shillings a week in his native land, Mr. Carnegie thinks he would be very foolish to leave it, unless he is impelled by an uncontrollable ambition, and has no ties to bind him. Even though men may be fortunate enough to earn higher wages, very likely the conditions of life will not suit them, and they will become dissatisfied. "Look before you leap" is the advice he offers, and Mr. Alderson adds that when once the average British workman has looked at the labour conditions in America, we do not think he will do much leaping.

What these conditions are the author describes in language that has only one meaning; they are very hard and wearing. Mr. Carnegie, he says, freely admits that English workmen would not submit to the conditions in his works. He calculates that he extracted nearly twice as much labour from his workmen as an English employer does from his.

But there can be no doubt, Mr. Alderson explains, that the extra work is forced by the tremendous drive or pressure of the American system. "The men are bent upon earning high wages, and the masters are determined to beat all competition. Progress, the accumulation of wealth, complete supremacy over all competitors, these are the paramount considerations, and everything else is disregarded. The American employer looks upon his workpeople as being literally hands; he cares little about their bodies, and still less about their souls. Every human being he employs is simply a machine which contracts to do so much work in a given time, at an agreed upon rate of pay. No deviation from that iron rule is allowed, and if accidents happen, and unforeseen contingencies arise, well, the men must suffer. Sentiment, sickly or otherwise, has no place in this grim region, and Christian principles wield no influence."

Mr. Carnegie, the biographer tells us, holds his workmen in high appreciation, and is exceedingly grateful to them for their part in building up his fortune. He acknowledges the severity of their labour, and always speaks of them in the highest terms of admiration and respect. There is almost a pathetic ring about the following words:—"I remember after Vandy and I had gone round the world, and were walking the streets of Pittsburgh, we decided that the Americans were the saddest-looking race we had ever seen. Life is so terribly earnest here. Ambition

urges all on, from him who handles a spade to him who employs thousands. We know no rest."

Mr. Alderson, in describing Mr. Carnegie's personal appearance and characteristics, says he is a short, sprightly man, about 5 feet 4 inches in height, with an erect bearing, keen grey eyes, broad forehead, and powerful jaw. His temperament is buoyant and his physical endurance and activity are remarkable, considering his age. Mr. Carnegie is a non-smoker, and exceedingly abstemious in his habits. Moderation in all things has characterised his mode of living, and to this must be attributed his wonderful vitality of mind and body, which is superior to that possessed by many men half his age.

The retired Steel King speaks very slowly, and clearly enunciates every word. He never replies to a question without a pause. The maxim, "Think twice before you speak once," has great weight with him. He is not one to be led unawares into making a promise or expressing an opinion.

In sharp contrast to his speech, his manner is very restless, and indicative of a large reserve of pent-up energy.

The day after the announcement of his settlement with the Billion Dollar Steel Trust he received 1750 letters containing as many suggestions for the distribution of his wealth; and his daily post-bag averages 300 letters.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

BRITISH TAXATION.

London, November 28.

Mr. Ritchie, speaking at Croydon, said he hoped to do something by April to relieve the burden of taxation.

THE RUSSIAN SQUADRON.

Admiral Stakholberg's Far East squadron has arrived at Portland from Kiel, and will probably stay there for ten days.

THE "TIMES" AND JAPAN.

The *Times* has a sympathetic article on the Japanese political situation. It dwells specially on the naval scheme and on the land tax, and says that the Japanese are a proud and patriotic people. Marquis Ito, it is thought, would be in favour of prosecuting a policy of naval expansion, and if he accepts office, it is hoped that a compromise may be arranged in which the opponents of the land tax can support the naval scheme.

VENEZUELA.

It understood that England and Germany have agreed upon joint action with the view of collecting their claims from Venezuela.

Three German warships are being fitted out with full war equipment at Kiel, to go immediately to Venezuela. It is understood that the British Admiralty is taking similar measures.

SOMALILAND.

Colonel Manning's flying column reinforced and relieved the garrison at Boholte. Thirty-five per cent. of the garrison were down with malaria."

SOMALILAND.

Shanghai, November 29.

The Indian Mounted Infantry have arrived at Aden and proceeded immediately to Berbera.

GREAT BRITAIN, GERMANY AND VENEZUELA.

The United States has been fully informed of the joint action the Germans and British contemplate taking in Venezuela.

LORD KITCHENER.

Viscount Kitchener has arrived at Bombay, where he met with a cordial reception. He goes to Agra to-night.

MR. CHAMBERLAIN.

The cruiser *Good Hope* has passed Gibraltar.

STRIKE IN MARSEILLES.

It is feared that a continuance of the

strike in Marseilles will imperil the existence of that city as a port and endanger the French fleet in the Mediterranean.

ENGLAND AND RUSSIAN SUGAR.

London, November 30.

The Russian Government presented a Note to Great Britain in September declaring that if the latter persisted in her resolve to enforce retaliatory duties on Russian sugar under the penal clauses of the Sugar Convention she would be infringing the commercial treaty between the two Powers. Russia suggests that the matter be submitted to the Hague Arbitration tribunal.

DEWET'S BOOK ON THE WAR.

London, December 1.

Dewet's book has been published. It is dedicated to his fellow subjects of the British Empire. It is severely critical but not acrimonious. It disparages Lord Roberts and says that his generalship lacked foresight. Buller, it says, had the most difficult task to perform. Apparently Dewet respects Lord Kitchener, but he ridicules the block-house system and also the scouting. He says that he can produce proof of the alleged British barbarities against women and children. He concludes by giving advice to the Boers to be loyal to Great Britain.

THE STRIKE AT MARSEILLES.

London, December 2.

Over forty steamers are lying idle at Marseilles.

SOMALILAND.

It is reported from Aldershot that a full telegraph section has been ordered to Somaliland.

THE DUKE OF CONNAUGHT.

The Duke and Duchess of Connaught have left Genoa.

THE WAZIRI EXPEDITION.

The expedition to Kabulkhel destroyed 59 towers, three villages, and captured 202 Waziris, and 5,600 cattle. Twenty-five of the enemy were killed and two wounded.

SOMALILAND.

Later.

The average of deaths from malaria at Bohotle is one daily. The Somali levies continue to prove undisciplined and utterly unreliable.

PHILIPPINE UPRISING.

A superior force of Ladrones have surrounded a force of American constabulary in the Philippines, killing the Inspector in command.

RUSSIAN TEA.

London, December 3.

Owing to the remarkable success attending the experimental tea-growing in the Caucasus, the Russian Ministry of Agriculture has decided to establish the industry on a sound basis and to import experts from China, India and Ceylon. The prices obtained for the season's yield of fourteen tons varied between 26d. and 52d. per pound.

THE MARSEILLES STRIKE.

Later.

Owing to the accumulation of destitute persons at Marseilles awaiting passage to Algiers, Tunis, and Indo-China, the French Government has ordered naval seamen to man the mail-steamers.

THE SUGAR DUTIES.

Replying to Mr. Gibson Bowles, Mr. Gerald Balfour, President of the Board of Trade, said that the Brussels Sugar convention reserves undoubted liberty to Great Britain in regard to her fiscal relations with her colonies. Great Britain declined at the

conference to apply the penal clause to colonial products.

ROOSEVELT AND THE TRUSTS.

London, November 4.

President Roosevelt's Message at the opening of Congress, reaffirms the necessity for legislation, even to a change in the Constitution, to permit of a supervision of the trusts, but care must be taken not to injure the great legitimate enterprises of the country. The President concludes by strongly advocating an efficient Navy, that will be capable of backing-up the Monroe doctrine.

BARON ROSEN.

Baron Rosen, Russian Minister to Greece, has been transferred to Japan.

SOMALILAND.

Later.

It is unlikely that General Manning will be able to take the field in Somaliland until the middle of January.

SPANISH CABINET RESIGNS.

The Spanish Cabinet has resigned.

GREAT BRITAIN AND VENEZUELA.

Four British warships have left Bermuda for Venezuela. Two more are to follow.

(RECEIVED AT THE LEGATION OF FRANCE.)

FRENCH NEWS.

Saigon, Nov. 27.

The Chamber of Deputies has nominated eight grand commissions of 33 members, with reference to customs duties, the Army, the Navy, Agriculture, &c.

Saigon, November 28.

The maritime staff at Marseilles have gone on strike, and the greater part of the packet-boats are prevented from setting out, owing to lack of hands.

Saigon, November 29.

The bureaux of the Chamber of Deputies continue to proceed to the nomination of grand commissions. M. M. Doumer, Deloncle and Deschanel have been elected members of the commissions of Foreign Affairs, the Colonies and the Protected Countries.

The strike of the maritime staff at Marseilles is complete. No French steamer has been able to leave. The Government is taking measures to ensure the public service.

The Council of State has declared that the petition of the Episcopacy in favour of religious congregations is an abuse.

Work has been resumed at the coal mines in the basin of Saint-Etienne.

SIAM AND THE GOLD CURRENCY.

Saigon, December 1.

In consequence of the adoption of the gold system by Siam, which may have an effect upon the finances of Indo-China and upon the rice market, the Minister for the Colonies announces the appointment of a commission charged with the duty of considering measures essential for averting a possible crisis in Indo-China.

FOREIGN AFFAIRS.

The Committee of Foreign Affairs in the Chamber of Deputies has nominated M. Etienne as President, and M. Deloncle as Vice-President.

THE CONGREGATIONS.

The Government has decided to ask parliament to authorise only five Religious Congregations of men, *viz.*, the Brothers of St. Jean d'Dieu; Cistercians; the Trappists; the African Missions of Lyons; and the White Fathers.

THE MARSEILLES STRIKE.

Postal matters for the Far East are being shipped at Marseilles on foreign steamers. The strike of registered marines continues quietly.

[Note.—With reference to these registered marines, to whom we applied the term maritime staff in our last issue, it may be explained that they are professional sailors who, in consideration of certain privileges and of a pension, are liable, till the age of 50, to be summoned for the service of the State in times of necessity.—Ed. J.M.]

THE MARSEILLES STRIKE.

Saigon, December 3.

The strike at Marseilles continues. The representatives of Algiers and of Cochinchina in Parliament have asked the Government to take measures, and the Ministers have decided to charter steamers manned by State marines.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.)

RUSSIAN CENSORSHIP.

The Japanese Commercial Official at Vladivostok telegraphs under date of the 20th of November that whereas it has formerly been necessary to send the manuscript of books to Moscow for approval before publication, it will hereafter be possible to obtain sanction from the Oriental Science Institute in Vladivostok.

(FROM THE "JIJI SHIMPO.")

NEW ZEALAND.

London, Nov. 26.

Election returns from New Zealand show a majority for the Government.

INSURRECTION IN SIAM.

The insurrection in Siam has been suppressed.

THE CLAIMS ON VENEZUELA.

London, Nov. 27.

England and Germany have joined to enforce their claims against the Venezuelan Republic. The United States has refused to protect President Castro. Germany has decided to dispatch three cruisers from Kiel.

THE PACIFIC CABLE.

London, Nov. 27.

President Roosevelt has signed the agreement relating to the Pacific cable between California and the Philippines, via Guam.

THE GOLD STANDARD IN SIAM.

Siam has adopted the gold standard in her currency.

LORD CURZON'S SPEECH.

London, November 29.

Speaking at Rajputana, Lord Curzon insisted on the policy of preserving the hereditary nobles in the protected native states.

LORD KITCHENER.

Lord Kitchener is going to Agra.

SHANGHAI TO BE EVACUATED.

The British garrison at Shanghai will evacuate that place on December 20th.

DEATH OF A FAMOUS PREACHER.

Dr. Joseph Parker is dead.

[Parker, Joseph, D.D., a popular Congregational preacher, born April 9th, 1830, at Hexham-on-Tyne, was educated at private seminaries and University College, London. He was pastor at Banbury, 1853-58; at Manchester, 1858-96; and settled in London in 1869. He built the City Temple at a cost of £70,000. He was Chairman of the Lancashire Congregational Union; Chairman of the Manchester Congregational Board; Chairman of the London Congregational Union of England and Wales. Dr. Parker is the author of "The People's Bible" (25 vols.); "The Paraclete"; "Ecce Deus"; "Ad Clerum"; "Weden Stephen"; "Springdale Abbey"; and many other works. The Hon. Degree of D.D. was conferred on him by the University of Chicago. —Men and Women of the Time.]

WAZIRI EXPEDITION.

The Waziri expedition has inflicted punishment on the tribe.

DUKE OF CONNAUGHT.

The Duke and Duchess of Connaught to-day leave for Egypt to attend the ceremony of the completion of the embankments at Assouan. Their Highnesses will afterwards proceed to Delhi.

FRESH ERUPTION IN MARTINIQUE.

Mount Pierre at Martinique has burst into a fresh eruption.

VENEZUELA.

H.M.S. *Charybdis* has left for Venezuela.

RUSSIAN SUB-MARINE BOATS.

The Russian Government is encouraging the inventors of sub-marine boats by furnishing funds.

VENEZUELA.

London, December 1.

Venezuela is trying to dispose of her liabilities to Europe by the despatch of a special envoy.

THE MARSEILLES STRIKE.

A big strike of sailors and firemen has taken place in Marseilles. Torpedo-boats are carrying mails in the Mediterranean.

PORT ARTHUR.

According to reliable information from Moscow, the Russian Government has decided to make Port Arthur a purely fortified port.

THE EVACUATION OF SHANGHAI.

London, December 2.

The *Globe* says that the postponement of the withdrawal of troops from Shanghai is a gross breach of faith. The *Standard* considers that the present state of things points to the existence of some difference of opinion and in the event of the other Powers postponing the withdrawal of their forces, the paper, referring to previous engagements, contends that Japan should despatch troops to Shanghai again, and insists that England should retain her contingent there.

THE FRANCO-SIAMESE TREATY.

A section of the Colonization Committee in the French Senate insists that the treaty between France and Siam be re-considered.

(FROM THE "JAPAN HERALD.")

MISSIONARIES IN CHINA.

M. Pelletan, the French Minister of Marine, has submitted General Voyron's confidential report on the Boxer disturbances in China to the Budget Committee, with authority to use the passages relative to the part played by missionaries.

THE GOLD STANDARD IN SIAM.

London, November 29.

M. Deloncle, the deputy for Cochinchina, has written to the Colonial Minister characterising the establishment of the gold standard in Siam as an economic *coup* calculated to entail the gravest consequences on the finances of Indo-China, particularly in the rice market of Saigon.

M. Deloncle demands the immediate nomination of a commission of inquiry to propose a solution of the difficulty before January 1st, 1903.

GENERAL VOYRON'S REPORT.

M. Combes, the French Premier, has begged the Budget Committee to abstain from reading General Voyron's report on the Boxer disturbances.

The Committee, by a majority of one, has decided to receive the report but to maintain secrecy as to the contents.

THE GOLD STANDARD IN SIAM.

London, December 2.

M. Doumerque has decided to institute a Commission on the Siamese currency, and promises to avert the crisis that is threatening the prosperity of the French possessions in the Far East, immediately the Commission has formulated an opinion.

THE EVACUATION OF SHANGHAI.

The evacuation of Shanghai by the foreign troops has again been postponed.

The *Standard* assumes that the postponement by France and Germany concerns the Yangtse question, and says the matter may be confidently left to the discretion of Lord Lansdowne, whose

principal task in China now is to keep the provinces primarily a British sphere of influence.

THE FOREIGN TROOPS AT SHANGHAI.

London, December 3.

The official correspondence as to the evacuation of Shanghai by the foreign troops was published to-day.

It appears that the German Government was asked in August last by Lord Lansdowne, the Secretary for Foreign Affairs, to agree to the evacuation, and consented in general terms. In October, however, the German Government stipulated that the Peking Government and the Yangtse viceroys should engage not to grant to any Power special political, military, maritime or economic advantages, nor allow the occupation of any other points commanding the Yangtse, Yangtse, either below or above Shanghai.

Prince Ching denied to Sir Ernest Satow, the British Minister, that the German Government had submitted any conditions to China.

Sir Ernest Satow ascertained, however, that Prince Ching had already accepted Germany's proposals.

Lord Lansdowne instructed Sir Ernest Satow to inform Prince Ching that his double-dealing was deeply resented and that Great Britain would not be bound by any pledges limiting her own or China's freedom of action regarding the maintenance of order and the protection of British interests in the Yangtse region.

The Japanese Government cordially supported Great Britain in this point.

Germany thereupon intimated that she had received assurances from China, and regarded the conditions as fulfilled.

Lord Lansdowne replied that he understood the assurances referred to the whole of China, excluding sovereign territorial rights already alienated.

The subsequent correspondence indicates that the evacuation is now only a matter of transports.

(FROM THE "N.-C. DAILY NEWS.")

THE CASE OF THE NINTH LANCERS.

London, November 22.

While the Indian Budget was before the House, Col. the Hon. H. Legge, M.P. for St. George's Hanover Square, who formerly commanded the 9th Lancers, introduced their case to the notice of the House. Lord George Hamilton said the action taken in their case was in the cause of discipline, and was authorised by the highest military personages in India.

His Lordship defended collective punishment and read a telegram from the Government of India, showing the result of collective punishment. The Commander of the 9th Lancers stated that there were reasonable grounds for suspecting the identity of the culprits, but there was not evidence sufficient to convict them.

His Lordship said that our success in ruling coloured races is due to the fact that we have established the perfect equality of all races before the law. Much as he valued the reputation of the 9th Lancers he valued the credit of the army and the reputation of the Government more, and would unhesitatingly support the Viceroy of India, Lord Curzon, in bringing the culprits to justice.

MORLEY ON CHAMBERLAIN.

Mr. John Morley, speaking at the National Liberal Club, eulogised Mr. Chamberlain's mission, which he said be regarded with considerable confidence. Mr. Chamberlain's fitness for the task was greater than that of any other man he, Mr. Morley, knew.

ANOTHER WAR SCARE.

London, November 22.

The orders given to three French warships to proceed to Oran have caused wild rumours in Paris regarding British designs; but it is declared that the French Foreign Office does not share these apprehensions and is convinced that Great Britain has no aggressive intentions.

London, November 23.

The *Financial News* mentions a report that the Government are about to propose to replace Lieut.-Gen. Sir John Stokes, K.C.B., by Sir Edward Lee on the board of the Suez Canal. They will also appoint a third representative, who will very probably be Sir James Mackay.

MR. CHAMBERLAIN'S TOUR.

London, November 23.

Reuter is informed that the details of Mr. Chamberlain's voyage depend on the weather and circumstances. He will probably visit Cairo while the

Good Hope is passing through the Canal and coaling; but it is impossible to forecast what he will do while the *Good Hope* is coaling at Zanzibar.

CIVIC DIGNITIES FOR AUSTRALIA.

His Majesty the King has been graciously pleased to confer the title of Lord Mayor on the Mayors of Melbourne and Sydney.

LOSS OF A COASTER.

Weihaiwei, November 24.

The steamer *Enseigne Henri* was wrecked on Friday between Chefoo and this port. The passengers and crew were saved, but the mails were partly lost.

[The *Enseigne Henri*, Captain Liu, was a steamer of 250 tons under the French flag, running between Port Arthur, Chefoo, and Wei-hai-wei.]

SOMALILAND.

The *Daily Telegraph* learns from its Aden correspondent that Lord Kitchener, Commander-in-Chief of the Forces in India, has had a long consultation with Major-General Pelham Maitland, C. B., Military Secretary to the Government of India, on board the P. & O. *Egypt* regarding the Somaliland Campaign.

OOM PAUL'S THOUGHTFULNESS.

It is stated at Brussels that ex-President Krüger carried away with him from Pretoria £700,000, including 3,500 shares in the South African Railway.

SIR ERNEST'S FIRMNESS AGAIN.

Reuter's Peking correspondent states that the Chinese having hoisted their flag over the Tangshan coal mines, Sir Ernest Satow, British Minister, proceeded thither and instructed the British Commander to replace the Dragon by the British flag. This was done, the Chinese making no resistance.

M. PELLETAN AND THE MEDITERRANEAN.

London, Nov. 25.

Replying to an interpellation regarding the reduction of the personnel of the French Mediterranean squadron, M. Pelletan declared that it was only reduced for the winter. The reduction was made to provide funds for increased naval construction and to continue the fortification of Bizerta. The Chamber approved of the declaration by 288 votes to 204.

VENEZUELA.

Commenting upon the Venezuelan question, the German Press hopes that Venezuela will receive a lesson. The Venezuelan Press claims the protection of the Monroe Doctrine, but the American papers retort that the doctrine is unavailable as a cloak for misbehaviour.

THE SOUTH AMERICAN ARBITRATION.

London, November 26.

King Edward's award in the Argentina-Chile boundary dispute is a compromise. It gives Chile 54,000 square kilometres, and Argentina 40,000.

THE GERMAN TARIFF DISPUTE.

The Berlin Press states that the Government and a majority of the Reichstag have concluded a compromise on the Tariff Bill, the Government making an important concession with regard to barley.

THE ORKNEY ELECTION.

Mr. John Cathcart Wason, who seceded from the Unionist party, has been re-elected for Orkney and Shetland by 2,412 votes, against 201 given for the Liberal candidate, Mr. Wood, and 743 for the Unionist candidate, Mr. Angier.

MR. CHAMBERLAIN'S TOUR.

November 27.

Mr. Chamberlain will be at Mombasa from the 14th to the 17th December, while the *Good Hope* is coaling at Zanzibar.

THE CHINA MAIL CONTRACT AND BRITISH NORTH BORNEO.

Mr. Austen Chamberlain, Postmaster-General, speaking in the House of Commons, said that when the Eastern mail arrangements are being revised, he will bear in mind the suggestion as to the P. & O. steamers calling at a port in British North Borneo, but in view of the small amount of correspondence passing between Great Britain and North Borneo, and the intricate navigation of the waters of North Borneo, he thought it hardly likely that it would prove justifiable.

A STRIKE AT MARSEILLES.

London, November 27.

The dockers and others at Marseilles registered for naval service have struck and have induced a number of crews of vessels to join them. Several mail steamers are being delayed.

STILL HOPES FOR SOUTHAMPTON.

The Secretary of the P. & O. Company says that the question of their headquarters is not yet settled.

HERR KRUPP'S RECENT ANXIETIES.

Herr Krupp had before his death just commenced proceedings against the *Vorwärts*, which charged him with gross immorality.

ENGLAND, GERMANY AND VENEZUELA.

London, November 28.

The three German third-class cruisers *Amazona*, *Ariadne* and *Niobe*, each of 2,655 tons' displacement are fitting out fully equipped for war at Kiel, to go immediately to Venezuela.

RIOT IN THE REICHSTAG.

There was a tumultuous scene in the Reichstag yesterday when the majority submitted a motion to pass the Tariff Bill *en bloc* except for the amendments, required by the compromise mentioned in the telegram of the 26th inst. The motion evoked a storm of protests from the Radicals, Socialists, and extreme Agrarians; violent speeches were delivered from both sides of the House and amid unprecedented uproar the debate was adjourned.

THE BRITISH ACADEMY'S FIRST PRESIDENT.

Lord Reay, G.C.S.I., G.C.I.E., LL.D., Edin., Chairman of the London School Board has been elected the first President of the new British Academy.

[Donald James Mackay, 11th Baron Reay and head of the Clan Mackay, was Lord Rector of St. Andrew's University, 1884-86, Governor of Bombay 1885-1893, Under Secretary for India, 1894-95, and is President of the Royal Asiatic Society and University College, London.]

DOCTORS DISCUSS LEPROSY.

Dr. Jonathan Hutchinson, M.D., LL.D., F.R.S., the eminent consulting surgeon, who is about to visit India and Ceylon for the purpose of making researches into the sources of leprosy, has read a paper at a meeting in connection with the Prince of Wales' Leprosy Fund, expounding his theory, which is that leprosy is due to badly cured fish. Sir Joseph Fayrer, K.C.S.I., LL.D., M.D., F.R.S., Physician Extraordinary to the King and formerly Professor at the Medical College, Calcutta, and others eulogised the paper but dissented from its conclusions.

CHINESE ENGINEERING AND MINING CO.

Tientsin, Nov. 28.

At the meeting to-day it was resolved that the success of the enterprise demands strict adherence to the contract of 1901, particularly as regards the removal of the Board to China; that the attempt to administer the company from Europe is at variance with the Company's solemn obligation, and does not warrant the confidence of the shareholders in the directors.

The shareholders appointed the following committee to investigate and manage the affairs of the Company, and negotiate a satisfactory settlement with the directors in London:—Messrs. Detring, Chang Yen-mao, Shen Tun-ho, Chu Pao-san, Liang Wen-tung, C. J. Dudgeon, C. M. Ede, Heyle, Tong Kidson, and von Hanneken.

(FROM THE "OSTASIATISCHE LLOYD.")

NEWS FROM EUROPE.

Berlin, November 21.

The Secretary of the Treasury, Baron Thielmann, stated to-day in the Reichstag that it would probably become necessary to cover the expected deficit of 150 million marks by introducing higher taxes on beer and tobacco.

Berlin, November 22.

The owner of the world-renowned Iron and Steel Works and the Germania Dock in Kiel, Privy Councillor Friedrich Alfred Krupp, has died in consequence of heart failure, aged 48.

NEWS FROM EAST ASIA.

Shanghai, November 21.

The Commander of the German troops has received orders from Berlin to prepare everything for the evacuation of Shanghai.

Shanghai, November 23.

The Commander of the German troops in Shanghai has been authorised to confer with the Commanders of the other foreign troops about the details for a simultaneous and uniform withdrawal of the foreign troops from Shanghai.

As the British and the French Commanders have declared that they have received no instructions whatsoever as to the evacuation of Shanghai, the negotiations have at present come to a standstill.

NEWS FROM EUROPE.

Berlin, November 24.

The negotiations as to an understanding about the tariff question are still going on. No agreement has been arrived at so far, but it is expected that the matter will be decided in the next few days.

The simultaneous proceedings of Italy in the Red Sea and France in Morocco are here believed to be due to an *ad hoc* agreement of the two Powers.

The Krupp Works will be carried on as before. The Chancellor and all Ministers have condoled very heartily in Essen. H. M. the Emperor was much affected by the news of Krupp's death. He spoke in his telegram to the widow of the universal importance of the Works.

Berlin, November 25.

The leading social-democratic paper *Vorwärts* had published slanders and shameless accusations against

Mr. Krupp, which affected him in such a manner that his heart trouble became apparently worse and finally took a fatal turn. The whole German Press condemn this proceeding of the *Vorwärts* in the strongest terms and extol his exceedingly humane actions. The Crown-Attorney has instituted criminal proceedings against the editors of the *Vorwärts*. The mourning for Krupp is general, and the funeral will be an exceedingly magnificent demonstration, which will gain much by the fact that H. M. the Emperor will personally go to Essen.

NEWS FROM EAST ASIA.

Shanghai, November 27.

The Commander of the French troops has also received orders to communicate with the Commanders of the other foreign troops as to simultaneous evacuation of Shanghai. As soon as the British commander shall have received orders authorising him to do the same, the negotiations will be taken up.

BANK OF JAPAN.

BANKING ACCOUNT.

On Saturday, Nov. 29th:—

	Dr.	Yen.

LIBERALS AND IRELAND.

The slight passage between the Leader of the Opposition and Mr. Balfour on Oct. 23rd is thus reported:—Mr. W. O'Brien asked the Prime Minister whether he would now definitely tell the House yes or no if he intended giving a day for the motion on the government of Ireland, of which notice had been given. Would he also kindly remember that as the motion referred to the struggle for the abolition of dual ownership, the Irish party were entitled to speak for a considerable section of the landlord minority.

Mr. Balfour would not deal with the question as to what proportion of the Irish population the hon. gentleman was entitled to speak, for it had no direct bearing on the principle he had ventured to lay down as having in the past governed proceedings in that House. He had nothing to add to what he said yesterday. If he was given to understand that the resolution in the hon. gentleman's name was endorsed and accepted, and would be supported by the Opposition as a vote of censure, he would grant a day (Ministerial cheers).

Sir H. Campbell-Bannerman (warmly)—I do not know on what ground or by what authority the right hon. gentleman makes any supposition of the kind (derisive cheers).

Mr. Balfour—I did not make any supposition (cheers).

Sir H. Campbell-Bannerman—The right hon. gentleman said he assumed.

Mr. Balfour—I said if I were given to understand.

Sir H. Campbell-Bannerman—Then who is to give him to understand? (loud cries of "You" and cheers).

Mr. W. Redmond asked the Leader of the House whether he had not repeatedly given time for discussions on the request of the Irish members?

Mr. Balfour said he had laid down no new rule at all.

Mr. Dalziel—Was not time given to discuss the financial relation?

Mr. Balfour—I have never denied that.

Mr. W. Redmond—Is the demand of the Irish now only to be granted if it is endorsed by the Leader of the Opposition?

Mr. Balfour—I shall on no ground grant such a demand unless the whole Opposition accept it and endorse it—(Ministerial cheers).

NEWS BY THE ENGLISH MAIL.

The British Admiralty is reported to have decided on a new class of battleship, the design of the Director of Naval Construction, Mr. Philip Watts, and will shortly invite private shipbuilders to tender for one or two. It is stated that these vessels will be the largest, fastest, and most heavily armed of any warship of the class. They will be of 18,000 tons displacement, compared with 16,350 tons of the "King Edward VII." One of the new class of vessels will be built at one of the dockyards.

Representatives of John Brown (Limited), Clyde-Bank, and the Fairfield Company, Glasgow, have waited upon the Clyde Trustees, to state that they have been called upon to send in within the next few days tenders for the two new Cunarders. Before they can do so, however, they request the assurance of the Clyde Trust that the river will be deepened and widened, to permit of the huge vessels being safely launched. It is understood the trustees will give a favourable answer.

Contrary to general expectations, states a correspondent, Britons making South Africa their home are marrying Boer women. Two of these unions have just taken place at Port Elizabeth. The bridegrooms were stalwart members of the South African Constabulary and the brides genuine Boer maidens, who, with their imperfect knowledge of the English language had some difficulty in getting through the marriage service. But this little hitch was overcome, and the girls looked very happy as they drove away in their wedding carts. The vehicles, by the way, were decorated with yellow ribbon, the ex-Free State colour, while the horses were adorned with red, white, and blue.

News comes from Bulawayo that the Matabeles are deserting the Matoppo Hills, where the tomb of Rhodes is situate, for the Mopsui region to the south. They assign as the reason for their departure that the depredations of the baboons which infest the hills have become intolerable, and that without firearms they are incapable of resisting the inroads of these ferocious animals. For some time past the baboons have been increasing rapidly, and are a source of considerable loss and annoyance to the natives. They are therefore to be left in possession of the "World's View," and, save for their presence, these famous hills will become more desolate and lonely than ever.

At last, remarks a London paper, we shall be able to obtain the right time in Fleet-street, but the long-deferred benefit is conditional on the sun shining—and that is a rare luxury in London. On the front of a recently erected commercial building there is a brand new, highly polished sun-dial, with the following motto in glistening brass: "Watch and pray, Time flies away." The dial was seen for the first time a few days ago, and during all the afternoon and also next morning the crowds complied with one portion of the request—they watched the slowly moving shadow-line and cast sorrowful glances towards the erratic clocks in the neighbourhood. But the clocks, unreliable as they are, will win in a fog.

At Waereghem near Courtrai, there has just been discovered, under remarkable circumstances, a long-lost masterpiece of Albert Duer. Some years ago a woman farmer of the district received what looked to her untutored eyes like a piece of wood painted in

six panels, and after leaving it in her granary for a year or two she sold it last year, with other oddments, to a local coachpainter's son as lumber for a few coppers. Hearing that he had sold the panel for 50s., the woman brought an action. This, says the Berlin correspondent of the *Newcastle Chronicle*, caused the picture to be examined by experts, with the result that it has been found to be a genuine masterpiece by Albert Durer, stolen many years ago from the National Museum at Munich. The panels represent the Apostles.

BOVRIL ISN'T DEAR,

in fact, value for value, it is one of the cheapest drinks, and one of the most economical foods that can be obtained. A cup of hot Bovril costs less than a drink of whisky, and while giving a more genuine and lasting warmth than the latter, contains, in addition, the nutritive principles of beef worth many times its cost.

Old fashioned beef teas and meet extracts, whether known as such, or disguised under more pretentious modern names contain none of the NUTRITIVE properties of beef. Baron Liebig himself admitted this fact; there is not a doctor to-day disputes it. Used as a nourishment Meat Extract is probably the most expensive article one can buy. Bovril one of the cheapest.

ITCHING HUMOURS
SPEEDY CURE TREATMENT
FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTI- CURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, perman- ent, and economical cure of the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from infancy to age, with loss of hair, when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautify- ing the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the pur- poses of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excoriations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS, CHOCOLATE COATED,

Are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw- cap pocket vials containing 60 doses. CUTICURA PILLS are alterative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifiers, humour cures, and tonic-digestives, yet compounded.

CUTICURA REMEDIES are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27-28, Charterhouse Sq., London. French Depot: 6 Rue de la Paix, Paris. POTTER DRUG AND CHEM. CO., Sole Props., Boston, U. S. A.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, DECEMBER 13TH, 1902.

BIRTHS.

On the 6th inst., at No. 215 Bluff, Yokohama, the wife of J. WILLIAMSON JONES, of a Son.

At No. 35 Bluff, Yokohama, on December 9th, the wife of G. GUSTAVUS BRADY, of a Son.

DEATHS.

On December 5th, at the General Hospital, Yokohama, LOUIS GROS, native of Lyons, aged 52 years.

Entered into rest at Honolulu, on the fourteenth day of November, 1902, THOMAS THERON ALEXANDER, for twenty-five years a Missionary to Japan. In love of the brethren tenderly affectioned; in honour preferring another; in diligence not slothful, fervent in spirit, serving the Lord; rejoicing in hope, patient in tribulation, continuing steadfastly in prayer; preaching not himself but Christ Jesus as Lord, and himself a servant for Jesus' sake; having the mind of Christ.

SUMMARY OF NEWS.

FIVE cows have been attacked with rinderpest in Kobe.

THE Nippon Yusen Kaisha steamer *Kushiro Maru* 1,800 tons, built by the Kawasaki Dock Company, of Kobe, will be launched on the 13th instant.

A NASTY bicycle accident which occurred in Kobe on Sunday afternoon, in which an officer of the *Bentomond* was badly injured, prompts the *Kobe Herald* to demand that the authorities

should enforce a rule on bicycle shops that no wheel should be offered for hire unless fitted with a brake.

AN elderly foreigner, whose name has not been published, was found in a dying condition lying outside the Kiyomidzu Temple in Kyoto on Dec. 7th.

FOURTEEN boats were wrecked, four men were drowned and thirty-six men are missing as the result of the storm in Chiba prefecture on the night of the 6th inst.

THE expenses incurred by Japan in connexion with the Durbar of next January are put by the *Official Gazette* at 15,661 yen. This country's envoy, it will be remembered, is Lieut-General Oku.

THE revenue cutters *Balabac* and *Palawan*, built by S. C. Farnham, Boyd & Co., Ltd., Shanghai, for the Philippine Government, have, like their sister-ships, proved satisfactory in every way on their trial trips.

FOUR fishermen belonging to Hino-misaki, Kishu, were rescued on the 6th by the steamer *Lyra*, their boat having been upset during the storm that swept over the neighbourhood on Saturday.

FIRE broke out at Moriyama-mura, Tamuragori, Fukushima prefecture, on the night of the 4th inst. Thirty-two houses and 10 godowns were destroyed including one post office. Two men were injured.

THE Siamese Royal Yacht *Maha Chakkri*, which left Kobe at 4 p.m. on Saturday, arrived at this port on Monday morning to convey home the Crown Prince, who is expected here on the 15th inst. by the C. P. R. steamer.

A MAN named Noguchi Togoro, living at Negishi-machi, Yokohama was arrested by the police on the 6th inst. on a charge of stealing several pieces of roofing zinc, which he sold to a hardware shop at Okinacho, Yokohama.

ASSURANCES of the excellent health of Pope Leo XIII. and the tidings that the Pontiff is now busily engaged in writing a Latin poem, the theme of which is the glory and honour of old age and the joy of living, were contained in a letter received recently in New York. The letter stated that the Pope suffered from no infirmity in this the 92nd year of his age.

DR. FRITJOF NANSEN, the Arctic explorer, announces that a Polar expedition under command of Capt. Amundsen will start in 1903 for King William's Land (east coast of Greenland), and will proceed thence for Behring Straits. Professor Schmidt of Berlin characterizes the expedition as undertaking a most important task in the domain of terrestrial magnetism.

THE death is announced by the last mail papers of Admiral Sir Edward Bridges Rice, K.C.B. Admiral Rice was a brother-in-law of Sir William Harcourt. The gallant Admiral, who was 83 years of age, entered the Navy in 1832, and served in the China war in 1842, commanding the flotilla of boats in advance of the British force. He was also employed in the Burmese war, and served in the Crimea.

AN armed burglar entered the house of a rich farmer, Seki Hiroto, at Somewada-mura Kuji gori, Ibaraki prefecture, on the night of the 4th inst., killed Mitsu (49), Seki (13), Shimo Take-nosuke (14), and Shihei (77), and badly injured Fusaji (23). He then stole yen 2,000 and disappeared. The owner of the house escaped by being absent. Seki Inosuke and his wife, living in

the same village, were arrested the following day, on suspicion of being accessory to the murder.

IN view of the great increase of ownerless dogs on the Bluff, and in Negishi, Honmoku, and Kitagata, a general destruction of all animals of that description was conducted by the Bluff Police beginning on the 10th inst. It would be well therefore that owners of dogs should take measures to distinguish their dogs from the ownerless curs that offend the eye by day and render night hideous in the localities mentioned.

THE Osaka Canal Company, says a contemporary, have constructed a canal connecting the Azikawa and Shiri-nashi rivers, but the scheme has not proved a complete success, and the Company now wish to connect the Kidzu-gawa and Shiri-nashi rivers by another canal. The distance between these rivers is about 3 cho. The estimates will be submitted to the Municipal Council shortly.

THE Department of Home Affairs, as already briefly reported, is to submit to the forthcoming Session of the Diet a bid for improving the Yoshino, Takahashi, Shinano, Yodo, and Tone rivers. The proposed undertakings will extend over a period of ten years at an outlay of thirty million yen. The intention is to spread the expenditure over the whole period, spending three million yen a year.

OYEBASHI, opposite Yokohama Railway station, was formally opened to traffic on Wednesday afternoon. Large arches were erected on either side of the bridge, to mark the occasion, and bands of white and red cloth were stretched across while colour lanterns and arc lights stretched from the bridge to the public garden. Fireworks were discharged at the public garden until evening, and a performance of *geisha*, city band, *bakabayashi*, and a fencing match took place. H.E. Governor Sufu and many prominent gentlemen were present. Some speeches were delivered by the Governor and others.

A SPECIAL telegram dated Shimonoseki, Dec. 8th, to the Tokyo *Asahi* states that Mr. Zembe Moriya, chief of the Taiwan *Nichi Nichi Shimpō*, who arrived at Shimonoseki by the steamer *Taichu*, has declared that the famine in the Pescadores is most severe. The people have only one meal a day. Nevertheless the food is exhausted and the people depend on potato leaves and sea weed, as well as grass. The usual population of the islands is 53,114, of which 8,902 have left to find work, and 7,377 are depending for help on others. Some people in South Formosa are making contributions of money. Mr. Asada, the Chief Official of the islands, is consulting with the Formosan Government in Taipei on the question of assisting the inhabitants.

A PROPOSAL was before a recent committee meeting of the S. P. C. K. on the suggestion of the Bishop of South Tokyo for a grant towards the erection of a hostel for girls attending the Women's University at Tokyo. A considerable number of Christians and others were desirous of regular teaching and other help. The Bishop explained that the only tenure which could be obtained was a leasehold tenure, but that this was not unsatisfactory in Japan, as there was practically fixity of tenure, and the house would belong to the Church, and always be removed elsewhere if they ever had notice to quit, which was very unlikely. The Committee recommended a grant of £100. A similar request was made on behalf of an Hostel for Divinity Students at Tokyo, who would attend lectures at the Divinity School of the American Episcopal Mission in another part of Tokyo. The Committee recommended a grant of £50.

POLITICAL GOSSIP.

Saturday, Dec. 6.

The *Jiji Shimpō* seems to attach considerable importance to the meeting that took place between Marquis Ito and Count Okuma at the residence of Mr. Kato Takaaki on the 3rd instant. There was evidently much cordiality between the two statesmen. They renewed their ancient friendship, and agreed heartily that it should be their common aim to organize an exemplary political party. But it does not appear that they spoke of joining hands to undertake the task. On the contrary, we gather that they merely agreed to agree when possible and to differ when convenient. In short, the significance of their meeting consisted in the evidence it afforded that the two great parties are united in opposition to the Katsura Cabinet's programme. Whether the *rapprochement* means that Marquis Ito has taken another step of separation from the *Genro* statesmen and involved himself correspondingly deeper in the ranks of party politicians, we can not pretend to judge. But it wears that aspect.

The *Nichi Nichi Shimbun*, which is generally very close to Marquis Ito, refrains from any explicit conjectures. It merely says that politicians, appreciating the opportunity created by the Cabinet's refusal to accept Marquis Ito's advice, took steps to bring the two statesmen together; that they both arrived at Mr. Kato's house some time before the dinner hour; that they had a conversation in a room where not even their host was present, and that the party being subsequently joined by Messrs. Oishi and Samejima, Marquis Saionji and others, then proceeded to the dining-room where political subjects were tabooed. As to the nature of what passed at their private conference, says our contemporary, the speeches delivered by them on the following day furnish an index.

Certainly Count Okuma's speech did contain some remarkable passages on this subject. It is true that he disavowed any political intention in the meeting at Mr. Kato's, but he immediately added: "It may become a motive for bringing about a change among politicians that labour in the cause of the majority of the people" (*tasu kokumin no seiji no uye ni hataraka mono ni henka wo hiki-okosu itsu no doki to naru ka mo shiranu*). He then went on to speak of Marquis Ito as the central figure of *Meiji* administration, and of the present Cabinet as the pupils of the Marquis. It would have been reasonable and natural, he declared, that the Ministry should have consulted the Marquis before framing a budget that contained important financial propositions. But they did not consult him. They first of all took the House of Peers into their confidence and then a section of the House of Representatives. So, at least, it was journalistically affirmed. The next intelligence had been that Marquis Ito, in the most courteous manner, conveyed a statement of his views to the Cabinet. But the latter declined to endorse them. Marquis Ito and Count Okuma—we are still epitomizing the latter's speech—had often worked together in the past and had often worked in opposition. But they had now reverted to their old friendship, and each was animated, not by party motives, but solely by solicitude for the country's good.

Count Okuma, had he been so minded, might have carried his analysis a little further. He might have recounted how the association of Marquis Ito with the *Seiyu-kai* had alone invested the latter with real

importance; how the *Seiyu-kai* had been organized on the clearly expressed understanding that it was to be guided by Marquis Ito, and how, ignoring the debt it owed him and the promise it had given him, it formulated and adopted binding resolutions at a political crisis without previously consulting him, so that he was placed in the position of having either to accept the Party's dictation or to sever his connexion with it, which latter step would have been the *fiasco par excellence* of the *Meiji* era.

What is the cause of the extraordinary lack of discipline that cripples the efficiency of every political association in Japan? Is it want of strength on the part of the leaders? Or is it an outcome of the old philosophy which gives to every man the right of following his own convictions in the face of all consequences? Or is it another form of insincerity?

There is no moral reason why Marquis Ito and Count Okuma should not be allies. But there is a political reason, namely, that neither statesman could consent to hold office under the other. That, at any rate, has been the idea hitherto entertained by the public. But Count Okuma's speech on the 4th seems to imply that he might not be unwilling to sit below the "centre of *Meiji* administration."

The *Kokumin Shimbun* is evidently uncertain about the result. But it shrewdly observes that whereas Marquis Ito, in his speeches and declarations, had been careful not to condemn the increased land tax on principle, but only to speak of its untimeliness, so that a little quiet reflection might have discovered a route for reconciling the views of the Marquis and the Cabinet, his meeting and apparent agreement with Count Okuma removes this margin of compromise, for the Progressists, Count Okuma's Party, have declared themselves unequivocally opposed to the land tax. But how far does Marquis Ito intend to carry his *rapprochement* with Count Okuma? The latter assuredly will take full advantage of the opportunity. It brings an access of life to his nearly inanimate following, and such a chance must not be lightly esteemed. But if Marquis Ito intends to join hands with the Progressists, he must be prepared for a big sacrifice—that sacrifice of his relations with the Elder Statesmen.

Meanwhile the Cabinet remains calm and apparently resolved. It has declared its policy and is prepared to stand or fall by the result. One signal success it has achieved: the country has pronounced in favour of its scheme of naval increment. Thus the question is narrowed to one of means. Shall the State abstain from productive enterprises in order to increase its armaments, thus adding to its burdens without developing its strength to bear them; or shall it pursue the plan of augmenting its revenues simultaneously with adding to its expenditures? Probably the Katsura Ministry are right in anticipating that public opinion will ultimately range itself on their side, whatever party politicians may say to the contrary. But, after all, the administration of the country has to be carried on. Marquis Ito is not in a position to spurn all trammels of association and expediency.

The press of Tokyo is tolerably unanimous in assigning to the Cabinet a determination to resign rather than change the bases of its Budget. Dissolution of the Lower House is said to have been discussed, but Count Katsura would not hear of it. Were there question of naval increment, he might have no hesitation in appealing to the country.

But with regard to such a problem as the land tax, dissolution would only antagonise the people without bringing any strength to the Ministry. Courageous resignation means, in Count Katsura's opinion, a renewal of life hereafter. So most thoughtful observers probably believe.

When we come down to analysing the practical course of events, one of two things seems probable. Either the Cabinet will resign within the next few days, or it will wait to see how the two Houses deal with the Budget. There is always a *via media* in a conference of the Chambers. If the Lower House introduces radical changes in the Budget, and if the Upper House restores the Cabinet's programme, a conference must ensue, and a line of compromise may be discovered. In the alternative, the Ministry would resign. But of course the former contingencies will not be invited unless a tolerably clear forecast can be formed of the result. Hence, unless the Cabinet's resignation takes place quickly, we may look for a delay until next January, when the Peers will have to deal with the Representatives' alterations in the Budget. It is by way of provision for this conjuncture that we interpret Marquis Ito's *rapprochement* to Count Okuma. If the amended—or mutilated—Budget goes up to the Peers unanimously approved by the Representatives, that is to say, endorsed by the *Seiyu-kai* and the *Kensei Hon-to* alike, the Upper Chamber will have proportionate reluctance in restoring the Cabinet's proposals. Thus the apparent alliance between the leaders of the two parties becomes an alliance against the House of Peers.

Monday, Dec. 8.

The *Seiyu-kai* have appointed to the office of *Innai Sonnu* (heads of the Party in the Lower House) Messrs. Matsuda Masahisa, Ozaki Yukio, and Ooka Ikuzo, the first-named member being recognized as the chief of the three. They have further resolved to vote for Mr. Kataoka Kenkichi as President of the House and Mr. Motoda Hajime for Vice-President—the old appointments, in fact. There is said to have been considerable discussion as to the propriety of appointing a member of the Progressists to the post of Vice-President, and Mr. Takata Sanaye was spoken of. But party feeling and personal prejudices defeated this idea of a division of power. It becomes evident, therefore, that although community of views may bring the *Seiyu-kai* and the Progressists into the same lobby, their association will be merely a coincidence. Nothing more was to have been expected.

It is stated in well-informed circles that the *Seiyu-kai* offered to make Mr. Kato Takaaki President of the House on condition of his joining their ranks, and that he declined, his position being that although he might possibly enter the Party later on, he should desire to do so on some other ground.

The Party have further indicated as their candidates for Chairman of Committee of the Whole House and chairman of the Budget committee respectively, Mr. Kuribara Ryoichi and Mr. Hara Kei.

The Progressists also have busied themselves with these matters. They voted to leave the nomination of parliamentary leader to Dr. Hatoyama, and he named Mr. Inukai Ki. It was then proposed by Mr. Oishi Masami that the Party should not set up any candidates of its own for the positions of President and Vice-President, but that it should vote for the nominees of the *Seiyu-kai*, in order to bring the two

parties into line. Some objections were raised to this procedure as savouring of submission, but the meeting voted in favour of Mr. Oishi's motion. It would seem therefore that the mood of the Progressists towards their traditional enemies is unexpectedly friendly. Why it should be so we do not pretend to understand clearly. The Progressists can not possibly contemplate fusion. That would mean extinction. Their political prospect depends entirely on standing united and implacable. It is just conceivable that they may be labouring to widen the breach between Marquis Ito and the Elder Statesmen. Such a purpose might be promoted by uniting with Marquis Ito and his political following to oust a Cabinet consisting of the Elder Statesmen's nominees.

Marquis Ito visited the Palace on the 5th instant at half-past ten in the forenoon, remaining there until 1 p.m. After an audience with the Emperor His Excellency was summoned to the presence of the Empress who presented to him a silver flower-vase.

It need scarcely be observed that the Tokyo press has much to say on the present crisis. The *Jiji Shimpō* seems to have abandoned its idea that a compromise will be elaborated. It considers the question at issue very paltry, being, in effect, the reduction or continuance of a charge of four million *yen*. Still there is no denying that both sides have entered the lists determined to fight and the combat had better be waged resolutely. The *Seiyū-kai* have been utterly discontented ever since the last session of the Diet. Marquis Ito held them in check for a time. But he has now relaxed his grasp, and they are to range at will. The *Nichi Nichi Shimbun* points out that although Marquis Ito and Count Okuma may seem to be in accord, they are really at radical variance, the former's view being merely that the land tax is untimely whereas the latter condemns it altogether. Our contemporary also criticizes some of the resolutions passed by the *Seiyū-kai* as incomplete and half-hearted. The *Kokumin Shimbun* ridicules the dispute as based on a paltry issue and regrets greatly that the country should be thus divided at a time when union is essential. The *Hochi Shimbun* sees the basis of the dispute in the fact that under a constitutional form of Government an oligarchy holds the reins of power, and the *Yomiuri* seems to advocate an alliance between Count Okuma and Marquis Ito. It is noticeable that not one journal professes to attach any serious importance to the land-tax question. They evidently regard it as a mere pretext. And so indeed it is. If such a matter—a few hundred thousand pounds—can be a source of political ferment, Japan must be in a bad way. But it is generally so. The country's credit suffers much more from the paltry nature of the people's political quarrels than from the state of its finances, which are really sound enough.

The *Jimmin*—which is the organ of the Kwanto section of the *Seiyū-kai*—attacks the Cabinet vehemently. It says that there is no previous instance of a Ministry which refused to listen to the advice of the Elder Statesmen, Marquis Ito, Count Inouye and Count Okuma, and that the unreasonable obstinacy of the men now in power thus becomes evident. But the *Jimmin* forgets, or rather ignores, Marquis Yamagata and Count Matsukata. Are not these also among the Elder Statesmen, and are not these on the side of the Katsura Cabinet?

As to the attitude of the Cabinet also

there are various and sundry rumours, but none of them seems worthy of attention. The *Yomiuri Shimbun*, for example, talks of Marquis Saionji as the next premier, but dismisses that conjecture in favour of an Inouye Cabinet supported from outside by Marquis Ito and Count Okuma.

Tuesday, Dec. 9.

So far as we can remember there has not been one political crisis in modern Japan unattended by accusations of bribery and corruption against either the Cabinet or the party politicians. A fine opportunity is now offered by the report that the Government contemplates the purchase of two private railways. Opposition journals, notably the *Hochi*, weave an intricate web of charges out of this material, and invite the public to conclude that certain *Seiyū-kai* leaders are falling into an abyss of corruption.

Wednesday, Dec. 10.

The *Seiyū-kai*'s leading members having requested Count Inouye to convey to them a clear idea of his financial views, the Count invited forty-two of them to his residence on the 7th instant, and made an *exposé* of his opinions, which is said to have occupied four hours. It comprised the whole history of the country's finance from the beginning of the *Meiji* era. His Excellency insisted that the expenditures of the central government and of the local governments alike are out of due proportion to the resources of the State. This condition may be said to have had its origin in the war of 1894-5, but a distinction must be made between the remote origin and the proximate cause, which distinction, however, is not clearly set forth in the published epitomes of the Count's speech. He insisted that the time has come for resolutely applying the pruning knife to the expenses of the State, and of restricting enterprises which involve an outflow of specie. As for naval increment, the Count declared that Japan must maintain her place in the world and that due additions to her fleet are essential. On the whole his views are said to coincide with those of Marquis Ito, but to have been much more detailed than those of the latter statesman.

It is apparent that the two big Parties are working hand-in-hand in the Lower House, though the feat involves considerable self-effacement on the part of the Progressists. Probably it would be a mistake to infer anything like fusion. The truth seems to lie in our original conjecture when the news of the meeting between Marquis Ito and Count Okuma was announced, namely, that just as the various sections of the first House of Representatives combined to oppose the *Hambatsu-Seifu* (clan government of that era), so the *Seiyū-kai* and the *Kensei Hon-to* have now united for the purpose of breaking down the combination of Elder Statesmen who have their stronghold in the House of Peers. The Peers will be more or less indisposed to maintain a hostile attitude when they find themselves confronted by a united House of Representatives.

The *Hochi Shimbun* is publishing article after article for the purpose of proving that the Government's project of buying two private railways is a scheme of wholesale political corruption. Minutely detailed accounts are given, setting forth all the intricacies of the alleged transactions together with the names of the persons concerned. It is absolutely impossible that the *Hochi* could acquire, at a moment's notice, information so precise and circumstantial about

doings which, if true, must have been carefully concealed. These, then, are inartistic falsehoods; another illustration of the reckless unscrupulousness shown by some Japanese journals when a sensation has to be made or an enemy attacked.

THE FUNERAL OF THE HONOURABLE COLONEL BUCK.

It need scarcely be said that the funeral of the late Representative of the United States at the Court of Japan, which took place on the 8th instant, was a remarkably imposing ceremony. Japanese officials were not likely to be perfunctory in paying the last tribute of respect to the memory of a man who, representing the nation which has always been closest to Japan's heart, himself possessed qualities that must have won affection and reverence under any circumstances. The Tsukiji Cathedral was filled to overflowing. It seemed that the whole of the American and British communities of Tokyo and many persons from Yokohama were in attendance, and in the numerous rows of pews reserved for official accommodation the entire Corps Diplomatique, from Chef de Mission to Student Interpreter, might be seen, all in full uniform, while on the opposite side of the aisle a still greater number of seats were occupied by Japanese Ministers of State—both those in office at present and those formerly in office, among the latter being Field Marshal Marquis Oyama, Count Matsukata and Count Okuma—, officers of the Army and Navy, and a large contingent from every Department of State as well as the Imperial Household. No public ceremony was connected with the transport of the remains from the Legation. The mourners, on assembling in the Cathedral, found that the coffin had already been placed in the chancel, where it rested among a wealth of wreaths and other floral tributes, some of imposing dimensions—as that sent by His Majesty the Emperor—and some remarkable less for wealth of decorative effect than for beauty of arrangement and rarity of blossoms. Anticipating that special measures would be necessary to preserve some measure of proportion between the limited size of the Cathedral and the crowd of mourners, the officials of the United States Legation had announced that only those provided with tickets could count on obtaining seats, but it will be readily understood that many who had not been so fortunate as to secure tickets, repaired to the scene at an early hour in the hope of finding space; a hope which was not disappointed, for steps had been taken to place chairs and benches in every available part, thus greatly extending the normal accommodation of the building. It may appropriately be noted here that much forethought had evidently been given by the Legation officials to every detail of the ceremony. Things worked smoothly from first to last; so smoothly that no consciousness of effort obtruded itself in the marshalling of the great throng, the conduct of the service, the removal of the coffin and the organization of the long cortege which accompanied it to the railway depot at Shimbashi. For although, as already noted, the transport from the Legation to the Cathedral was altogether private, that from the Cathedral to Shimbashi lacked no detail of ceremonious observance, the hearse being preceded and followed by a large body of Japanese troops and by a number of officers of the

United States Navy. Precisely at 11 o'clock, the hour fixed for the commencement of the service, Baron Sannomiya, Grand Master of Ceremonies, representing His Majesty the Emperor, walked up the aisle, conducted by Mr. J. Ferguson, Chargé d'Affaires of the United States Legation, and was followed immediately by the whole body of Episcopalian Clergy in Japan, British and American. The service was performed by the Rev. E. W. Woodman, the Right Reverend Bishop McKim reading the lesson and pronouncing the benediction. Two hymns were sung—very beautifully and impressively—, "Rock of Ages" and "Nearer my God to Thee," and as a body of U.S. Naval officers bore the coffin shoulder-high from the chancel the organ played the Dead March in "Saul." No funeral sermon being preached, the whole ceremony within the Cathedral did not occupy more than forty minutes, a result evidently judicious in consideration of the cosmopolitan character of the congregation. Unhappily the day proved cold and wet, but inclemency of weather certainly did not curtail the attendance, and probably passed almost unnoticed by the crowd of mourners who assembled to evince their sorrow for the loss of a true Christian gentleman and able official, as well as their profound sympathy with his bereaved widow.

Yokohama was reached by the special train about 1.35, and at the station a large number of American residents and Japanese officials, including Governor Sufu, Mr. Rinoiye, Secretary of the Kencho, and Mr. Saito, the Acting-Mayor, were waiting to receive the coffin. On the train there also travelled the United States Legation officials and the Consular officials at Yokohama. The coffin, which was covered with the Stars and Stripes, was after some delay, rendered necessary by the provision of a suitable platform, removed from the car by a party of marines, and was borne by them to the hearse, which was waiting outside the station. The progress to the U.S. Naval Hospital was very slow, so that it was 2.20 when the procession reached the Bluff. There the coffin and the floral tributes were carried in by U.S. marines and bluejackets and placed in the mortuary specially prepared for the occasion. The walls of this room were covered with black and white cloth with flower decoration. When the coffin had been placed on its stand Mr. Ferguson, U.S. Chargé d'Affaires, formally handed over care of the late Minister's remains to Dr. Harmon, in charge of the U.S. Hospital.

They will lie in their present repository till Mrs. Buck departs for the United States, when they will accompany her, probably on the P.M. steamer *Korea*.

At the service in Union Church, Tokyo, on Sunday last, Dr. Imbrie, Pastor of the Church, paid a brief tribute to the memory of the late American Minister to Japan. Dr. Imbrie spoke as follows:—I was absent from Japan when our late Minister arrived, and on my return I thought of him as of a stranger little likely ever to be more than a stranger; but to-day, as I stand beside his grave, my feelings are those of one standing by the grave of an old friend.

I had hardly come to know him when he took me captive. So gracious was he in manner, so kindly of heart. So fair-minded in judgment. Ever wise in counsel, ever ready to help, and withal gifted with the spirit of gentle pleasantness that made him all the more winning. But that was not all. To one who knew him well it was clear that there were depths in his character not to be omitted in any sketch of him however brief and imperfect. From little things let fall from time to time a friend soon came to know that he

had a sincere reverence for God and the things of God; and that he was ever more than glad of any occasion to extend the kingdom of Christ in this land.

As no doubt you are aware a public funeral will be held in Trinity Cathedral, and also a private service at the American Legation. Those will be the fitting places at which to speak of him. But I could not allow the present occasion to pass without a word in his memory. For this was his church home; it was with us that Sunday after Sunday he took his place as a worshipper; and he belonged to us as he belonged to no others.

His Majesty the Emperor of Japan is said to have been much shocked by the news of Colonel Buck's sudden death. Mr. Hineno, an Imperial Chamberlain, was at once despatched to the United States Legation on the Emperor's part, and Miss Kitajima, a Lady in Waiting, was sent on behalf of the Empress.

Their Imperial Highnesses the Prince and Princess Imperial sent officials on the 5th instant to offer condolences, and all the Imperial Princes, Princes, and Ministers of State visited the Legation in person the same day.

Marquis Ito received the news during the banquet given in honour of himself and Count Okuma on the evening of the 4th instant at the residence of Mr. Kato Takaki. His Excellency at once left the party, which broke up without delay.

All the leading journals of Tokyo notice the sad event in terms of sorrow and sympathy.

The *Jiji Shimpō* writes:—"We profoundly sympathise with Colonel Buck's widow. Our countrymen sorrow to think that they have lost such an admirable representative of a country with which their relations are so friendly. Japan and America have special connexions, and the late Colonel Buck, by his gentle, kindly and sincere disposition, contributed not a little to bring together the two countries which have civilization and peace for their common object. It can not be too bitterly regretted that such a misfortune as his sudden loss should have occurred just at a time when his aid was needed to promote still further the prosperity and tranquillity of the two states.

The *Kokumin Shimbun* says:—"The kindness and sincerity shown by the late Minister towards Japan have long been known to the people of this country. The notification issued by him to his nationals at the time when the revised treaties went into force, was published in the columns of the local foreign journals and in our own columns. Our readers know how greatly it contributed to the mutual friendship of the two nations.

The *Nichi Nichi Shimbun*, after mentioning illustrations of the late Minister's gentle disposition and saying that he was never known to be angry, adds:—"Colonel Buck was a sincere Christian. He eschewed all luxury and showed himself a kindly, upright gentleman. As to that all must agree. But he was also an admirable man of affairs, and as evidence of the favourable sentiments he entertained towards Japan, the good offices he employed in connexion with the quarantine trouble in Hawaii may be mentioned. Mrs. Buck has our profound sympathy in her sudden bereavement. Japanese and foreigners unanimously offer her their sincere condolences.

The *Hochi Shimbun* writes that Mr. Buck

exemplified the Confucian ideal of gentleness, sincerity and unobtrusiveness, and after a warm eulogy of his career, says that Japan profoundly regrets the loss of this aged and genuine gentleman.

The *Asahi*, the *Jimmin*, the *Nippon* and the *Yomiuri* all write in warm terms.

THE LARGE MURDER.

Probably few of our readers remember the Large murder, which took place on the night of April 8th, 1890. It was a remarkable affair, chiefly because of the extraordinary skill shown by the assassins, and because of the absence of any apparent motive. Mr. and Mrs. Large had retired to rest when two men, carrying what seemed to be short bamboo sticks, entered their bed-room. It subsequently transpired that these men had asked the hall-porter for the key of the safe, in which a considerable sum of money happened to be lying at the time, and that the porter having replied that the key was kept by Mr. and Mrs. Large, was then bound and gagged, after which the two men made their way to the Larges' room. Mrs. Large, startled by their entry, cried out to inquire who was there, when one of the men replied briefly that they had business. They then approached the bed, and Mr. Large, springing up, grappled with them, and forced them back, fighting all the time, until he fell, covered with wounds, in the passage outside, Mrs. Large also having had her hands badly cut in an attempt to shield her husband. The men took their departure immediately, and it was supposed that their inquiry about the safe had been merely a blind to suggest burglarious designs. They left behind a tobacco pouch and a pipe, but no other trace of any kind. Most strenuous efforts to follow up this clue were made by the police, but without any semblance of success. Two years later, the temple Sennen-ji in the Okubo suburb of Tokyo, was entered and two persons were murdered in a manner closely resembling that observed in the case of Mr. Large, where every cut had been delivered in the unerring style of a finished swordsman. The police suspected connexion between the two crimes, but no clue could be obtained in the Sennen-ji case either. That year, two men, Ogasawara Shigesuye, a native of Kumamoto, and Baba Tsunehachi, were arrested for burglary, and sentenced to 14 and 13 years' imprisonment respectively. Baba died in jail but Ogasawara is still undergoing sentence. Meanwhile the police never relaxed their efforts. For some reason a detective named Kaneko Michihiro seems to have connected these two burglars with the Large murder, and after Baba's death he succeeded, with much difficulty, in tracing, his widow, who identified the pipe and the pipe-case as the property of Ogasawara. Then attempts were made to find a woman who had lived with Ogasawara, but she had died in the meanwhile. Thereafter the seller of the articles was found, and he identified Ogasawara as their purchaser. Segawa, the hall-porter, was also summoned to be present at the identification, but it does not seem that his testimony proved of any value. At all events the murderer lost heart and confessed everything, so that the mystery is at length cleared up, and a crime to which all kinds of motives were assigned, turns out to have been an incident of a vulgar burglary.

It turns out that the murderer of Mr. Large, Ogasawara Shigesuye, was formerly

a military man. He graduated from the Non-Commissioned Officers' College (*Kyododan*) in 1880, and having served for some time in Kiushiu, was transferred to Tokyo as a second-class sergeant of artillery in the year 1883, where he remained until 1887, in which year he took his discharge. The facts fully account for the skill he showed in using his sword on the night of the murder. Several of the gashes on Mr. Large's body were inflicted during a struggle in a passage only 2½ feet wide, the banisters of a stair-case being on one side and a bed-room wall on the other. Yet the assassin's sword never touched either the wood or the plaster. It was guided throughout with unerring accuracy, and the men empanelled to form a coroner's jury arrived at the unanimous conclusion that only a skilled fencer could have used his weapon so unerringly. After leaving the army Ogasawara was employed in the arsenal at the wage of 40 *sen* daily. This proved insufficient to support himself and his family, especially as he was addicted to drink. He separated from his wife, and gradually becoming more and more embarrassed in circumstances, listened to the counsels of a newly found friend, Baba Tsunehachi, who appears to have been a confirmed scoundrel. At a drinking bout on the 8th of April, 1890, the two men concluded, at Baba's suggestion, that a short life and a merry one would be far preferable to dragging out a long existence in poverty and misery. Each had a sword-stick, and acting at once upon their new theory, they disguised themselves by partially wrapping their faces in black cloth, and set out to look for a profitable adventure. They had no idea of breaking into one house rather than another, but they happened to find themselves in the neighbourhood of the Azabu Eiwa Gakko which, from its comparatively isolated position, seemed suitable for their purpose. At this point the account differs somewhat from the facts elicited at the inquest. Ogasawara says that when they learned that the key of the safe—to which they had compelled the porter to show them the way—was in the Larges' room, they repaired thither and Baba knocked at the door. Thereupon Mr. Large opened it, probably expecting to see one of the servants. But finding an unknown man attempting to enter the room he thrust him back violently. Baba, calling out "I am a Japanese robber," aimed a blow at Mr. Large with his sword, but the weapon struck the lintel of the door and a second blow was necessary. Seeing this Mrs. Large attempted to escape from the room, but Ogasawara slashed her as she came towards him. Meanwhile the noise had roused several of the girl students, and the two burglars effected their escape with difficulty. They threw their bloody sword-sticks into the moat at Kinokuni-zaka.

This is evidently a confused and fragmentary account of what really happened. No mark of Baba's sword was visible on the lintel of the door, and it is certain that Mr. Large received two wounds on his left arm when attempting to throw one of the burglars over the banisters. Ogasawara's confession is directed to fixing the guilt of the actual assassination on Baba, whose lips are sealed by death, but the probabilities are all in favour of the theory that Ogasawara himself delivered the fatal cuts, for Baba's antecedents furnish no reason to suppose him capable of wielding a sword with skill.

Ogasawara can not be punished for this offence. The limit of time fixed by law is

ten years, and although an attempt has been made to date the reckoning from the seizure and examination of the last person suspected, the judicial officials are said to be of opinion that no extension of time can be claimed on that account. Had suspicion attached to the real murderer, the period of his liability to punishment would be much longer. But Ogasawara was never suspected. On the same plea the man escapes the penalty of the Sennen-ji murder of January 25th, 1892.

THE ECONOMICAL SOCIETY.

On the 4th instant this Society entertained at dinner Mr. Inouye Katsunosuke, Japanese Representative in Berlin, Mr. Uchida, Japanese Representative in Peking, Mr. Arakawa, Consul-General in London, Mr. Watanabe, of the Mitsui Busan Kaisha, and Mr. Ichihara, who recently returned from the West, whither he went in Baron Shibusawa's Company.

Mr. K. Inouye, in a short address, spoke of the extraordinary industrial development of Germany, which seemed not unlikely to surpass that of England or America, and of the earnest aid given by the Emperor to all manufacturing enterprises. He urged that closer relations with Germany would conduce greatly to Japan's advantage, and he spoke of misunderstandings which still exist, and which it should be the aim of an influential association like the Economical Society to remove.

Mr. Uchida referred with much satisfaction to the tendency now observable among Japanese business men to make China a field of enterprise, and he spoke also of the conviction evidently acquired by Japanese travelling abroad that China is the most important arena of Far-Eastern commerce. The "Elders" of the Business Men's Association were now paying visits to Europe and to China, which could not fail to be productive of good results. Japan's political influence in China to-day could not in some respects be compared with that of certain Occidental countries, but the speaker considered that commercial and industrial enterprise would soon become more important than politics in the Middle Kingdom. Foreign nations were evidently of the same opinion, and it was well that the attention of the Economical Society should be invited to the fact. The Siberian Railway was now finished and the great capitals of Europe were brought within three weeks' journey of Japan. Soon the time would be reduced to two weeks. Then in China the work of railway construction was proceeding apace. Before long the great trunk line from Peking to Canton would be opened to traffic. Doubtless the commercial and industrial conditions of China would be materially changed by the completion of these various lines, and a period of business activity, such as that witnessed in America, would ensue. Japan being most advantageously situated for profiting by the new situation, her merchants and manufacturers should put forth their strength and not forfeit the opportunities thus offered to them.

Mr. Arakawa said that after returning from Europe many things in Japan forced themselves unpleasantly on his observation. For example, the condition of the horses in the tram-cars and omnibuses might not shock the Japanese who were accustomed to them, but it must appear very questionable in European

eyes. In the factories, again, it was observable that the machinery was worked in a reckless manner because of the necessity of paying high dividends, which necessity arose, in turn, from the fact that shares were held by men who had purchased them with money borrowed at high rates of interest. Everything indicated the absence of any appreciation of sound economical principles such as were essential to healthy development.

Mr. Watanabe observed that the Anglo-Japanese alliance was an affair of armaments. As yet there was nothing like an industrial and commercial alliance, not could there be until the spirit of mercantile morality which begets business confidence was nurtured in Japan. Without that, the alliance had very little practical value.

Mr. Ichihara Morihito, in a short address, dwelt mainly on the fact that although Japan had begun to spin cotton and although she produced large quantities of raw silk, she did not yet seem able to command such industrial and artistic facilities as would enable her to become a producer of high-class textile fabrics on a large scale.

DEATH OF COUNT SANO.

We regret to have to announce the death of Count Sano, which took place at his residence in Tokyo on the 7th instant at 3.30 p.m., in the 81st year of his age. For some years the Count had been in a very feeble condition. Each winter brought an access of lung trouble, supplemented by a gastric affection, and the recent sudden arrival of cold weather produced a condition soon recognised as dangerous. Count Sano held the office of Privy Councillor at the time of his death. He had long been a very prominent figure in Japan, occupying a leading place in the fields of charity and art. He is regarded as the founder of the Japanese Red Cross Society, and he was unquestionably the founder and chief patron of the Fine Arts Society. He held the position of president of both societies for many years. A native of Saga, he began to occupy official posts from the year 1870, and in 1873 he was appointed chief of the Japanese section of the Austrian Exhibition, being nominated simultaneously Japanese Representative at the Austro-Hungarian and Italian Courts. It was from that time that he began to interest himself prominently in art matters, and it was during his visit to Austria that he obtained a knowledge of the working of the Red Cross Society. During the Satsuma Rebellion of 1877, he obtained permission to organize the *Hakuai-sha* (Society of Mercy), the embryo of the Japanese Red Cross. He was the recipient of many Orders from European Sovereigns, and the highest official post occupied by him in his own country was Minister of Finance (1880). His patent of nobility was granted to him in 1887 as a Viscount, and in consideration of his services in connexion with the Red Cross Society in the war of 1894-5, he was raised to the rank of Count.

The Committee of the Red Cross Society have decided that the funeral of the late Count Sano shall be at the charges of the Society. The date was fixed for the 12th instant, the cortège leaving the residence of the deceased in Sannen-cho at 1 p.m. and proceeding to Aoyama. His Majesty the Emperor has raised the Count to the first rank of the Second Official Grade.

CHINESE NEWS.

Monday, Dec. 8.

The hitherto Viceroy of Yunnan and Kweichow, Wei Kwan-ton, has been appointed it is said, to be Viceroy of Liang-Kiang, so that Chang Chih-tung will return to his old post. It was not supposed that Chang would continue to hold the Viceroyalty of the two Kiang, but the general impression seems to have been that only a Hunan man could discharge the duties of the position satisfactorily. We do not know whether Wei Kwan-ton has that qualification. The telegram to the *Jiji Shimpō*, from which we quote, alleges that Chang returns to Wu-chang because no other official is willing to be his successor there. The foreign public will be anxious to learn something about Wei Kwan-ton.

The sufferers by the floods in the Yellow River have been granted a sum of a hundred thousand taels, fifty each, from the Imperial Household Department and the Board of Finance.

Viceroy Yuan returned to Tientsin on the 4th instant, and was to make the usual visit to Peking on resuming the duties of the viceroyalty. The Governor of Hunan, Yu Lien-san, has been relieved of the post, and will probably be succeeded by Wu Chung-li. This change is presumably a result of the Chenchou murders, which has certainly been followed by results more drastic than those attending any previous outrage of a similar character. It may be mentioned here that the Chinese authorities have agreed to pay a sum of twenty thousand dollars to the family of Mr. Evans, the police-officer recently killed in Southern China.

The affair of the flag-hoisting at the Kai-ping mine illustrates the complexion an incident may assume in public estimation when its outlines alone are known telegraphically and when imagination is left to fill in the details. We were led to imagine that an insult had been offered to the British flag and that the direct intervention of Sir Ernest Satow was needed to redress the wrong. But it now appears that a certain Mr. Wynne, who is described by Mr. Yang, director of the E. E. and Mining Company, as so bad that he can not be "lawfully talked with," caused Yang's dragon flag to be lowered. Thereafter, writes Mr. Yang, "the district officer, Yi, of Lanchow, came to me, so I consulted with him and agreed that as Tientsin was already handed over to the Chinese and besides the Company partly belongs to the Chinese, and moreover as meetings were being arranged in the immediate future between the Chinese and foreigners, therefore the flags of both countries may be hoisted so as to have a good show. Mr. Yi and I made some speeches by way of celebrating the hoisting of the flags, and all Chinese and foreigners of the Company were very glad too." This "gladness" was not of long duration, but Yang's account shows that his offence was not of a very grievous nature.

Tuesday, Dec. 9.

Wei Kwan-tou, the new Viceroy of the two Kiang, has been appointed Southern Superintendent of Trade, which post is usually associated with that of the Viceroy officiating at Nanking.

The *Jiji Shimpō's* Peking correspondent says that three thousand men have been selected from the Eight Banner Corps to form the nucleus of the force that is to be

organized by Viceroy Yuan Shih-kai after foreign methods.

There is said to have been received in Peking a telegram from the Chinese commandant in Mukden, stating that owing to the violence and misconduct of Cossack soldiers in that city, various disturbances have arisen, and it is impossible to preserve order.

In the *Asahi Shimbun's* correspondence we find a statement that the Empress-Dowager has sent to Viceroy Yuan a picture painted by herself and a suit of garments. This gift, we presume, is in connexion with the Viceroy's resumption of official duties after the period of mourning for his mother.

Wednesday, Dec. 10.

It is now stated that the appointment of Wei Kwan-chou to be Viceroy of the two Kiang was made entirely without consulting Viceroy Chang Chih-tung, the present occupant of the post, and that Chang is about to return without delay to Wu-chang, much chagrined at the turn things have taken. We do not yet attach credit to this intelligence, first because it is altogether at variance with previously received news, and secondly because there appears to be very little probability that the Throne would deliberately put a slight upon Viceroy Chang. Should the facts be confirmed, they will have considerable importance.

Thursday, Dec. 11.

News continues to arrive that a very unsettled state of affairs exists in Manchuria. A telegram to the *Jiji Shimpō* represents the Commandant at Mukden as telegraphing, to Peking that Kan Hō-fu (?), who heads the insurgents in north Shingking, is now the leader of a hundred thousand men, and has obtained possession of the most important points in the neighbourhood of Mukden. The telegram is somewhat obscure, but it seems to imply that this Kan—whose name is very doubtful—has high views and that he has proclaimed himself sovereign. The Authorities in Peking are said to be much perturbed, and so they well may be, for in her present condition China has certainly no competence to deal with a powerful insurrection in Manchuria. It is generally said that the main result of the war between Japan and her neighbour eight years ago was to place China at the mercy of foreign Powers. But it may be said with greater truth that a main result of the celebrated Protocol of 1901 is to place her at the mercy of domestic insurgents.

The second Article of the Treaty of Shanghai—the ratifications of which have to be exchanged on or before the 5th of next September—lays down that China shall take steps to provide a uniform national coinage which shall be legal tender throughout the empire. Plainly the object of the Article is to correct the anomaly and inconvenience resulting from the fact that the so-called unit of currency in China, namely, the tael, has a different value in almost every province. But some people are disposed to read into the treaty a stipulation that the new coinage shall be linked to gold by a fixed ratio, and that the ratio shall be preserved by limiting the supply of coins to the demands of trade.

It is refreshingly wonderful to find such theories gravely advanced. Probably the publicists responsible for the suggestion had in mind the silver subsidiary coins of England, which are arbitrarily made to circulate at a gold price far in excess of their intrinsic value. But the shilling or the half-crown

retains its fictitious gold price solely because it can always be exchanged for gold at that price. If twenty shillings did not buy a sovereign, each of these silver tokens would at once fall to a fraction of its present value. There would be no corresponding means of maintaining the gold price of a Chinese tael. The idea of giving it a fictitious value by limiting the number of coins in circulation is wholly unpractical. If China wants to have a currency stable in terms of gold, she must make its units such that they will be exchangeable for a fixed amount of gold at a fixed ratio; in other words, she must adopt the gold standard. That is the one and only way. She is now unwittingly revenging herself upon the nations that have condemned her to pay a heavy indemnity, for the millions of silver taels that she has to hand over to them periodically, are the means of throwing a quantity of the white metal upon a market having no use for it, and the consequence is its inconvenient depreciation. By the time that the whole amount of 450 million taels plus interest has been absorbed by the Occident and Japan, a great many merchants engaged in the Far Eastern trade will have new reasons for cursing the Boxer outrages.

Friday, Dec. 12.

The project of a lottery for the purpose of raising funds to pay off the Indemnity, is said to be again on the tapis in Peking. It has been submitted to the Throne by a Chinese dignitary whose name is undecipherable as transliterated in the *Jiji Shimpō's* telegrams, and the Empress Dowager having given her hearty approval, the Boards of Administration and Revenue were consulted with a similar result. We do not see why this plan should not be adopted. It is very much in vogue in Europe. There are Ottoman Government premium bonds, Servian bonds, Panama bonds, Italian Red-Cross bonds, Congo Free State bonds, various Corporation bonds, Egyptian Foncier bonds, and so on. Why should not China join the galaxy. Perhaps the chief difficulty is that her people have not sufficient confidence in the honesty of their officials to subscribe for tickets in the drawing. That, however, will be largely a matter of example, and on the other side stands the proverbial spirit of gambling said to permeate the Chinese people, though, for our own part, we doubt whether their *morale* is one bit lower in that respect than the *morale* of certain European nations. At all events China is much too practical to suffer the question of dignity or sentiment to stand in the way of any such project. In 1881, when 180 Japanese paper *yen* could be bought with 100 Mexican dollars, a well known English banker elaborated and submitted to the Treasury in Tokyo a lottery scheme for providing hard cash to restore specie payments. He had such confidence in the success of his proposal that he asked for nothing except the loan of a million dollars' worth of *satsu*. He trusted to the appreciation of the latter for his own reward. But the Japanese Government would not entertain the project for a moment. They considered that the national credit would be fatally lowered by recourse to such an expedient. China will probably be less fastidious.

It is reported that Taotai Shêng memorialized the Throne in favour of granting a concession for a railway from Szechuan to Hankow, but the application was refused on the pretext of some objection made by

British subjects. This is exceedingly vague. Szechuan is a province with 80 millions of inhabitants and covering an immense area. From what place in it is the railway projected, and who are Shêng's proposed concessionaires? At all events, if rumour speaks truly, Shêng's suggestions are no longer likely to find favour in Peking.

Viceroy Yuan's entry into Peking on the 9th instant seems to have been a very imposing affair. He travelled by special train and had a retinue of several hundreds.

There is a rumour that Viceroy Chang has been proposed as Yung Lu's successor in the presidency of the Board of War. But objections are said to have been made, at any rate Yung Lu still holds the post, though the state of his health makes him desirous of resigning. Meanwhile memorials are said to have been presented to the Throne impeaching Chang, and declaring him unfit to discharge the duties of Viceroy; a rather belated charge, surely.

ENGLISH PUBLIC OPINION AND THE SHANGHAI AFFAIR.

It does not at all surprise us to learn from the *Asahi's* London correspondence that the English press writes very strongly about the affair of the evacuation of Shanghai, and points out that China's conduct must be interpreted either as an indication of a desire to give Germany a better place than England, or as an evidence of distrust of Great Britain. In either case, the leading papers are represented as saying, the incident constitutes an insult to England.

But why, we wonder, should the English press have taken up the matter at this particular juncture. The facts, including Prince Ching's extraordinary procedure, were all before the British public more than a month ago, and they evoked pretty plain-spoken comments from English newspapers in the Far East. In England, however, the incident appeared to be treated with comparative indifference. What has now happened to bring the matter again upon the *tapis*? Possibly a Blue Book has been published, though the time for that appears to be premature.

And, again, why should the blame be laid on China only? According to the intelligence received here, it was not China that took the initiative in suggesting the presentation of a Yangtse-Valley guarantee to Germany and France. The Peking statesmen merely adopted a course suggested, if not dictated, to them. This looks like the old story. Concessions are forced from China by *A* at *B's* expense, but *B*, instead of exacting reparation from *A*, holds China responsible.

There is one thing to be observed with reference to China's action, namely, that in giving this guarantee to Germany and France without England's knowledge, the Peking statesmen doubtless hugged themselves in the belief that they were pursuing their crafty and traditional policy of playing off one European Power against another. Great Britain, however, declines to lend herself to that sport for China's delectation and advantage. We sincerely sympathise with China in her difficulties, but her paradoxical position is that the more devious the route she adopts, the quicker it will lead to her ruin.

FORMOSA.

The Governor-General of Formosa reports extensive military operations against the insurgents in the interval between the 14th of October and the 2nd of December. We can not identify the locality. Formosan geography has become a veritable puzzle. When the Chinese ideographs of place-names are given, it is generally possible to identify them; but the telegraph does not transmit ideographs, and one is compelled to rely on the Japanese pronunciation of local terms. These operations are said to have been in the neighbourhood of "Taikoku-san," a mountain unknown to us under that name. The losses on the Japanese side were 19 killed and 71 wounded, among the former being one officer, and among the latter five. Nothing is reported as to the casualties on the side of the insurgents, but it is evident that the fighting must have been tolerably severe. The affair was not the result of any immediate attack by the rebels. It appears to have been a regularly organized expedition, having for object the destruction or intimidation of all the rebels in the district directly concerned.

This fighting in Formosa is a miserable affair for the officers and soldiers engaged. Men lose their lives or suffer great hardships without attracting their country's attention. The island has cost Japan heavily, but she will get it well in hand ultimately.

"C. L. B."

Whatever be the issue of the house tax controversy, it will be remembered as having elicited a monumental illustration of journalistic quibbling. Some time ago the *Kobe Chronicle* described the "kernel of the dispute" to be a "claim by the leaseholders that the Japanese Government, in return for what were described by Mr. Bertie, the English negotiator, as numerous and important concessions, should abide by the *status quo* as regards property in the Settlements." Now what does that mean? What can it possibly mean except that certain concessions were required and obtained from Japan in return for certain concessions made by England? No statement of a bargain could be clearer; yet because we interpreted the *Kobe Chronicle* as alleging that exemption from house tax had been expressly purchased by the British negotiators and deliberately sold by the Japanese Government, the *Kobe* journal charges us with "the customary perversion," and having quoted its own language as above, has the exquisite temerity to add:—"There is no word, it will be seen, of any express purchasing or exemption from house-tax, which would have been ridiculous, but of a general claim that in return for the concessions made on the British side the Japanese agreed to the maintenance of the *status quo* as regards property in the Settlements." Quibbling could not be carried any further. The whole question is the question of the house-tax; or, to put it in broader terms, the question whether houses enjoy under the treaty the same exemption as is guaranteed to land. It has been again and again claimed that the British negotiators had houses in view as well as land when they stipulated for the maintenance of the *status quo* as regards property, and the *Kobe Chronicle*, discussing the house-tax problem, assigned to foreign lease-holders the claim that the maintenance of the *status quo* was agreed to by Japan in return for numerous and im-

portant concessions on the English side. Yet it has the magnificently disingenuous effrontery to complain of being the victim of perversion because it is interpreted as saying that the British negotiators purchased the concession of exemption from house tax and that the Japanese sold it. Is there something in the air of Kobe that encourages or educates the shuffling, wriggling, prevaricating, tortuous kind of journalism for which the *Kobe Chronicle* is conspicuous? Apparently not, for no other Kobe newspaper has ever made itself equally contemptible.

Of the same pattern is our Kobe contemporary's manner of treating the argument that no State can be held to have divested itself of the right of adjusting taxation so as to meet public exigencies unless a compact explicitly agreeing to such divestiture is producible. It attempts to evade that plain axiom by pleading that States do actually divest themselves of the right by treaty, and that Japan has explicitly divested herself of it with regard to lease-hold property in the former settlements. Of course they do and of course she has. But that is not the point at all and the *Kobe Chronicle* knows well that it is not the point. The point is that if houses, which are not legally included in "property held under land-leases," were intended to be included in such property, the fact must have been specially mentioned, and that, failing such special mention, the treaty can not possibly be read as depriving Japan of a right fundamental among the attributes of sovereignty.

THE STRANGE STORY.

Chief Public Procurator, Mr. Ikegami, of the Kobe Local Court, has made full inquiry into the facts of the strange story recently published by the *Mainichi Shimbun* of Osaka and subsequently by the *Yorozu Choho* and the *Niroku Shimpō* of Tokyo, the two latter journals adding the name of the person against whom the villainous charge was preferred as well as the name of the firm to which he belonged. The Penal Code of Japan does not, it is said, make explicit provision for the punishment of such an act, though we should have thought that it would fall under the general heading of offenses against good morals. At any rate Mr. Ikegami concluded that the story should not be left uninvestigated. He therefore employed the police to make inquiries, and the result of a thorough investigation is that the tale is proved baseless from point to point. The Chief Procurator tabulates the results of his inquiries under seven heads, which we can not reproduce. They show, to put the matter briefly, that the story was a pack of lies from start to finish, and that even the perpetrators and the place of perpetration disappeared under the light of examination. The injury suffered by one of the actors in the drama, the clog-maker that did the good Samaritan, the Chinese witness, the bundle of 300 *sen*, the cook that ran away.—everything vanished into thin air, and nothing now remains except the newspapers, against three of which, the *Niroku Shimpō*, the *Yorozu Choho* and the *Hochi Shimbun*, legal proceedings have been instituted. We sincerely hope that they will suffer for recklessly lending their columns to circulate one of the most brutal libels ever printed.

CHINESE LABOUR IN THE PHILIPPINES.

It appears that the capacities of the Philippines can not be developed without the assistance of Chinese labourers. Several cases occurred recently of British capitalists who were willing and anxious to start important enterprises in the islands, but who were deterred by the untrustworthiness of native labour. The Filipinos are at once lazy and capricious. They are content to work for a subsistence, not to better their condition, and they insist upon abandoning their work on every occasion of a traditional holiday or festival. Wages have risen enormously since the American occupation commenced. It is alleged that a house-servant who was content with \$6 a month under the Spanish regimen, now expects from \$15 to \$30. Moreover, the Filipinos appear to know that they have a good thing and to intend to keep it as long as possible. Some time ago an American company was organized for the purpose of importing a thousand *jinrikisha* into Manila, and having them drawn by Chinamen, if possible, the idea being to relieve the citizens from the impositions of the native cab drivers. But the latter fell into a state of vehement excitement and swore that they would run down the *jinrikisha* if the latter plied in the streets, so that the project had to be abandoned. In short, Chinese are badly wanted, yet the laws restrict their coming. Professor Jenks, who occupies the chair of political economy and politics in Cornell University, and who recently visited the Philippines, has written a report advocating the admission of Chinese under "a system which would prevent them from acting as merchants and peddlers, since through their greater thrift and business acuteness, they would gradually draw the careless, improvident Filipino into their debt to so great an extent as to seriously hamper the possibilities for his development." That is surely an interesting statement. We are accustomed to regard thrift and business acumen as good qualities, and to think their exercise might prove a useful object-lesson to carelessness and improvidence. But, according to the Cornell Professor, the Filipinos must be protected against contact with a higher type of person lest the possibilities of their development should be hampered. How are they to be developed, we wonder. Are they to be kept apart from the American citizen also, who surely does not stand lower than the Chinaman in thrift and business acumen? Probably the happiest and most fortunate thing that could happen to the Philippines would be to be peopled by Chinamen under American rule. But the Chinaman is not to have a show.

AN EDUCATIONAL CELEBRATION.

In July 1872, there was issued by the Dajo-kwan—as the Cabinet of those days was called—an edict of very great importance from an educational point of view. Up to that time education had been virtually limited to the military class, its advantages in the case of civilians not being recognised. Occasionally the Tokugawa Government had shown a disposition to adopt a more liberal policy, but on the whole it may be said that, prior to the Restoration, neither the farmer, the artisan nor the merchant was supposed to have any book learning. The abolition of feudalism, however, involved a radical departure from this theory of educational exclusiveness, and the edict of 1872 directed that all classes of the people should cultivate their minds, and that elementary schools for

the instruction of the whole nation's young folk should be organized in every part of the empire. This, the educational enfranchisement of the nation, is naturally regarded as an event of prime importance, and on the 7th instant a celebration was organized in Tokyo to signalize the thirtieth anniversary of the great event. There were present about a hundred persons prominent in the educational world, among them being Baron Kikuchi, Viscounts Okabe and Fukuoka, Baron Kato Hiroyuki, Mr. Kubota Yuzuru, Mr. Tsuji Shinji, etc. Baron Kikuchi delivered an interesting address, in which he explained that the framers of the edict of 1872 had contemplated the division of the whole empire into eight educational districts, each provided with a university of a specialized character, as a university for national philosophy, one for law, one for literature, one for mathematics, and so on. The technical schools now in existence did not form part of the 1872 scheme, but, on the other hand, of the eight universities then planned, only two had actually been organized. The original scheme had been that in each of the eight university districts there should be 32 middle schools, or 256 in all. The number now actually in existence, official and public, was 222. As to elementary schools, the framers of the edict of 1872 contemplated a total of 53,760, but the latest statistics showed that the actual number now open does not exceed 27,076. This part of the scheme, then, was very far from having been realized. The attendance of children of school-going age at elementary schools was 93.75 per cent. in the case of boys and 81.84 in the case of girls, being an average of 88.07, which figure, though still below what was desirable, nevertheless afforded ground for congratulation.

Baron Kato Hiroyuki, in a speech of a purely historical character, recalled the enlightened policy pursued by Eto Shimpei in educational matters, though unhappily he died the death of a rebel, and spoke of the great difficulties that educationists had to encounter in those early days.

There were several other speeches and the meeting lasted from 9 a.m. to 5 p.m. with an interval for luncheon.

LOCAL AFFAIRS IN ENGLAND.

The local debt in England per head of population is £10, according to the latest returns. If the same state of affairs existed in Japan, the communes would owe about 4,200 million *yen*. Another striking fact is the rapidity of the debt's growth in England. In 1875 the people owed only £4 per head—exclusive of the State's debt. Thus in little over a quarter of century the local indebtedness has more than doubled. The fact is that the various towns have been supplying themselves busily with electric lights, water works, harbours, piers and such things. These productive enterprises account for 48 per cent. of the debt. And there is evidently not the least hesitation in undertaking them, for the loans raised by the localities during 1901 aggregated some twenty-nine millions sterling, by far the largest figure on record.

The annual report of the Local Government Board, from which these returns are taken, shows that the "tramp" is quite a professional expert in England just now. He moves about the country, enjoying constant change of scene, and getting bed and board at various workhouses in succession.

This state of things has become so flagrant that a remedy is proposed in the shape of making the workhouse really a workhouse, not a play-house, and requiring that every vagrant who applies for board and lodging must do a genuine day's labour in return.

Beer-drinkers must have been considerably shocked by this latest report of the Local Government Board. For it showed that out of 396 samples of beer analysed by the experts of the Board, no less than 213 were condemned on account of the presence of arsenic. Considering the immense consumption of beer in England, such figures are very startling.

KOREA.

A telegram to the *Kokumin* says that Li Yong-ik is still finding refuge in the Russian Legation, and that the Ministry are urging the Court to punish him, whereas he himself is labouring to recover his political influence. It will be observed that there is still no definite statement of the offence charged against Li.

Li Yong-ik is not taking his discomfiture without a struggle. Either by his contrivance, or as a consequence of genuine investigations, it has been discovered that his political rival, Li Keun-thaik, chief of Police, had plotted an invasion of the Palace with Japanese soldiers. Thus Li Keun-thaik finds himself in quite as tight a place as that occupied by Li Yong-ik.

That is the latest story. But whence could Japanese soldiers have been obtained for the purpose of invading the Palace? Seoul is a veritable seed-plot of intrigue and sensational nonsense.

The latest about Li Yong-ik is that his hiding place is the house of a German lady! From thence he continues his struggle to return to power, his present plan being to ally himself with the Min faction against the Om. So far as the public can judge, the honours are about even between the disputants, for the other Li,—Li Keun-thaik—chief of police, who is supposed to be Li Yong-ik's great rival, has been removed from office. The commotion continues, however, and its continuance is a tribute to the influence that Li Yong-ik wields in spite of his partial discomfiture.

The two Kims, who were charged with having plotted to make away with Korean refugees in Chiba and Kobe, have both been tried before a Chiba court. It is not clear how the Kobe plotter, whose would-be victim was Pak Yong-hyo, came within the jurisdiction of the tribunal before which the Chiba suspect, who wanted to kill Li Chun-yong, was arraigned. But the issue of the trial is that one of the men was acquitted on the ground of insufficient proof, and the other was sent forward for trial on a charge of intimidation with violence. Both men gave fictitious names, but they were identified as "Kims" who had graduated at the Military College in Tokyo and were employed as teachers at the Officers College in Seoul.

LAWN TENNIS IN TOKYO.

On Wednesday the final in the Ladies' Singles was played in Tokyo between Miss Squire and Miss Ruth Squire, the former ceding 25 points in 90. At first Miss R. Squire held her own, but ultimately she was outclassed, the game ending, Miss Squire 90,

Miss R. Squire 80. Miss Squire thus wins the tournament, a result altogether consistent with the relative merits of the contestants.

The Handicapping Committee asks us to draw the attention of players to the extraordinary delay that is taking place in playing off the rounds, especially in the case of the mixed doubles. These were to have been finished completely by the end of November, but as yet only 5 games have been played out of 11. Unless more expedition is used, winter weather will certainly interrupt the progress of the tournament, which would be very unfair to those that have observed the rules and played their rounds in good time.

NOTES ON CURRENT EVENTS.

The troubles of the Hongwan-ji seem to be growing more and more acute. They have proved so unmanageable by the priests themselves that the Chief Abbot, Count Otani Koyei, has himself come to Tokyo for the purpose of soliciting the intervention of Count Inouye. It has apparently been a difficult matter for Count Otani to take this step, since Count Inouye, if he accepts the mission assigned to him, will treat the whole question in a manner much too drastic for the tastes of those principally implicated. Indeed the delay in obtaining the benefit of the Count's insight and advice has hitherto been attributed—with seeming truth—to the Lord Abbot's unwillingness to bring within the purview of investigation any part of his own personal conduct or the management of his domestic affairs. But since extravagance in the Abbot's household is said to be one of the main causes of the great temple's financial embarrassment, there would not be the smallest chance of getting Count Inouye to intervene unless he were authorized to deal with the *fons et origo mali*.

Tokyo journals state that the Government has intimated its willingness to purchase two private railways, namely the Kobu line (Shinjuku to Hachioji) and the Nishinari line (Osaka). The Minister of State for Home Affairs is said to have asked the managing directors of these roads to consult the shareholders with regard to the question and the price. But the shareholders are pretty sure to name deterrent figures. In this country it is generally sufficient for the owners of property to know that a potential purchaser is in the market. They at once "open their mouths so wide," as the Chinese say, that no reasonable quantity of food could suffice to fill them. It appears to be quite unknown why the Government has taken this step, and we need scarcely note that some of the opposition newspapers do not hesitate to infer wholesale corruption of members of Parliament, among these journals being the *Jin-min*, organ of the Kwanto section of the *Seiyukai*. Whatever the truth about the railways may be, it is certain that the character constructively assigned to their countrymen by several Japanese journals is about as bad as bad can be. These newspapers speak of Japanese politicians as persons always ready and willing to be corrupted, and of Japanese statesmen as persons always ready and willing to resort to corruption.

The Prince Royal of Siam is expected to reach Yokohama by the *Empress of China* on the 15th or 16th instant, and will spend about a month in this country.

The Nippon Yusen Kaisha's steamer *Bingo Maru*, which reached Nagasaki on the

6th instant, carried specie to the amount of £220,000, the proceeds of the sale of a portion of the recently negotiated five-per-cent. bonds.

Mr. Okura Kihachiro, who has been travelling in China on business connected with mining, left Shanghai on the 6th instant for Japan by the *Hakuai Maru*. Mr. Okura's journey extended to Hankow, but we have no intelligence as to its results.

His Excellency Baron d'Anethan and Madame la Baronne arrived safely in Nagasaki on the 3rd instant by the Norddeutscher Lloyd S.S. *Bremen*, and continued their journey at once for Tokyo, where their arrival will be most heartily welcomed by the foreign and Japanese communities.

Moscow is to have a Russo-Japanese Society as Tokyo has. The object of the association in the Russian city is to develop commercial relations between Japan and Russia. One of the first steps will be to establish at Slonim in the province of Minsk a mill for weaving Japanese raw silk, and that will be followed by endeavours to promote the exportation of Russian petroleum, sugar, wheat and manufactured goods to Japan, as well as the importation of silk, tea, porcelain and other Japanese articles into Russia. The organization of this Society is a feature of the policy inaugurated by Russian statesmen some months ago. They saw that the best way to dispel mutual prejudices injurious to Russo-Japanese relations was to bring the two nations into close business contact. Their success is to be desired. But does it not sound strange that Japanese raw silk should be carried all the way to the province of Minsk for manufacture?

Russia has decided to subsidise a new line of steamers between Helsingfors and the Tyne. The vessels are now in process of construction. When the service is fully established, a steamer will arrive at Newcastle every Sunday. A main part of her cargo will be Finnish butter, should the forecast of the projectors prove correct. This project is another example of the disposition alluded to by the President of the Nippon Yusen Kaisha in his recent speech, the disposition of modern Governments to encourage maritime enterprise at the charges of the State.

It must fill Yokohama residents with envy to read the records of the Shanghai Mixed Court and to learn that a coolie master was fined twenty-five dollars for allowing his men to make such a noise as to be a nuisance to the neighbourhood. Mr. Troup was the prosecutor, and doubtless the people living in his vicinity feel very grateful to him. The laws of Japan give a householder the right to complain of any nuisance constituting what is called *annin bogai*, or an obstacle to sound sleep. But noises during the day-time are not restrainable, so far as we know. At any rate we have never heard of any prosecution under that article of the Code, though noises of the most strident nature are common enough in Tokyo, for example, and in other big Japanese cities also. Osaka must be a pleasant place for anyone attempting to sleep after daylight, when a thousand steam whistles begin to summon employees to the factories. But probably the law would not admit the legitimacy of any attempt to sleep after daylight.

A telegram to the *Asahi*, confirmed by Reuter, says that the United States

Government has decided to adopt the gold standard in the Philippines. That is a natural step, but it adds another link to the golden chain that is being forged around China. The term "Middle Kingdom" is now assuming a new significance. Is there any financier in China capable of making gold the currency of the huge empire? It would be a difficult task, but it will have to be undertaken sooner or later, and the sooner the better.

Sir Donald Makenzie Wallace invited the editors of and contributors to the Supplement of the "Encyclopædia Britannica" to a banquet in the Grand Hall of the Hotel Cecil on the 21st of November. Sir Donald was the original editor-in-chief, but after the work had all been planned and organized, he had to abandon it on account of ill-health, after which he accompanied the Prince of Wales on his grand tour. The gathering in the Hotel Cecil must have included many distinguished men, and we may look forward to an interesting account in the columns of *The Times*. This has been a great enterprise. The number of volumes, originally estimated at 5 or 6, grew ultimately to 11, including one volume devoted wholly to maps.

The *Maha Chahrkri* arrived in Yokohama on the morning of the 8th. The novelty of seeing a Siamese war-vessel in these waters has invested her movements with much interest. A reception committee has been organized in Japan for the purposes of the Prince Royal's visit, the chief of the Committee being Count Toda.

We are informed that the following telegram was received in Yokohama from Chicago on Wednesday evening:—

"Government rules bonded teas dutiable."

A New York jury has had the difficult task of determining whether a newspaper was justified in charging a musical composer with plagiarism. The conductor of the Pittsburgh Orchestra, Mr. Victor Herbert, was denounced by the *Musical Courier* for producing an "agglomeration of puerile piracy." He brought action for libel and obtained damages to the extent of fifteen thousand dollars. But what is plagiarism where music is concerned? How is it to be proved? Certain musical experts being called for the defence, declared that they "felt" such and such a piece to be a reproduction of such and such a morceau by an old master, and such and such a phrase to be some one else's. But the feelings are poor evidence, not very far removed from the imagination. Mr. Herbert appears to have owed his substantial damages to the intemperate language used by the *Musical Courier* rather than to the accusations preferred against his musical originality.

It is announced that Professor John Milne, F.R.S., and Dr. J. L. Janson have been appointed Honorary Professors of the Imperial University. We had occasion recently to comment on the eminent services rendered to Japan by Dr. Janson, and it is quite unnecessary to speak to a foreign audience in Japan about Professor Milne's reputation. The honour now bestowed on him will be heartily welcomed by all nationalities represented in this country. Dr. Janson, we believe, intends to settle in Korea and there carry on the work in which he was engaged while in Tokyo. Professor Milne has his residence in the Isle of Wight, and he continues his scientific researches as

actively and enthusiastically as ever. His project of a belt of seismographical observatories round the world has not yet matured, but we should hope that public opinion will grow up to it.

Major-General Fukushima has returned to Japan. Captain Azuma, who was with him throughout his illness, says that the attack came on while the Major-General was travelling by train, and that it became so severe that he had to be carried to the Umballa Hospital. Nothing, adds Captain Azuma, could exceed the kindness and attention shown by British officials, from the Viceroy downwards. Surgeon-General Whitehead, who had been appointed to the highest medical post in India, and who was just about to leave Umballa for the purpose of assuming his new duties when Major-General Fukushima arrived there, postponed his departure and remained at the Hospital until the Major-General was pronounced convalescent. The malady seems to have been very painful, and for a time the patient's condition was precarious. He has not yet recovered completely.

Japanese newspapers speak enthusiastically of a repeating pistol invented by Lieut. Hino of the Army. It is called *jido-pistorn*, or "automatic pistol," and the description is that by utilizing the force of recoil all the processes required for repeating power are achieved, and every symptom of shock to the hand of the holder is removed. Eighty bullets per minute can be discharged, and the effective range is said to be a thousand metres. This sounds very formidable, and unless there is some gross exaggeration Lieut. Hino is to be heartily congratulated.

On the 15th instant the Matsumoto-Shiojiri section (86 miles) of the Central Railway was opened to traffic. Shiojiri is in the centre of Shinano. It is the place where the three midland roads meet, namely, that from Shinonoi in Echigo on the north, that from Nagoya on the south and that from Shinjuku in Tokyo (*via* Hachioji and Yamanashi) on the east.

A telegram received in Tokyo announces that Mr. J. Gram has been chosen to act as umpire in the House Tax Arbitration. Mr. Gram was formerly a Minister of State of Norway and is now a Governor of a Province. It appears from this intelligence that the efforts of the Japanese arbitrator to have an English Lord Justice, or an American Justice of the Supreme Court named umpire, have failed.

THE OBLITERATION OF FINLAND.

Papers received by the English mail contain a Helsingfors telegram dated October 18th which said:—"A colossal statue of the late Elias Lönnrot, the collector and editor of the great Finnish epic, the *Kalevala*, was unveiled to-day in Helsingfors in somewhat peculiar circumstances. The Finnish Society of Literature applied some time ago to the Governor-General for permission to unveil the statue with the ceremonies usual on such occasions, and the Governor-General granted his permission on condition that all speeches should be previously submitted to him, and that the Finnish National Anthem should not be sung. This is the first time that the National Anthem has been formally forbidden. Neither of these conditions being acceptable, the society preferred to unveil the statue with no ceremonies whatever. In the course of the day a great number of wreaths from all parts of Finland were deposited at the statue, but there was no speech nor any singing.

THE DIET.

Monday, Dec. 8.

The Diet assembled on the 6th instant and the Lower House proceeded at once to elect candidates for the post of President. The Progressists, whose demeanour towards the *Seiyu-kai* is remarkably conciliatory, supported the latter's candidate so that Mr. Kataoka Kenkichi received 337 votes, an unprecedented number. For Vice-Chairman Mr. Motoda Hajime's name came first with 270 votes. As for the other votes at the first ballot, they were

Dr. Hatoyama	44
Mr. Hayashi Yuzo	38
Mr. Kato Takaaki.....	38
Mr. Hara Kei	36
Mr. Kono Hironaka	27

A second ballot was then taken to determine two names in addition to that of Mr. Kataoka, the result being:—

Dr. Hatoyama	189
Mr. Hayashi	175
Mr. Hara	154
Mr. Kato	144

Thus the candidates to be sent up to the Emperor in order that His Majesty might name the President were Messrs. Kataoka, Hatoyama and Hayashi.

In the case of the Vice-President also the Progressists voted for Mr. Motoda, and the other two candidates ultimately obtained were Mr. Takata Sanaye (182) and Mr. Sugita Teiichi (180).

On the 7th instant the Emperor nominated Mr. Kataoka to be President and Mr. Motoda to be Vice-President.

No other business was transacted by the Lower House on the 6th, but the Peers made the usual sectional organization.

Wednesday, Dec. 10.

The House of Peers did not meet on the 8th instant, and the House of Representatives confined itself to business of organization. Mr. Kataoka Kenkichi spoke a few words, acknowledging the honour that the House had paid him in re-electing him to be its President, and promising to bring diligence and sincerity to the discharge of his duties. Mr. Motoda Hajime returned thanks for the corresponding honour of the Vice-Presidency. He was even more brief than Mr. Kataoka.

Mr. Tominaga, a representative of Shizuoka, who enjoys the distinction of being the oldest member of the House, in tale of years, congratulated the President and Vice-President on their election. The House, he said, had already received proof of their competence for the high posts to which they were now re-appointed, and had elected them by an over-whelming majority, confident that they would bring to hear on the important questions awaiting future discussion all the ability they had shown in the past.

The sectional divisions were then effected, but a change was made in the manner of appointing Heads and Managers of Sections. Instead of proceeding by the method of election, the seniors in age were nominated Heads and the youngest were selected for Managers. In almost every section the *Seiyu-kai* had a majority.

The *Jiji Shimpō* mentions that the custom has now been definitely adopted of assigning a separate room to each coterie of members aggregating ten or upwards. It appears that there are six coteries satisfying that condition, namely:—

	Members.
The <i>Kensei Hon-to</i> (Progressists)	92
The <i>Teikoku-to</i> (Imperialists)	17
The Independents (<i>Mushozoku</i>)	36

The <i>Seiyu-kai</i>	192
The <i>Jinin-kai</i> (1902 Society)	26
The <i>Dōshi-kai</i> (Fellow-thinkers).....	13

Among these the *Kensei Hon-to*, the *Teikoku-to* and the *Jinin-kai* have rooms downstairs, the others being accommodated upstairs. Each room is fitted with a telephone.

From the same source we obtain the following particulars as to the occupations of the members:—Agriculturists (120), merchants (33), manufacturers (2), mine-owners (7), brewers (7), physicians (9), bankers (19), officers of companies (10), principals of schools (2), school inspector (1), temporary school teacher (1), journalists (9), barristers (51), officials (9), authors (2), publisher (1), warehouse-owner (1), inn-keeper (1), manager of emigration company (1), druggist (1), transport agent (1), miscellaneous traders (9), without employment (78).

The official opening took place on the 9th instant at 11 o'clock, the Emperor presiding in person.

The speech from the Throne was as follows:—

We hereby perform the opening ceremony of the Imperial Diet and inform the members of the House of Peers and the House of Representatives:—

That the relations of our Empire with the Treaty Powers have grown in intimacy, and that, to our profound satisfaction, matters relating to the North-China complication have been settled in a timely manner so as to restore peace to the Far East.

That We have directed Our Ministers of State to present for deliberation by the Diet a Budget and various projects of law based on a policy adopted to the circumstances of the time, to the ample provision of national defences, and to the essentials of the country's prosperous development. We trust that you will carefully consider these matters, and will bring to the discharge of your duties of consent a spirit of harmony and conciliation.

On the 10th instant the Lower House is to choose its chairman of Committee of the Whole and its chairmen and members of standing committees. For the first-named office the Progressists will not put forward any candidate, and for the offices of chairmen and members of standing committees, the two great Parties, *Seiyu-kai* and *Kensei Hon-to*, having agreed that the matter should be arranged by the two party Leaders and party Managers in the Lower House, these gentlemen held a meeting, at which it was decided that the number of the Budget Committee should be increased from 45 to 63—its original figure—and that two-thirds of the total should be *Seiyu-kai* members and one-third *Kensei Hon-to* members. Thus the Imperialists and other minor coteries are altogether excluded from the reckoning; a singularly arbitrary proceeding.

It results that the Lower House will not proceed to the actual business of the session until the 11th instant. It will probably effect very little before the New Year's recess.

Thursday, Dec. 11.

We stated in our last issue, on the authority of Japanese journals, that the *Seiyu-kai* and the Progressists had agreed to change the number 45 for the Budget Committee to 63. It now appears that this matter has been fruitful of some discussion. In view of the fact that the Lower House contains 376 members whereas it had previously only 300, some increase in the numbers

of the various standing committees would be a natural step. But the parties have not been guided by that consideration only. They seem to have chosen numbers such as would easily lend themselves to division in proportion to the various political associations in the House. The Budget Committee is therefore to be increased from 45 to 63; the Settled Accounts Committee from 27 to 45; the Disciplinary Committee from 18 to 27, and the Petitions Committee from 36 to 45.

Another statement was that the *Seiyu-kai* were to nominate two-thirds of the Budget Committee and the Progressists one-third. That also is not quite correct. The *Seiyu-kai* are to be represented by 45 members and the Progressists by 18. This point caused some controversy. The Progressists, with their affiliated coteries, claim to have 120 followers in the House against 192 *Seiyu-kai*, and they consequently insisted that they ought to have 24 members on the Committee against the *Seiyu-kai's* 39. But the Progressists are in a yielding mood at present, and they finally agreed to be content with 18 representatives against 45 *Seiyu-kai* nominees. A similarly partial arrangement was effected with regard to the other Standing Committees, namely, 31 *Seiyu-kai* and 14 Progressists on the Settled Accounts Committee; 18 *Seiyu-kai* and 9 Progressists on the Disciplinary Committee, and 31 *Seiyu-kai* and 14 Progressists on the Petitions Committee.

This is a flagrant example of the tyranny of a majority. There are 36 Independents and 17 Imperialists in the House, making 53 in all, or one-seventh of the whole House. These Independents and Imperialists are apparently to be totally excluded from the standing committees. They have an unquestionable right to be represented, but it would seem that the *Seiyu-kai* and the Progressists have combined to reduce them to non-entities. This, should it prove to be the case, will be another example of how little party politicians in Japan understand the principles of constitutional government which they nevertheless clamour to apply.

Of course the above changes must be made by vote of the House, but since they concern the Lower Chamber's Standing Orders only, the consent of the Peers need not be sought. It is not so, however, with another contemplated change, namely, the extension of the period allowed for the Budget Committee's deliberations from 15 days to 30. We shall be much surprised if the Upper House endorses that alteration. Even under the present system the Budget does not reach the Peers until such a late period of the session that their discussion of it becomes a mere formality.

The two Houses met on the 10th instant, and the Presidents having conveyed to the Palace the usual replies of the Chambers to the Speech from the Throne, received the Emperor's acknowledgments.

In the Upper House, Prince Tokugawa Iyesato was chosen—by 191 votes—to be Chairman of the Committee of the Whole, after which the election of the Standing Committees was proceeded with, and the House rose at 12.05 p.m.

The Lower House met at 1 p.m. The President announced that, in accordance with the custom of the last two sessions, the House would meet three times a week—Tuesday, Thursday and Saturday, during

the session, and the Committees would meet on the intervening days.

On the motion of Mr. Matsuda Masahisa, the House proceeded at once to consider a proposal for increasing the numbers of the Budget Committee and the various standing committees—namely, the Budget Committee from 45 to 63; the Settled Accounts Committee from 27 to 45; the Disciplinary Committee from 18 to 27, and the Petitions Committee from 36 to 45. These changes were unanimously agreed to, and the election of the Chairman of Committee of the Whole being next on the Order, Mr. Kuribara Ryoichi was chosen by 247 votes. The President then directed the Sections to elect the Standing Committees, on the understanding that each committee should choose its own chairman.

Mr. Matsuda Masahisa introduced a Bill for altering the Law of the House in the sense of prolonging the time for the preparation of the Budget Committee's report from 15 days to 30 days.

The House rose at 3 p.m.

NAVAL INCREMENT.

It is stated that the Government's original intention was to present the scheme of naval expansion in a Supplementary Budget, but in view of the political conditions it has been included in the General Budget. The programme would go into operation from 1903 and be carried to completion in 1913. The figures are these:—

	YEN.
Ship-building Expenditures.....	62,348,269
Namely—Ship-building	60,352,660
Machinery	1,048,760
Inspection Expenses	946,849
Armaments	29,001,313
Namely—Arms	27,746,375
Machines	538,760
Inspection.....	716,177
Buildings	8,510,722
Namely—Kure Docks.....	1,596,971
Saseho	4,197,867
Maizuru	1,702,051
Preliminary Expenses	100,000
Cost of workshops	154,930

The effect of including this project in the General Budget will be to precipitate the political crisis. For had the Cabinet followed its original plan, the question of naval expansion would have followed the discussion of the General Budget. It is understood that the problem of continuing the increased rates of land tax will also be placed in the forefront of the controversy.

Concerning the works of communication contemplated by the Government, the following appear to be the most important:—

Subsidy to a Shanghai-Suchow-Hangchow line of steamers, a total of 47,553 yen spread over 3 years, the grant for next year being 37,200 yen.

Extension of Telephones, 14,850,000 yen, spread equally over 10 years.

Railway Improvement, 14,480,000 yen, spread equally over 6 years, in addition to the sum already devoted to that purpose.

In the Foreign Office Section we find the following notable additions:—

Consulates-General in Calcutta, Canton, Swatow, Ningpo, and a Consulate in Honolulu, the whole involving an expenditure of 150,000 yen, of which 20,000 is to be appropriated next year.

A Consulate at Chinnampo, 70,000 yen spread over 3 years, the appropriation for next year being 20,000 yen.

A sum of 150,000 yen for special investigations abroad.

The London correspondent of the *Birmingham Post* telegraphs that Emperor William has decided to have his American built schooner yacht *Meteor III* overhauled and altered at a cost of £10,000. This is necessary if she is to make a good showing in next year's contests.

CHINESE ENGINEERING & MINING CO. LD.

The trouble between the London Board of the Chinese Engineering and Mining Co. and the China shareholders of the company has culminated in the holding of a meeting at Tientsin and the adoption by the latter of various strong resolutions.

The situation was described to the meeting by His Excellency Chang Yen-mao, who briefly referred to the events of 1900, when in view of political and military possibilities and an uncertain future, it was thought advisable to register the company under British laws in order to protect the property of its shareholders and at the same time to open the company's doors for the influx of foreign capital, which was considered desirable and necessary for the development of the natural resources of the Empire. Unfortunately the agreements drawn up in connexion with this transaction of far-reaching consequence had in only too many instances been disregarded and violated by one of the contracting parties, so much so as to jeopardise the validity of those agreements. He wished it understood that that meeting adhered unconditionally to the agreement of the 19th February, 1901, and its attachment: that their desire was to see that deed in justice upheld and respected and that they were prepared to meet those animated by a similar goodwill, with the firm intention and resolve that they should not suffer by the support they might give in upholding "equity."

Mr. Detring at greater length detailed the acts of the London Board, which, though the management was nominally under the China Board, ignored the latter, sending out crowds of unnecessary foreign employees, issuing debentures to the amount of £500,000 without consulting the China shareholders, and in other ways behaving in a way inimical to the latter's interests. Finally Mr. Detring gave instances of the failure of the attempt to manage the Company from Europe. Men arrived with agreements who had never been asked for; others were found entirely unsuitable for their work. Works were no sooner started than plans were changed.

A Committee was appointed to enquire into the whole condition, and a resolution was passed to the effect that "the success of the enterprise demands strict observance of the terms of the deed of transfer of 19th February, 1901, with memorandum attached, particularly as regards the management of the Company's property by a China Board."

Other resolutions expressed lack of confidence in the London Board and the Committee was instructed to take steps to bring about a just observance of the deed and memorandum above referred to.

THE LATE MR. T. B. REED.

The telegrams announce the death of the Honourable T. B. Reed, one of the most prominent and forceful figures in American political life. We take the following sketch of his career from *Men and Women of the Time*:—

Reed, the Hon. Thomas Brackett, American statesman, was born at Portland, Maine, on Oct. 18, 1839. He graduated at Bowdoin College in 1860, and began the study of law, but suspended it to enter the U.S. Navy, where he served as Assistant-Paymaster from April 1864 to November 1865. He was admitted to the Bar the same year he left the Navy, and began practising at Portland. In 1868-69 he was a member of the lower branch of Maine Legislature, and in 1870 of the State Senate. From 1870 to 1873 he was Attorney-General of Maine, and from 1874 to 1877 was City Solicitor of Portland. In 1876 he was elected a Member of Congress, and has been continuously re-elected since then. He is a Republican, and when his party regained control of the House of Representatives in 1889, he was elected its Speaker. This position he retained until the House again became Democratic in 1891; and when his friends returned to power he was again elected Speaker, Dec. 2, 1895, and re-elected March 15, 1898, and served until Speaker Henderson was elected.

THE MISSIONARY QUESTION IN CHINA.

THE matter of missionary interference in law-suits where native converts are concerned, is now attracting much attention in China. Several men, prominent among Christian propagandists, have expressed their views on the subject, and the leading journal of Shanghai devoted a long article to its discussion on the 25th of last month. Chinese officials complain very much of this abuse. They allege that, in consequence of the arbitrary intervention of missionaries, the administration of justice is disturbed and Christian converts are enabled to perpetrate wrongs which enrage their neighbours and are largely responsible for the riots and disturbances that take place periodically. It is probable that this charge is exaggerated. A few instances of practical wrong actually suffered are much more potential in moulding public opinion than long years of freedom from such abuses. Dr. GRIFFITH JOHN, for example, a venerable and universally respected missionary, whose experience dates back to ante-Taiping-rebellion days, alleges that among ten thousand Protestant converts in central China, not more than four, so far as he knows, are open to the accusation of having traded on their Christianity for purposes of litigation. But, it may be retorted, the accusation has never been strongly preferred against Protestant converts: it is the Roman Catholics that are said to be the chief sinners. Well, in answer to that Bishop VOLONTERI, Vicar Apostolic of Southern Honan, comes forward and declares that he and his coadjutors have often published edicts disavowing ability to assist either Christians or their catechumens in temporal cases before law courts; have warned the courts that any plaint not bearing a European seal may be rejected, and have actually conveyed to local officials the names of bad and litigious Christians. Unless, then, the evidence on the foreign side is to be rejected altogether, we are compelled to admit that these charges are pressed too strongly by the Chinese. On the other hand, that the abuse exists and that it causes great umbrage can not be doubted for a moment. How is a remedy to be found? In discussing that phase of the matter the leading Shanghai journal makes some interesting remarks. It insists, in one paragraph, that since Chinese officials are "past masters in the art of juggling with fictions, and never do themselves more justice than when engaged in stuffing a few confiding foreign functionaries with the east wind," therefore all they say on this subject must not be taken as "gospel truth." No one can object to that reservation, although the terms in which it is expressed can scarcely be called illustrative of the discernment it prescribes. But when we come to read subsequent paragraphs of the same article, we find that our Shanghai contemporary evidently believes not only that the missionary

agis is thrown over native converts in judicial matters, but also that such protection is essential. For in considering the recommendation that no missionary should be allowed to assist or countenance his converts in *yamên* cases, the *N.-C. Herald* endorses Dr. JOHN's plea, namely, that "if converts are understood to stand entirely alone, as respects the *yamên*, there will be no such thing as justice for them in any part of China, for officials regard them as men who have joined the enemies of their country, and would soon consider ways and means of getting them obliterated." Plainly, if Dr. JOHN's belief be widely entertained among missionaries, they must deem it a solemn duty to lend assistance to their converts in judicial affairs, and plainly if such assistance be one of the rewards of conversion, litigious and intriguing persons will embrace Christianity for the sake of the legal status it confers. Thus we find ourselves revolving in a vicious circle. If the missionary does not protect his converts, Chinese officialdom will discriminate against them to their ruin; and if he does protect them, he will attract a class of converts whose ruin must necessarily be desired by officialdom. Most of the problems arising out of China's foreign relations partake of of this insolvable nature when they are closely examined.

THE DIMENSIONS OF THE INCREASED LAND TAX.

IN order that our readers may appreciate what are the real dimensions of the financial question which now threatens to precipitate a political crisis, it may be interesting to enter into a brief explanation. In the 1898-99 session the Diet agreed to an increase of the land tax which, commencing to be operative in 1899, should continue for five years, namely, until the close of 1903. The Government asked that the increase should be from $2\frac{1}{2}$ to 4 per cent. of the assessed value of the land in the case of rural lots, and from $2\frac{1}{2}$ to 5 per cent. in the case of urban lots, the latter being assessed relatively too low. The House of Representatives, however, would not agree to a larger increase than $3\frac{1}{3}$ per cent. for rural lands and 5 per cent. for urban lands, and it further stipulated that a material reduction should be effected in the assessed value of certain agricultural lots. The additional revenue to be derived from the tax thus became:—

	Yen.
From rice land	8,068,900
From uplands	1,759,000
From rural building lands.....	852,700
From urban building lands	866,500
From other lands	230,900
Total.....	11,778,200

On the other hand, the reduction effected in the assessed value of land amounted to 114,260,700 *yen* in the case of lowland farms and 35,138,700 *yen* in the case of upland farms, or a total of 149 $\frac{1}{3}$ million *yen*, the loss of revenue in consequence of this

change being—at the rate of $2\frac{1}{2}$ per cent.—3 $\frac{3}{4}$ million *yen*, approximately. Hence the net increase of revenue to the State was 113 $\frac{1}{4}$ millions minus 3 $\frac{3}{4}$ millions, or 8 millions *yen*. There was another item also, namely, prison expenditures. These had been defrayed by the communes from 1881 to 1898. But from 1899, simultaneously with the increased rates of land tax, the Treasury undertook to pay the prison expenditures, thus relieving the localities of an annual liability amounting to 3,550,000 *yen*, or, say 3 $\frac{1}{2}$ millions. If we subtract this sum from the above 8 millions, it results that the actual addition made to the people's burdens in 1899 was 4 $\frac{1}{2}$ million *yen*. It is, then, about a bagatelle of four hundred and fifty thousand pounds that the *Seiyû-kai* have assumed an attitude of hostility to the Cabinet, and threaten to bring about a ministerial crisis, as well as to postpone the naval-increment programme and the undertakings of various productive national enterprises.

When these things are considered carefully they fall into line with the facts we have frequently noticed as illustrating the finnikin character of Japanese finance. No one can seriously pretend that a legislative principle is involved in this matter, or that a Diet which four years ago voted for the temporary increase of a tax, would be guilty of *mala fides* if it now voted for continuing the increase. Are we then to conclude that there is genuine uneasiness about imposing this almost imponderable burden upon the nation; that the camel's back is strained to the point of inability to bear another straw? Or must we accept the unpleasant alternative that the four hundred and fifty thousand pounds is a mere pretext for attacking the Cabinet; that, in short, the *Seiyû-kai* want to occupy the seats of power and are prepared to reach them by any route however narrow? No new tax is in question. The problem is simply whether the people shall be relieved of the duty of paying four hundred and fifty thousand pounds, which they have hitherto paid without the least symptom of distress. If the increased rates be now abandoned, it is plain from the above figures that the Communes will find their burdens lightened, not merely by a reduction of four hundred and fifty thousand pounds for which they are now liable, but also by a reduction of 3 $\frac{3}{4}$ million *yen* on account of the change of assessed value, and 3 $\frac{1}{2}$ million *yen* on account of prison expenses; so that, on the whole, they will be better off to the extent of 7 $\frac{1}{4}$ millions than they were prior to 1889.

It appears to friendly onlookers very unfortunate for Japan's credit that her politicians should make financial questions the bases of so many ministerial crises. What the world must inevitably conclude is that the country is in a chronic state of impecuniosity and that the struggle to make ends meet precipitates constant conflicts between the people and the Government. Japanese patriotism is said to be a sentiment of very high quality.

So it is, we believe. A Japanese is ready to lay down his life at any moment for his country. What a pity it is that his patriotism does not influence his politics so that he should refrain from sacrificing the Empire's credit on the altar of his own personal ambitions.

GREAT BRITAIN AND GERMANY.

WHEN Reuter telegraphed, a few days ago, that the British press commented strongly on China's action with regard to the evacuation of Shanghai, we were puzzled to understand such late reference to so important a question except on the hypothesis that a Blue Book had just been issued, which hypothesis now proves to have been correct, though the appearance of a Blue Book at a time so close to the events narrated is somewhat unusual. A special telegram to the *N.-C. Daily News*, dated at London the 3rd of December, describes the matter thus:—

The official correspondence on the subject of the evacuation of Shanghai was published to-day. It appears that Germany was asked about the matter by Lord Lansdowne in August last and consented in general terms, but in October stipulated with the Peking Government that the Yangtze Viceroy should engage not to grant to any Power special political, military, maritime, or economic advantages, nor allow the occupation of any other points commanding the Yangtze River either below or above Shanghai.

Prince Ching denied to Sir Ernest Satow that Germany had submitted any conditions to China, but Sir Ernest Satow ascertained that Prince Ching had already accepted Germany's proposals.

Lord Lansdowne then instructed Sir Ernest Satow to inform Prince Ching that his double dealing was deeply resented, and that Great Britain would not be bound by any pledges limiting China's and our freedom of action regarding the maintenance of order and protection of our interests in the Yangtze region.

Japan cordially supported Great Britain. Germany intimated that she had received assurances from China and regarded the condition as fulfilled. Lord Lansdowne replied that he understood that these assurances referred to the whole of China, excluding only the sovereign territorial rights already alienated.

Subsequent correspondence indicates that the evacuation is now a matter of transports.

It will be observed that the substance of all this, including Prince CHING's extraordinary duplicity, was related in our own columns at the time, though of course we were not in a position to speak of the action taken by the British Government. That action amounts to a definite repudiation of the pledge given by China to Germany. Yet it must be confessed that Lord LANSDOWNE's attitude towards Germany leaves something to be desired in point of straightforwardness. It appears little better than a patent prevarication to pretend that a stipulation explicitly limited to the action of the Yangtze Viceroy can be interpreted as referring to the whole of China. However, a great deal may be sacrificed for the sake of preserving good relations with Germany. Whether Germany acts wisely in compelling Great Britain to choose between such sacrifices and an open rupture, is a question which we do not like to discuss. It can be discussed much more beneficially by the Germans themselves. One thing, however, may be pointed out. It is that to subject England to these new trials of patience in the sequel

of what she suffered at Germany's hands during the South-African War, shows at any rate great confidence in her powers of endurance. For the rest, we do not see that Germany can gain much by seeking to weaken the position held by Great Britain in China. That position has never been used in the past, and will never be used in the future, to Germany's disadvantage. Wherever England's foot is planted, there the open door may certainly be found. Knowing these things, the Berlin Government's attempt to oust Great Britain from the place she has won in the Yangtze Valley by heavy expenditure of blood and treasure, is difficult to explain on practical grounds. Truly during the past three years some malicious fate seems to have busied itself shaping wedges to force England and Germany asunder. Just as the amenities of the German press during the South-African War were beginning to be softened by the lapse of time, they are vividly recalled by Sir HORACE RUMBOLD's contrast between the eminently well-disposed procedure of the EMPEROR of Austria and the indifferent attitude of the EMPEROR of Germany. We can only hope that the numerous and powerful reasons making for friendship between the two countries will always outweigh these accidents. The Anglo-German combined action in Venezuelan affairs may have a beneficial effect. Combined action, even for a comparatively petty purpose, should remind the two peoples that while each has everything to gain by union and coöperation, neither could hope to benefit ultimately by quarelling.

THE HOUSE OF PEERS.

IN the early days of Japanese parliaments the disposition was to treat the House of Peers as a nonentity. Whenever it opposed itself to the Lower Chamber, members of the latter talked grandiloquently about the "people's will," and even about the necessity of brushing from the legislative path an irrational obstacle to enlightened progress. Doubtless that kind of language drew its inspiration from the history of England, where the Upper House consists entirely of hereditary nobles and representatives of the episcopacy. The House of Peers in Japan, however, is a very different kind of body. Among its 328 members, only 53 sit by hereditary right, namely, 14 Princes of the Blood, 11 Princes and 28 Marquises. Among the remaining members, 119 are elected by the Counts, Viscounts, and Barons, 111 are Imperial Nominees, that is to say, men who have earned distinction by eminent services or attainments, and 45 represent the highest tax-payers in the prefectures. Such a body may justly claim to speak on behalf of the wealth and intelligence of the country with even greater authority than the Lower House. During the period when the Representatives, the party politicians and a considerable section of the press, united to minimize the legislative

status of the Peers, the latter did not betray any visible signs of resentment. But the tone of their detractors can not have failed to cause them much umbrage, and to beget a resolve that they would show in practice whether it was possible to treat them as a negligible quantity. They certainly have succeeded in showing it. For the Peers are now the real obstacle to party government in Japan. If Marquis Ito, once a *persona gratissima* in the Upper House, could count on its support, the *Seiyu-kai* would assuredly take office forthwith. And we doubt whether the conservatism of the Peers will be at all softened by the apparent alliance between the Progressists and the *Seiyu-kai* in the House of Representatives. A result of the alliance will be to confront the Peers with a formidable phalanx of opponents in the Lower Chamber, but to conceive that they will be either overawed or placated by the accession of the *Kensei Hon-to*, under the presidency of Count OKUMA, to the ranks of the *Seiyu-kai* under the presidency of Marquis Ito, would, we think, be an error. The Peers must know well that such an alliance has no elements of stability; that it is merely a replica of the destructive combinations of former times. If they yield to it, they will be yielding, not to a potential instrument of administration, but to a temporary weapon of party politics. The leaders of the *Seiyu-kai* and of the *Kensei Hon-to* must be fully cognizant of these things. But the consequences of the alliance have an obverse, and that is probably why the Progressists are more anxious than the *Seiyu-kai* to cement it.

MARQUIS ITO'S SPEECH.

Marquis Ito made an interesting speech at the general meeting of the *Seiyu-kai* on the 4th instant. A good translation, or rather *resumé*, of the first half of the speech appears in the *Japan Times* of the 5th instant, as follows:—

Rising in the midst of prolonged applause the Marquis prefaced his speech with remarks expressive of his pleasure at making the acquaintance of the members of his party newly elected to the House of Representatives while renewing that of others, and also of his intention to take them into his confidence regarding his political views according as occasion would demand it. As for the present, the speaker then went on to say, the more important portions of the Government programme at the coming session of the Diet, were already receiving public attention and though possibly not correct in every detail, what was being reported regarding the naval and land tax questions was in the main a fair representation, as he believed, of the Ministerial propositions. But before taking up these burning questions of the day the Marquis wished to dwell briefly on the central idea by which he had been guided in organizing the *Seiyu-kai*, that idea being to make his party an organ for fully putting in practice the wishes of the Emperor when His Majesty in the exercise of his great prerogative gave the nation the Constitution under which the Empire was now governed. The Marquis said: "In promulgating the Constitution the Emperor decreed:

'Considering that Our subjects are the descendants of the loyal and good subjects of Our Imperial Ancestors, We doubt not but that Our subjects will be guided by Our views and will sympathize with Our endeavours, and that, harmoniously cooperating together, they will share with Us Our hope of making manifest the glory of Our country, both at home and abroad, and of securing forever the stability of the work bequeathed to Us by Our Imperial Ancestors.' "Such being the Imperial decree in question the people of Japan are bound to obey the spirit and words of this decree. In other words,

having been given a voice in the legislation of the country by virtue of the Constitution, they in making use of this privilege must always endeavour to be in consonance and not at variance with the purposes of the Constitution which are the wishes of the Emperor." Continuing the Marquis noticed, as he said, that, in the past the political public of Japan had unfrequently been divided in their views over the fundamental principles of the Constitution and it was with an earnest desire to bring about a unification of views in this connection that he had ventured on the formation of the *Seiyu-kai*. He was glad that much progress had of late been made toward this unification and he owned that this favourable tendency was undoubtedly in part at least the result of unremitting efforts on the part of his followers to study up the problems bearing on the real interests of the country. Turning next to the general question of national economy, the Marquis said: "I regret that, as it appears to me, things are not progressing as they ought to be progressing as regards the economics of the country. This seems to be especially the case when one looks at the condition of the provincial finances. Here it is often evident that the parties concerned are conducting affairs with no calculation as to their resources. I think they often launch out in enterprises on the spur of the moment without stopping to ask whether or not their projects are within the means of the country or of their prefecture, town or village, and they seem to lack almost absolutely the spirit of caution that they may increase their expenditure only to the extent of the progress they have made in the power of meeting it."

After further cautioning party politicians in general against the reckless habit of voting for appropriations, the noble speaker proceeded with two questions of the hour. He said: "The proposal is to continue in force the present increased rate of taxation in order to carry out the scheme of naval expansion. Both the Government and the nation are one in looking at it as the burning question of the day. It was on the 2nd of November last that I was first made acquainted by the Ministry with the general idea of their programme in this connection. The information I received then was not sufficient in some points, while in others I found myself totally at a loss and subsequently I had occasion to personally see the Minister of Finance. On my return to Oiso I collected various statistics and referred to such books and papers as were within my reach and I did all I could to study up the problem. I further considered it in the light of the past and present state of things in such countries of Europe and America that are recognized to be in a condition of the greatest prosperity. I also travelled back to the days of the Restoration in Japan and followed the trend of affairs, calling back to mind the political and financial questions in the settlement of which I participated. I considered it only proper that I should thus make a full study of the question and then acquaint the Ministers of State with the views arrived at by me for they, by the confidence placed in them by His Majesty the Emperor, are representing the Government. This I accordingly did. I also made known my views to my colleagues the members of "Gen Kun" who are in special favour at Court and these views are exactly the same as those which were laid before the members of the Cabinet. What I am going to tell you now is also the same views of mine. I aim at being truthful in all I say and loyal in all I do, and I have no occasion for any veiled scheme or anything of the kind: I only intend to lay before you what I judge best in the light of all the knowledge at my command and of the experience I have come through." Coming then to what the speaker in the late interview told the Cabinet, he said: "I declared my views before them thus. I said as I say now that I recognize the reasonableness of the naval proposal as coming from those in power. Nobody who took trouble to study the trend of affairs both at home and abroad, would dare to say that our navy could remain for ten years as it at present. There is a limit to the number of years for which all war-vessels retain their full efficiency and the subsequent deterioration must be made good. Whether you call it replenishment or call it expansion the fact is the same—it is a necessity. Or look at it from the point of maintaining the balance of power in the Far East: no one can possibly deny the necessity of the extension. So far so good as the Government proposal goes, and I agree with the Ministry in this regard. But when we come to the question of the means wherewith to carry out the proposal, the Government intends to have recourse to continuance of the present increased rate of land tax. My idea is not, however, to rely on the continuance: it is to solve this urgent question by finding the necessary means in a contraction of administrative expenses. (Great applause.) The Government thinks that there is no room for such a curtailment; but I deem that there is room for it. (Cheers.) It is here that the Government and I differ."

"It may then be asked why is it undesirable to fall back on the "continuance" plan. I do not think

that the present rate of 3.3/10 per cent. is so heavy as to be unbearable by the people: I cannot recognize that this levy is keeping the tax-payers in arrears. On the other hand it must be remembered that the farmer does not regard the rate as a light one; and I deem agriculture one of the most important factors in the economics of the country (cheers). After full deliberation I am of opinion that while the land tax is at the rate of 3.3/10 per cent., in many places the additional local imposts which are charged under various names such as prefectural rate, town rate, village rate, and so on, would amount, when added up, to fully twice that of the national tax. This shows that the burden is not a light one. Further, seeing that various lines of industries and commercial enterprises scattered over the country are making fair progress, we must not neglect our agricultural interest (cheers). One may question if the levy on the farmer must never be increased in the future. I would by no means answer in the negative. In case of national need, the farmer should willingly bear his share of the burden. There is no reason in the world why a burden once lightened should never again be increased. When a burden is re-imposed it will be done so equally on the farmer as on the merchants, and the farmer has no right to say that he alone must be exempted. With the privilege of participating in the administration of the country no man of any education should ever forget about the welfare of the country. But on these points my views are often at variance with those in official circles. I think that the Japanese as a people are inclined to go about their business too recklessly: they squander their money with almost no thought of their wealth. It was in 1880 that the prefectural assemblies were first established. Before putting this new scheme in operation, the Government convened a meeting of prefectural Governors, on which I sat as chairman. When I look over the course of events that took place between that year and that in which the Constitution was promulgated I notice that the prefectural expenditure increased very considerably, in that interval of time. True, many troublesome occurrences happened and the resolutions passed by prefectural assemblies had often had to be vetoed. On the whole, however, in so far as the question of public burdens was concerned, instead of the Government having to ask for more, the people seemed to be bent on giving more and more. This was decidedly unexpected. In any other country the people would demur at being burdened but in Japan they appeared to think more of the state than of their own pockets and they never seemed to be chary of giving (loud laughter). This condition of things made me think that the Japanese were not a people to refuse any increase in their burdens even though they were given the national assembly. In this respect my views differed at the time from those of others in the Government. People in official circles were imbued with the idea that the opening of a national assembly would be the opening act to some awful drama.

Then subsequent to the inauguration of the Parliamentary regime, the people demanded pretty hard of the Government the curtailment of administrative expenditures, and I think I remember to have been once or twice harassed on that same question by the representatives of the people. However when I calmly review the result of all those demands about financial retrenchment I discover them to have merely been a pretext for annoying the Government. For the facts that transpired subsequent to the Japan-China war significantly demonstrate the expansion not only of the expenditures of the central Government but also prove how the expenditures of the provinces where the members of the Diet hail from have been trebled or even quadrupled. Not that I absolutely disapprove of an increase of central and local administrative expenses; my position is simply this, namely, that the administrative expenses must be made commensurate with the resources of the country and the provinces.

Well, gentlemen, let me see how matters stand at present, and in doing this I must review the history of the national finances. When I was first installed in the chair of Premier, about sixteen years ago, the revenue stood at 76,400,000 *yen*. The appropriations demanded by the different departments of State had however totalled 94,500,000 *yen*. The Treasury could not, even if it would, satisfy those demands. I myself undertook the task of arranging the budget, and addressed myself to strike out all those items that I judged uncalled for and amending others that were intended to meet with the requirement of new works. All those preliminary tasks having been completed, I convoked a Cabinet council, and it sat till midnight. The result was the budget for the year was fixed at 76,400,000 *yen* together with a surplus account of one million *yen*. The revenue of that time was 76,400,000 *yen*, but to-day it stands at 240 million *yen*, about the treble of that of that particular year. Such an expansion can by no means be considered light.

As to the expenditure side of the finance, I think I had better refer to the budget.

Then again in the matter of national wealth I must admit its enormous increase. I must admit all the important affairs of state calculated to strengthen the basis of the national existence, such as matters of national defense, communications both marine and overland, and such like provisions have been to a considerably extent been made. However, in estimating the wealth of a country we must consider this question from various standpoints, for according to the mode of computation a considerable difference will arise as to the amount of wealth. However I will not dwell on this point any further, this being a matter of science and theory. At any rate I can safely say that the wealth of Japan has markedly increased.

Now in looking over the economic field of to-day, I do not think either manufacture or trade or agriculture is placed in a prosperous position. The explanation is because all the enterprises in those respective spheres have been launched with no adequate funds to back them. The result was that some of those enterprises have collapsed after they ran for a few years. Lack of competent technical knowledge has also brought about the failure, and these two causes—lack of funds and lack of experience—must be regarded as having brought about the present economic failures.

There is another point to be taken into consideration in reviewing the present economic inactivity, and that is lack of sincerity and sense of responsibility by all those who have charge of the work. For managers and experts and even companies themselves have often acted unfaithfully, and have tried to evade the obligation of paying debts contracted in various quarters. In fact those managers and experts have not been worthy to take charge of such responsible businesses. All these points must be carefully attended to by all the members of the Diet on whom rests the grave responsibility of arranging on a sound basis the finance of the state.

Gentlemen, I should like with your permission to review here at this juncture the history of the finance of the Meiji Government, and I must remind you that what I have to tell you is far from being complete or perfect. Well, with this premise I may briefly state that the specie that Japan had during the pre-Restoration days amounted to something like 100 million *yen*, and this volume nearly remained constant as the country was practically shut out at that time from the rest of the world. Then at that time each local *han* (clan) issued its own fiat currency, aggregating about 30 million *yen* which was converted into consolidated loan bonds when the Restoration had been consummated. With the lapse of time the volume of specie changed more or less, but even about the years 1875 and 1876 it must have stood at 100 millions to 80 millions. But this amount had to disappear from the country, and this exodus occurred rather too suddenly, for in a year or two the majority went out of the country and whatever amount there remained was found in the vaults of the central exchequer, and only paper money was in circulation at that time. Still the paper stood at par. Meanwhile the finances of the state as also the economic market at large had been placed in an exceedingly embarrassing situation. The Government of the day taxed their brains hard to devise measures for rescuing the country from this trouble. Their deliverance appeared in the shape of the Imperial edict issued in spring of 1877, an edict proclaiming the reduction of the rate of land tax. The truth is the Government had decided that the only sound remedy consisted in adopting a courageous plan of economy. I well remember what a drastic reform the Government decided to carry out as their remedial measure, for I was then occupying the chair of the Public Works Department. The original estimates of that department were about 3,900,000 *yen* for the year 1877, and the sum was cut down to 2 millions. This programme would have ended in success, had not the civil war of Satsuma that broke out in the same year thrown it out of all order. Economically and financially the war proved disastrous, and at one time paper money stood at 1.80 to 1 *yen* of gold. The war over the Government revived the original programme of remedy with redoubled energy; still the specie remaining in Japan did not exceed 8 millions about four or five years after. The Minister of Finance of the day, Count Matsukata, adopted various devices for preventing the outflow of specie and encouraging its inflow. The result was fairly reassuring, for in 1883 the volume of specie in the country increased to 19 millions, till at last coming to 1887 paper could be restored to par.

About the time of the advent of the constitutional régime in 1890 both the financial programme of the Government and the economic enterprises began to show an expansion somewhat out of due bounds, and this undue expansion was in danger of engendering a panic. The crises was however tided over, and with the retrenchment programme subsequently adopted in compliance with the demands of the Diet, the Treasury had at its disposal a surplus of about 36 million *yen*, when the Japan-China war

broke out. At the same time the Bank of Japan possessed over 90 millions as reserves against paper money, for the convertible system had been inaugurated in the meanwhile.

For convenience in reviewing the history of the finances of Japan, I should like to divide it into three chapters, one covering the period from the beginning of the Meiji era to the 10th year (1877), next from the 10th year to the 27th year (1894), and lastly from the 27th year to the present.

Otherwise described, the above three periods may be called, first, the period immediately succeeding the Satsuma rebellion, a period resembling that which, in the case of a family, succeeds a fire or a funeral, when economy is all the order of the day; secondly, the period of festival when spending is in vogue; and thirdly, the period when expenditure is succeeded by more or less exhaustion. Japan received 360 million yen from China and has also received the proceeds of a foreign debt of 200 millions. What has become of all that money? It is true that we have a priceless Army and Navy. But these are weapons serving as a protection against emergencies. They are not profitable enterprises. Some of the money has, of course, been spent on productive works, but, on the other hand, for years past the country's imports have exceeded its exports. The balance must be paid for in hard money, and it is thus that a great part of our 500 million yen has left the country. It is a disquieting fact. Thus though naval increment is unavoidable, it becomes a question whether we can, at the same time, safely carry on enterprises which necessitate the import of large quantities of materials. Our condition as to the production of iron for manufacturing purposes is that of a child born with lung disease. Never mind who is responsible for the failures. What concerns us is that there have been failures and that we are still a long way from success. Yet the age is an age of iron-using, and we have to consider whether for enterprises demanding iron we shall import materials from foreign countries or employ such as can be obtained at home. It is not, in the former case, a mere question of whether money can be found within the limits of the Budget, and whether, if it be found, this enterprise and that may be undertaken. There is also the question of whether the money remains in the country or leaves it, and unless that question be taken into consideration Japan may find itself emptied of cash. It is true that foreign countries do not hesitate to increase their armaments. But, on the other hand, they are able to manufacture their warlike implements at home. Especially is that true of England. It may be said, in a word, that in occidental countries the more the states enterprises are expanded, the larger the sums expended within the country, whereas in Japan the more such enterprises are expanded the greater the sums that flow out of the country. It is there that the foreign saying applies, namely that progressive enterprises must be undertaken by gradually developed strength, a saying which seems to be forgotten in this country. What I would say to the Government, therefore, is that before undertaking enterprises their urgency should be carefully estimated, and that although the Navy may not be left as it is for ten years, its increment should not be attempted simultaneously with works requiring a large exodus of specie. And what I would say to you, Gentlemen, also is that it has hitherto been the habit of members of both Houses of the Diet to press for railway construction on the supposition that railways bring wealth to the districts through which they run, but if local considerations alone be given weight in such matter, can the financial resources of the country be saved from exhaustion?—(Cheers). I am not speaking to the *Seiyu-kai* alone. I am speaking to the Government and to the nation at large.—(Cheers). If we go on as we are doing, no ability can help us in the end.—(Cheers). Among you, gentlemen, there are graduates of the Universities and learned men who have no need to be told by me what are the conditions existing abroad. But I would remind you that although Western nations do not fail to pay full attention to national defenses, they pay no less attention to national finance. Be it the public treasury or be it a bank, every endeavour is made to accumulate a specie reserve, and no plan is wanting to prevent that reserve from being dissipated. Methods differ, but the aim contemplated is the same. What is Japan's case? Has she not unfettered her purse-strings and is she not living the life of a person that sleeps throughout the whole twenty-four hours? (Applause). These things have to be carefully considered, not by the Government alone but by the nation also, and some steps must be taken. What those steps should be, it is not now the time to explain, but certainly we must be in no doubt about our object. As to the question of the land tax, considered from the Government's point of view, the increase to the tax is only 80 sen for every yen of assessed value, while, on the other hand, the Treasury has assumed the burden of prison expenditures, previously paid by the communes, and the assessed value of the land has been reduced by a total of

150 million yen, so that, in fine, the Treasury's net receipts from the additional rate of tax are only 4 millions. The people, however, though relieved of the prison expenses, are paying out three times as much, partly for administrative purposes, partly for educational. There are folks who affirm that it is better to impoverish oneself than to leave one's children without education. That is an access of educational fever. The Chinese proverb says truly that when a man has enough to eat and to wear he begins to think of etiquette. What is the object of education? Is it to enrich the country, or is it to fill an impoverished country with lean scholars? The Diet will soon open, and we shall hear what the Government has to say and what the members have to say. Should it be decided that the increased rate of land tax is not to be continued, then I would urge that the money thus saved by the people ought to be laid aside and not spent. An article in the *San (Taisho)* comparing the economical conditions of various countries, shows that Japan scarcely deserves to be ranked anywhere in the catalogue, and I conclude that if we go on as we are doing, and if we do not foster the spirit of effective economy, our plight will be a sorry one. I would earnestly impress upon you, gentlemen, that as you now command a majority in the House of Representatives, you have to recognise your responsibilities. Nothing could be further from my desire than that you should rely on your strength to enforce your will upon others; or that you should refuse to any question a calm and reasonable hearing; or that you should resort to violence and intolerance; or that you should treat with disrespect propositions emanating from a Ministry which has its mandate from your Sovereign. With these limitations, the fullest freedom of discussion is permissible (cheers). Each of you may consider himself the representative of ten thousand of your fellow-countrymen, and I sincerely hope that you will conscientiously and with moderation labour to display by speech and by conduct what are the true aims of the *Seiyu-kai*: I myself have been 35 years, nay rather 40 years, engaged in administrative affairs, and through ill report and good report I have endeavoured to direct my steps by the light of my conscientious estimate of the nation's good. I do not urge upon any man a course which has not the sanction of my own convictions, and now, in my old age, I propose to hold fast to the principle that has guided me hitherto. I have been the recipient of undeserved Imperial favours and have attained a position far above my deserts. Gratitude alone demands that I should not now shrink from any sacrifice. The nation has to labour for the development of its resources, the education of its people, and the gaining and holding of a worthy place among the States of the world. It is towards the achievement of these great purposes that I venture to contribute my humble advice. If you do not agree with me, these is nothing more to be said, but I ask you not to arrive at any conclusion without due weighing of both sides. And I would remind you that in your attitude towards these important questions now awaiting solution, there should be no conflict between selfish interests and public duties. If you vote for diminishing the State's expenditures in certain directions, you should not seek to increase them in others by introducing pet projects of your own. To achieve a great purpose there must be absolute consistency of acts and professions. That is what I expect from members of the *Seiyu-kai*. (Loud Applause.)

The speech occupied an hour and a half and was delivered with remarkable dignity and deliberation. It is said to have produced a great effect, and Tokyo journals speak of it as the most remarkable oratorical effort of recent years. The resolution translated in our last issue were submitted to the meeting after the Marquis' speech, which was immediately succeeded by three cheers for the Emperor, proposed by Marquis Ito.

Subsequently there was a friendly meeting in the Imperial Hotel, when Marquis Ito made another speech, this time a brief one. The most important point was a denial that he had given any promise to the Emperor to support the Katsura Cabinet. There was no such promise. Moreover, every Cabinet had an indisputable right to shape its own procedure without reference to the opinion of any outsider.

Official statistics published in Paris on Nov. 11th, show that there was an increase in the population of France during the year 1901 of 72,398. The statistics for the year 1900 showed a decrease of 25,988. The change in 1901 was due more to an increase in the number of births than to a lowering of the death rates.

THE CHRISTIAN DAIMYO.

(CONTINUED FROM LAST ISSUE.)

One conceives with what grief Naito must have announced this meagre result of his negotiations to Konishi, and the humiliation which the latter must have experienced on communicating this news to Ukita and his staff. A council was immediately convened, in order that a course of action in this dead-lock might be decided on. To reject the answer of the Chinese would have been to cut short all understanding with them, and consequently to indefinitely postpone the peace so much desired. On the other hand, to present such a response to the Taiko, who aspired to nothing less than to being proclaimed Emperor of China, meant not only exposing themselves to all the violence of his wounded pride, but dragging Japan into a fresh conflict, more disastrous than the first. After long discussions, they resolved to have done with this unfortunate war by concealing the truth from the Taiko, and making him believe that the title, which the Chinese brought him, was his nomination as Emperor of China. As the Taiko was unable to read Chinese and as, on the other hand, most of the *daimyo* desired peace at no matter what price, the plan had every chance of succeeding. Yodogimi, Hideyori's mother, was gained over in advance. For a long time back, she had instructed Ishida Mitsunari, to insist with Konishi on his concluding peace, cost what it might. Anxious with regard to the future of her son, she pretended that the Taiko was already getting old, and that an immense country like China would succeed in the end in crushing Japan (47). The question then was to confide the secret to Yodogimi and to Ishida, in order that these two influential personages might lend their assistance in the carrying out of the intended plan.

It was towards the end of 1595, that a Chinese embassy, charged with the answer in question, arrived in Konishi's camp. It was composed of two young mandarins, of Jukeki, the indispensable counsellor, and of a train of more than 300 persons. This display had been the work of Jukeki: he hoped by that to strike the imagination of the Taiko, whose aspirations he knew, and to make him more easily accept the will of the Peking Court. Konishi, knowing that the delay of the Chinese had rather irritated the Taiko, thought he should stop the embassy for some time, and go himself and demand of the Taiko if the coming of the Chinese would be agreeable to him. He then set out immediately with Jukeki and Terazawa, Governor of Nagasaki. Landing at Nagoya they left Jukeki there, and passing through Nagasaki to present their respects to the newly arrived Bishop, the two *daimyo* went to Fushimi. The Taiko received them there with extreme satisfaction, and intimated to them that the Chinese embassy would be welcome. Some weeks after, Konishi and Terazawa took the road back to Korea, after having warned Yodogimi, Ishida, and other personages of the resolution taken by Ukita and the staff.

If Jukeki thought he could impose on the Taiko, with his numerous embassy, the Taiko on his side did his best to give the Chinese a high idea of his grandeur and his power. He pushed forward especially the work on the palace of Fushimi on which several thousands of workmen worked night and day. He ordered all the *daimyo* not taking part in the war, to assemble at Fushimi with a numerous following of *samurai*. The number of the latter came as high as 100,000, and their dress surpassed in richness anything that had been hitherto seen in Japan. Finally, wishing that his son Hideyori, then hardly three years old, should play a political part in this extraordinary event, he had him named Kwampaku.

While the Taiko thus prepared to receive the Chinese embassy, Kato, in Korea, was near spoiling all. Jealous at the conduct of the negotiations being confided to Konishi, his rival, he had from the beginning addressed letters to the Chinese and the Koreans, declaring to them that, without his intervention, all their efforts would

(47) Taiko, Chosen-gunki, p. 86.

end in nothing. And, as proof of this assertion, he insisted on the fact that he was a cousin of the Taiko and signed his name Toyotomi. When he learned, therefore, of the arrival of the ambassadors in Konishi's camp, he hastened to warn them that Konishi had no power to negotiate peace, which after all the Taiko did not want, and that the Chinese would, once they reached Japan, be all put to death. This was more than was necessary to discourage the not too courageous Chinese, whom the military display of the Japanese, as well as their long detention in Konishi's fort had somewhat alarmed already. Profiting by the obscurity of the night, the chief of the embassy quitted the Japanese camp and set out for China. There was general consternation among the Japanese when, next morning they found that the principal ambassador had disappeared. They at once informed Ukita, who sent a messenger to Japan the same hour, in order to communicate the disastrous news to Konishi. This latter, already *en route* for Korea, met Ukita's courier on the sea, at some distance from the Iki island. Without losing an instant Konishi ordered Terazawa to return to Fushimi, in order to inform the Taiko of Kato's conduct, and of the flight of the Chinese. The Taiko was so infuriated that he wished to have Kato put to death. He recalled him on the instant from Korea, and put him under arrest until further orders. This punishment consisted in his keeping the doors and shutters closed, and in abstaining from any visit in the town.

When Konishi arrived in Korea he sent an express to the Court of Peking, denouncing the cowardice of the chief of the Embassy. He was told in return that the guilty person was degraded and the second mandarin, who had remained in the Japanese camp, invested with full power.

Finally, Konishi was able to embark with the 300 Chinese and a Korean envoy who had been added to this embassy on the express request of the Taiko. At the same time half of the Japanese troops took their departure for home, while the other half had to guard the fortresses till the conclusion of peace. Towards the end of July, 1596, Konishi and his companions arrived at Nagoya where, in accordance with the instructions of the Taiko, they rested eight days. Thence they went by sea to Sakai, where Josei Tonomo-no-suke, Konishi's brother and governor of the town, received them with great pomp.

Everything seemed, however, to conspire for the overthrow of this embassy. Extraordinary phenomena such as a rain of cinders, a comet, and above all one of these earthquakes which Japan sometimes experiences, came successively to delay it. The earthquake took place on the 30th of August at 8 o'clock in the evening, beginning with a light shock, but taking, during the following days, such proportions that the towns of Fushimi, Osaka and Kyoto were almost entirely destroyed. The palace of Fushimi, in which the Taiko intended to give audience to the Chinese, the residences of the *daimyo*, and in a word all that had been constructed there at great expense during several years, was wrecked in a few hours.

This disaster postponed the audience by more than two months, and it was not until the 20th of October, 1596, that the embassy left Sakai for Osaka, where the Taiko was to receive it. The damage caused by the earthquake having been less considerable in this town; they had been able to repair the palace in these few months. The reception, fixed for the next day, was splendid, for, despite the recent misfortunes, the Taiko had made a display of unwonted luxury. The ambassador, after having handed to the Taiko the letter of the Emperor of China, offered him a crown and a court habit. It is evident that this crown was a Chinese cap conferring more or less elevated rank, and that the court habit must have had the same signification. The Taiko, convinced that he had just been nominated Emperor of China, accepted these insignia with joy, and at once put them on. For three days he behaved in the most amiable manner towards the Chinese, whom he loaded with presents. On the evening of the 23rd, he went in person to congratulate Jukeki, who was lodged in Hachisuka's residence, on having so well

acquitted himself of this delicate mission. He expressed at the same time his joy on the subject of the wisdom of the Emperor of China, declaring that in all things, concerning the Government of China, he would refer to him.

On the 24th, the ambassadors returned to Sakai to await there the beginning of the negotiations. On the next day, the Taiko sent them four bonzes, most skilled in the Chinese characters, in order to fix the conditions of peace, which was about to be concluded. Then the Chinese exhibited the conditions, which the Court of Peking had drawn up: to wit, that the Taiko was named King of Japan, but that the Japanese should destroy their fortifications in Korea, and abandon that country, never again to put foot in it. Konishi, who was present at this interview, was considerably annoyed by this disclosure made to the bonzes, and begged them not to speak of it to the Taiko. But the bonzes returned as quickly as they could to Osaka, and informed the Taiko of what had just passed. The latter became terribly angry: threw away the cap and the Chinese dress, which he had worn constantly since his pretended nomination, tore up the letter of the Chinese Emperor, and swore that he would be revenged for this affront. Then, lamenting that he was surrounded by traitors, he drove from his presence Ukita, Konishi and all the *daimyo* who had taken part in the mystification. Happily, Yodogimi and Maeda Toshiie interceded in favour of the latter, otherwise the Taiko would have put them to death. Yodogimi even went so far as to accuse herself of being the only one guilty in this affair, and offered herself to the resentment of the Taiko (48).

In fine the comedy had no tragic result, but Ukita had to surrender his post of General-in-chief to Hideaki, a nephew of the Taiko, and the three *daimyo*, who formed the staff, were deprived of their posts. Konishi received the order to take back the embassy to Korea and to remain there himself in the meantime. Kato, on the contrary, having become again the faithful friend, was restored to favour and sent as general of the vanguard to Korea. In confiding to Kato this post, the Taiko declared that henceforth he would always follow his advice.

But it was specially against the Koreans that the Taikō let loose all his indignation. He accused them of having inspired the Chinese with the idea of making these conditions, and declared to them in consequence that they would be the first to feel the effects of his vengeance. And indeed, in confiding nearly 100,000 men to Hideaki, the new Commander-in-chief, he commanded him to treat the Koreans with the utmost severity, and to spare neither women nor children nor even the animals.

In the spring of 1597, the new army left the port of Nagoya and proceeded to Korea. Hideaki installed himself at Fusan, while the other generals occupied almost the same positions they had abandoned the preceding year. As the Taiko had directed them, the Japanese delivered themselves up to every excess of cruelty: nothing was spared; they butchered all who fell into their hands. Only the robust prisoners were sent to Japan, where they were sold as slaves. From this epoch date equally the sending of the ears and noses of Koreans. The Taiko caused these ignoble trophies to be gathered together in Kyoto, where they were buried. The place is to be seen even now, and is known under the name of "Mimi-zuka" ear-cairn. Shimazu and Kato were the most zealous in the forwarding of ears, torn oftener from women and children than from soldiers. Shimazu alone sent more than 30,000. (49) To their honour be it said, not one of the Christian *daimyo* took part in these excesses; and nevertheless Japanese history praises the exploits which Konishi, Kuroda and Mori Hidekane performed, whenever they engaged the enemy's army.

This enemy only arrived towards the end of the year 1597, when 100,000 Chinese, say the Korean chronicles, came to the help of their allies. Up to this time the Koreans alone had made head against the Japanese army,

whom they harassed by continual guerilla warfare or by drawing them into ambushes. Hideaki, whose military capacity was more than mediocre, let himself be guided from day to day by the chances of the struggle, instead of striking one strong blow. Instead of advancing, he was reduced to act on the defensive against some thousands of Koreans, in the places which he had occupied since the commencement. But matters became still worse on the arrival of the Chinese. The Japanese were soon forced to abandon one fort after another and to fall back on Fusan, where Hideaki had already established his headquarters. Already there only remained to them three forts—Sun-chun on the west, held by Konishi; Sa-chun on the river Si-jin, held by Shimazu; and Ulsan, on the east, occupied by Kato. Sickness and, above all, famine caused even greater ravages than the arrows of the enemy. Several *samurai* deserted and took refuge in the mountains, where they obtained a livelihood as farmers or wood-cutters (50).

Meanwhile winter had come. Konishi, who was nearest to the Chinese, made unheard-of efforts to throw them back. Several times he issued from his fort and caused disorder in the ranks of the enemy, but each time he had been obliged to yield to superior force and to retire with considerable loss. Finally, driven to despair, he attacked the Korean fleet, always till that time victorious. In no encounter had the Japanese junks been able to bear the shock of the Korean galleys. The latter, constructed in the form of a tortoise, were entirely covered with iron and consequently protected against the burning arrows of the Japanese. And indeed it was only thanks to a terrible tempest, which prevented the Koreans leaving the shore, that Konishi succeeded in gaining the first and only victory over the Korean fleet.

In the two other forts the distress was still greater than with Konishi. Kato had allowed himself to be surrounded in Ulsan, where the famine became so frightful that Kato's soldiers had to eat their horses, the last extremity, one should say, for fervent Buddhists. Kato would probably have even fallen into the hands of the Chinese had not Kuroda Nagamasa come to release him from his difficult position. Such was the situation of the Japanese army at the close of the year 1597. Thus had the blindness of the Taiko plunged Japan into irreparable misfortunes. Worst of all, this fury of waging war, manifestly against the interests of the country, was only to cease with his life.

FOOTBALL NOTES.

I suppose that nine out of ten footballers, if asked what are the most important qualifications in a three-quarter, would say speed and ability to pass. Now a moment's thought will show that *defensive* ability is of paramount importance. Of what use is a three-quarter who cannot kick, tackle, and save. By "saving" I mean stopping a dribbling rush of the opposing forwards, and this is really the most difficult part of a three-quarter's duties. To do it effectively he must do exactly as the half should do behind scrum when the forwards are right on to him, and that is *fall on the ball*, not head first but sideways, as I described in previous notes. Above all, never take a flying kick under such circumstances; nearly all learners are prone to do this, with, invariably I should say, most disastrous results. A three-quarter has, during the game, any number of opportunities of getting in his kick without doing it under the above circumstances. As regards kicking, I would say that nothing but practice makes a man what is called "a perfect kick." By "a perfect kick" is meant of course a man who knows instinctively when to punt into touch, when to take his drop at goal and when to make a following up kick. To beginners it may seem impossible for a three-quarter to do any such thing and gain advantage from it. A better pen than mine puts the matter clearly. I quote

(50) These fugitives remained, after the departure of the Japanese troops from Korea; 25 years later they all perished in a rebellion.

(48) Taiko Chosen-gunki, p. 208.

(49) Chosen-eki, p. 126.

C. J. N. Fleming, the Oxford University captain of 1890, who says:—"Judicious kicking for following up is really the highest form of the art. In kicking for following up, the idea is to kick the ball in such a way that it will reach the ground just as the kicker, or some one else on the kicker's side who was not off-side when the kick was made, arrives there, and either appropriates the ball himself or prevents an opponent from returning the kick. When playing against a strong wind this usually proved most effective; down wind, too, when a back finds himself close to his own goal a high kick into the field well followed up will prove a good way of clearing his lines." Mr. Fleming rightly adds a word of caution to young players to the effect that they must not attempt tricks to the detriment of more solid play; and that it is the first duty of a three-quarter, before anything else is attempted, to learn to kick accurately into touch. So much for kicking. Tackling is the next point that warrants attention. Do not be too soon, gauge your distance, which should be that distance which enables you to charge and throw your arms round the man at the same time. If on the other hand you are being charged straight wait for the man until quite close, then go in head down, sideways, not into his stomach. If you do the latter the chances are all in favour of a ricked neck, acquaintance with many stars and planets you never saw before, and the annoying feeling that you never even got your arms round the man.

In attacking, the moment you have got on full speed, never never look for an opening, go straight ahead and as hard as you can. Once you get going do not hesitate to pass to any one on your side in a better position than you are in. But no wild, up in-the-air passing, please. A pass whether done by halves or three-quarters should be straight, low, and hard; take the waist as the level and you cannot go wrong, even though the man who is to receive the pass be travelling at a great pace. Practice on the field is the only way to acquire the art of quick and accurate passing. When the half gets the ball out of the scrum the whole three-quarter line should move straight forward, not hang in towards one another. A wing three-quarter by converging on his brethren in the hope of getting the ball minimises his chance of getting right through. Now suppose the three-quarter has got through the enemy's three-quarter line and has only the full-back to encounter, what should he do? Firstly, on no account slacken up, keep on full steam, but, secondly, at the crucial moment, look for some one to pass to. The full back cannot tackle two men at once, remember that; but of course if the three-quarter finds himself unsupported he must get past the back as best he can. A word or two as regards "fending." The Navy men showed how it could be done and I hope that some of our three-quarters will get more proficient in this respect than they are at present. It must be a push with the flat hand not a slap such as I noticed in one instance on Saturday, nor yet a push with the closed fist which I also noticed. Finally, a three-quarter to be first class must have "head," must act promptly, and know intuitively what the opposing side will do under certain conditions. A three-quarter who hesitates is a passenger, pure and simple.

We are improving, I think; but the forward play on Saturday was too rough. It was not my intention in writing these notes to mention any names, but I feel I must commend Pollard and Ward for their energetic work forward on Saturday. White fielded the ball excellently in the line-out, a most important thing, and for absolutely correct play the best we have had this season was the preliminary work leading up to H. W. Kilby's try for which he was himself mainly responsible.

OLD HEATHEN.

A practice game of Rugby football took place on Saturday afternoon, the Fifteens being composed of the probable interport team and several Association players. Under the circumstances the play was not all that would be desired from a Rugger point of view, but there can be no doubt the practice was of good service to many in the

team. Whites were the first to score, Van Smith after a pretty run down field securing a try right between the posts. This was converted, and very soon after Strome made the second try for his side, which W. S. Moss made into a goal by an excellently judged kick. After this Colours had a look-in, and getting more into each others' manner of play enabled Wheeler—the speediest sprinter on the field on Saturday—to score a try. This E. W. Kilby converted. Just before the close of the first half H. W. Kilby secured a try for the same side, which was not, however converted. Nothing was made in the second half, so the game resulted in favour of the Whites by 10 points to 8.

We regret that the afternoon's sport was spoiled somewhat for Wheeler, who, just a few minutes before time would have been called, severely sprained his wrist and had to be helped off the field to Dr. Rokkaku's house. This is the second time he has met with misfortune this season. We hope it will not prevent his taking part in the interport match, for he is one of the speediest and the keenest player in all the team.

BURNING OF THE "HOKU-UN MARU."

The steamer *Hoku-un Maru* (207 tons), owned by the Iwauchi Kisen Kaisha, which left Awomori on the 30th inst. for Iwauchi, foundered in a gale off Shiribeshi, Hokkaido, on Dec. 3rd. Of the crew of thirty the captain and twelve men are missing.

Details are published of the burning of the *Hoku-un Maru*, which took place in the Bay of Sutsu, Hokkaido, on Dec. 3rd. The steamer, laden with rice and general cargo, left Hakodate on Dec. 1st, and on the 3rd, about 5.30 p.m., was on fire. Every effort to put out the fire proving unsuccessful, she was headed for Okujirijima with the idea of beaching her. The flames, spread so quickly, however, that the attempt was abandoned, and two boats were lowered and 23 passengers and the crew of 15 including the captain, got into them. Immediately after the steamer sank. A boat containing the majority of the passengers and crew was upset and save the captain, 8 passengers, and the crew, all are presumed to have perished. The steamer was a small craft of 175 tons, owned by the Iwata Kisen Kabushiki Kaisha, Hokkaido.

DEATH OF MR. L. GROS.

We announce with deep regret the death of Mr. Louis Gros, which took place on Friday evening. Mr. Gros was in his usual health till a sudden illness set in on Tuesday and it was found advisable by his friends to have him removed to the General Hospital. Dr. Scriba, who was sent for, came down from Tokyo, and everything medical science could suggest was done for the unfortunate gentleman. Finally an operation was conducted on Friday afternoon by Dr. Scriba, and was attended with success, but the patient could not rally and passed away a couple of hours later.

Mr. Gros, who was 53 years of age, was a native of Lyons. He came out to Japan over twenty years ago and was silk inspector, first with Messrs. Strachan & Co., afterwards with other firms and latterly with Messrs. Varenne and Co. He was very popular among his compatriots and greatly liked by all other nationalities with whom he came in contact, being of an amiable and kindly disposition.

The funeral took place on Monday morning. The service was held at the Roman Catholic Church, where there was a very large attendance of friends. The floral tributes were numerous. The funeral service was conducted by Pere Gérin and Pere Pettier, and after the ceremony at the Church the coffin was conveyed to the Cemetery, where the last rites were performed. The hearse was followed by Mr. G. Reiffinger and Mr. Berard, as chief mourners, the pall bearers being Messrs. Coye, Baud, Dubourg, Gilbert, Mottu and Moreau.

ALPINE ASCENTS AND ADVENTURES.

A very enjoyable time was spent in Van Schaick Hall last evening by a very large number of the members of the Yokohama Literary Society and their friends. The lecturer was the Rev. Walter Weston, and as he took for his theme "Alpine Ascents and Adventures," a topic with which he is peculiarly to able to deal, being an enthusiastic raconteur and a practical exponent of the art of Alpine climbing in particular, the lecture proved absorbingly interesting from start to finish. It was, moreover, capitally illustrated with nearly fifty beautiful views many of which Mr. Weston had himself photographed, and by reproductions of famous pictures taken or done by leading Alpine climbers in the years gone by. Mr. Weston began with a short historical retrospect showing when the fascination of the Alps first began to exert an influence in modern Europe, and after a brief allusion to old superstitions regarding them, turned to the scientific portion of his theme which involved reference to the stories of the conquest of the great peaks, and the splendid work done by the Alpine Club. The second portion of the lecture dealt more particularly with the personal adventures of the speaker in the Alps and this was freely illustrated by capital views showing the start of a party on a specimen climb, the nature of the scenery encountered on the way up to the ice pinnacles, the story of an eight hours' exposure on a snow slope and other adventures of a really creepy kind. Mr. Weston concluded by giving some advice as to the dangers to be met with on the Alps, and eke the mountains elsewhere in the world, and how to avoid them; he showed what a large proportion of the accidents reported are due to really culpable negligence and careless disregard of elemental rules, and finished by throwing on the screen pictures of the dangers lurking in the sudden breaking out of storms. In the short space at our disposal it is hopeless to attempt to give any idea of the racy style of the speaker with the many witty stories and anecdotes which he used, or to impart a trace of his overflowing enthusiasm for his theme. Needless to say he made out a splendid case for mountain-climbers and if the good presentation of a favourite hobby is infectious, as it is said to be, we expect to see the number of mountain-climbers materially increase among those who were lucky enough to hear Mr. Weston's lecture.

A hearty vote of thanks was accorded the speaker on the motion of the President of the Society, and after a short interval had been devoted to discussion and examination of various alpine paraphernalia kindly put on exhibition by Mr. Weston, the second half of the programme was taken up. It proved very enjoyable and thanks are specially due to the Tokyo visitors for their charming contributions. Miss Ross' recitation, dealing with an incident in Napoleon's famous retreat from Moscow, was loudly applauded and a special meed of praise must be awarded Mr. Maitland for his sympathetic handling of *Papin's* "Elaine." Programme:—

PART I.

"ALPINE ASCENTS AND ADVENTURES."

Rev. Walter Weston, M.A., F.R.G.S., member of the English and Swiss Alpine Clubs.

PART II.

- Gypsy Songs...op. 55
 - "I chant my lay a hymn of love"...*Dvorak*.
 - "Cloudy heights of Tatra".....*Dvorak*.
Mrs. J. L. Cowan.
- Recitation.. "Faithful unto Death"...*Clifford Harrison*.
Miss Ross.
- Songs...(a) "My Love's an Arbutus"...*Sternberg*.
(b) "Love is a Bubble".....*Altison*.
Mr. J. L. Cowan.
- Violin Solo.....(a) "Romance"...*G. Papini*
(b) "Premier Chagrin"...*Godard*
Mr. H. A. Poole
- Song..... Elaine!.....*Guido Papini*
Mr. N. G. Maitland.
Violin obligato by Mr. H. A. Poole.

The next meeting is fixed for Friday, December 12th, when Mrs. W. Kirkland Wilson will give an illustrated lecture on "A Trip to Turkey."

CHILDREN'S ENTERTAINMENT.

The Public Hall was crowded on Saturday afternoon by a large host of happy children and also by many who must in common fairness be called children of a large growth, the occasion being an entertainment organized by Mr. C. H. Thorn for the benefit of the Ladies' Hospital Fund. Mr. Thorn is to be heartily congratulated upon the success which attended upon his kindly venture, for if happy, care-free childish laughter pealing out continuously from the start to the finish of the entertainment goes for anything, then the little ones had a royal good time indeed.

The show began with some very clever conjuring tricks by Mr. Thorn, who proved himself a very adept in the black art of mystery and would put many a professional to shame by the neatness and celerity with which he carried out the various delusions. Needless to say he was loudly applauded. We should not forget to mention that the conjurer was assisted by a very smart boy-in-buttons, Master Gerald Irwine. Part II. opened with a Coon Duett by Mr. L. E. McChesney and Mr. C. H. Thorn, the song being called "Mammy's Caroline Twins." The "twins" gave place to Mr. G. G. Brady, who sang, in costume, "One of the Soldiers." This pleased the small folks so much that they loudly demanded "more," but Mr. Brady cried off as he had another turn later on. A banjo trio by Messrs. C. Aslet, S. Pernard and A. Manley was encored and the players kindly acceded to the request. Some more conjuring by Mr. Thorn followed, and then Mr. Brady brought the programme to a rollicking close by singing "The grass widower."

We have been asked to publish the following:—The Committee of the Ladies' Hospital Fund would like to thank most cordially the gentlemen who so kindly and ably gave the children's performance on Saturday last. It would be impossible to single out any one performer as each was perfect in the part he took, and the care, time, and work given to the whole performance are most sincerely appreciated by the ladies interested in this work.

Mrs. BELLows, President.
Mrs. MOLLISON, Vice-President.
Mrs. K. WILSON, Hon. Treas.
Mrs. C. M. MARTIN, Hon. Sec.

LAW CASES.

THE MINING FRAUD CASE.

Nakamura Sadao and two other Japanese, who were committed for trial on a charge of having obtained money by fraud in disposing of a gold mine in Fukuoka Prefecture to Mr. James Johnstone, have lodged a protest against the jurisdiction of the local Court. Should this be upheld the case will probably be tried in the Fukuoka Chiho Saibansho.

SATO v. THWAITES.

In the Yokohama Chiho Saibansho on Friday before Judge Kano the hearing was resumed of the suit brought by Mr. Rennosuke Sato, of Tokyo, against Mr. C. Thwaites, of No. 61, Yamashita-cho, Yokohama, claiming payment of yen 6,995.55 in connection with a contract to show a series of illusions in Tokyo.

Three witnesses were examined, after which the case was again adjourned for the calling of other evidence.

VAN DER HEYDEN v. STORNEBRINK.

In the Yokohama Chiho Saibansho on Friday before Judge Kano the hearing was resumed of the suit brought by Dr. Van der Heyden against Mr. H. L. Stornebrink, claiming a division of property. Particulars of this case have already been published. After hearing statements by Counsel, the Court adjourned the case and decided to call Mr. Mees, who was attorney for plaintiff during his absence from Japan.

JOVANSSEN v. JOVANSSEN.

In the Yokohama District Court on Monday judgment was given in the suit for the confirmation of the invalidity of marriage, brought by

Rachel Jovanssen against her husband Adolphe Jovanssen. The petition of the plaintiff was dismissed with costs.

POPP v. GILL.

The suit of Messrs. E. Popp & Co. against Mr. W. H. Gill, claiming yen 10,000 damages for defamation of character, which had been partly heard in the Kobe Court, has been withdrawn, the parties having arrived at an arrangement.

ALLEGED BREACH OF CONTRACT.

In the Yokohama District Court, before Judge Kato, on December 9th the hearing was resumed of an action brought by Mr. J. G. Doering against Mr. Kannhauser, a former employe. The claim was for yen 5,500 damages for breach of contract. The case first came on for hearing on October 2nd, and judgment was given in default on the 7th of the same month, when the defendant was ordered to pay to the plaintiff the sum of yen 2,000. The defendant appealed against this decision.

Plaintiff's counsel applied to the Court to postpone the case until the 16th inst. as he was not prepared to proceed. The application was granted.

GOTO SOBEI v. ALLEN.

In the Yokohama Local Court on Tuesday before Judge Iriye, the hearing took place of an action for payment of yen 80.18 for goods sold, brought by Mr. Goto Sobei, Benten-cho, Itchome, against Mr. G. R. Allen, No. 31 Yamashitacho, Yokohama.

Plaintiff's counsel stated that the claim referred to the cost of some silk and other articles sold to the defendant since the 3rd January, 1901, which remained unpaid for. Judgment was given in default for the plaintiff.

NAKAMURA v. SINGLETON AND BENDA.

In the Yokohama District Court, before Judge Kano, on Dec. 10th, the hearing of the claim, adjourned from the 12th November, for the payment of salary, amounting to yen 200, brought by Nakamura Shinzaburo against Messrs. Singleton and Benda was resumed. Mr. Yano and Mr. Sekijima represented the plaintiff and Mr. Takahashi appeared for the defendants.

Judgment will be given on Dec. 12th.

OKASAKI v. BRUHL FRERES.

In the Yokohama District Court, before Judge Kano, on Dec. 10th the hearing took place of an action brought by Mr. Okazaki Bunjiro of Tokyo, against Messrs. Bruhl Freres, No. 22, Yokohama. Mr. Fukuda appeared for the plaintiff and Mr. Nagashima and Mr. Hidaka represented the defendants. The facts have been already reported in our columns.

The Court adjourned for further evidence:

ROUGH VOYAGE OF THE "ATHENIAN."

The C.P.R. steamship *Athenian*, from Vancouver, arrived in Yokohama on Wednesday morning five days over due, and considerably the worse for a most stormy passage. The officers of the ship assert that it was the roughest voyage of their experience. A terrific wind struck the ship the second day out from Vancouver, November 20th, and from that day until Sunday night, December 7th, she fought her way through winds and waves, the storm culminating in a hurricane on Sunday afternoon. A tremendous sea struck her about 3 o'clock, demolishing the skylights of the music room and flooding the dining saloon and 1st class cabins below. The entire voyage was one requiring the hardest of work and the most watchful care on the part of the officers of the ship to prevent disaster. On the first day of the storm, Mr. S. H. Nealy, of Washington, D.C., one of the passengers, while on a stroll was pinned against the lee bulwarks by the lurching of the ship and sustained painful but not serious injuries. One rib was fractured and his side badly bruised. On December 1st as seven Chinese sailors were setting the main jib, it was whipped by the wind from their grasp, and the wood pulley struck one sailor literally knocking

the entire top of his head off, killing him instantly. It then struck the second man on the head, injuring him so that little hope is entertained by the ship's surgeon for his recovery, the third man was badly injured about the shoulder. During the typhoon of Sunday, Dec. 7, the assistant purser, Mr. O'Mera, of Vancouver, was thrown violently by the lurching of the ship, his nose and cheek being badly cut. During most of the voyage the chief steward of the *Athenian* has been seriously ill, and this with the other disasters aboard has kept Surgeon Palmer busy.

Through the sixteen days of storms encountered by the *Athenian* the barometer has recorded a most extraordinary condition of atmospheric changes; so unusual that Capt. Mowatt will forward the record to the Hydrographic Office.

The passengers without exception highly commend the manner in which the ship was handled by her officers during the sixteen days of continuous and tempestuous storms—Contributed.

LITERARY GOSSIP.

It will be learned with regret, though hardly with surprise, that Dr. George MacDonald, the poet and novelist, is in very feeble health. The veteran writer is now nearing his seventy-eighth birthday. His first volume, "Within and Without," was issued in 1856; his last work, "Rampolli," in 1897—his literary activity thus covering a period of forty years. Dr. MacDonald has been living with his son at Haslemere since May last.

A literary and historical find of more than ordinary interest to Scotland and America has just been made in Pennsylvania, being ten holograph letters of Paul Jones, the famous Scottish seaman and founder of the American Navy. The letters, written in 1782, are in excellent condition, and relate largely to naval matters, filling up a gap that has hitherto existed in the life of the dashing commodore. The letters are now in the possession of Mr. J. Pierpont Morgan.

In a very readable article in *The Quiver*, for November, particulars are given of the various noblemen who are in Orders. Though it is a rule that clergymen shall not become members of the House of Commons (says the author), no veto is placed upon peers in Holy Orders, who are not Bishops, taking their seats in the House of Lords. There are at the present time seven noblemen thus exercising this right—a Marquess, four Earls, and two Barons; and though their calling is a spiritual one, they yet sit in the Upper Chamber, like the mass of their brethren, as Temporal Peers.

A cousin of the late Nathaniel Hawthorne, who lives in Salem, says there never was a House of the Seven Gables in that town. He tells the *Boston Journal* that "Hawthorne came down to visit me shortly before his death, and we rambled about the old haunts of his early days. I was particular to ask him to point out, if he could, the famous House of the Seven Gables because at that time the controversy existed in some degree. 'There never was any,' was his immediate reply to me. 'I never had any particular house in my mind when I wrote the story. It was just a fancy of my own.' And a very successful 'fancy' it was.

The Rome correspondent of the *Daily Express* sends a very interesting piece of news. It is to the effect that Professor Ciro Nispi-Landi has obtained leave from the Italian authorities to subject the bed of the Tiber to a thorough search. Historical research had shown, he says, that for ages, "the Romans cast their most priceless possessions on the bosom of Father Tiber, as offerings to the god which they believed to live beneath his waters." Besides such articles, the Professor expects to find an extraordinary variety of curios in the way of armour worn "by the many soldiers who must at one time or another have lost their lives in battles that raged along the banks and on the bridges of the Tiber; and many more valuable articles which were cast into the stream by the early Christian fanatics. People always exaggerate the chances of treasure trove, but we

do not doubt that if the bed of the Tiber could be thoroughly searched the "finds" would be on a very great scale and of immense interest.

Henrik Ibsen has a more effective way of enforcing his personal wishes against his Government than a refusal to pay his rates and taxes. The Norwegian Government lately required the house (not the Doll's House) occupied by the dramatist for the extension of Government offices, and Ibsen was politely requested to shift his quarters. He replied with a threat that reduced the Government to abject submission. He said if he were turned out of his house he would leave the country and become a German. The Government being thus reduced to Ibsen's choice, chose Ibsen. Ibsen's patriotism (the *St. James's Gazette* remarks) apparently hangs loose on him, for he would rather chuck his country to-morrow than suffer personal inconvenience.

Another volume has been added to the series of exquisite little books which Mr. John Lane of the Bodley Head is issuing under the title of "The Lover's Library." This is "The Love Poems of Herrick." We read little of Robert Herrick nowadays, notwithstanding the sweetness and melody and intensely English feeling of his verse, and it is likely that this selection of the hundred and fifty or more of his gems which have been collected in this dainty booklet will satisfy the desires of most lovers of verse. About a dozen of the "Lover's Library" volumes have now been brought out, and together they make the prettiest possible row on the bookshelves, pleasing alike to the eye and to the poetic taste.

Some ingenious person said recently that great humourists were always thin. A contemporary asked its readers to search their memories for "a fat-and-great-humourist," and the following passage from Thackeray's *English Humourists* was sent in:—

Swift was fat, Addison was fat, Steele was fat, Gay and Thompson were preposterously fat—all that fuddling and punch-drinking, that club and coffee house boozing shortened the lives and enlarged the waistcoats of men of that age.

Perhaps the ingenious person will reply that he meant humourists of a different order; but even American humourists have not all been thin.

Amid all the recent comments on the *Edinburgh* centenary, it seems to have generally escaped notice that the present centenary Review is the second, and not the first, *Edinburgh*. The first *Edinburgh Review* was founded in 1755, but although the services of nearly all the finest writers in Scotland were enlisted to establish it, only two numbers appeared, the first in July and the second and last in January of the succeeding year. The editor was Alexander Wedderburn, afterwards Lord High Chancellor, and among the contributors were Adam Smith, Robertson, and Blair. Smith in the first number reviewed Johnson's Dictionary, and in the second wrote a long account of contemporary literature in England and on the Continent full of his own peculiar critical judgments. Hume was excluded from the Review on theological grounds. Nevertheless, its theological notices were the cause of the magazine's sudden fall. They excited such opposition that, according to one of the contributors, "a regard to the public tranquillity and their own determined the reviewers to discontinue their labours." Sir James Mackintosh republished the two numbers in 1818, when the second *Edinburgh* had become famous.

Sir Conan Doyle, says the *Academy*, is one of the victims ordered out for execution in the third issue of the omniscient *Ancestor*. The critics, it would seem, went too far when in *The White Company* they told us that we had "a perfect picture of fourteenth century England," and that romance had here "its foundation upon sure fact and accurate detail." Heraldry is the main stumbling block; and by Mr. Oswald Barron's showing, the author seems to have given himself rather generously away. That was not for the general reader to find out; but that the maker of "The Song of the Bow" should have clothed

his archers in "white surcoats with the *Lion of St. George* in the centre" might fairly have been expected to surprise the careful reader. One element, at least, in that composite flag, the Union Jack, most people know. The article ends with a bit of cordial chaff that nobody could resent. "So with happy remembrances of a good story well told . . . we leave *The White Company* to go its jolly way, blowing as its wont upon its nakers, a kind of kettledrum which the good knight Sir Conan . . . insists upon their using for trumpets."

What does the child really like in the way of books? We have heard of a child who continually interrupted the reading of Mr. Kipling's *Just-So Stories* to ask the meanings of words; on the other hand we know children who listen to the stories over and over again without a question. But they always insist on having the verses read. Perhaps the best combination is that of verse with reasonably simple pictures, such as we have in *The Visit to London*, by Mr. E. V. Lucas and Mr. F. D. Bedford. Mr. Lucas's verse is easy, suggestive and funny. The following lines from "The Presents" would please most children:—

Their father's present seemed to be
A Bradshaw's Railway Guide,
But really was a useful box
With postage stamps inside.
The mother's present pleased them much—
A china mandarin,
Who, when his head went up and down,
His tongue put out and in.

Mr. John Morley has decided to give the Acton Library to Cambridge. Mr. Carnegie, of course, made a present of the great collection of books to Mr. Morley absolutely, and the latter admits that for a time he built libraries in the air—"I played with the fancy of retaining it for my own use and delectation." But upon consideration, Mr. Morley, "with the possible reservation of an inconsiderable portion of quite secondary importance," offers the library to the University of Cambridge—an offer already accepted by the Duke of Devonshire, as Chancellor. Mr. Morley says that the library was "collected by Lord Acton to be the material for a history of Liberty, the emancipation of Conscience from Power, and the gradual substitution of Freedom for Force in the government of men." This is interesting because it has been sometimes stated that the books are all ecclesiastical in character. As a fact religion was only a particular case of a general theory. Lord Acton's governing notion was to collect material on human institutions as the ore which was to be mined into a work on Liberty. Cambridge will be grateful to Mr. Morley for his splendid gift, a worthy memorial of a great scholar whom Cambridge—on second thoughts—deservedly honoured.

NEWS OF THE WEEK.

Owing to the drought, says the Melbourne correspondent of the *London Times*, it is estimated that Australia's exports for the ensuing year will be reduced by £5,000,000. It will also be necessary to import £1,500,000 worth of foodstuffs.

We have received from—we presume—the *Kobe Herald*, the sole agent of these publications, three sheets giving excellent bird's-eye views of Kyoto, Osaka and Kobe, and Nara. The streets and the prominent buildings in the cities, and the railways and roads traversing the adjacent country are delineated with much minuteness and, we should think, with considerable accuracy. Of course the sheets are issued *apropos* of the Osaka Exposition.

The *Penang Gazette* publishes an interesting article anent a bill for \$2.71 recently sent to Lieut. C. V. McC. Pritchard, of the Singapore Volunteer Infantry, by a grateful Government at home. It seems that when Mr. Pritchard had faithfully served his country for twenty years, the nation awarded him the Volunteer Long Service medal. The account for \$2.71—or 4s. 8d. sterling—was the bill for the cost of the medal in question. The grateful British nation rendered

it to Mr. Pritchard as it handed him the medal. The itemized extra cost of the ribbon, if any, is not stated by the Penang paper.

A London telegram dated 30th ult. says:—The Messageries Maritimes Company has passed its dividend. The company has resolved to write off half its nominal capital, and raise 15,000,000 francs (£600,000) in preference shares in order to build cargo boats.

In a discussion on a paper—"Illustrations of the Gospel drawn from Chinese Sources"—read by Mr. John Darroch before the Missionary Association at Shanghai on December 2nd, Dr. Gilbert Reid gave several appropriate quotations from the Confucian Analects and the Works of Mencius, and mentioned, among other things, that on one occasion, being in a town near the Yellow River, he found that a descendant of Mencius was the most confirmed opium smoker in the place.

The new launch of the Osaka Water Police built by Messrs. Fuji-Nagata & Co. of Osaka, underwent a trial on Dec. 7th, which proved quite successful. This vessel measures 73 feet in length, 15 feet in width and draws 7 feet of water. Her gross tonnage is 53.09 and registered tonnage 23.73. Her indicated horse power is 17, nominal horse power 83, which is capable of propelling the vessel at the rate of 13 knots, although the contract speed was 12 knots. Her hull is of wood, all the deck work and fitting being of teak. There is a search light of 1,200 c.p. on the bridge. The vessel is equipped with apparatus for towing purposes. There is a nice saloon aft, neatly decorated. The *Hoan Go* reached the New Harbour of Osaka at 3.30 in the afternoon and the Worthington pump with which she is fitted was then brought into use. This is a powerful pump with the necessary hose for use in case of fire in the harbour.

A Chinaman named Yu Taw-rin, employed by Ko Taigo, No. 52 Yamashitacho, Yokohama, collected 3,200 yen in cheques from two customers in Nihon-bashi, Tokyo, on the 6th inst., which he cashed at the First National Bank. He then alleged that he lost the money in the street, and immediately reported the matter to Ko Taigo by telephone. Two other employees of Ko Taigo at once went to Tokyo and reported to the Nihon-bashi police station. The police inspector in charge at once made an enquiries whereupon Yu Taw-rin confessed that when he went to Tokyo he was accompanied by another Chinaman named Sho-do-ho. This man waited in a restaurant until he had collected the money and after he had cashed the cheques he handed the money to him. The confederate returned to Yokohama at once, the intention being to divide the spoils when the affair had quieted down, but the Nihon-bashi police arrested the confederate before the scheme matured, and the money was returned to its proper owner.

The marriage took place on Dec. 3rd at Shanghai, in Holy Trinity Cathedral, of Mr. David William Scott Crawford (one of the heads of the firm of Lane, Crawford & Co.), and Miss Veda Ethel Buyers, elder daughter of Mr. W. B. Buyers, Secretary of the Marine Engineers Institute. Friends of both parties were present at the ceremony, which was performed by the Rev. H. C. Hodges, M.A. The bride was led into Church by her father, and was attended by her two little brothers, in kilts, as pages, two diminutive bridesmaids, in the daughters of Mrs. Wakeford Cox, and by her sister Miss Nora Buyers, as principal bridesmaid. The bride's dress was of white satin and chiffon, made with a full court train; the principal bridesmaid was dressed in white crêpe de chine, trimmed with white satin and chiffon. The two children were in white also, but were attired in quaint Kate Greenaway dresses, which were highly becoming. Mr. John West supported the bridegroom as best man, and additional groomsmen were Messrs. T. A. Clarke, W. F. Wingrove, G. Willeumier and Dr. Keylock, Race Club friends of the bridegroom, who is a prominent member and jockey of the club.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

Last January there appeared in *La Revue* some rather severe strictures of Dr. Inoue Tetsujirō's views on religion. The writer based his remarks on Dr. Inoue Enryō's representations of Dr. Inoue Tetsujirō's opinions. To this procedure Dr. Inoue Tetsujirō very naturally demurs, and in No. 186 of the *Tetsugaku Zasshi* he quotes from *La Revue's* criticism certain passages, which he maintains are entire misrepresentations of his actual views. *La Revue* said in effect that Dr. Inoue Tetsujirō purposed choosing from each existing religion the best parts and by blending them with the deductions and doctrines of modern science to produce a new religion; and Dr. Inoue Enryō dwelt on the insipidity of such a dish as the University Professor proposes to prepare for hungry souls. To all this Dr. Inoue Tetsujirō replies that he has never proposed to blend scientific elements with religion. Science, he says, it is evident is wholly founded on cognition. But men's lives are very much influenced by considerations that have their source outside of cognition. Men have ideas as to real being, or actual existence which affect their actions very seriously. Religion is nothing but the organ whereby our ideas as to the true reality of spiritual essences are expressed and in which they are embodied.* The harmony of the idea of real being with the cognition of phenomena is certainly possible, says Dr. Inoue, (*Jitsuzai no kwanen to genshō no ninshiki to wa chōka shiyerarubeki mono nari*). A thorough explanation of the existing world and man's nature must give a satisfactory account of what cognition teaches and what man's transcendental notions teach. But religion and science occupy different provinces and I have never attempted to amalgamate them. Dr. Inoue Enryō's allusion to Comte as attempting to do what I propose is beside the mark, as Comte's deductions were all based on experience, that is, on the cognition of phenomena. This was the real reason of the failure of Comtism as a quasi-religion. It lacked the element the presence of which gives to religion its peculiar powers. Dr. Inoue Enryō, proceeds Dr. Inoue Tetsujirō, accuses me of complaining of the number of existing Buddhist books and hints that I wish to lessen their number. What I said was that in Buddhism there is a danger of not being able to see the wood for the trees, of not being able to determine amid the multitude of doctrines what is important and what insignificant. Who is there among Buddhist priests even that can point to anything like a concise and yet exhaustive exposition of the creed in any one book? Dr. Inoue Tetsujirō next takes up the illustration used by Dr. Inoue Enryō and says that a mixture of nourishing food derived from various sources need not necessarily be tasteless, and that the nourishing property of certain things is increased by being combined with others, and so on. The conclusion which he reaches is that religious development must go on, that neither orthodox Buddhism nor orthodox Christianity suits the majority of intellectual men at the present time, an assertion which can not be gainsaid, and that hence it is desirable to construct a creed of an ideal type that shall command the homage of those serious-minded persons who now belong to no religious sect. This creed, according to Dr. Inoue, should have practical morality as its chief aim. Dr. Inoue Enryō denies that Buddhism is pessimistic and that it makes a point of suppressing the desires of mankind. To this Dr. Inoue Tetsujirō replies that the whole history of orthodox Buddhism confirms the opinion that the characteristics in question are inseparable from the creed. In as far as the Nichiren Sect has preached optimism, continues Dr. Inoue, so far is it heretical, and the same may be said of the liberties allowed by the Shin Sect. They are allowed in defiance of Buddhist teaching. The tenets of the Shin Sect cannot be called Buddhism (*Shinshū*

ga kinyoku shugi too yaburitaru wa, Bukkyō no shūi ni kamawazu; sunawachi Shinshū wa Bukkyō to shō subekarazu.) Dr. Inoue Enryō thinks that to reform an old religion is an easier task than to set up a new one, but neither he nor any other leader makes much progress in this reform, says Dr. Inoue Tetsujirō. Nothing is to be hoped for in this line. All that the majority of Buddhist priests care about is making money.

Commenting on the above, the *Taiyō* says Dr. Inoue Enryō undoubtedly misrepresented his opponent when he made out that he was trying to imitate Comte, since it is on that transcendental cognition which Comte would have nothing to do with that Dr. Inoue proposes to base his system of ethics. In regard to the want of any Buddhist work corresponding to the Christian's Bible, what Dr. Inoue Tetsujirō says is perfectly true. There is no concise authoritative statement of the fundamental doctrines of the religion. As regards the question whether Buddhism is pessimistic and as to its attitude towards human desires, distinction must be made between the original teaching of Shaka and the subsequent development of the creed. In all religions there is a wide discrepancy between the doctrines proclaimed by different men at different times. That which Paul believed was not the same as that which Christ believed, and when we come to Luther and Calvin we find a still greater difference. To determine, then, what are the distinctive characteristics of a creed plainly involves a thorough examination of the whole history of its development.

* * *

According to the *Chūdkōron* (a Buddhist organ) in September last an association very much like the Young Men's Christian Association was formed by the Neo-Buddhists called the Bankoku Bukkyō Seinen Rengōkai. The objects of the Association are thus stated in the *Chūdkōron*. (1) There are Buddhist converts scattered all over the world. The Association aims at acting as a link of connection between them. (2) It is proposed to establish a centre in Tōkyō where Japanese and foreign Buddhists can meet and get to know each other. Furthermore the Association will endeavour to assist in every way possible Japanese Buddhists going to foreign countries and foreign Buddhists who visit Japan. (3) It will be the aim of the Association to revive interest in the creed in countries where for a long time Buddhism has been on the decline. (4) The Association purposes to hold meetings in Japan and in other parts of the world, to start an organ in English and to despatch missionaries to foreign countries and support them there. The Association states that in every part of the world there are found persons who are wearied of the material civilisation in the midst of which they are living and who are longing for the spiritual enlightenment that Buddhism can bring to them. This then is a suitable time for making a special effort to preach the Buddhist gospel. Many nominally Buddhist countries are sunk in superstition, corruption and religious indifference. Japan has taken upon herself the responsibility of awakening the Far East and the present Association aims at furthering in every way possible this noble object and asks every earnest Buddhist throughout the country to lend a helping hand.

We observe a notice in the *Taiyō* to the effect that in October a Society was formed called the Tō a Shūkyō Kenkyū-kai, which aims at giving a new impetus to Japanese Buddhism by inviting to this country eminent foreign Buddhists from India and elsewhere. The Society is said to be spending much money on this project. The *Taiyō* sneers at the whole affair and says that the adoption of such methods indicates a worldly spirit and that where religious feeling is real no such advertising is required. This kind of thing does not savour of real religion at all, says the *Taiyō*.

* * *

Some time ago a few prominent Christians and a few University professors formed a Society for the Prevention of Cruelty to Animals. People are asking what this Society purposes doing. Dr. Katō Hiroyuki, in the *Kyōiku Kōhō*, in his common sense, practical way discusses the whole question

of cruelty to animals and touches upon its connection with religious feeling. The following is the substance of his remarks: A society has been formed for preventing cruelty to animals, but the Japanese public has not as yet taken up the subject very warmly, nor has there been any attempt to define in what cruelty to animals consists. In ancient times Buddhism went far beyond Christianity in forbidding cruelty to animals, the reason being that according to the Buddhist conception the nature of animals and of man is in many respects the same, and a soul may first dwell in an animal and then pass on to find a tabernacle in a human body on its way to a still higher state. The prohibition of the slaying of living creatures of any kind, however, was only intended for priests and was not applied to laymen. The present movement in order to succeed must be based on reason, that is, the public must be convinced that the care of animals is one way of promoting human interests. A mere appeal to the feelings in a vague manner is not likely to lead to much good. It might be argued that the killing of wild and savage beasts involves cruelty and therefore should be stopped, but this would involve the subjection of man to these animals. Animals are for the use and the convenience of man, and there are occasions when man's necessities involve a certain amount of harsh treatment of animals. The Buddhist prohibition of cruelty had for its chief object the softening of the feelings, but it went too far. We are told that his reverence Hōnen Shōnin lived such a perfect life that he never once during his stay in this world injured the leg of a mosquito. It is said that the noted priest Shaka Unshō once remarked that in the case of a man whose heart is thoroughly weaned from the world and who is devoted to Buddha the fiercest beasts would be awed by his presence and retreat before him. It is the wickedness of men that enrages wild animals against them. Now nobody doubts that his reverence Unshō is a holy man; so it was proposed by somebody that he should go to Asakusa or Ueno and test his theory by entering a lion's cage, but this he declined to do. Now to try and stop cruelty by overstating the claims of animals to our consideration, as is frequently done, is evidently a mistake. A certain amount of suffering must be inflicted on animals by man. But the line must be drawn between what is and what is not necessary. Our way of preparing carps to be eaten is certainly most cruel. The fish is cut up while still alive. Moreover, numbers of shell-fish are put into water and boiled while still living. People fuss over the occasional cases of cruelty that happen to meet their eyes in the streets, while they say nothing about the habitual inhuman practices that are going on in their midst. There are many necessary offices filled by men that tend to make them very cruel. It is said that murders in Europe are very common among butchers, the taking of life being regarded by them as a trifling affair. In connection with this I call to mind a story that is worth relating. In the Tokugawa days there was a certain family known as Yamada Asaemon, members of which, generation after generation, filled the office of public executioners. Which of the Asaemon's it was I can't tell you, but it once happened that when one of them returned to his house one evening his mother was doing needle-work by the side of a lamp. As he watched the inclination of her head towards the work, he said to himself:—"What a splendid position for beheading! It couldn't be better! Shall I cut it off?" He had his hand on his sword, but instantly came to his senses and was subsequently so shocked by the incident that he resigned his office and retired into private life. How far the simple feeling of tenderness should be allowed to control men's actions towards animals is a difficult question. Some would stop all sport and all vivisection as cruel, but in our opinion human interests in all things have to be placed first. Animals exist for men rather than men for animals. The question of how animals should be treated is a somewhat complicated one and requires delicate handling. The Society that has been formed should lose no time in defining the limits within which its crusade against cruelty is to be carried on.

* This seems to be one of the ultimate ideas of Lotze's metaphysic, which briefly stated is that all true reality is possible only in the form of spirituality. —(WRITER OF SUMMARY).

The *Kirisutokyō Shūhō* (The Christian Weekly News) writes on the social aspects of Christianity in the following strain: One of the chief reasons of the small amount of influence exercised by Christianity on society generally is the fact that those evangelists who have gone into secular callings have not as a rule carried their Christianity with them. Whether they changed their occupations on account of loss of faith or whether loss of faith was the result of their adoption of a secular calling, is a question that cannot be settled. Probably there are cases of both of these things happening. At any rate the fact remains that it is in society that their renunciation of the Christian faith has taken place. It has become the habit with professing Christians when engaged in secular business of various kinds to conceal their faith or at any rate to fail to make it plain to the public that they are Christians. Instances of this kind of thing were common during the General Election last August. Compared with the outside world the Christian Church is pure, but when a small body like the Christian Church comes into contact with an unscrupulous and corrupt large body like society, that the Church should suffer some evil consequences is to be expected. If on this account Christians were to separate themselves from the world, the world would become more corrupt than it is. The Church must not keep aloof from society. It must take part in politics, business, and secular education and seek in a variety of spheres to stem the tide of evil.

Reverting to the above subject in another note, the *Kirisuto-kyō Shūhō* says:—It is true that compared with other religions in Japan Christianity has turned its attention to social needs and to the reform of social abuses. It has instituted a crusade against prostitution; it has established reformatories, orphan asylums, and the like; so that when compared with Buddhism it has seemed to have accomplished a great deal. But when judged by its own standards, what it has done appears quite inadequate. Our efforts in these matters need to be better sustained than they are. We begin many things that we never carry through. Take the agitation against prostitution and the Ashio copper-poisoning affair. Have we not most of us ceased to take an interest in them? And yet neither of them has been settled as we desire to see it settled. We have aroused public attention in regard to these matters, but we ought not to stop there. Then there is the case of cruelty to female operatives at Ōmiya, Saitama Prefecture. Is not this an instance where Christians ought to be first and foremost in pleading for the helpless and calling for justice on the offenders? But the agitation against the cruelty perpetrated has not proceeded from Christians. *

Commenting on the Ōmiya case the *Rikugō Zasshi* says:—It is reported that a bill will be brought forward by the Government during the next session of the Diet dealing with the whole question of the treatment of factory hands. It is said that for a long time past the Department of Agriculture and Commerce has been collecting information on this subject. It is to be hoped the Bill will contain some stringent measures for protecting the rights of employers and that when the Bill has become law, the Government will appoint inspectors of factories whose duty it shall be to see that the rules controlling these establishments are strictly observed.

* * *

In the *Shinjin* (No. 4) Mr. Ebina Danjō, under the title of "Christianity and the Chinese Empire," expresses himself as follows:—When Mr. Wu Ju-lung, the President of the Peking University, was in Tōkyō, at a meeting of Christians, he asked whether there was not some difference between the Christianity propagated in Japan and that preached in China, for, said he, if there is no difference, how do you account for the fact that Christianity is always causing trouble in China, while here it causes no trouble whatever? We are not surprised at Mr. Wu's being puzzled over this question. We deeply sympathize with

his feelings on this subject and will now proceed to say what we think on it. Though there may be some minor differences in the methods pursued in the two countries by the missionaries, this does not account for the different ways in which the gospel message is received in China and Japan. The fact is that from ancient times our attitude to strange doctrines of all kinds has been more liberal than that of the Chinese. Under the Bakufu, though the Chutz (朱子) school of philosophy may be considered to have been the orthodox school according to the notions of those in power, the teaching of such men as Yamaga Sokō, Itō Jinsai and Butsu Sorai, though directly opposed to the Chutz' doctrines, was tolerated, and in not a few cases the disciples of the above-named men were appointed to high offices by the Bakufu. The whole attitude of Japanese leading men to heterodoxy was one of extreme toleration. To show the difference between China and Japan in this matter, it is worth while drawing attention to the different interpretations given to a passage in the Confucian Analects which, when Japonicised, runs thus:—

Iian wo semeru (政) *wa, kore gai nomi* (To persecute heterodoxy does nothing but harm). In China Chutz gave to the character 政 quite another meaning, making it signify study, and a great many texts published in Japan give *osamuru* as the true reading. But Sokō pointed out that Chutz had corrupted the text of the Analects in this place, and convinced most people that Confucius was in favour of allowing great freedom in the expression of opinion. Sorai argued in the same line and Jinsai went as far as to say: *Hito yori mireba, ju ari; Butsu ari; Ten yori mireba, ju naku Butsu nashi; tenchi no aida tada michi aru nomi*. These kind of sentiments prevailed so much in Japan from ancient times that we have come to regard the introduction of new doctrines or a new religion with unconcern.† So that the transition from the old state of things to the new was comparatively easy to us. Freedom of religious belief, which is now secured to us by the Constitution, was what leading Japanese 300 years ago desired to see granted. I would ask Mr. Wu Ju-lung whether he can find in the whole of Chinese history any record of liberality of sentiment towards strange doctrine.†† The Chinese have not only clung to their Confucianism, but they have clung to one method of interpreting the meaning of Confucius' words, and that is the method adopted by Chutz. It is the extreme narrow-mindedness of the Chinaman that causes a perpetual commotion when the doctrines of a foreign religion are preached. Until this state of mind can be got rid of, disturbances connected with mission work will not cease. The persecution of Kang Yu-wei was mostly caused by the fact that he taught what were considered heretical doctrines. At the very beginning of the Meiji era, when our modern intercourse with Western nations commenced, there were Japanese like Nakamura Keju and Nijima Jō, who fully realised that Christianity could be of great use to us. Have there ever been such men in China?

There is another and deeper cause for the friction that exists between Chinese Christians and the Chinese nation, and that is the inferior character, when compared with our Japanese Christians, of the majority of those who enter the church in the neighbouring country. The Chinese Christians are for the most part ignorant, and entirely lacking in independence of spirit. They follow the missionaries blindly and are absolutely without any patriotic feelings or national pride. When any small trouble occurs they immediately appeal to the missionary for help and he applies to his consul and thus an international dispute arises. We

† Not a few foreign observers seems to be of opinion that this indifference on the part of the Japanese is to be traced to lack of real interest in philosophy and religion. They tolerate everything in this line, because they really care for nothing, say these critics.—(WRITER OF SUMMARY.)

†† There is a little slip here, for if the reading defended by Sokō given above is correct Confucius favoured toleration of strange doctrines, though he may have been misrepresented by his followers in subsequent ages.—(WRITER OF SUMMARY.)

have not had many disturbances in Japan connected with Christianity, but whenever there has been anything of the kind our Christians have always resolutely set their faces against asking for foreign help. In the Echigo affair some time ago help was offered by a Missionary. What was the answer of the Christians residing in the place where blood had been shed:—*Gwaikoku no kanshō wa isssetsu gomen wo kōmuru*. (We beg to decline to accept any foreign interference whatever). I ask Mr. Wu whether there is any of this spirit among the mass of Chinese Christians? There is no means of altering the present situation unless China is prepared to allow her sons and daughters to imbibe whatever they please in the way of teaching; unless she is prepared to allow anti-Confucianists to have their say. I do not advocate China's entrusting the education of her youth to the missionaries. This would be to encourage the growth of an unpatriotic set of men, to produce a number of traitors to the country. (*Karera [senkyōshi] ni kokumin kyōiku wo makase okaba, gwanrai aikoku no jō toboshiki Shinajin ni wa kanarazu ōku no baikokudo* [賣國奴] *wo shōzen*). Let Chinamen of influence and intelligence examine Christianity for themselves, and when they have mastered its principles, let them become the pioneers of a new civilisation. Our noted Confucianist, Yamazaki Ansai, once asked his pupils what they would do if a Chinese Army with Confucius as the General and Mencius as the next in command were to attack Japan. The pupils looked puzzled and made no reply. Whereupon Ansai said:—"Of course we would take both of them prisoners. This is the course recommended to us by their teaching." Let Wu Ju-lung, actuated by the same spirit as Ansai, take the lead in creating for China a set of independent, patriotic Christians that have no connection whatever with foreigners and let these Christians show to the Chinese nation what real Christianity is like. This is the only sure way of saving China from the evils that threaten her on every hand.

* * *

The *Tōkyō Maishū Shinshi* having been blamed by a few Christians for publishing facts concerning the bad lives of certain pastors, in an article entitled "Concubinage among Christians," contends that conduct which is known to the general public, which has been alluded to by the leading journals of Tōkyō certainly forms a suitable subject of discussion for a Christian journal. There is too much tendency to white-wash sepulchres that contain corrupt matter, says this organ. It goes on to write thus: One of the reasons of the lack of strength and influence complained of among Christians comes from the fact that there are men in the ministry that are quite unworthy of the office they hold. We shall not make any headway until we get rid of the encumbrances and hindrances that now beset our path. What is needed is more care in admitting candidates for baptism into the church, the expulsion of unworthy members of the Church, and the return to their countries of idle Missionaries. There is constant complaint about the insufficiency of Divinity students; but it is not numbers that are wanted as much as men of the right type. A few Pauls or Moodys could effect more than hundreds of inferior men. The *Yorozu Chōhō* a little time ago gave publicity to the case of a certain evangelist called Nakajima—under the title of the *Ōkami no Bokushi* (The Wolf-Pastor)* and astonished the public thereby. And at this very moment there are people engaged, it is alleged, in collecting information concerning certain scandalous proceedings connected with another Christian pastor. With such things as these going on we feel called upon to speak out, says the *Maishū Shinshi*. This is no time for

* This case was referred to by several newspapers. Nakajima, it seems, accused another pastor of having committed adultery with his (Nakajima's) wife, with the object of extorting money from the wife of the accused pastor. Having secured several hundreds of yen the matter was allowed to drop. But Nakajima and the woman who was his accomplice in the affair have both been arrested.—(WRITER OF SUMMARY.)

* The *Jiji Shimpō* was the first journal to draw special attention to this case and subsequently went to a good deal of trouble in collecting information thereon.—(WRITER OF SUMMARY.)

calling black things white, for acting the hypocrite and trying to make things appear different to what they are. (*Negawakuba shiro wo shiro to shi, kuro wo kuro to seyo, daitan nare, gizen wo yosouu nakare; gizensha wo shobun seyo. Shikarazareba Nihon no Kirisutokyō wa chi ni ochiin. Warera yamu naku kore wo iū.*)

Under the title of *Protestant kakuhā no Daidō-danketsu* (大同團結), "A Union of Protestant Sects based on similarity of views on Essentials," Mr. Hachihama Kikusen in substance expresses in the *Maishū Shinshi* the following sentiments. Though during the eighteenth century, as a result of the separation from Rome at an earlier period, the tendency in religion was all towards individualism, during the nineteenth century the tide set in towards union and amalgamation. The effects of this spirit have been felt in Japan. The union of the Presbyterians, the Congregationalists, the Episcopalians, the Methodists and other sects, and the Evangelical Alliance, which aims at uniting all bodies, are all steps in the right direction. But the action of the Evangelical Alliance in the Ebina affair last year was a plain case of persecution on account of doctrine—a course which if persisted in will endanger the existence of the Alliance. Already the members of the Alliance have begun to discuss their differences and seem to be about to expel each other from the Alliance (*Tagai ni i wo tatete, tagai ni aishirizoken to suru ni itareru*). This is much to be regretted. Though the various Protestant sects are divided from each other in respect of doctrines and organization, it is much to be desired that they should unite for evangelistic purposes. But it appears that not even this can be brought about. Moreover, the united evangelistic work begun last year known by us as the Taikyō-dendō cannot be continued. We observe also that religious bodies do not keep to their own districts, but set up rival stations at the same places and there are some that go about as the denouncers of the heresy of which their brethren are said to be guilty. Our divisions are the one hindrance to rapid progress. From every point of view the union of all earnest-minded Christians is to be desired.

The *Tōkyō Maishū Shinshi* has a leading article on missionary work in Hawaii. Few people, it says, have any idea of the importance of Hawaii to Japan. Its area is about 6,740 square miles, about half the size of Formosa and its population about 125,000. According to statistics published last year, though we only imported 5,265 yen worth of goods from Hawaii we exported to the islands goods valued at 1,294,790 yen, and year by year the money sent to Japan by our labourers there amounts to 6,000,000 yen. From what other country in the world does Japan receive so much pecuniary benefit? The Japanese in Hawaii to-day number over 60,000; nearly half of the whole population. If these Japanese could be converted to Christianity and sent back to their own country, what a change they would make here! There are two missions labouring among the Japanese in Hawaii: the Hawaiian Board of Missions and the Methodist Church. There are 12 Japanese Evangelists connected with the former and 12 mission stations. According to last year's report the Christians of this body numbered 774. The Methodists have 4 evangelists there, occupy 3 stations, and have probably about 300 converts. There is need for quite 50 more evangelists, as the population is scattered over a wide area. There are some 50 sugar plantations, each of which ought to be supplied with an evangelist.

* * *

The following books bearing on religion have lately been published. *Mormon-kyō to Moru-mon-kyō to*. By Mr. Takahashi Gorō, price 75 sen, issued by the Juji-ya, Ginza, Tōkyō. Since there has been a great discussion in Japan over the probable effects of the introduction of Mormonism here, Mr. Takahashi has taken the trouble to prepare a history of the sect and a summary of its doctrines.

Shaka Muni no Den, By Dr. Inoue Tetsujirō, price 80 sen, has just been issued by the Bungeido. Although there are numerous lives of

Shaka in Japanese, most of them make no pretence of distinguishing between fact and fiction. Dr. Inoue has embodied in his work much material culled from foreign works and has compared the life and teaching of Shaka with the lives and the doctrines of Christ, Mahomet, Confucius and other great men.

Seikyō to Ju, Butsu, Dō (The Greek Church and Confucianism, Buddhism and Taoism) price 18 sen, by Mr. Yamada Koryū is published by the Greek Church press, Surugadai, Tōkyō. The following headings show the contents of the book. (1) Confucianism. (2) Buddhism and morality and religion. (3) Similarities between Buddhism and Christianity. (4) Points on which Christianity is opposed to Buddhism. (5) The Teaching of the Zen Sect. (6) Nirvana. (7) Chinese Scholars. (8) Laotsz's Character and Taoism.

Waga Sange is the title of the translation of Tolstoi's "Confessions" made by Mr. Katō Chokushi. It sells at 40 sen a copy at the Keiseisha. This is the first time any work of the same size has appeared bearing on Tolstoi's religious belief. He is the kind of writer that would be likely to interest the Japanese.

We have received from the Rev. A. Wendt a small tract entitled *Gakujutsu to Shūkyō* which has been issued by the Shinrisha. In the opening sentence Mr. Wendt states that in his opinion the two greatest questions that can occupy man's thoughts are the origin of the universe and of man and the object for which they both exist. These subjects he discusses in a concise manner within the space of 15 pages.

AMERICAN TOPICS.

The imports of precious stones of all kinds at the port of New York during October amounted to \$2,419,680, as against \$1,693,650 in October last year.

As far as the Presbytery of New York is concerned the seal of approval has been given to Presbyterian creed revision. At its November meeting the Presbytery voted to accept the 11 overtures in the revised Confession of Faith, adopted by the Presbyterian General Assembly last May. There was a large attendance.

The sum of \$8,000,000 will ultimately be spent by the University of Chicago for building up Rush Medical College. This will be the result of making Rush an organic part of the university, which will be accomplished on July 1 if the Rush trustees raise \$1,000,000. It is expected that patriotic citizens will contribute largely, as no other means of securing the money is known.

The W. C. T. U. held its national convention at Portland, Maine, recently. One of the principal speakers was Lady Henry Somerset. The *Boston Transcript* says that the "conference is notable not only for the vastness of the work represented and the diversity of the labourers, but also for the remarkable public interest shown in the gathering."

The American exhibits sent to the International Photographic Exhibition at Turin met with remarkable success. The New York Camera Club secured the King of Italy's prize. The United States, although its exhibits were fewer in number than those of other countries, received the highest number of prizes, including five Grands Prix, two gold medals, four silver medals and eight diplomas.

Another expedition, whose ultimate destination will be the North Pole, is being planned by William Zeigler of New York. He has made an excellent offer to Mr. Oliver Lawson of New York and Mr. Leroy Pelletier of Buffalo to lead the proposed expedition. Lawson and Pelletier have had several years' experience in Alaska and the Arctic regions and are confident that they can accomplish what Zeigler desires them to and what others have failed to do.

The Episcopal Church Congress, held recently at Albany, was characterized by several interest-

ing discussions. A debate on the relation of the church to the drama was participated in by Dr. Floyd Tomkins of Philadelphia, the Rev. Walter Bentley, and others. Dean Hodges read a paper on the subject: "Do Spiritual Principles Furnish a Solvent for Economic and Social Difficulties?" and Mr. Henry M. Hoyt discussed: "Are coercive methods of colonization promotive of Christian civilization?" Altogether, remarks the *Springfield Republican*, "the church congress may be said to have justified its conception as a free parliament of a broad church."

A novel experiment is being tried by the McCormick harvesting machine company of Chicago with a view to solving the serious problem of the relations of capital and labour. A young woman of extended experience in sociological work has been employed solely to look after the welfare of the army of employees in the works. Their comfort during working-hours, their care in sickness, and their pleasures all come under her attention. Suggestions which she makes to the officials of the company are taken up for consideration and, in a large number of cases, adopted. The success of the young woman's work is said to be shown best by the freedom from labour disturbances which the big harvester plant has enjoyed since she entered on her novel duties.—*Northwestern Christian Advocate*.

The pound-net fishermen on the Jersey coast are just coining money these days, it is said. The Fall run of weak fish has been the biggest in many years. Up to the opening of November the catches were often phenomenal. During the last two weeks in October every one of the score of big nets off the coast between Long Branch and Holly Beach has yielded from twenty-five to sixty barrels of fish every day. One morning 106 barrels of weak fish were taken from one net at Holly Beach. They weighed thirteen tons and sold in the city markets for \$1,170. This was the largest catch of the season. On the other hand, the hand-line fishermen complain that the inside fishing was never so poor in south Jersey waters as this season. At the entrance to nearly all the fish are trapped before they can swim up stream.

The fire loss of the United States and Canada for the month of October, as compiled by the *Journal of Commerce and Commercial Bulletin*, shows a total of \$9,503,300. The following comparative table will show the losses by months:—

	1900.	1901.	1902.
January	\$11,755,300	\$16,574,950	\$15,032,802
February ...	15,427,000	13,992,000	21,010,500
March	13,349,200	15,036,250	12,056,600
April	25,727,000	11,352,800	13,894,600
May	15,759,400	22,380,150	14,866,000
June	21,281,000	9,590,000	10,245,350
July	13,609,100	15,740,000	10,028,000
August	10,298,250	8,334,000	7,425,550
September...	9,210,300	7,645,200	9,945,000
October	7,107,000	14,749,900	9,593,300
Total	143,423,550	135,395,250	124,097,700

Portable School-houses is the latest idea for the solution of the problem of overcrowding in American schools. *Harper's Weekly* describes the plan: "The idea of portable school-buildings first came from Paris. Then the idea [reached the United States, about five years ago, and Milwaukee was first to adopt it. In St. Louis, which next adopted the portable school-house, the plan was a great success. Several large eastern cities have within the last year or so commenced on a small scale to have portable school-houses as a part of the educational facilities. In St. Louis there has been a great influx of people on account of the world's fair. When the city schools opened a few weeks ago the increase was enormous, but the schools were well able to care for them. The portable school-building, however, is all that saves them, and when in any neighbourhood there is a likelihood of an overcrowding, a portable school-building is at once moved in. At present there are twenty-seven houses of this kind in the world's fair city, and all of them are in use."

RESCUE OF A JAPANESE FISHERMAN.

Captain J. H. Rinder, Commander of the O. & O. steamer *Coptic*, reports:—Sunday, Dec. 7th, 1902, 1.30 p.m., about 5 miles North-West of Vries Island, lowered a boat and took from an overturned fishing boat, a Japanese man named Ishikoro Hamikichi, age 18 years, resident of Ichhome Mannencho, Sagami. He states the name of the fishing boat was the *Kahigei Maru*. She was upset in a strong south wind at 8 p.m., Saturday, Dec. 6th. Total crew on board were seven men, of whom five were drowned at once. Survivor and one other man clung to bottom of boat until about Sunday, Dec. 7th, when the other man let go and was drowned. Five other steamers passed before the rescue. The passengers and officers of the *Coptic* made up a purse of yen 42.00 and presented it to the rescued man.

CALENDARS.

The old-established Phoenix Assurance Co., Ltd., of London (the local agents of which are Messrs. Kingdon, Schwabe & Co.) send us a wall calendar and two very handy little note books which afford a good deal of information as to historic fires.

From the Queen Insurance Co., (now merged in "Royal") we receive a wall calendar and a blotter, both highly ornamental, the designs on them being most effective.

CORRESPONDENCE.

SPORT IN YOKOHAMA.

TO THE EDITOR OF THE "JAPAN MAIL."
SIR,—Following on the Spring Meeting of the Nippon Race Club, there appeared in the columns of one of the local papers a number of letters, criticising the officials of the Club. Whether the correspondence published did any good, or not, is open to question. Very little advice of any practical value was offered; in fact the letters generally seemed to be mainly an expression of dissatisfaction with the Committee and officials. The same feeling of dissatisfaction remains, the Autumn Meeting just concluded having clearly shown that the present Executive Committee, with one or two exceptions, are not the right men to properly serve the best interests of racing in Yokohama.

In the first place I would mention the grave want of *savoir faire* shown by the Chairman when on the second day of the races Lady MacDonald presented the prize given by Sir Claude to the winner of the Tientsin Cup. It is usual on such occasions to offer a bouquet to the lady presenting the prize. The bouquet is usually provided by the officials, as the owners cannot tell beforehand which will be the lucky winner. But no bouquet was forthcoming, nor did the Chairman consider it his duty to thank Lady MacDonald on behalf of the Race Club, nor to show her any public official courtesy whatever. Baron Sannomiya, too, who attended to present the prize graciously given by His Majesty the Emperor, was not thanked, *coram publico*, as he should have been, by the Chairman as the chief official of the Club.

As regards the racing, the Autumn Meeting certainly showed an improvement on the Spring Meeting. The fields ruled larger, and the wins were fairly evenly divided, except of course in the All Comers Class, in which Imperial Mistral II romped away from the poor lot of horses he had to meet. That of course, could not be helped, but the handicapping in this class, especially on the second day, was absurd.

The programme, as it worked out, shows that it was not the work of men experienced in racing matters. The penalties were inconsistent. On this point one illustration will suffice. On the first day The Beetle, carrying 145 lbs., beat I.O.U., carrying 137 lbs., over a mile. On the second day the two met again, and The Beetle, including penalty for having won on the first day, carried 143 lbs., I.O.U. 137 lbs. Distance a mile and a furlong, with a difference of 2 lbs. in favour of the first day's winner. Naturally The Beetle won again, and with greater ease.

The wording of the conditions of the races was in some instances vague, and obscure of meaning. In the conditions of the Champagne Challenge Cup, for instance, were the words "Winners 7 lbs. extra." Now a literal reading of this would be "any winner of any race at any time." Individual members of the Committee, however, interpreted it in different ways, one Committeeman holding that they meant "Winner of the Champagne Cup at previous Meet-

ings." Others said it meant "Winners at date of entry," or "Winners at the Meeting" according as their fancy for the moment suggested. I don't know if they settled the point, or how, but "Tenryu" had won at previous Meetings, and also on the first day, and yet apparently the extra 7 lbs. was not put up, as the weight carried is given in the papers as 145 lbs. The conditions published in the programme should have clearly stated what was meant, leaving no room for doubt.

I noticed many things at the recent Meeting which showed that the officials had a very limited acquaintance with the ordinary rules of racing. Perhaps it is too much to expect that they should be familiar with Jockey Club rules, but such as are embodied in the rules of the Nippon Race Club should certainly be studied by anyone before he takes upon himself to act as an authority at a Race Meeting. Take the very necessary and universal rule that martingales and breastplates shall be taken into the scales and included in the Jockey's weight. In the enclosure before the weighing room door I saw several horses wearing martingales or breastplates, whose riders on weighing in after winning a race took only their saddles into the weighing room, leaving the martingale or breastplate on the horse. Whips and sticks, stuck into the jockey's boot, were allowed in the scales, contrary to rule. There was a very palpable cross half-way up the straight in one race, and the first horse should have been disqualified, and the rider warned off, but in the wrangle that ensued I heard one of the Committee make the astounding statement that as the offending jockey was in front, he had the right to any part of the course he liked! Shades of Admiral Rous: how then is a cross effected? With such a Committee ruling matters I should be sorry to own racehorses here, and I know more than one former owner who would be glad to take an active part in the game under a stronger Committee, but will not as long as the present state of uncertainty prevails. Surely there are men in Yokohama who have some racing experience that could take office, and put an end to such nonsense. A man whose linguistic knowledge is confined to his mother tongue, would not be such a fool as to offer his services as an interpreter. Neither should a man having practically no knowledge or experience of racing, presume to accept office as Chairman of a Race Club. The one thing is as absurd as the other.

Yours very truly,

FORMER OWNER.

VOLCANOS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The great majority of volcanoes are situated either on islands or at not very long distances from the sea. The rule, no doubt, has a few exceptions.

It suffices at first that there should be some exceptions to discredit a theory and the exceptions are much less rare than the correspondent of the *Standard* affirms. That in the case of a volcano, situated as is Vesuvius or Etna, on the sea-shore, an infiltration of water through fissures in the ground be admitted, is not a matter of any difficulty. But how can the same conclusion be extended to volcanic craters situated a hundred kilometres or more from any coast? How can we imagine sea-water finding its way similarly across a thousand sinuous canals yet remaining all the time charged with all its saline principles? Such, nevertheless, is the extremity to which one is reduced if one seeks to apply the same theory to most of the volcanoes of the chain of the Andes. The distance from Talima and Cotopaxi to the coast in a straight line is two hundred kilometres; that of Antisana is 230, and from Sangay to the sea it is 250 kilometres. Now Sangay is in a state of constant activity, and Cotopaxi with its lava emits chloral-hydric acid, sulphurous gases and all the usual products of European craters. Popocatepetl, in Mexico, which emits an abundance of chloral-hydric acid, is 245 kilometres from the sea, and the distance of Ararat is 300 kilometres. In Africa, setting out from the east coast, it is reckoned that there are 500 kilometres to Kenia and 300 to Kilima Njaro, and there are not less than 1,200 between the same coast and the volcanoes that Emin Pasha has indicated near the Albert Nyanza. If the orifices of eruption mark the traces of lakes, at least these lakes are of fresh water, and could not supply any saline elements to the erupted matter. If then volcanoes were produced by infiltrations of water, the emanations should differ according as the water was salt or fresh, but daily experience indicates the contrary.

The extinct volcanoes of the Puys chain, in Auvergne, around which there are so many proofs of chloral-hydric and sulphurous emanations, were separated from the sea by a distance of 300 kilometres at the time of their activity. Finally, what shall be said of the volcanoes of Thibet, situated at an altitude of 600 metres, and at a distance of 1,500 kilometres from the Gulf of Bengal?

Yours, etc.

D. BECKER.

SALE OF HORSES.

Mr. John W. Hall on Friday held a very successful sale of horses, the following prices being realised:—

	Yen.
Misawo, Australian Gelding	35
Nightingale, Grey, China	25
Grisette.....	100
Peter, Black Nambu	45
Kachikawa, Bay, Australian Gelding.....	300
Arakawa, Bay, Australian Gelding...(bought in)	270
Kiyokawa, Grey, Country-bred(bought in)	263
Hayakawa' Black China	360
Alster, Brown, Country-bred Mare...(bought in)	380
Elbe, Bay, Australian Mare	140
Lightning, Black American Gelding	160
Max Willem, Cream, China	90
Pollux, Grey, half-bred	60
The Orb, Brown, Australian Gelding, (bought in)	260
Fujikawa, Chesnut, Australian Mare, (bought in)	775
Try Again, Chesnut, Australian Mare	410
Trust not, Bay Australian Mare	400
Lady May, Bay Australian Mare.....	400
Miss May, Grey, Country-bred, Mare	250
Imperial Mistral II., Chesnut thorough-bred English Stallion	2,700
Ping Pong, Grey, Country-bred Mare	240
Mantis, Bay, Australian Mare	360
The Beetle, Chestnut, Australian Mare	960
Fouree, Bay, Australian Mare	610
Eleve I., Black, Australian Mare.....	160
Ma Mie, Bay, Australian Mare.....	580
Le Gone, Grey, Country-bred, Gelding	120
Hope, Bay, Australian Mare	340
MacMorse, Grey, China	55
I. O. U., Bay, Australian Mare.....	425
Rose, Bay, Australian Mare	460
Shamrock, Bay, Australian Mare.....	470
Thistle, Bay, Australian Mare	540
Leek, Grey, Country-bred, Gelding	220
Ojosama, Brown, Australian Mare...(bought in)	330
Oregon, White, China	20
Nicup, Grey, Country-bred, Gelding	140
Sanyo, Bay, Australian Mare	545
Tasmania, Brown, Australian Gelding	440
Figaro, Bay, Australian Mare	200
Etourdi, Chestnut, China	45
The Count, Bay, Australian Gelding	120
Saikio, Bay, Country-bred Mare ...(bought in)	350
Ping Pong, Black China Mare	140
Lady, Bay, Mare	380
Picador, White, Arab.....	120
Kirigomi, Piebald, China	30
Honida, Nambu	10
Schwalbe, Bay, Australian Mare	260
Boris, Brown, Country-bred Gelding	140
Stand Rose, Skewbail, China	85
A Brown Australian Mare.....	310
A Brown Australian Gelding	200
An American Gelding	160
A Grey Country-bred Horse	45
A Bay Australian Mare.....	70
A Bay American Gelding	100
A Arown American Mare	90
A Dark Bay Australian Mare	660
A Bay Half Bred, Carriage Horse	50

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE EDUCATION BILL.

London, December 5.

In the House of Commons the Education Bill passed the third reading by 286 to 134. In the House of Lords a special midnight session was held to consider the Bill, which passed the first reading.

LORD KITCHENER.

Lord Kitchener has arrived at Delhi whence he has started to follow the grand Indian Manœuvres.

MR. CHAMBERLAIN.

Mr. Chamberlain has arrived at Cairo.

THE CHINESE AFFAIR.

Lord George Hamilton has said that it has been decided to grant only two clasps for the China War, for Taku, and for the relief of Peking.

THE VENEZUELA QUESTION.

The warship *Indefatigable*, presently at Trinidad, has been urgently ordered to Venezuela.

MR. CHAMBERLAIN'S TOUR.

London, December 6.

Mr. and Mrs. Joseph Chamberlain were the guests of Lord and Lady Cromer while staying in Cairo. They rejoin the cruiser *Good Hope* at Suez on Sunday. Lord and Lady Cromer, Major-General and Mrs. Wingate, and a representative of the Khedive met the distinguished party at the railway station.

GREAT BRITAIN AND VENEZUELA.

H.M.S. *Indefatigable* has arrived at La Guayra.

TROUBLE IN NIGERIA.

It has been decided to send an expedition of from 400 to 600 West African troops against Kano, in Nigeria. The Emir has large forces and is making extensive preparations.

[Note.—In the Statesman's Year Book it is stated that Kano is a town containing about 100,000 souls and the funerals average 10 per diem.—Ed.]

MARSEILLES STRIKE.

Later.

Negotiations instituted by the French Government with a view to terminating the Marseilles strike have failed, the masters and officers regarding the terms as unsatisfactory. The men are issuing violent manifestoes.

TO COMMAND THE LIFE-GUARDS.

Lord De Ros has been gazetted Colonel of the First Life-Guards in succession to the late Prince Edward of Saxe-Weimar.

[Note.—Lord De Ros, who is the Premier Baron of England, the Barony dating back to 1264, entered the Life-Guards in 1845 and rose to the command of the Regiment in 1861. In 1877 he became a Major-General and on his retirement in 1881 was promoted Lieut.-General. Since 1853 he has been intimately connected with the Royal Family, first as Equerry to the Prince Consort, and later as Lord-in-Waiting. He is now 75 years old.—Ed.]

THEIR MAJESTIES TO VISIT IRELAND.

London, December 7.

Lord Dudley has informed the Lord Mayor of Dublin that Their Majesties will visit Ireland early in 1903.

THE U.S. LEGATION IN TOKIO.

It is stated in Washington that the Hon. Mr. J. Barrett, Commissioner to the Far East for the St. Louis Exposition, will be appointed U.S. Minister at Tokyo.

THE HUMBERT CASE.

In the French Chamber of Deputies the Minister of Justice, replying to a Nationalist allegation that the Government were in complicity with the Humbert Case, recalled the fact that Frederick Hamburg was a Boulangist deputy.

Thereupon a violent scene occurred. The Radicals and Nationalists left their seats and engaged in a general *melée*. The sitting was twice suspended.

SEVERE WEATHER IN EUROPE.

London, December 8.

Winter weather prevails on the Continent and in Great Britain, causing much distress.

GOLD STANDARD IN THE PHILIPPINES.

Bills providing for the establishment of the currency in the Philippines on a gold basis have been introduced in both Houses of Congress.

THE VENEZUELA BUSINESS.

London, December 9.

The second class cruiser *Retribution* and a third class German cruiser are at La Guaya.

THE RUSSIAN SQUADRON.

The Russian squadron has sailed for China.

MR. CHAMBERLAIN.

Mr. Chamberlain had audience of the Khedive yesterday, and visited the Pyramids.

ARMY APPOINTMENT.

Sir Reginald C. Hart, V. C., K. C. B., who has been stationed at Quetta, is appointed to the command of the Thames District in succession to Sir T. Fraser, K. C. B., C. M. G.

BRITAIN AND VENEZUELA.

Mr. Balfour has said that no efforts have been spared to obtain an amicable settlement of British complaints with regard to Venezuela, but latterly British representations have been practically unnoticed. Germany had been placed in a similar position.

A final communication had been made to Venezuela by the British and German representatives and if no satisfactory reply should be given the Governments would take the necessary measures to enforce their claims.

THE MARSEILLES STRIKE.

London, December 10.

The dockers at Marseilles have joined in the strike and refuse to unload vessels of any nationality whatsoever.

The trades unions in Marseilles are considering the advisability of a general strike. The fishermen, joiners, bakers, and butchers have already joined.

THE VENEZUELAN TROUBLE.

The British and German identical ultimatums were presented at Caracas on Sunday afternoon. If they are not complied with immediate military action will be taken.

VENEZUELA.

Later.

The British and German Ministers left Caracas yesterday with their staffs and embarked on their warships at La Guaya.

THE MARSEILLES STRIKE.

The French Cabinet have decided to intervene actively at Marseilles. They have instructed Admiral Rouvier to call upon the masters and men to accept arbitration.

STRAITS CURRENCY.

The Straits Currency Commission continues to take evidence. The date of presenting the report cannot well be determined. It is understood that the report will be sent to Singapore before publication in England.

THE VENEZUELA AFFAIR.

London, December 11.

A Caracas telegram of the 9th states that the combined British and German squadrons on that date seized the Venezuelan fleet of four warships in the harbour of La Guayra.

All British subjects have been arrested in Caracas.

THE MARSEILLES STRIKE.

Later.

The strikers at Marseilles have refused to hold any further communication with their employers or the Government. They are determined to continue the struggle to the bitter end.

BRITISH ARRESTS IN CARACAS.

Satisfaction is expressed in London at the arrests of British subjects in Caracas. It is said they will be safer in jail than if left at the mercy of the populace.

(RECEIVED AT THE LEGATION OF FRANCE.)

FRENCH NEWS.

Saigon, December 4.

The Prime Minister, M. Combes, has submitted, partly to the Chamber of Deputies and partly to the Senate, sixty applications for authorization formulated by religious

congregations of men. He concluded to grant five only.

At Marseilles a certain relaxing of the situation is taking place. The strikers are asking to open *pourparlers* with the navigation companies.

THE MARSEILLES STRIKE.

Saigon, December 6.

The men on strike at Marseilles have voluntarily rejected the proposals of the companies.

NEWS FROM FRANCE.

Saigon, December 7.

The Chamber of Deputies has voted the Convention of Brussels relating to sugar, with the project reducing the tax to 25 francs.

The Chamber of Deputies, in consideration of the delay in passing the Budget, has voted two-twelfths provisionally.

Saigon, December 8.

The Minister of Foreign Affairs has submitted to the Chamber of Deputies the France-Siamese convention, completed by a declaration of the Siamese Government which considers as definitive the arrangements of Articles 2 and 3 of the Convention of 1893, relating to the demolition of fortifications in the provinces of Battambang and Angkor (Siem-reap), and to the zone of 25 kilometres on the right bank of the Mekong. The Siamese Government declares that it will not raise any new fortifications in these regions.

The Convention has been sent to the Commission of Foreign Affairs.

The Parliamentary session is closed.

[The two Articles of the Convention of 1893, referred to above, are as follows:—

Art. II.—The Siamese Government engages itself not to maintain or cause to move armed ships or boats on the waters of the Great Lake of the Mekong and their affluents situated within the limits indicated in the next Article.

Art. III.—The Siamese Government will not construct any fortified post or military establishment in the provinces of Battambang and Siem-reap (Angkor) and within a zone of 25 kilometres on the right bank of the Mekong.—Ed. J. M.]

Saigon, December 9.

In the Chamber of Deputies in the course of an interpellation about the Humbert affair, a violent tumult occurred, and some struggles took place among the Deputies. Several of the Nationalist Deputies were expelled *manu militari*. Finally the Chamber passed a vote of confidence in the Government by 334 to 136. The session is closed.

A decree has been issued organizing jurisdiction in Tonquin, Annam and Laos by unifying the details of the judicial service.

Saigon, December 11.

The registered marines of Cannes, Antibes, Sain-Raphaël, Arles and Callioures have decided to join the strike at Marseilles and to cease work.

(FROM THE "JAPAN HERALD.")

THE BELLEVILLE BOILER.

London, December 7.

It is stated that the French Navy is being overhauled with the object of ascertaining the cost of replacing the Belleville boilers by those of the most modern cylindrical type.

It is understood that the chief engineer has counselled the suspension of all constructive work until the type of new boiler is decided upon.

AN ULTIMATUM TO VENEZUELA.

London, December 8.

Mr. Balfour has announced in the House of Commons that an ultimatum has been delivered to the Venezuelan Government by Great Britain and Germany.

The announcement was received with cheers. Continuing Mr. Balfour said that for two years the British Government had had grave cause for

complaint against the Venezuelan Government. On various occasions there had been unjustifiable interference with the liberty and property of British subjects, no satisfactory explanation for which had been given. Latterly the British Government's representations had passed practically unnoticed. There were many British subjects also, who had large claims against Venezuela.

THE EVACUATION OF SHANGHAI.

Viscount Cranborne, Under Secretary for Foreign Affairs, has stated in the House of Commons that the German troops will be withdrawn from Shanghai on the 28th inst. or early in January.

Viscount Cranborne added that he therefore saw no reason to countermand the orders given to the British troops to evacuate the city.

THE CLAIMS AGAINST VENEZUELA.

London, December 10.

Viscount Cranborne, the Under Secretary for Foreign Affairs, speaking in the House of Commons, said the claims of Great Britain against Venezuela included compensation for unjustifiable interference with British training(?) vessels; the imprisonment and ill-treatment of British subjects; the seizure and destruction of British property; and the damage of British railway property.

(FROM THE "JIJI SHIMPO".)

PRESIDENT ROOSEVELT'S MESSAGE.

London Dec. 2.

President Roosevelt's Message read at the opening of Congress is protective in its nature. He remarked that America should strictly remove abuses connected with trusts and urged that there should be established systematic government for the republican countries built up by the Spanish races, and insisted upon the necessity of a powerful navy for the purpose of maintaining the Monroe doctrine.

GERMANY IN SHANGHAI.

According to a report in the *North-German Gazette*, Germany has declared, though semi-officially, that she will withdraw her troops from Shanghai in the course of the coming January.

STRIKE IN FRANCE.

The strike at Marseilles shows no signs of weakening though the government has chartered steamers and the navy authorities have rendered assistance by supplying sailors to man the ships.

VENEZUELA.

London, December 5.

Mr. Castro, President of Venezuela, is trying to win in the present trouble with England and Germany. The *Cologne Gazette* says that the boldness of Venezuela has now changed into foolhardiness.

JAPANESE BONDS.

The 4 per cent. Japanese Bonds are now quoted at 88.

PLOT AGAINST THE CZAR.

Several men have been arrested in Livadia on suspicion of having made an attempt on the life of the Czar.

THE MARSEILLES STRIKE.

The strike at Marseilles has not yet ended. M. Pelletan, Minister of Marine, is now employing his official authority.

THE KING OF PORTUGAL.

London, December 8.

The King of Portugal left London to-day.

DUKE OF CONNAUGHT.

The Duke of Connaught has arrived at Cairo on his way to India.

VENEZUELA.

Three German warships have arrived at Willemstad. President Castro is anxious to effect an amicable settlement of the pending trouble.

THE VENEZUELA TROUBLE.

London, December 9.

Ultimatums have been presented to Venezuela by England and Germany. Both Legations have been closed, and the two Ministers have left

Caracas for the warships of their respective countries, in the harbour of La Guayra. The latter port is about to be blockaded.

DEATH OF AN AMERICAN STATESMAN.

Thomas Brackett Reed (born 1839) of Portland, lately Speaker of the U.S. House of Representatives, is dead. The funeral takes place to-day.

WASTE SILK.

Buying has continued but we have rather an unwilling market. Sellers are strong and operators for export are apparently squeezed a little on both sides, consumers sending in low offers and sellers requiring high prices.

BOVRIL AT THE FRONT.

Bovril has played such a conspicuous part in South Africa that it forms no inconsiderable feature of the story. The Lancet has had frequent references to Bovril in the reports of the officers of the Royal Army Medical Corps. Nearly every newspaper correspondent has had to refer to Bovril to make his story complete. Rudyard Kipling and Baden-Powell have written their Bovril stories. Over 500 British hospitals and similar public institutions use and prescribe Bovril, not beef tea, but Bovril.

The reason is not far to seek. Bovril is a nourisher as well as a stimulant. It contains the albumen and fibrine, the sustaining properties of the beef. It is this fact, together with its absolute purity, that commends Bovril to physicians and scientists, and proves in practice what it demonstrates in analysis.

WILD WITH ECZEMA

And Other Itching, Burning,
Scaly Eruptions with
Loss of Hair.

Speedy Cure Treatment.

Bathe the affected parts with Hot Water and Cuticura Soap, to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation, and inflammation, and soothe and heal, and lastly take Cuticura Resolvent Pills, to cool and cleanse the blood. A single set is often sufficient to cure the most torturing, disfiguring, itching, burning, scaly, pimply humours, eczemas, rashes, irritations, and chafings, with loss of hair, when all else fails.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurement, as in pimples and ringworm; the awful suffering of infants and the anxiety of worn-out parents, as in milk crust, tetter, and salt rheum, — all demand a remedy of almost superhuman virtues to successfully cope with them. Such are the CUTICURA remedies, the purest, sweetest, most speedy and economical curatives for the skin, scalp, and blood ever compounded. Mothers are their warmest friends.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes and chafings, in the form of baths for annoying irritations and inflammations of women, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses.

CUTICURA REMEDIES are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27-28, Charterhouse St., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHAM. CO., Sole Props., Boston, U. S. A.

YOKOHAMA: SATURDAY, DECEMBER 20TH, 1902.

DEATH.

On the 10th inst., at Merate, Brianza (Italy), the Marchioness LOUISE ORIGONI MATERAZZO DI COSTIGLIOLE.

SUMMARY OF NEWS.

THE Japanese battleship *Shikishima* arrived at Chinkin, Korea, on the 16th inst.

ARTIFICIAL camphor, fully equal to the natural product, is being made from turpentine at New York.

A RATHER prolonged shock of earthquake was felt in Yokohama at 2 o'clock on Sunday afternoon.

SEVERAL Japanese junks were wrecked or damaged by the storm which swept over Kobe on the 14th inst.

ANENT Lord Kelvin's assertion that in 400 years the coal of the world will be used up, M. Cartieux, chief engineer of the Northern Railway of France,

says that in ten years, between petroleum and alcohol, coal mining will not pay.

FOUR hundred and four Japanese emigrants left Japan on the 17th inst. for Hawaii and America by the *America Maru*.

A CAR on the Gan-yetsu Railway ran off the line at Kawageta on the morning of the 17th inst. but little damage was done.

MR. M. ICHIHARA, formerly Manager of the First National Bank's Yokohama Branch, was elected Mayor of Yokohama on Tuesday.

THE Yokohama Customs have sent in a bill for 1,509.65 to the Nippon Yusen Kaisha, the cost of repairing damages done by the steamer *Kaga Maru* to the Pier.

DR. GOTO SHIMPEI, Civil Chief of the Formosan Administration Bureau, arrived at Taipeh on the 17th inst., from Europe. He will leave for Tokyo on the 12th by the *Fusan Maru*.

THE body of a Chinaman, aged about 30 years, was found floating near Yatobashi, Yokohama, on the morning of the 13th inst. The body was handed over to the City Office.

IT requires, we are told, sixteen months to prepare the Christmas cards of England, and manufacturers are now feeling the pulse of the public for what is going to be their taste in 1903.

THE Rev. Hugh Price Hughes, the famous Wesleyan divine, and brother of Miss Hughes so well known in educational circles in Japan, died suddenly in London on Nov. 17, from apoplexy.

A COOLIE named Takaoka Taijiro, of Tochigi, employed by the Yokohama Dock Co., while working on the *Tamba Maru* on the morning of the 11th inst., fell to the bottom of the hold, and was killed.

A MAN named Saito Tetsusaburo, living at Naraya-machi, Mito, killed his former wife and a man by shooting them with a pistol on the night of the 14th inst. The murderer attempted to commit suicide but was not successful.

AN explosion of dynamite took place in a coolies' room at the northern entrance to the tunnel at Ine, Ogawamura, Yoichigori, on the Hokkaido Railway on the night of the 9th inst. Two coolies were killed and four injured.

THE well-known Netherlands Trading Society, which now confines itself to pure banking business, is about to open a branch in Shanghai under the management of Mr. E. D. Van Walree, formerly Netherlands Consul at Yokohama.

A MILITARY balloon which was sent up at the military engineering ground at Fumiji-cho, Kojimachi, Tokyo, on the morning of the 14th inst., broke away during a strong gale and when last seen was going in the direction of Shinagawa.

TEN fisherman belonging to Naka Nishiura-mura, Miura, Kanagawa Prefecture, went out fishing near Miyake Island on the 4th inst. On the 7th a gale set in and when the men attempt-

ed to reach Shimoda their boat capsized. They held on to the bottom of the boat for four days, by which time six were drowned, but four were rescued by another fishing boat. They returned to their village on the 15th inst.

A GOLD watch was delivered by parcels post at the Isezaki-cho police station on the 11th inst. The article belonged to Captain Inouye Masamoto and was taken from him by a pick-pocket between Shimbashi and Yokohama on the 9th inst.

A TELEGRAM received by the Tokyo *Asahi* from Naoyetsu dated Dec. 17th, stated that the International Oil Company have decided to suspend operations at one of their factories and over one hundred workmen are to be discharged on the 24th inst.

A TELEGRAM from Seoul dated Dec. 13th to the *Jiji* states that the trial of locomotives on the Keifu Railway Co's. line was carried on over a distance of twelve miles between Eitoho and Meigakutono, which will be the last section to be finished this year.

MASUDA KATSUHEI, living at Miyoshicho, Yokohama, Kobayashi Seijiro, and Takeda Shin, were arrested by the Police on the 16th inst. and charged with stealing yen 1,500 by means of forgery from a confectioner, Tanuma Chubei, of Imagawa Koji, Kanda, Tokyo.

A YOKOHAMA Customs tidewater named Kondo Tomekichi, was arrested by the Police on the 11th inst. on a charge of conniving at the illicit import of opium by a Chinaman. The Chinaman has escaped, but the Yokohama Saibansho sent officers to his house and captured several boxes of opium.

A WORKMAN named Ito Komakichi, employed by the Yokosuka Naval Arsenal, was arrested and sent to the Yokohama Local Court on the 17th inst. on a charge of stealing several articles valued at yen 79 from a godown belonging to a temple known as the Senkoin, at Hayama-mura, on the 12th inst.

THE silver wedding of the well-known artist Mr. Hashimoto Gaho, was celebrated at the Seiyoken Ueno, Tokyo, on the morning of the 14th inst. Prince Niho, Count Hijikata, Baron Kaneko, Mr. Takata Sanaye, Mr. Hirayama, Chief of the Commercial Navigation School, Mr. Tokutomi Iichiro, and three hundred persons were present. Several speeches were delivered, and afterwards an enjoyable garden party took place.

A TRAGICAL affair occurred near Omori on the afternoon of the 11th inst. A vegetable and dry goods dealer named Tohaka Sogoro, living at Tobemachi Rokuchome, Yokohama, went to Tokyo to buy new year's goods from the wholesale dealers and returned to Yokohama by train. When near Omori he leaned out of a window at the moment another train from Yokohama was passing, and was hit by an open door. The man was struck on the head and killed instantly.

AN armed burglar entered a house occupied by Tazawa Masakichi, at Nakamura-machi, Yokohama, about 2 o'clock on the morning of the 14th inst. He stole an overcoat and three other articles and took them outside. He then re-entered the house but made a noise which aroused Masakichi. The master of the house attempted to catch the intruder, whereupon the burglar drew a large knife and cut Masakichi in several places. Masakichi's wife at this moment awoke and pulled her husband down, while the burglar made good his escape.

POLITICAL MATTERS.

Saturday, Dec. 13.

To-day the House of Representatives will have to take the first reading of a Government Bill for increasing the land tax from the 37th year of *Meiji* (1904). The Cabinet does not ask the House to continue the present tax, which, as our readers know, was imposed for a definite period of 5 years, ending in 1903. Sentimental objections having been raised to the declared continuance of a legally terminable impost, the Cabinet has brushed away that difficulty by frankly asking the Diet to increase the old rate of $2\frac{1}{2}$ per cent, to $3\frac{1}{3}$ per cent. in the case of rural lands and 5 per cent. in the case of urban lands from January 1st, 1904. As to the other objection, namely, that this increase of the people's burdens is too severe—an increase of £450,000 which they have been paying for the past four years without the least embarrassment—the Ministry meets it partially by appending to the Bill certain clauses intended to reduce the local land rates. At present the people may be required to pay land rates up to $\frac{1}{3}$ of the land tax on account of city and prefecture outlays, and up to $\frac{1}{5}$ on account of town, district and divisional outlays. These figures the Government proposes to reduce to $\frac{1}{4}$ and $\frac{1}{7}$ respectively. It is not an absolute reduction, since the maxima may be exceeded with the sanction of the Home Minister and the Minister for Finance. But so may the present maxima.

As for the Railway Bill, it would seem that the Cabinet has greatly reduced its programme in deference to the objections raised by Marquis Ito and the *Seiyu-kai*. Our readers doubtless recollect that, speaking in round numbers, the Ministry's original plan was to add 100 million *yen* to the 30 millions remaining unexpended from the old plan, and to disburse the whole amount of 130 millions in 10 years. This programme has now been materially modified. The Government reduces the additional demand, so that the proposed appropriations stand thus:—

Remaining unexpended under the previous programme.....	Yen. 27,041,563
To be added.....	41,415,725
Total	68,457,288

It is moreover stated in the exposition of reasons accompanying the Bill, that this addition is not for the purpose of any new constructions, but is necessitated solely by the appreciation of commodities that has taken place since the original estimates were compiled. The additional funds are to allotted to the following lines:—

	Yen.
The Hachioji-Nagoya Road	18,548,729
The Yatsushiro-Kagoshima Road	8,466,167
The Wadayama-Sakuye Road (changed from the Himeji-Sakuye).....	14,400,829

Total 41,415,725
The appropriation for next year under this heading is 10,670,423.

Evidently the Cabinet has quietly accepted the views of Marquis Ito, Count Inouye and the *Seiyu-kai* on this subject of railway extension. It has not only abandoned its projects of development, but it has also extended from 12 to 20 years the time of construction with regard to lines included in what is called the First Period. Perhaps it may be well to explain that under the post-bellum programme an extensive scheme of railway building was adopted by the Diet, and that the various lines to be built were

divided into three sections, according to their importance. The lines in the first section are not yet concluded, and their conclusion will be postponed from 1907 to 1915, should the Cabinet's proposals be accepted. This is a distinct offer of compromise. The points at issue between the Ministry and Marquis Ito are now reduced to one, namely, that whereas the Ministry asks the Diet to re-impose the increased land tax from 1904, simultaneously with certain reductions of the local land rates, and to apply the funds thus obtained to purposes of naval increment, Marquis Ito suggests that the land tax be left without increase, and that the necessary funds be obtained by reducing administrative expenditures. Evidently if Marquis Ito's plan be adopted, naval increment will have to wait until the fiscal year 1904-5, whereas the Katsura Ministry would commence it in 1903-4.

Will the *Seiyu-kai* accept this compromise? We do not think so. They are not looking for compromises under any circumstances, and besides they profess to be bound by a pledge to their constituencies in the matter of the land tax. Thus a collision is inevitable. But Count Katsura, continuing his record of sagacious statesmanship, has greatly blunted his opponents' weapons of attack. He has shown that he does not seek to advance any programme disapproved by a majority of the Lower House, and that his only immovable resolution is not to abandon an already accruing and easily obtainable item of revenue without which a national exigency can not be met. If he stands to his guns on that ground, he will come out of the fight honorably at all events, whether victory and retreat be his immediate fate.

The Budget was submitted to the House of Representatives on the 11th instant, and inasmuch as the project of extending to 30 days the period for the compilation of the Committee's Report can not, even if adopted by the Houses, become operative this session, the Report must be presented on Christmas Day. Therefore there will be no debate in the House this year, since the Diet rises for the New Year's recess on the 25th. But of course the Report will show plainly what may be expected.

Meanwhile the Cabinet is standing absolutely firm and imperturbable. The Upper House is with it. The Peers and the other members of the Upper Chamber, are said to approve entirely of the Ministry's programme, and to be persuaded that the Representatives are fighting for ulterior objects. The talk now is of dissolution after dissolution.

Monday, Dec. 15.

The opposition journals—that is to say, the journals hitherto opposed to the *Seiyu-kai*—are beginning to show impatience at the deliberation of the latter's procedure. Naturally the organs of the Progressists are frankly in favour of immediate onset. Any one can appreciate the reason. It would be entirely to their advantage that a final rupture should now be effected in the ranks of the Elder Statesmen, and such a rupture could scarcely be avoided if an attack were pressed home immediately. On the other hand, the *Seiyu-kai's* organs explain that the Party is simply following its leader's advice; that is to say, it proposes to listen quietly to what the Government has to say before committing itself to any violent course. We need scarcely add that all kinds of sinister rumours are in circulation, but none of them

seems worthy of a moment's attention. The Government is conspicuously quiet and self-possessed. Evidently the Ministers of State have definitely decided on their procedure and are calmly awaiting the progress of events. This attitude of imperturbability is very discomposing to their enemies. It suggests latent resources which may be unpleasantly invoked at the psychological moment. Dissolution of the Lower House would be such a resource. It would fall like a sledge-hammer blow on the heads of many members.

Journalists in Tokyo find material for criticism in the fact that whereas the Government was originally supposed to have decided on asking the Diet for further railway appropriations aggregating 100 million *yen*, spread over ten years, its actual demand is found to be only some 58 millions. Some claim that this reduction is a concession on the Cabinet's part to the declared views of the *Seiyu-kai*, but others, conspicuously the *Kokumin Shimbun*, affirm that the Government's intention remains unchanged, and that the projected outlays have merely been deferred.

In the last session of the Diet the Government submitted to the House of Peers an amended Criminal Code. It underwent some alterations at the hands of the House and was sent down to the Representatives, who, however, failed to pass it owing to lack of time. The bill has now again been submitted to the Peers, and as it embodies the amendments made by them last session, it will doubtless be passed without delay.

Thursday, Dec. 18.

It is stated that the step which led to the suspension of the Lower House was unexpectedly and suddenly resolved upon by the members of the Committee. They had imagined that the Cabinet attached chief importance to the question of naval increment and that the land tax would not be made a crucial problem. On discovering, however, that the Ministry was irrevocably determined to stand by its land-tax programme, the Committee decided to attack at once. Their decision was not made known to the parties in general. A whip was sent round desiring the members to be in their places but not stating the purpose of the summons. One reason assigned for this precipitance and secrecy is that the party leaders had some doubts as to the firmness of their followers and that they consequently thought it prudent to make an onset without allowing time for reflection. Unquestionably the whole affair was singularly expeditious. There have been few similar occurrences in Japanese parliamentary history.

As for the debate in the House, Count Katsura's speech inviting the Committee to reconsider the matter, was delivered in a calm and dignified manner. It produced an excellent impression. But of course the members had made up their minds. They were indisposed even to listen to Admiral Yamamoto, and he obtained a hearing only by insisting on his right. Viscount Yoshikawa's reason for intervening in the discussion was that the retrenchments recommended by the Opposition evidently included abandonment or suspension of works falling within the province of his Department of Communications.

Mr. Taguchi Ukichi, speaking in support of the Government's Bill, pointed out that prior to the Restoration, the agricultural classes

paid 13 million *koku* of rice by way of tax, which, at present market rates, meant 130 millions of *yen*. On the other hand, the national land tax and the local land rates now paid did not aggregate more than 7 million *koku*. Hence the land tax was lighter to-day by 60 million *yen* than it had been in the time antecedent to the assessment of 1873. Under such circumstances it could not be called rational to pretend that the farmers are over-taxed.

It will be observed that Mr. Taguchi's statement is even less favourable than the facts warrant. For he takes no account of the fact that the country's agricultural produce as well as its population have increased largely since 1873. If the Japanese paid 130 million *yen* in the form of land tax 29 years ago, the 70 millions they now pay should be put at probably 35 or 40 millions for purposes of comparison.

The members who imparted salt to the debate were Mr. Oishi Masami and Mr. Ozaki Yukio, especially the latter. Mr. Ozaki's mind is stored with humorous comparisons. They are not remarkable for dignity, but they serve the dual purpose he probably has in view, the purpose of amusing the House, and the purpose of inducing the members to treat their collisions with the Ministry in a light spirit.

It is said to have been the original intention of the Opposition to cut down the Budgetary expenditures freely, and thus to provide funds for naval increment. But the attitude of the Ministry exasperated the Committee and induced them to abandon their first purpose in favour of a vehement attack. No one seems to see as yet how any compromise may be found, and in some quarters it is anticipated that the Cabinet, having dissolved the Diet will leave to some other statesmen the duty of meeting the new House of Representatives. But there is no successful attempt to explain what would be gained by dissolution.

A leading member of the *Seiyu-kai* is represented as saying that if the Government surrenders on the point of the land tax, an arrangement can be easily effected, but that no other method of compromise is possible. What may be taken as tolerably certain is that the postponement of naval increment for a year would not cause any inconvenience.

The association of journalists hostile to the Cabinet held a meeting on the 15th and passed some vehemently emphatic resolutions to the effect that the Ministry had broken its pledges, betrayed its trust, done violence to constitutional institutions and showed contempt for the people. Who are "the people," we wonder.

There is of course a rumour that the Cabinet has tried to open negotiations with Marquis Ito and that the Marquis, fearing to be approached by both sides, has fled to Yugahara in Izu, where he is now enjoying the glorious weather.

Friday, Dec. 19.

The various parties held meetings on Wednesday morning to consider and discuss the situation. There were no signs of yielding. The members assured each other that they were determined to pursue their route over all obstacles, and that neither the prospect nor the fact of dissolution should deter them. Mr. Sugita Teiichi went so far as to declare that they should not be content with anything less than the complete "stoppage of the Ministry's breath."

Protestations of that nature were to be expected, and will be variously estimated. But what the thoughtful section of the public wanted to learn was why the Budget Committee took such a sudden course. Why were the rank and file of the two Parties unexpectedly and without a moment's notice asked to vote upon a measure of cardinal importance? Tokyo newspapers have suggested that the leaders feared to take their followers into their confidence lest the stormy outlook should cause waverings or disaffections. Evidently the men who had been treated in such a cavalier fashion entertained a similar suspicion, for they raised the question at the above meetings with considerable show of feeling. In the case of the Progressists Mr. Tsunoda Shimpei, an old campaigner, who seems to have been resting on his laurels during recent years, formulated a warmly worded query on the subject, and there resulted a tempest of a nature not altogether novel at Progressist meetings. We need not reproduce in detail what was said. The gist of it was simple enough. The leaders had no explanation to offer except that they had promised their *Seiyu-kai* friends to preserve secrecy, and when that excuse failed altogether to throw oil on the troubled waters, Mr. Oishi Masami stepped forward and avowed himself the guilty party. It was he that had given the pledge to the *Seiyu-kai*. If he had been wrong, he frankly apologised, but, after all, what more did they desire than the present situation? Had they not obtained everything they wanted, and was there any occasion to scrutinise the steps too closely? The meeting accepted that excuse good-humouredly. It was an excuse not inconsistent with Mr. Oishi Masami's official record, which shows that he is a disciple of the fine Catholic doctrine "the end justifies the means."

The responsibility of instituting such secret and sudden action having thus been shifted wholly to the shoulders of the *Seiyu-kai* leaders, the public was curious to hear the latter's explanation. They did not vouchsafe any explanation; or, at all events, any sufficient explanation. Summed up succinctly their plea is that they got mad. The chairman of the sub-committee alleges, indeed, that he acted in accordance with the exigencies of the situation, but inasmuch as he did not attempt to define what those exigencies had been, his plea can not be taken too seriously. The truth undoubtedly is that the members of committee became exasperated and put down their heads for a rush. They did not even consult their chief, Marquis Ito. What happened was that the two leaders of the House—the *Seiyu-kai* leader and the Progressist leader—held a secret conference on Monday night, and without breathing a word to any other member of the House, arranged for the introduction of a motion to change the order of the day in the Tuesday session, and for the issue of a whip to get all the members in their places. It was a veritable hole-and-corner business, and since secrecy is never adopted except where publicity would be dangerous, we must assume that the *Seiyu-kai* and Progressist leaders feared to take their followers into their confidence. In short, their mood was so angry that they determined to strike a hasty blow and create an irrevocable situation. As to what angered them, it is said to have been the manner of the Ministers' replies to questions. For "Ministers," how-

ever, we must read "Minister" in the singular. It is Baron Sone that has been again unfortunate. His mind does not appear to be in active sympathy with party politicians or parliamentary procedure as now conducted in Japan. Last session he nearly precipitated a collision, and this session he is said to have succeeded thoroughly. What a confession that is! So far as the public can discover, the sum of Baron Sone's offence was his suggestion to Mr. Oishi Masami that did the latter want to discuss questions of foreign policy, he would be better advised if he came to the private residence of the former for the purpose instead of raising such questions in open debate. Mr. Oishi seems to have taken umbrage at that kind of persiflage, and he "got even" by means of the "hole-and-corner" process, which, if we may accept his own statement, he himself suggested. Upon such a petty pivot do great affairs of State revolve.

Marquis Ito's position in the *Seiyu-kai* becomes more and more apocryphal. The original resolutions committing the Party to an attitude of opposition were taken without consulting the Marquis, who of all party leaders is nominally the most autocratic and to whose will his followers have openly pledged themselves to bow. And now it appears that a step involving open warfare was also taken without the least previous reference to the Marquis. Towards him also it was considered necessary to observe secrecy. History will pronounce an interesting verdict about all these doings.

At the Progressists meeting their parliamentary leader, Mr. Inukai Ki, took much trouble to explain that nothing like an alliance exists between the Progressists and the *Seiyu-kai*. They simply find themselves drawn into the same camp by temporary community of sentiment. We assume that this declaration was intended to appease the scruples of far-seeing Progressists, who have no fancy to see their Party commit suicide by effacing itself in the ranks of the *Seiyu-kai*.

The *Fiji Shimpō* and the *Asahi Shimbun* both urge compromise. They justly point out that the difference between the Ministry and the parties is altogether trivial and that an adjustment should be easy. Journals like the *Nippon*, of course, recommend war to the knife. But not even the *Nippon* attempts to show that anything more substantial than sentiment is at the bottom of the trouble. If a *via media* can not be found, the compromising disposition of Japanese politicians will greatly belie its record.

The Cabinet held a meeting on the afternoon of the 17th instant. Its resolution is not known, but the general impression is that there will be either a prolongation of the period of suspension or a dissolution. The former course would bring the Diet to the eve of New Year's recess, if not actually into the recess. Either dissolution or the Ministry's resignation would surprise many onlookers, ourselves among the number.

A local contemporary states, we observe, that it is regrettable that "there should be a breach of faith on the part of the Government in regard to the land tax," and then extenuates the incident by claiming that the present Cabinet can not justly be held responsible for the acts of its predecessors. Where is the breach of faith? In 1899 the

Diet agreed that the land tax should be increased for a period of five years. What is now proposed is that the Diet should vote for repeating this fiscal measure for January 1st, 1904. Lest some impractical purists should contend that to legislate for the "continuance" of the increased rate would be a violation of public engagements, the Ministry have carefully excluded the word "continue" from the Bill, and have drafted a project asking simply that from January 1st, 1904, the tax on urban land should be 5 per cent. and that on rural lands 3.3 per cent. If such action be a breach of faith, then it would follow that to propose an increase of the tax from April 1st, 1904, would be equally dishonest, and if from April, 1904, then equally from January or April, 1905, or any other year, so that in fine we arrive at the extraordinary proposition that because a certain impost was levied at one time for a fixed period, it must never be levied again throughout all ages. There is no breach of faith whatever. The only sentimental argument possible to the opponents of the tax is that the people would be disappointed by its re-imposition. But people always are disappointed when they find themselves required to pay an extra tax. Marquis Ito, it is observable, has not even hinted at the extravagant plea that because the Legislature takes explicitly finite action with regard to a fiscal question in 1899, it must not take similar action in 1904. What he has claimed is simply that the time is inopportune for renewing this particular tax.

CHINESE NEWS.

Saturday, Dec. 13.

From Tientsin a telegram comes to the *Asahi Shimbun* saying that the place is flooded with privately struck copper coins, and that the market is demoralized. Viceroy Yuan, on his return from the south, found this unlooked for state of affairs, and immediately issued an edict limiting the circulation of these copper coins to the 20th of December, and promising that the severest penalties should be inflicted on any one striking or uttering them.

There has been a conflict between Chinese police and pirates at Taku. Ten police were proceeding to arrest some pirate when they met three of the latter. A fight ensued, in which two of the police were killed and one severely wounded. The constables managed, however, to apprehend one pirate; a remarkable exploit considering that they numbered 10 to the pirates' three.

Intelligence from Hongkong says that one half of the province of Kwangsi has fallen into the hands of the rebels, that General Ma has been killed, and that the capital, Kwei-lin, is in imminent peril. General Ma was sent recently from Chili to command the Government's forces in the province. He made himself famous in the Boxer time, and a few months ago he successfully quelled the insurrection near Jehol. It may prove, of course, that this news is very greatly exaggerated. The Kwangsi rebellion has been shrouded in mystery since its commencement. At first it was said to be a formidable affair. Then came persistent statements from foreign sources that rumour had indulged in more than its wonted hyperbole, and that not a ripple of excitement was observable at places previously said to be seething with tumult. Naturally these assurances convinced the public. Still, from time to time, stories in a different sense continued

to come from the province, and finally the Central Government's despatch of such an officer as General Ma showed that in Peking the rebellion was not under-rated. If these latest accounts be confirmed, there may be valid cause for uneasiness. It was in Kwangsi that the Taipings had their origin, and their first signal success was the capture of Kwei-lin. The analogy is suggestive.

Monday, Dec. 15.

News from Peking to the *Jiji Shimpō* says that the Empress Dowager recently assembled all the Ministers of State, and admonished them that no time should be lost in organizing essential reforms. The completion of preparations within the course of next year ought, Her Majesty said, to be an object constantly kept in view. It is inferred that the Empress Dowager is beginning to think seriously of retiring from the active discharge of administrative functions.

Troubles have again broken out in the neighbourhood of Jehol, and the Peking Government has despatched a special commissioner to deal with them.

It is stated by the *Jiji Shimpō's* Peking correspondent, that Viceroy Yuan, on his return from the south, memorialized the Throne to the effect that the cotton-spinning industry and other enterprises of Viceroy Chang Chih-tung do not pay and can not be regarded as profitable or well managed affairs. With regard to the telegraphs and mercantile marine, which are under the direction of Taotai Shêng, the Viceroy's verdict is that so much nepotism exists in the selection of employees as to interfere with the successful working of these enterprises. In consequence of this memorial, the telegraphs and the China Merchants S.S. affairs have been removed from Shêng's control and placed under that of Viceroy Yuan. The *Jiji's* correspondent does not say, however, what effect the memorial has produced upon Chang Chih-tung's undertakings. They have been long known to be unprofitable, but during Chang's tenure of power at Wu-chang no one in authority came forward to condemn his doings. That the truth should be told about them in Peking is very proper, of course. But it is a thousand pities that enterprises undertaken in a spirit of progress should prove the means of discrediting the old Viceroy at the close of his illustrious career, and it is not less lamentable that they should serve to impair the relations between him and Viceroy Yuan, for when these men cease to work together, the cause of China's advancement must suffer.

An Imperial Decree just issued in Peking says that the training of soldiers is, conspicuously good in Chili and Hupeh, and directs that officers from other provinces shall be sent there for instruction. Viceroy Yuan and Chang are instructed to arrange the details of this arrangement.

Another Decree declares that secrecy, which is essential to the proper service of telegraphs, being unobtainable so long as the lines, or any part of them, remain in private hand, steps must at once be taken, under the direction of Viceroys Chang and Yuan, to buy up all telegraphs now in private possession and to place them under official control.

There is a rumour that Viceroy Chang Chih-tung is to go to Peking and be appointed Minister of Foreign Affairs. We should imagine that some change at the Foreign Office is inevitable. Sir

Ernest Satow can not possibly continue in friendly relations with a man who has behaved with such flagrant duplicity as Prince Ching, and even if Sir Ernest were replaced, his successor would have the same difficulty. There is no other instance, we imagine, of a Foreign Minister who has been publicly denounced for duplicity by the Government of a friendly Power. Indeed it is surprising that Great Britain has not already announced her intention of not allowing any Representative of hers to hold intercourse with Prince Ching.

Wednesday, Dec. 17.

It is alleged that Viceroy Yuan, when received in audience on his return to Peking, made some strong statements to the detriment of Chang Chih-tung. He charged the old Viceroy with being a visionary who set his mind on great achievements and did not reflect sufficiently on the means of carrying them out, so that by degrees he had contracted heavy debts to foreigners, and in the issue the chief industries of Hupeh would probably pass into foreign hands.

Another high official against whom Viceroy Yuan raised his voice was Taotai Shêng. That fact was announced in previous telegrams and is now confirmed. But we must warn our readers that all these stories have no basis more solid than conjecture. Yuan Shih-kai has certainly made some strong representations to the Throne. That much seems trustworthy. But as to the exact nature of the representations it is evidently impossible to speak with assurance.

The Peking Syndicate, which is chiefly a British Association, is said to be projecting an important extension of the central line, for which it has already obtained a concession. If it carries out its new plan the provinces of Shansi, Honan, Anhui and Nanhwei will all be brought into railway connection.

The new Viceroy of the Liang-kiang, Wei Kuang-tao, is said to have memorialized the Throne, and to have obtained permission for the despatch of an increased number of students to Japan. The *N.-C. Daily News* has this to say about Wei:—

H. E. Wei's record leads us to expect that he will make an excellent successor to his countryman, the late Baron Liu. Like so many of his countrymen who have obtained high rank, it was as a soldier that he first attracted notice. Employed almost exclusively hitherto in the north-west, he was never a friend of Tung Fu-hsiang, and he was transferred from the Shen-Kan provinces to the Yun-Kuei in 1901 because it was feared that Tung Fu-hsiang would not be very comfortable under Wei's rule. By those who know him he is reported to be an official of strict integrity, moderately conservative, but open-minded, and he is, it will be remembered, one of the four officials indicated in Baron Liu's deathbed memorial as his possible successors.

Friday, Dec. 19.

It is stated that the Chinese Government is planning the establishment of a State bank in Peking, and that Mr. Wu, Chinese Representative in Washington, having been instructed to advise his nationals in America to make deposits in the Bank, reports successful efforts in that direction.

Mr. Hu, a Chinese official of whom we have not hitherto heard, and his wife are reported to be making arrangements for the despatch of some 20 girl students to Japan.

Mr. Wang, who is to come to Japan as superintendent of Chinese students, has been instructed, it is said, to collect while in Tokyo all information such as may serve the Chinese Government in carrying out its intention of taking Japanese models for its new educational system.

MR. UCHIDA ON THE FUTURE OF CHINA.

It is seldom that a Chef de Mission permits himself to speak publicly of the country to which he is accredited. There might be more frankness in this respect, but we can scarcely expect it where the slightest transgression of the line of propriety might involve a serious solecism. Mr. Uchida, who represents Japan at the Chinese Court, was recently entertained by the Chino-Korean Association (*Shin-Kan Kyokai*), on which occasion he delivered a speech of the highest interest, for not only does exceptional value attach to the opinions of any Japanese publicist about Chinese affairs, but Mr. Uchida himself is a special authority. His address was of considerable length, too long to reproduce verbatim within the limits of the space at our disposal. We shall therefore make a careful *resumé* of it.

1.—THE FUTURE OF POLITICS AND OF BUSINESS IN CHINA.—It is essential to distinguish between "political China" and "business China." Of course politics and business are closely related, but so far as China is concerned, whatever her politics be, the development of business is certain. For she has granted various privileges to Western nationals, who, in accordance with such treaty-conferred rights, will engage in sundry enterprises. Thus let her government or her politics be what they may, her material progress is assured. She may not open herself, but foreigners will open her, willy nilly. Nevertheless progress will come in the field of politics also.

2.—THE FUTURE OF THE PEKING GOVERNMENT.—Considering the progress of events in Peking, some persons allege that the Government has reverted to a conservative policy. That is a mistake. Nothing could be more erroneous than to imagine that the Boxer troubles were the outcome of a reactionary movement towards old fashions. Undoubtedly the leaders of the movement utilized conservative sentiments, where profit could be drawn from them. But struggles for power take place in Europe and America also, and in Japan too. One must not forget that the methods adopted by the promoters of such struggles are often difficult of analysis by outsiders. "This is not the place for me to enter into any explanation of the origin of that Boxer commotion."

[It may be here noted that, according to a genealogical table of the Chinese Imperial Family recently published by Dr. Ariga in the *Gwaiko Jijo*, the succession to the Throne belongs to Prince Twan. But the Empress-Dowager passed him over, and the fact caused him much umbrage, the upshot being that he stirred up the conservatives for his own purposes. His real object was not to drive out foreigners at all. Such is Mr. Ariga's opinion. Whether Mr. Uchida holds the same view, we do not know.]

This affair and its issue, Mr. Uchida went on to observe, may be compared to the things that happened in Japan at the time of the Restoration, when the Choshu people set themselves to drive away foreign ships. Probably a similar purpose animated the principal actors in both instances (*i.e.* utilizing the anti-foreign feeling to overthrow the Bakufu in the case of Japan and to upset the present Government in the case of China). Of course, among the members of the Central Government in China, there are not many that can be said to be truly liberal in their views, but, on the other hand, they are not all bigoted conservatives as Japanese journals make out. Thus the Empress Dowager and the Emperor are thoroughly resolved to open widely the door that has been closed

for so many centuries, and to freely welcome foreigners, nor can it be doubted that their determination will bear good fruit. It is owing to that cause that from the Princes downwards there is a general disposition to be friendly to foreigners, and so long as the door is not closed, there will be a steady advance in the right direction. The sound of the railway can be heard within the precincts of the Imperial Palace to-day, and it is scarcely conceivable that, whosoever may come into power, the iron horse can be driven out or the door closed again. Conservatism may indeed raise its head once more, and there may be struggles for political power, not unattended by tragic incidents. But such things will belong to the rank of fortuitous occurrences. Provided that China makes no blunder great enough to bring the question of her partition into the field of practical politics, the Government will be steadily pushed forward by the pressure of the outer world, as was the case with the Bakufu Government in Japan at the time of the Restoration. No nation, be it ever so great, can resist the force of civilization. Look at the cases of Germany at Kiao-chow and Russia in Liao-tung. From the point of view of politics and of international morality there may be much to say in this context, but there can not be any doubt that commerce and industry in Shantung and Shanking will be promoted by these events. Such are not the methods by which one would desire to see the cause of progress promoted, but the fact of its promotion is indisputable. If China does not open of her own accord, she will be opened by abnormal processes.

3.—RAILWAYS ARE THE CHIEF INSTRUMENT FOR OPENING CHINA.—The countries that have obtained concessions for building railways in China are England, Russia, America, Germany, Belgium and France. Between them they are entitled to construct some 8,000 miles, and they have already opened 2,673 miles to traffic; that is to say one-third of the whole. Of the Peking-Hankow (the Lu-Han) Road, which is now being quickly built, 440 miles are to be finished this year, and as the total length is 800 miles, only 360 remain to be constructed. In Shantung again, a line has been already built from Tsing-tau on Kiao-chow Bay, to Wei-hien, a distance of about 100 miles, and will surely be carried to Hainan before long. A number of experts have of late been engaged in Japan, and the American road from Hankow to Canton seems likely to be pushed forward with expedition. Thus in five or ten years China will have a much greater length of railways than Japan. As to the effect that will be produced on China when the main-trunk line, 1,500 miles long, runs southward from Peking to Canton *via* Hankow, which has been well called the Chicago of China, there can not be much doubt. A certain publicist has said that if the Yangtze flowed north and south instead of east and west, China's history would have been very different. He spoke truly. And now the huge empire will have a means of communication from north to south in the shape of that great instrument of civilization, the railway, which road will by and by connect with the Trans-Asian line, so that England will be brought within two weeks' journey of Canton. Branch lines, too, will be built in every direction, forming so many further doors of admission to the immense market, while, at the same time, England and France will be pushing up from the south, so that the whole aspect of the Middle Kingdom will be changed.

4.—INDUSTRIAL UNDERTAKINGS.—China will hereafter become a great manufacturing country like America. Occidentals will vie with one another to start industries in China. The Japanese ought to do the same, combining with Chinese for the purpose. The customs of the two peoples are alike, and they are neighbours. Their coöperation could not fail to present many convenient features. Now is the time for the Japanese to apply themselves to this work.

6.—WHAT THE JAPANESE SHOULD TAKE NOTE OF.—Most of the Japanese that go to China have no capital. Their idea is to make a fortune by one *coup*. If they undertake anything they have to seek here and there for money, and sometimes their only resource is to deceive one another. The inevitable result is that they forfeit their opportunities. Men worthy of confidence ought to go there, and enter into partnership with Chinese or Europeans.

Japanese engineers have been employed for the purposes of the Hankow-Canton Railway. No doubt there will be a growing demand in China for Japanese experts, and Japan should make it a point to educate a corresponding supply.

Merchants importing goods into China, should themselves go there and study the tastes of their customers.

Means of communication in northern China are much inferior to those in the south. That is specially apparent in winter. But it has now been found that Chingwang-tao is open all the year round. Thus there will be a better steamship service. There ought to be a vessel at least once a week. What may be hoped is that fast steamers will perform the trip from Moji to Chingwang-tao in a day and a half. That may sound like idle talk, but the time will probably come when there will be a steamer every day from Japan to North China.

THE QUESTION OF ANIMALS.

Philosophy is a very fine thing in its way but there is often an exceedingly exasperating element in its manner of dealing with the practical issues of every-day life. The fact is illustrated by Baron Kato Hiroyuki's remarks on cruelty to animals, as epitomized in our last Monthly Summary of the Religious Press. Dr. Kato's arguments tend to invest the whole subject with an atmosphere of academical insouciance. One rises from the perusal of his essay with a bewildered impression that the rules which ought to guide men's treatment of dumb animals have never been profoundly discussed or distinctly formulated, and that really the principles underlying the problem are still in too nebulous a state for the practical man to give himself much concern about them. Perhaps Dr. Kato merely intended to suggest to the Japanese Society for the Prevention of Cruelty to Animals that as no such association has ever previously existed in Japan, and as the Japanese people have hitherto obeyed instinct only in their behaviour towards animals, it would be well to educate a clear understanding on the subject before attempting to enforce any line of conduct. But to us the distinguished Professor's remarks are very disheartening in the sense that they relegate to the halls of the academy a question which ought to have been carried long ago into the field of practical life in Japan. After all, the rule is surely simple enough. Every unnecessary hardship inflicted on a dumb creature is criminal cruelty and should be punished as such. A great deal of cruelty

is necessary. So long as man compels animals to work for him, so long will they have to suffer. How much they suffer we can not tell, but it is easy to conjecture what terrible pain and torment even a merciful man may unwittingly inflict on an animal when he forces it to apply its whole muscular strength to the discharge of heavy tasks with little regard to the state of its health. That, however, must remain among the inevitable imperfections of the very imperfect system under which humanity lives, moves and has its being. What is not inevitable is that needless suffering should be inflicted, as is the case when daily in the streets of Tokyo horses are compelled to drag weights far above their strength, and when cattle are carried on the decks of ships without any protection against the effects of rough weather. We sincerely trust that the Society for the Prevention of Cruelty to Animals (*Dobutsu-gyakutai-boshi-kai*) will not allow itself to be diverted from its humane work by any doubts about the proper limitations of its merciful functions, and that its practical purview will soon extend beyond the apparently narrow range hitherto reached.

MR. OKURA ON CHINA.

Mr. Okura Kihachiro returned on the 12th instant from his trip up the Yangtse, and has been interviewed by a representative of the *Jiji Shinpo*. He says that the two convictions derived by him from his observations are, first, the necessity of effort in China by Japanese business men; and, second, the need of accumulating a reserve in the national treasury. He was startled by what he saw in the Yangtse — English and German war ships and commercial vessels plying constantly on the river, and English and German settlements in a flourishing state, whereas scarcely a Japanese ship could be discovered and the Japanese settlements were abandoned to weeds and decay. There is need, he thinks, of a bank of China and Japan, like the Russo-Chinese Bank, and he sees no reason to share the common apprehension that such an enterprise would not pay. On the contrary, he believes that with good management it would be profitable. It might lend money on the security of railways and mines with a prospect of favourable returns. He fully approves of naval increment as essential to supporting Japan's position in the East, but he deems nothing more necessary than the accumulation of a gold reserve. Certainly that would be a difficult task, seeing that Japan has to pay interest amounting to some ten million *yen* on her foreign debt, which, although much less than China's corresponding liability of 60 millions, is large in proportion to the relative resources of the two empires. Nevertheless a reserve can be accumulated if only administrative expenses be resolutely cut down. It is to that the Diet should apply itself vigorously. There can not be the least doubt that large administrative reforms could be effected. On the other hand, Mr. Okura sees no reason whatever for restoring the land tax to its original figure. The people can bear the burden perfectly well. He would leave the tax as it is, applying the proceeds to naval increment, and he would employ the results of administrative economies to form a reserve for the promotion of enterprises in China.

A LOTTERY IN SHANGHAI.

The Municipal Council in Shanghai having intimated in the minutes of a meeting held by it on the 13th of November, that it is strongly inclined to favourably regard a proposal from a Chinaman who is willing to pay \$150,000 annually for a monopoly of the right to conduct a lottery in the Settlement, the Revd. C. E. Darwent, of the Union Church, preached a sermon against the project and the *N.-C. Daily News* strongly endorses him. The ground taken by the Council is that no possibility exists of stopping the sale of lottery tickets, as now carried on in the Settlement, and that the thing might at least be managed in an orderly manner were it legalized and duly controlled. Probably there is some other reason, for that is scarcely worthy to be called a reason at all. There are a great many offences against good morals that can not be effectually checked by any machinery that human ingenuity has ever devised, but the inevitable existence of sinners is not a conclusive argument in favour of legalizing sin. There is just one case, a well known case, where legalizing has the recommendation that it conduces to public health, but truly we fail to see how any plea of the kind can be put forward on behalf of licensing lotteries. Manila was a by-word for many a year because of its lottery. Is Shanghai to emulate the Luzon city in that respect? We should be sorry indeed to learn that a settlement where a majority of the residents are British subjects, had degraded itself by deliberately introducing a most demoralizing influence into the daily life not only of its foreign population but also of its Chinese. The Council seems to have borrowed heart of grace from the fact that there is an authorized official lottery in Kiao-chow, but as the *N.-C. Daily News* justly remarks:—"It is possible that our Settlement has much to learn from its artificial imitators like Kiao-chow and Dalny, but this is beginning at the wrong end."

FROM EAST TO WEST.

We are parted, my friend, by the wild wide sea
And the severing hand of Time,
And alone, amid strangers, I long for thee,
In this distant Eastern clime.
And I long for the English songbirds' note
And the silvery vesper chime.
Here the air is laden with scented flowers,
And the mournful nightingale
In sweet, sad songs, tells the long still hours
His lovelorn joyless tale.
And the moon casts down a flickering light
Through the dark cloud's rended veil.
And I long, how I long, for the cowslip meads,
And the banks where the roses blow;
And the king-cups, half hidden among the reeds,
In the marsh by the stream below;
And the bleat of the lambs in the fields away
Where the ox-eyed daisies grow.
But I long still more for the sound of thy voice,
And the clasp of thy loving hand,
And to see by thy smile, oh friend of my choice,
That long years in a distant land
Have not stolen from me the Love of my youth
Nor a soul that can understand.

M.K.

PROJECTED BANK OF CHINA AND JAPAN.

A bill providing for the establishment of a Bank of China and Japan has been submitted by the Cabinet to the Diet. It is to be a joint stock company with a fifty years' charter, and a capital of 20 million *yen*, of which the Government supplies 6 millions, paying it over in 2 years, and the remaining 14 millions will be offered to the public, the shares to be paid up in four years. Among the functions to be undertaken by the Bank are: (1) the lending of money on the security of immovable property or ships, such loans to be repaid by yearly installments or at a fixed time; (2) the making of loans for fixed periods on the security of public bonds, company's debentures, company's shares or other valuable documents, as well as on that of goods; (3) the making of other loans; (4) the handling of Chinese Government funds; (5) the management of deposits or entrusted funds; undertaking the floating of public loans or company's loans; the discounting of bills, the selling, or buying of specie or ingots, &c. The Bank's branches in foreign countries are to be empowered to receive deposits at compound interest and to issue premium-bearing bonds. The Bank is to have a president and two vice-presidents nominated by the Government; together with four or more directors and three or more managing directors elected by the shareholders. The Bank is to set aside 2 per cent. of its profits as a reserve for maintenance of capital; and a similar reserve for equalization of dividends.

NAVAL COALING RECORDS.

A Honolulu dispatch of Nov. 17th stated that the U.S. cruiser *New York* established a naval coaling record for the world on the previous day. We extract the following:—

The *New York* set a record for coaling yesterday, which it is said beats all other records on a man-of-war of any navy and in any port. In six hours she put aboard 850 tons of coal. On Sunday 350 tons were placed on board a lighter and the lighter brought around to the port side of the cruiser. The other 500 tons of the amount required was put on the wharf at which the cruiser is lying, on the starboard side. At 7 o'clock yesterday morning the band attached to the vessel was sent up on the bridge with orders from Captain Mackenzie to play lively tunes and to keep them going. The band obeyed the order to the letter. And to the music of the band the coaling began and was kept up. The coaling was done entirely by the crew of the vessel. The Jackies trundled wheelbarrows filled with coal at a trot. There was rivalry between those at work on the lighter and those at work on the wharf. Coal went into the bunkers at a phenomenal rate, and at 1 o'clock the last of the 850 tons went in, the ship was coaled and the world's naval vessel coaling record was broken.

The coaling average of the *New York* is thus 141.7 tons. Leaving entirely out of consideration the performances of the British cruiser *Terrible* at Hongkong and Singapore in the present year (272.7 tons, and 302 tons per hour respectively) because in both cases the coal was placed on the ship's deck by coolies, the following figures made at Portsmouth in 1891 will stand some comparison with the Honolulu "world's naval vessel coaling record"—the work in each case being done entirely by the ships' crews:—

	Tons shipped.	Average per hour.
<i>Hannibal</i>	943	170
<i>Prince George</i>	1,520	187.7
<i>Resolution</i>	1,215	169.5
<i>Majestic</i>	1,230	200.3
<i>Mars</i>	1,070	203.78.

THE FINANCIAL POSITION IN TIENTSIN.

Monday, Dec. 15.

A long telegram from the *Asahi Shimbun's* Peking correspondent, dated the 11th of December, contains a gloomy review of the financial situation in Tientsin. The credit of Chinese banks, we read, has fallen so low that a thousand-tael note circulates at less than one-fourth of its face value, and transactions have been practically reduced to a ready-money basis. The foreign banks decline to receive any Chinese notes unless the issuing bank is guaranteed by the Viceroy. They are consulting His Excellency on the subject, but the Viceroy naturally hesitates about pledging himself to any large extent. There are about 200 Chinese banks in Tientsin, but of these not more than 55 enjoy the Viceroy's confidence, and it is stated that whereas the volume of paper in circulation over the signatures of these banks amounts to some seven million taels, only about two millions have the Viceroy's security. Thus, when settling day comes, there will be an extensive crash. There is an officially instituted bank, but its capital being only five hundred thousand taels, it has no strength adequate to deal with such an emergency, and nothing remains except to have recourse to the foreign banks. The *Asahi's* correspondent alleges that the origin of the trouble is to be sought in the exodus of specie produced during recent years by the excess of imports over exports, the result of which has been that the hard-money reserves of the Chinese banks have disappeared, leaving a large volume of unsecured notes. Further, since the Boxer troubles foreign banks have shown much reluctance to handle Chinese notes, the effect upon the latter's credit being of course, disastrous. It is stated that this subject received the earnest attention of the foreign municipal authorities during their tenure of office, but they failed altogether to devise any remedy. This year the exodus of specie has greatly exceeded that of any previous season. The correspondent adds that, with the exception of the *Busei-gumi*, all the Japanese firms in Tientsin have suffered heavy losses, and that even the silver coins struck officially are greatly debased.

Tuesday, Dec. 16.

Financial affairs seem to be in a very troubled condition in Tientsin. Allusion has already been made to the fact that the market is flooded with privately coined *cash* which have depreciated to a mere fraction of their face value. The latest news is that Viceroy Yuan, on his return from the south, issued a proclamation interdicting the circulation of these *cash* after the 19th December. The food-stores consequently refused to exchange any commodities for *cash*, and distress at once declared itself among the lower orders, many of whom never see any kind of money except copper coins from year's end to year's end. Several riots on a small scale are said to have taken place, and the food-shops having closed their doors, the people are crowding to the Viceroy's *yamen* with parcels of *cash* which they demand to have exchanged for some form of currency that will buy bread. Under these circumstances the local government has provided a million and a half strings of good *cash* which will be exchanged freely against the debased coins, and should that step prove insufficient, silver notes will be employed. It will be remembered that the volume of private *cash* said to be in circulation is estimated at eight million taels.

Probably that is an exaggeration, for at the original rate of a thousand cash to the tael, it would follow that every adult member of the Tientsin population is in possession of some thirty strings of cash.

THE RUSSO-JAPANESE ASSOCIATION.

The Russo-Japanese Association had a meeting at the Maple Club on the evening of the 15th instant. The Russian Representative, M. Iswolsky, and M. Alexieff were among the guests, and the principal members of the Society present were Count Matsukata, Viscount Yenomoto, Baron Honda and Mr. Komuchi Tomotsune. M. Iswolsky, having thanked the Association for appointing him an honorary President, observed that since his coming to Japan he had noticed the organization of numerous societies and associations for the promotion of various objects, and he inferred a highly active and progressive condition of the public mind, as well as an abundant spirit of patriotism and independence. The Russo-Japanese Association seemed to be a natural outcome of the time. Economics were the most important element of national strength, and in the competition of countries it was by economical forces that history was shaped. This was the competition of peace which brought nations closer together, and it was this that concerned Russia and Japan in the Far East. The Minister rejoiced to think that it was so, and regarded it as a matter of mutual congratulation. Nothing was more essential to the promotion of that purpose than a mutual understanding, a mutual knowledge of one another's circumstances and conditions. A meeting like that of this evening furnished evidence that this was appreciated and that the two peoples desired to meet everywhere in friendly and mutually appreciative rivalry. The spread of accurate and frank information about the affairs of the two nations was of cardinal importance in furthering the amicable objects they had at heart, and he trusted that the Association would spare no efforts in that sense. Facilities for mutual acquaintance had been greatly increased of late. When he himself was appointed three years ago to represent his country at the Court of Japan, he had jestingly remarked to a friend that he was going to the nearest diplomatic post to Russia. What he had then said in joke might now be said in earnest, for the Trans-Asian Railway had almost made neighbours of Japan and Russia, and any Japanese contemplating commercial or industrial enterprises on Russian soil, could now proceed thither himself, and make all the necessary investigations instead of relying on the reports of others. M. Iswolsky concluded by expressing regret at his approaching departure from Japan, but he declared that as the first honorary President of the Association its welfare should be an object to him even in his new post, and he would not fail to work for the promotion of its aims.

M. Alexieff, having explained that although he himself was nothing more than a lieutenant of Mr. de Witte's he could affirm that the Minister's attention was closely directed to the development of Far-Eastern trade and industry, and that the organization of an Association proposing to itself the promotion of those ends was most welcome to all Russian subjects.

THE BIG STEAMERS.

The *Daily Mail* contains the following information, wired by a correspondent in St. Paul, Minnesota:—

Mr. James Hill, President of the Great Northern Railway, who is Mr. Pierpont Morgan's principal ally in "combining" American railways, has almost completed the final step in a gigantic attempt to acquire the Oriental trade for the United States. Having arranged cheap railway connections between the Eastern and Southern States and the Pacific Coast, he will in December launch a number of new giant cargo steamers, the first of a new fleet for Pacific commerce. The ships are of 28,000 tons, each being equal to the combined capacity of the *Campania* and the *Lucania*. Mr. Hill, in an interview, said to me:—"We don't aim to secure the European trade to the Pacific through America, but we wish to divert the American Eastern trade now going through the Suez Canal. Our Eastern business has doubled in a year. We are prepared to run our steamers at bare expenses if necessary, they being only incidentals to us, and feeders for our railway." Mr. Hill added that should America not amend her navigation laws it might be necessary to run the new Pacific fleet under the British flag, English laws being more convenient and less costly.

Of course the "number" of ships to be launched this month is only two. But that is a secondary consideration. The point of interest is the possibility of working such immense vessels profitably. Very likely they will get the main share of the passenger traffic, but how they are to fill up with cargo is a mystery. So far as Japan is concerned, a special organization for collecting cargo would be essential, unless it is in contemplation to keep the steamers waiting for weeks, perhaps months, and even to send them from port to port seeking. Were there a possibility of gathering twenty or thirty thousand tons of cargo at one place by a certain date, Mr. Hill's venture would look more promising. But who is to undertake such work and carry it out successfully? The Nippon Yusen Kaisha alone have the necessary organization, and they certainly will not employ their machinery to assist a company which will be competing with them on the Pacific. Besides, how many ports are there in the Far East capable of receiving such vessels, and where can they be docked in the event of an accident? Mr. Hill is an eminently long-headed man. It is scarcely conceivable that he should not have taken all these things into consideration. But if so, he has preserved silence most successfully.

METHODS OF WAR.

We read in the *Independent* that at a banquet in honour of the foreign delegates attending the opening of the New York Chamber of Commerce's new building, General Young, who will soon succeed General Miles in the command of the United States Army, denounced the carpet critics who had defamed the American troops in the Philippines, for whom he claimed that they were the most humane that had ever waged war. He asserted that the Philippine campaign would have ended much sooner but for the intense desire of the American people to carry it on in an easy and persuasive way. "A Japanese or a German army would have taken a different course." We do not know whether the words here marked as quotation were actually used by General Young. At all events, they embody a statement attributed to him by the *Independent*. There have been ample opportunities in history to furnish material for judging the quality of German warfare, so we do not venture to challenge General Young's views on that point, whatever we may ourselves think about it. But have there been suffi-

ent opportunities for judging Japanese methods? Is it fair to class Japanese soldiers and officers in a category different from that to which American officers and soldiers belong, in the matter of humanity? To attempt to disprove a sweeping assertion like that of General Young would be an endless task. In such a case the *onus probandi* rests on the maker of the assertion. But under any circumstances such allegations are lamentably wanting in tact when they come from an officer in the position of General Young.

It is difficult, however, to know exactly what kind of war has the approval of General Young. The *Independent* makes him say that the most humane war is one "fast, furious and bloody from the beginning." Doubtless that is the species of warfare that inflicts a minimum of suffering in the long run. Hence it would appear that the General constructively applauds German and Japanese methods as the most humane, though he assigns a different opinion to the American civilian population.

THE SIAMESE CROWN PRINCE.

His Royal Highness the Crown Prince of Siam arrived at Yokohama on Tuesday afternoon in the C.P.R. steamer *Empress of China*. The ship was signalled from Inuboye in the morning and was expected to arrive at two o'clock but it was half an hour later ere she approached the Quarantine ship to undergo examination. At twenty-two minutes to four salutes were fired by the larger war-ships in port. These are the *Chinyen* and *Fuso*, with two torpedo-boat destroyers; the *Mahachakkrin*, the Siamese Royal yacht, the *Oregon*, U.S. battleship; and the *Rurik*, Russian cruiser. These vessels and practically all the mercantile shipping in the harbour were dressed with flags.

Landing under a salute from the warships the Prince made a short stay at the Imperial resting villa and proceeded to Tokyo by a special train at 4.40 p.m.

Among those who received His Royal Highness were Count Toda, and Baron Sannomiya, Grand Master of Ceremonies in the Imperial Household, and Lord Abbot Otani Koson of the Eastern Honganji.

The principal journals of Tokyo publish leading articles welcoming the coming of the Prince Royal of Siam. The *Fiji Shimpō* notes that among all Eastern Powers Siam alone has followed the same progressive route as Japan, and though the Kingdom is now held in an Anglo-French vise and is severely pressed by France, its progressive impulses are happily not checked. The relations between Japan and Siam have gradually grown closer in recent years, and may ultimately become as intimate as those between this empire and its neighbours, China and Korea. The *Fiji* speaks also in very high terms of the young Prince, and welcomes him heartily.

The *Asahi Shimbun* says that while Japan, China and Korea are the only countries in the northern Far East that retain their independence, Siam is the sole country in the south, and she has Japan's fullest sympathy. If Japanese history during the *Meiji* era can be of any service to Siam, it will be a matter of sincere congratulation to this country.

The *Chuo Shimbun* notes that the two countries, Japan and Siam, have had friendly relations for 300 years; that Japan became one of the leading Powers after her war with China; that the responsibility devolves on

her of spreading civilization in the Far East, and that she desires now to resuscitate her old friendship with Siam and to increase it.

The Crown Prince of Siam was received in audience by the Emperor and Empress at 5 p.m. on the 18th instant, and subsequently dined with Their Majesties in the *Homei-den*. There were present several Imperial Princes and Princesses, the Minister of State for Foreign Affairs, the Siamese Minister and others.

At 11 a.m. on the 18th the Emperor proceeded to the Shiba Detached Palace to return the visit of the Prince.

TRANSMISSION OF MAILS.

Truly it is difficult to endorse the complaints published against the procedure of the Japanese Post Office in the case of mails by the *S.S. Tartar*. What happened seems to have been that the Canadian Postmaster General, having notified the Japanese postal authorities that, according to an announcement from the Canadian Pacific Railway Company, the latter would not hold itself responsible for any mails except those transmitted by certain steamers, the Japanese Authorities took steps to stop the transmission of mails by the *Tartar*, which was not included among the steamers indicated. We do not see what other course the Tokyo Post Office could have taken. There is a suggestion that it might have allowed the mails to go forward by the *Tartar*, and then have given subsequent effect to the Canadian discrimination. But it is not difficult to imagine what kind of outcry would have been raised if, after that course had been adopted, the Canadian Pacific Railway Company's disavowal of responsibility had borne practical fruit in the case of the *Tartar's* mails. The entire onus would have rested, and rightly too, on the shoulders of the Japanese Authorities. In our opinion the only query that can be fairly raised is whether due expedition was employed in issuing the notice about the discrimination. It appears that the Canadian despatch bore date November 6th, and since the *Tartar* did not leave Yokohama until December 13th, there should have been ample leisure to convey to the public information sufficiently timely to prevent any disappointment, whereas the information was not published until the eve of the steamer's sailing, when many important letters had already been mailed. The Tokyo Post Office, in the interest of its own reputation, ought to explain that point.

READERS.

On the 17th instant, 125 members of the Judiciary and the Police instituted a strict search at 18 places in Tokyo, commencing with the well-known book store, *Kinko-do*. The reason of this extraordinary measure was that two school inspectors of the Department of Education, one of whom is no longer in the service, are supposed to have accepted "consideration" from the recently formed book-store trust, to advocate the use of readers compiled and issued by the trust, and that a sudden search for proofs was considered necessary. The results of the search are not known. There are all kinds of rumours about this matter of readers, but we refrain from repeating them in the absence of certain information.

KOREA.

Saturday, Dec. 13.

We are not surprised to find that the rumour of Li Yong-ik being in hiding at the house of a German lady is indirectly contradicted. The latest news is that Mr. Stein, the Russian Chargé Affaires, has assured the Japanese Representative, Mr. Hayashi, that Russia does not seek to derive any advantage from the asylum her Legation affords to Li Yong-ik, and that she has not made any offer of a loan to Korea. The *Kokumin's* correspondent sends this news. Is it probable that the presence of a fugitive from the laws of his country in the Russian Legation would be openly acknowledged by the Russian Representative? And if that incredible tale be swallowed, what is to be said about the superfluous loan assurance—superfluous because any offer of a loan to Korea by Russia without previously consulting Japan would be a distinct breach of the Yamagata-Lobanow Convention? The public must reconcile itself, however, to hear many strange things about the Li Yong-ik affair before the political sea in Seoul ceases to seethe.

Monday, Dec. 15.

News comes from Seoul to the effect that the members of the Cabinet having continued to importune the Emperor for the punishment of Li Yong-ik, His Majesty issued a decree directing that no more memorials should be presented on this subject. It is stated, however, that three of the country's leading statesmen, including the aged and influential Cho Pyong-sik, are resolved not to be deterred by this injunction.

The directors of the Seoul-Fusan Railway organized an entertainment on the 12th instant, to celebrate the opening of a twelve-miles section of the road.

The *Kokumin Shimbun* has a telegram dated the 13th, which says that the whole Korean Cabinet has resigned, and that all the Ministers will be changed except Min Chhong-meuk, Minister of Agriculture, Commerce and Public Works, and Cho Pyong-sik, Minister of Foreign Affairs. Thus far the following new appointments have been made:—

Cho Chong-kyu, Minister of the Household.

Kim Kyong-ho, Minister of Home Affairs.

Li Kwi-tong, Minister of Justice.

It is alleged that these appointments indicate a policy of conciliation, but that the relations between Lady Om and the Prince Imperial are strained, and that the former has fallen sick. The Palace is guarded by troops under Cho Pong-hwan.

Friday, Dec. 19.

Affairs seem to have settled down in Seoul. So, at least, the correspondent of the *Kokumin Shimbun* reports, but the *Asahi's* correspondent is not optimistic.

Mr. Hayashi, Japan's Representative in Seoul, is to leave Korea on the 20th instant for Tokyo.

A TEA SYNDICATE.

All the important tea merchants and several of the unimportant having made due application to Mr. Otani Kahei, a syndicate has been formed under the name of *Nihon Seicha Yushitsu Gomei-kai*, or "The Japan Tea Exporters' Union." Mr. Komada left Yokohama on the 17th instant to bring the syndicate into touch with the American market.

NOTES ON CURRENT EVENTS.

Lieutenant-General Nelson A. Miles, who commands the United States Army, is now in Japan, on his return from the Philippines where he has been on a tour of inspection. He is accompanied by Lieut.-Colonel Mans, his Aide-de-Camp. The distinguished officer purposes to journey homeward by the Trans-Asian Railway, special facilities having been furnished by the Imperial Russian Government.

On the 13th instant at 8 a.m. the Girls School of the Society of Friends in the Mita district of Tokyo was destroyed by fire. The conflagration had its origin in a kitchen stove, and as the buildings were situated on high ground and there was a strong wind blowing, no possibility existed of checking the flames. Happily no injury to life or limb is reported. The school had 27 boarders and over 60 day-scholars.

Our readers have not forgotten the apprehension of a guard on the Japan Railway last month, in consequence of the police's idea that some indignity had been put upon an Imperial Prince. It is now stated that the Chief Inspector of Police in Tochigi prefecture has been severely reprimanded for ordering this arrest.

An accident occurred at the Hokoku colliery in Fukuoka prefecture on the 10th instant. Owing to a landslide over 200 men were cut off from all communication and great fears were entertained for their safety. Ultimately, however, they were all rescued without injury.

Count Sano's funeral took place on the 12th instant, under the auspices of the Red Cross Society. In spite of exceedingly inclement weather a great concourse of mourners assembled, all the leading members of the Red Cross and Fine Arts Societies being present in person or represented by proxy. Two battalions of troops escorted the hearse from the residence of the deceased to Aoyama cemetery.

His Excellency Baron d'Anethan, Belgian Representative, was received in audience by the Emperor on the 13th instant, and subsequently the Baron and Madame la Baronne were received by the Empress.

The graduation ceremony took place at the Etajima Naval College on the 14th instant, in the presence of H.I.H. Prince Arisugawa representing the Emperor. The graduates numbered 185, among whom 3 having distinguished themselves specially, were rewarded by the Emperor with presents of field-glasses. Prince Arisugawa then proceeded to Kure by the *Yashima*, and attended a special meeting of the Japan Life-saving Society (*Yeki-sei-kai*). His Imperial Highness presided at the launch of the *Tsushima* on the following day; a sister ship of the *Niitaka*, recently launched at Yokosuka: namely a cruiser of 3,420 tons with a speed of 20 knots.

The Emperor, with his usual gracious benevolence, has contributed a sum of 1,000 *yen* for the relief of the sufferers by the conflagration in the Japanese settlement at Fusan.

Mr. Lloyd C. Griscom, who has been appointed by the President of the United States to succeed the late Honourable Colonel Buck as American Representative at the Court of Japan, served for some time as Secretary of Embassy in Constantinople, and was pro-

moted last year to be United States Minister in Persia. He is a son of General Griscom, now President of the Morgan S.S. combination, one of the wealthy men of America. Presumably the new Minister will be accompanied by his wife.

Mrs. Griscom, we learn, was a Miss Bronson. Her wedding trip was with her husband to Teheran, when he proceeded thither to take up his duties as Minister.

On the 20th instant the *Ceefoo Maru* will be launched at the Mitsu Bishi Yard in Nagasaki. She is a sister-ship of the *Kushiro Maru* which was launched at the Kawasaki Yard in Kobe on the 13th instant. Her registered tonnage is 1900 tons, her speed 12 knots, and she has accommodation for 16 in the first class, 216 in the second and 300 in the third.

The last round of the Men's Singles in the Tokyo Lawn Tennis Tournament was placed yesterday, and after a splendid fight was won by Mr. Takagi (scratch) Mr. Kabayama (receives 3) scoring 78.

At 11 a.m. on the 16th instant an explosion occurred at the powder-magazine in the sixth workshop at the Kure arsenal. Four persons were killed and 7 severely hurt.

Mr. Sugiura Toraichi has been appointed Minister to Mexico, combining the duties of Representative in Peru, in succession to Mr. Sato Aimaro.

The murderer of Mr. Large came out of jail on the 17th instant. His sentence of 13 years—pronounced on account of another crime—had been abbreviated in connexion with the death of the Empress-Dowager. Ogasawara Seigesuye suffers no penalty whatever for the Large assassination: he reaps full advantage of the law of limitations. Japanese papers state that, on leaving prison, he received a sum of 79 *yen* which he had earned during his incarceration. He is to be ultimately given shelter by an uncle in Kumamoto, but for the moment he has been taken into the Christian Prison-Gate Home presided over by Mr. Hara. That truly is returning evil for good.

FIRES.

Fire broke out on Sunday morning in a public bath house at Chojamachi Nichome, Yokohama, occupied by Shioya Kisaburo. One house was destroyed and six damaged.

A fire broke out at Kakigaracho Ni-chome, Tokyo, about 2.40 a.m. on Dec. 13th which burnt down two houses and partly damaged 14. The fire was extinguished about 3.30 p.m. A woman was killed and a man severely wounded.

Fire broke out about twenty minutes past three on Thursday morning in a building consisting of three houses at No. 39 Ishikawa Nichome, (Japanese town). The Satsumacho and Police Brigades were early on the spot and having a good supply of water from the adjacent hydrants were able to keep the flames from spreading beyond the structure in which they had originated. The cause of the fire is unknown.

Another fire occurred about an hour after in a empty house at Wakabacho Ichome. One house was destroyed and several damaged.

The small steamship *Keisho* (200 tons) belonging to Mr. Hori, a shipping agent at Chemulpo, Korea, was found to be on fire early in the morning of December 15th when about 30 miles distant from Chemulpo on a voyage from that port to Chinnampo. She was run on a sand bank. All the passengers and crew were saved. Two steamers of the same line have gone to the scene.

YOKOHAMA LITERARY SOCIETY.

Mrs. W. Kirkland Wilson's illustrated lecture entitled "A Trip to Turkey" drew a large attendance of members of the Yokohama Literary Society to the Van Schaick Hall on Friday evening. Mrs. Wilson has a happy descriptive style shot through with a vein of delicate irony and illuminated by many flashes of dainty wit and it was therefore not surprising that she held her audience from the start, and at the close was rewarded by a hearty outburst of applause, showing how keenly her hearers had appreciated the effort. We print the whole paper elsewhere.

The musical portion of the programme again proved very attractive. Mr. Irwin Chapman, after playing a pretty improvisation on the piano, accompanied two songs of his own composition, which Mr. A. H. Atkinson sang most sympathetically. Indeed, we have seldom listened to Mr. Atkinson with greater pleasure than on Friday evening. The first song, which perhaps was the happiest effort of the composer, was set to one of the late Eugene Field's baby songs: "Winkin', Blinkin' and Nod." It runs as follows:—

Winkin', Blinkin' and Nod one night
Sailed off in a wooden shoe,
Sailed on a river of crystal light
Into a sea of dew.
"Where are you going and what do you wish?"
The old moon asked of the three;
"We've come to fish for the herring fish
That swim in the beautiful sea.
Nets of silver and gold have we"—
Said Winkin', Blinkin' and Nod.
Laugh'd the old moon and sang a song
As she rocked the old wooden shoe,
And the wind that sped them all night long
Ruffled the waves of dew.
The little stars were the herring fish
That swam in the beautiful sea,
"Now cast your nets where e'er you wish
Nothing afear'd are we."
So spake the stars to the fisherman three,
Winkin', Blinkin' and Nod.
Winkin', and Blinkin' are two little eyes,
And Nod is a tired head,
And the wooden shoe that sped the skies
Is the wee one's trundle bed.
Now close your eyes while mother sings
Of the wonderful sights that be
And you shall see those beautiful things
As you rock in the misty sea,
As the old moon rocked the fishermen three—
Winkin', and Blinkin' and Nod.

Mr. Chapman's music formed a fitting accompaniment to these dainty words and we hope to hear it again. The second song "Phyllis Mine," was more conventional, but still very pleasing. Mr. Brady, who followed, gave a spirited rendering of Mark Twain's "Red Indians," and in response to a persistent encore, repeated "The House that Jack Built." The next item should have been contributed by Madame Henckler, but she was prevented by indisposition from attending, and so Mr. N. G. Maitland kindly filled the gap, singing Dvorak's pretty "Songs my mother told me," in capital style. The evening was brought to a close by Mr. Atkinson, who sang Clutsam's "Myrrha," from the "Songs from the Turkish Hills." The next meeting is fixed for December 29th.

PING-PONG AT THE Y.A.R.C.

The result of the Ping-pong tournament which has been in progress at the Boat House does not seem to be any longer in doubt. Mr. R. Schwabacher has won all fifteen games, and Mr. D. L. Abbey has won thirteen and lost two games. No other player can now equal these figures, the nearest being Mr. J. Kuhn, who scored twelve wins and three losses. The game is therefore concluded, the first prize (a handsome silver cup presented by Messrs. O. Strome and W. Goddard) being gained by Mr. Schwabacher, and Mr. Abbey taking second place.

The Lord Mayor's Show in London was unusually elaborate, and blocked the carriage in which Messrs. Balfour and Chamberlain were riding. They alighted and hired and mounted costers' barrows to watch the procession, during which they were greatly cheered.

GOLD AT WEI-HAI-WEI.

MINING operations for gold are about to be undertaken by a British company at Wei-hai-wei. It is said that the quartz mountains in the vicinity of the fortress are rich in the yellow metal. Two syndicates acquired considerable areas for mining purposes after the British occupation, but it appears that much time was needed to overcome official obstacles in London, and only now can a commencement of work be made. The two syndicates have joined forces. It will occur to some people, perhaps, that this incident is a kind of providential indication to China of the advisability of placing her currency on a gold basis, though a great deal of imagination is required to entertain such a conception. China will have to come to gold sooner or later: that is tolerably certain. When she makes up her mind to take the step, her great difficulty, of course, will be to obtain a gold reserve. Very little of the yellow metal will be needed for purposes of circulating currency. The silver dollar may remain, and it can be supplemented by notes. But the purchasing value of the dollar must cease to depend on its intrinsic worth. The coin must be a token, deriving its value from its exchangeability for gold, which means the existence of a substantial gold reserve in the central treasury. How much would be needed we do not pretend to say, but in all probability a hundred and fifty million taels would suffice. Where is China to get that sum? She can not look forward to the luxury of a convenient wind-fall in the shape of an indemnity, and if she entered the market as a buyer of gold with silver, she would have to pay very dear for it. There is one thing to be noted, however. She managed without much difficulty to pay to Japan a sum of 230 million taels in gold, and if she could obtain a supply of the precious metal for that purpose a few years ago, why should she not be able to obtain a smaller supply for the purposes of her own currency now? The obvious answer is that the embarrassments of a creditor who has to employ silver for defraying a gold debt are immensely greater now than they were ten years ago. The world has lost all confidence in silver. Exactly what the bimetalists predicted has taken place. The bottom has been knocked completely out of the white metal by continuous demonetization, and no one ventures to affirm that its sterling value some fine morning may not be quoted at 12 pence. China could get people to lend her gold now. Her credit is still good enough. She would have to do a good deal of hypothecation, it is true, but that could be done. The trouble is that she would incur a liability of almost illimitable dimensions. The 450 million taels that she owes the Treaty Powers in connexion with the Boxer affair, is a debt which will prove a crushingly heavy burden before she gets it discharged, for its weight is augmented by every appreciation of

gold. Twenty years ago it was very hard to get any one to pay even passing attention to the question of bimetalism. Only twenty-years ago! Yet what a problem it is now! When the Straits Settlement and Siam have adopted the gold standard, it will be practically impossible for China to retain her silver isolation. Indeed it is already well nigh impossible for those engaged in her foreign commerce to avoid crippling losses. Japan is generally said to have been very wise and very fortunate since she seized just the right moment to do the right thing. But even Japan is not altogether happy. She too finds much inconvenience in being obliged to take part in the scramble for gold. That reserve in the vaults of the Central Bank is a perpetual source of solicitude to her. She dare not even undertake a bold programme of railway building lest the purchase of materials should involve an outflow of the yellow metal. Still, on the whole, she has done well. There is no gain without some loss, as the Chinese proverb says. If only her neighbour could follow her example. Perhaps the solution of this problem is to be the crowning achievement of Sir ROBERT HART'S career.

THE POLITICAL SITUATION.

THE suspension of the Lower House's sittings is a measure for which the public was not prepared. It means that unless the majority abandon their implacable attitude, dissolution will follow. The purpose of dissolution, according to English practice, is to appeal to the sense of the country from the verdict of the House. In this case the appeal would be upon lines such that the Government could not hope to win. For the constituencies would be asked to choose between taxing themselves and insisting on a measure of administrative retrenchment which their representatives declare to be feasible, and which certainly is feasible to some extent. Only one answer could be expected and thus, from the English point of view, dissolution becomes an aimless step. This is not England, however. This is Japan, and although the institutions of Japan are modelled, in the main, after a constitutional pattern, they have not yet attained any generally recognised constitutional standard. Dissolution has a secondary use among the Japanese; a disciplinary use. It inflicts a heavy direct fine on the members of the House and it condemns them to large outlays if they desire to be again returned to parliament. Each member's salary of 2,000 yen is paid in two equal installments; one immediately after the official opening takes place; the other shortly before the end of the session. Thus a dissolution in these early days of the session would mean that the members lose a thousand yen each, and further that they would have again to organise an election campaign which they have just completed at

heavy cost—so heavy, indeed, that many of them have had to pledge the salary of which dissolution would deprive them. From that point of view dissolution is a weapon serving to remind them that if the constitution gives them a right to obstruct the course of State business mainly for the sake of getting administrative power into their own hands, it gives to the Government also the right of making the members pay a heavy and sobering penalty for every sacrifice of patriotism to ambition. Nevertheless it had not entered into our calculations that the KATSURA Cabinet would dissolve the Lower House, nor do we think that if Count KATSURA were free to consult his own judgment only he would have recourse to that expedient. For the distinctive character of his statesmanship has always been to pursue his ends with a minimum of disturbance and friction, whereas dissolution will entail much disturbance and much friction without bringing the nation nearer to endorsing the Government's land-tax scheme. The new House will be just as recalcitrant as the old, and unless a series of dissolutions is to ensue, the Ministry must lay down its arms. Thus two interpretations suggest themselves of this measure of suspension. One is that the Cabinet has deferred to its conservative supporters, whose sympathy would be estranged by an unresisting surrender; the other that dissolution is not expected to be faced by the House. On the former hypothesis, the Cabinet might be expected to resign before the new House meets; on the latter, some route of compromise will be discovered before the 20th instant.

The striking feature of the situation is a complete reversal of familiar conditions. In previous struggles with the Diet, Marquis Ito has always stood at the head of the Government which sought to carry wise measures in the face of ambitious agitation. Now it is against a party headed by Marquis Ito that the distinguished statesman's weapon of dissolution is to be employed by his old-time colleagues. The on-looking world can not choose but sympathise with Marquis Ito in his arduous task of educating the nation up to the institutions he has given it.

THE BOOKSHELF.

The Encyclopedia Britannica.

The announcement of *The Times* that the ninth edition of the *Encyclopedia Britannica* may henceforth be obtained in Japan on the system of monthly payments, shows that this country is nearer Europe than it used to be. In the United States, where the enterprise of book-sellers in recent years has often taken the form of issuing fine editions of standard works at high prices, this device of monthly payments is frequently advertised, and the advertisements generally serve to remind us sadly that, in spite of all the changes of the immediate past, we are still living beyond the reach of many facilities enjoyed in the Occident. As to the *Encyclopedia Britannica*, there is no English-speaking person, we presume, who would not benefit more or less by the possession of such

a work—a complete library of reference in itself and quite priceless to any one desiring to keep in touch with the world of science, literature and art. But the price of the book has hitherto been about £30, and then there was the trouble of ordering it from home, while the necessity of paying such a sum all at once could not but deter folks who, since they live in the Far East to earn their bread, can ill afford to pay out hundreds of *yen* for a book. The alternative was to buy the American reprint at 120 *yen*. Doubtless many people took advantage of that resource, for greatly inferior as the reprint was to the original in many respects, it nevertheless served as a tolerable substitute. But even that opportunity is no longer available, for since Japan became a member of the International Copyright Union, pirated editions works like the *Encyclopedia* may not be imported any longer. At a most timely moment, therefore, does an agent from *The Times* appear upon the scene, offering to dispose of copies of the original Edinburgh edition not merely at the much reduced price of £18 for ready money, but also on the system of monthly payments, so that by disbursing a sum of 5 *yen* at once, and pledging oneself to hand in 10 *yen* monthly for 19 months, one can come into immediate possession of the great work. Of course it must be mainly to the Japanese public that *The Times* addresses that exceptionally favourable offer. In view of the limited number of foreign residents in this part of the Far East, it is not probable that many subscribers will be found among them. But we should imagine that hundreds of Japanese will avail themselves of the chance. A hundred and seventy-five *yen* is too large a payment for Japanese book-buyers in general. But no one need be alarmed by the prospect of disbursing ten *yen* a month, and it will be taken as an evidence of great confidence that *The Times* extends this system to a country where the facilities that a foreigner commands for collecting money under such an arrangement are a matter of uncertainty. We observe that the *Kokumin Shimbun* welcomes the offer cordially and congratulates its countrymen that such an opportunity is brought within their reach. The experiment is absolutely novel in Japan, where booksellers are remarkable for the very small modicum of confidence they repose in their customers. It will therefore be interesting from a psychological point of view to see how *The Times'* experiment succeeds. We ourselves are persuaded that the great journal's faith in Japanese probity will not be abused, and that the buyers of the *Encyclopedia* will not bring disgrace on the nation by failing to implement their engagement.

Shimbi Daikwan.

The eighth volume of this remarkable publication has now appeared. It contains thirty-seven illustrations of celebrated sculptures and paintings. The authors have included four pictures by great Chinese artists—Li Ti, Ma Yuan, Kao Yen-hui and Chang Fang-ju—, which, apart from their own special features, afford interesting material for comparing the ancient works of Japan and the neighbouring empire. When we add that there are typical examples of the Tosa and Fujiwara academies, and that such masters as Cho Densu, Soga Chokuan, Keishun, Sesson, Kano Eitoku, Kano Sansetsu, Okyo, Tani Bunchō and Yokoyama Kasan, are well represented, the

reader will begin to understand what a valuable and instructive book this eighth volume is. It must remain a perpetual pity that before commencing such a big enterprise, the authors did not collect and classify their materials. The task would have been difficult. It would have entailed painstaking and exhaustive examination of all the objects available for the purposes of the hundreds of illustrations destined to appear in these volumes. But how immensely the value the work would have been enhanced if, instead of a mere miscellany of Japanese art, as the *Shimbi Daikwan* now is, its contents were classified historically and academically! We can not expect that the task will ever be undertaken now. The *Shimbi Daikwan* occupies the field to the exclusion of anything more intelligent, and we must fain be content to possess such a pictorial gallery of Japanese sculpture and painting as was not even dreamed of by either the Japanese or the foreign public thirty years ago.

Two on their Travels, by ETHEL COLQUHOUN, London, William Heinemann.

SOME two years ago that unwearied traveller, Mr. Archibald Ross Colquhoun, revisited the Far East and as a result of his journey brought out a capital book entitled *The Mastery of the Pacific*, which dealt in an interesting manner with the politics of the people who at present dominate the Pacific, while it furthermore described in great detail the various languages, tongues and peoples who are subject to the ruling Powers. It seems that on this journey Mr. Colquhoun was accompanied by his bride, and now we receive from her publishers a dainty record of the lady's impressions during that eventful trip. We have seldom read a pleasanter travel-book. Mrs. Colquhoun has a happy style, arch yet never pert, adroit when traversing difficult places, yet always honest, looking at things as they are square in the face, while allowing a delicate flash of wit or good-humoured irony to irradiate her pages at frequent intervals. And withal she imparts to her narrative a pleasant, breezy, thoroughly English atmosphere, the atmosphere which the cultured, well-read, well-travelled, observant woman knows how to create around her, making one proud to own her as a country-woman. So honest is she in her likes and dislikes, her prejudices and her raptures, so adventurous for pure adventure's sake, yet so truly homesick in her longings for the ordered, cleanly ways of her own dear land, that we read every page with pleasure, and drop the book at last with a sigh that the end has come and we have to part company. Exiles in the Far East will find Mrs. Colquhoun treating of their trials and drawbacks with a sympathetic pen and she has a kind word to say for all who helped to make her scamper through the farthest East pleasant and comfortable. She seems to have thoroughly enjoyed the beauties of Java—the garden of the East; though she could not quite approve, being a modern Englishwoman, of all that she saw there in the way of draping the human form divine which the Colonial Dutch have adopted. Not quite so pleasant did she find her journeyings in and around Borneo, though her voyaging was lightened by the vagaries of one Ah Ting and sundry Scots engineers. Her approach to Manila was by way of the Sulu Archipelago, in the company of an American scientific expedition, which included two lively young ladies, daughters of one of the professors, whose characters are candidly

drawn. After doing the Philippines and enjoying herself more or less at various places, the traveller turned toward Japan and spent a few weeks sightseeing in and around Kyoto. Then comes perhaps the most entertaining part of the journey, at least to our way of thinking—the journey home *via* Siberia. This is particularly well-told and is likely, we imagine, to induce others to take the same route when opportunity offers. We should like to quote extensively from this very entertaining book, but space forbids, and we content ourselves with transcribing a few paragraphs from the last page of all. Says Mrs. Colquhoun:—

Our relations are genuinely pleased to see us back, and the hilarious ones say, "Dear me, what globe-trotters you are," without any suspicion of the pain they inflict. Our one wealthy aunt asks suspiciously what churches we have been attending during our absence. In the bosom of our families our traveller's tales are listened to with a certain amount of respect for a day or two, though somewhat checked by inquiries as to where such and such a place is—"in China?" (Just about this time every place in the Far East from Singapore to Vladivostok was supposed by our relations to be in China.) Then public interest wanes. Our thrilling descriptions are cut short by a murmured aside, "Jane, dear, did you know that young Mrs. Smith had her sister staying with her, and they say that there's something between her and Bertie Brown."

When we meet old friends in the street we are prompted to rush up and shake them by the hands. It seems so wonderful that they should still be here. At first they are slightly surprised, then a light dawns on them. "You've been away, haven't you? I thought I hadn't seen you lately—Japan? Java? Philippines? Dear me! Quite a tour. Yes, we're all well, thank you, but Maria still has the boys with her in Scotland, Charlie has the mumps," etc.

How true to life this is, those of us who occasionally wander back to the home-land can testify. We cannot take leave of Mrs. Colquhoun's lively pages without reference to the many charming pictures, some in colours, some in half tone, which are freely scattered about the volume. We gather that they are from the pen, pencil, or paint-brush of the gifted authoress. Altogether writer, publisher and printer may be heartily congratulated upon the way they have turned out *Two on their Travels*.

Verse and Worse, by TUNG CHIA (J. O. P. Bland). Shanghai, Messrs. Kelly & Walsh, Ltd.

On many a Far Eastern bookshelf lies a slim little volume of verse which the lucky possessors would not part with for the price of many a more pretentious volume. We refer to "*Lays of Far Cathay*"—the first edition, with its clever pencil sketches and unconventional make-up. It was followed in due season by a second edition, expanded and redressed, but this though stuffed with collotype head and tail-pieces is not in the same field with its predecessor. Now "*Tung Chia*" bows before us a third time and on this present occasion brings both prose and verse. In his preface he tells us that most of these things have been published in one place or another: some in the *Rattle*, some in the *North China Daily News*; some in home papers. We think that one and all of the prose pieces were worth rescuing from the oblivion which so soon settles on things contributed to our ephemeral latter-day press, though of course they are not all of the same merit. The opening satire "*An Extinct Science*" is perhaps the very best thing in the little book, the irony being subtle and well-sustained, but some of the ironical verses might with advantage have been left out. "*Tung Chia*" has not been fortunate in his format. His page is ample enough, but the type is cramped and miserable. By taking a little thought his printer might have given

him a page of letterpress pleasant to the eye and soothing to the tastes of the genuine book-lover. Had he "set-up" the book in "old style," or, as some old-fashioned printers prefer to call it, "old face" letter, with a thick lead running through the lines, then would we have had something that would have given additional pleasure to the reader—and to the collector. As it is the eye grows weary ere half-a-dozen pages have been traversed and it becomes a veritable martyrdom to the flesh to read the book to its close. Much happier has the author been in his illustrator. Mr. W. D. Straight has given us some delightful bits in black and white after the style of Albert Durer's famous school, which will long linger in the memory. "Tung Chia" in his prose and verse has shadowed forth a faint reflection of some of the aspects of life as lived in China's Treaty ports; Mr. Straight visualises the scenes and the characters for us even more effectually.

IMPERIAL DIET.

The galleries of the House of Representatives were crowded on the 13th instant in the expectation of an interesting interchange of question and reply between the leaders of the political parties and the Cabinet Ministers. But that expectation proved entirely incorrect. The Prime Minister and the Minister of State for Finance addressed the House, or rather read speeches. The Premier's utterances were clear and his delivery was calm and dignified, but Baron Sone could not be distinctly heard, and indeed, the members displayed little disposition to listen. Thereafter the remarkable feature of the occasion was that all the men of note among the parties remained absolutely silent. Two or three persons, quite unknown to fame, formulated queries, accompanying them with desultory denunciations of the Ministry, and being allowed to digress and generalise in a manner which showed that the President's ideas of parliamentary discipline are as much at variance as ever from the ideas of Anglo-Saxons. But the prominent members of the House preserved a studied silence.

The Premier said:—

GENTLEMEN—I deem it a great honour to meet you all here to-day. Not a few bills of importance will be presented for your consideration this session, and I think therefore that it is not inadvisable to submit to you a brief statement of the Government's policy. It is a matter of congratulation that the relations of our country with foreign States have become more and more friendly. I had the honour of announcing in your last session the conclusion of an Anglo-Japanese Alliance, and I have now to say that no effort has been spared to utilize that compact for the purpose of preserving the peace of the Far East and enhancing the prestige of Japan. It appears to me that the full benefits of the alliance are to be realized only by the industry of the people, and that consequently the importance of developing the national strength can not be overstated. The Budget for next fiscal year having been submitted to you, in accordance with the Emperor's commands, I do not doubt that you are already familiar with the Government's policy as there outlined. The Government, having regard to the state of affairs in the world and to the maintenance of this country's power and rights, deems that the completion of the Navy is a matter of cardinal moment, and has accordingly drafted and submitted bills for that purpose. National defences being a guarantee for the preservation of peace, their completion is a feature of the empire's policy, and has the approval, I am persuaded, of the whole nation. On the other hand, the carrying out of that programme is not possible under existing financial arrangements; and, further, I believe that the time is not adapted for raising a loan whether domestic or foreign. Hence it becomes necessary to seek some other funds. The increased rates of land tax cease by law to be applicable after the year 1903, and it would naturally be the Government's desire to replace the tax on its old footing at that time. But we fail to discover any other source of revenue equally suitable for the purposes of naval increment, and we have therefore resolved to rely on that expedient. Our conviction is that for the sake of preserving the peace of the East and promoting the country's pros-

perity the nation will not show any disposition to shrink from the burden.

With regard to the questions of administrative reconstruction and financial reform, the Government has fully recognised their expediency, and diligent efforts have been made in that direction ever since the present Cabinet came into office. I had the honour last session to make known to you the result of the Government's endeavours up to that time, and you have now before you in the Budget, or will receive in the course of the session, information as to changes already effected or still under considerations. Evidently administrative and financial reform must be adapted to the country's prosperity and to the development of its resources. Hence in the present condition of the State it is not possible to adopt a positive policy in these matters. Broadly speaking, the finances can not be placed on a sound basis without paying due regard to the expediency and urgency of the State's enterprises. Hence with the exception of certain public works in Formosa, it has appeared to us that all those demanding the issue of loans might be postponed, and that the monies hitherto advanced by the Treasury should be repaid with the proceeds of the bonds recently sold. We have elaborated a policy with regard to education, to means of communication, to works of irrigation, to the development of Hokkaido and Formosa, and to the promotion of the China-Japan trade. We have also mapped out reforms in judicial organization, and we have effected various abolitions, amalgamations and reconstructions in the administrative machinery. It has been our aim in all this to reduce the public expenditure as far as possible while securing increased efficiency. Steps have also been taken to effect improvements in local administration so as to define more accurately the respective functions of the various autonomic bodies and to obviate needless expenditure.

This, Gentlemen, is merely a sketch of the Government's policy. You will have opportunities of learning full details in the course of your session either from my colleagues or from myself. May I be allowed to express an earnest hope that this policy will receive your full attention and be impartially discussed by you.

The Minister President then left the House, and the Minister of State for Finance, entering the rostrum, read a statement of financial policy, which was little more than an explanation of the Budget. We take the following *resumé* of it from the columns of the *Japan Times*:—

After giving the figures for the revenue and the expenditure, the Minister pointed out that regarding the increase of 6,400,000 *yen* in the ordinary revenue as compared with the last budget, the present fiscal year was the first in which the *Saké* and Sugar Consumption Taxes had gone into force and the Government had not calculated that the yields from these sources would come up to the amounts expected from them; but that in the coming year the two taxes would be in full working order, yielding the revenue originally estimated; hence the increase in question. The increment also included, however, additions from other sources such as the Income and Business Taxes, the receipts from Forestry work and the Tobacco Monopoly in accordance with the accepted rule of progression. Excepting the Customs, the Revenue Stamps and a few other sources, all the others presented, as the Minister said, a favourable prospect. In the extraordinary branch a decrease of 35,590,000 *yen* occurred. This was owing principally to the fact that the proceeds from the sale of 4 p.c. Chinese Indemnity bonds had already been disposed of in the last budget and also to the fact that the work of expanding the national armament having come near to completion, the receipts in the form of public loans which had been needed hitherto on this account had become considerably decreased.

Referring to the increase by 3,360,000 *yen* of the ordinary expenditure in the new budget, the Minister said that this was due either to the operation of various laws or to the progress of prescribed undertakings, concerning pensions, interest on deposits, annual appropriation for educational institutions, post and telegraph business, etc. On the other hand the extraordinary expenditure of 62,270,000 *yen* was a decrease of 31,920,000 *yen* as compared with the last budget. This decrease was explained thus. The Government had made full provision for undertakings which were judged as calculated to promote the national interests and which required therefore to be speedily completed—such as the establishment of new Consulates, the enlarging of the scope of river works, the taking in hand of the work of completing the connection between sea and shore at the Kobe Custom House, the building of new warships, the carrying out of the 2nd expansion of the telephone business, the establishment of two high technical schools, and other works for the encouragement of the trade and industry of the country. Against this extensive programme of a positive character the Government would have finished in the current

fiscal year the paying up all the expenditure occasioned by the North China affair and at the same time would have shown a great decrease in the amount paid on account of the armament expansion. Consequently in the coming fiscal year the Government was so much the less in need of funds: hence the large diminution referred to.

Continuing the speaker said that in order to give an intelligent explanation of the proposed estimates it was necessary to refer to the supplementary budgets. It was the wish of the Government to include the supplementary budgets in the main budget, but this could have been done only after some laws had been amended. For this reason the Government was obliged to again have recourse to the expediency of supplementary budgets. As for the policy which was followed by the Government in compiling the budget before the House, the authorities were very careful in taking into consideration the general condition of the country so that the main purpose of bringing about the healthy development of the national finances and economics might best be promoted. In pursuance of this policy the Government did not hesitate to postpone all the undertakings which were not of an urgent character, while it did not equally hesitate to ask the sanction of the House for outlays which admitted of no delay. The post-bellum programmes being on a large scale, the Minister went on to say, directly affected the economic condition of the country, the effect having been manifested in the enhancement of the scale of prices and wages. Indeed the undertaking of expenditures, the defrayment of which would directly affect the economic circles of the country, had alone reached the annual sum of 50 million *yen*. This was unavoidable at the time, but it was nevertheless undesirable, and in the new budget the Government had done its best to make its undertakings be well in keeping with the economic condition of the country.

Coming to the question of the much-talked-about reforms the Minister said the Government had been able to economize about 10 million *yen* as the result of changes effected in the working of the administrative machinery. The Government decided to make use of this saving for purposes of river works, the expansion of telephone business, the establishment of Customs Houses and two high technical schools and other endeavours calculated to promote the agricultural, industrial and commercial interests of the country.

The speaker next called the special attention of the members to the Government's railway programme. A previous session of the Diet had passed a railway vote, according to which there was still left about 30 million *yen* to be expended on this account. Owing however, to the subsequent rise in prices and wages this amount was altogether too insufficient to execute the prescribed programme. In addition to this fact the Government was faced with the necessity of completing the connections among various railways and in consequence of this it needed a supplementary appropriation of 100 millions *yen* more. This railway work was one which had been a long while in the Government's mind and that the condition of its finances had not allowed it to start the execution thereof. The Government thought it however, a fit moment now to submit the matter to the House. It had decided to make the work one extending over ten years with an annual outlay of 13 million *yen* or 130 million *yen* altogether. Regarding the railways for Hokkaido the Government made some changes in the order in which they were to be constructed.

With regard to other undertakings the Government decided to start the work of water course engineering in the coming fiscal year, allotting three millions for the year. The telephone connections were in great demand, with a tendency to increase. The original plan was to complete this work in the current fiscal year but the Government now saw the necessity of extending the period for ten more years commencing with 1903 and this involved a total expenditure of 14,800,000 *yen*. The Minister also referred to the establishment of a commercial sample room in China, as well as of the Japan-China Bank as very important schemes for promoting our trade with the continental empire. The question of naval expansion was not of course forgotten but what the Minister said in this connection may be summed up in a word, that it was an undertaking of national necessity. The Minister informed the House of the Government's intention of introducing later bills for amending *Saké* and Tobacco Monopoly laws. In conclusion the Minister said that by the money obtained from the sale in last September of the 5 per cent. bonds the Government had been enabled to settle all temporary accounts in connection with the undertakings which were to have been carried on by means of public loans.

It will be observed that in the above statement the Minister distinctly announced the Government's intention of asking for a total vote of 130 million *yen* under the heading of railway construction, extension and improvement, but the

figures in the Budget are not consistent with that allegation. This apparent discrepancy has not been intelligibly explained.

Thereafter various questions of virtually no importance were presented by insignificant—or as yet insignificant—members of the House, who seized the occasion to indulge in irrelevant denunciations of the Ministry's policy. The only interesting query was one by Mr. Nemoto Sho, who asked whether the scheme of naval increment was connected with the Anglo-Japanese Alliance, as was stated by some people. The Minister of State for Foreign Affairs replied that there was no connexion whatever.

Mr. Taguchi Ukichi expressed surprise that a scheme of naval expansion should be submitted side by side with Ministerial declarations of constantly improving relations with foreign Powers.

Admiral Yamamoto replied that the original scheme of naval expansion was to be completed in 1905, but in view of the state of affairs in the Far East and the necessity of preserving the balance of power, the Government deemed it essential to undertake a further programme, involving the building of three line-of-battle ships and eight other vessels, the total contemplated expenditure being 99 millions *yen*, of which the appropriation sought this year was about 2,800,000 *yen*. From next year a larger sum would be needed. Full explanations would be given to the Budget Committee, and he begged the House to consider this question by the light of affairs in the Far East and the national defences.

In answer to a question from Mr. Sakura, the Vice-Minister of Finance explained that as the proceeds of the increased land tax would not be available until 1904, the Treasury proposed to pay the naval-increment appropriation for 1903 out of interest on the Naval Conservation Capital Fund.

The House rose at 4.30 p.m., after rejecting a motion for entrusting the Bill—relating to increased rates of land tax—to a special committee, and agreeing to hand it to the Budget Committee.

The Budget Committee met on Sunday, the 14th instant, when the attitude of indifference assumed by the leading members of the House in the session of the previous day, was exchanged for one of animated and even vehement debate.

The first question put to the Government's representatives related to administrative and financial reforms. It was urged that a promise of such reforms had been made to the Diet by the Cabinet last session, but that the Budget showed an economy of only 400,000 *yen* on that account. Was that the limit of the Cabinet's intention?

Count Katsura replied that a part of the result of administrative retrenchments had appeared in the last Budget, and another part was embodied in the Budget now before the House. The Ministry did not intend to spare any further efforts that might be possible, but he could not see that much margin offered for larger economies.

Mr. Haseba Junko insisted that if, on the one hand, naval increment was necessary to maintain the nation's place as well as the balance of power, then, on the other, administrative economies ought to be pushed with the utmost vigour. Yet they were asked to be content with economies totalling only 400,000 *yen*. The Government said there was no room for further economies. He thought that there was room. Thus a conflict of opinions arose, and it seemed only right that the Government should explain why it held such a view. The War and Naval Departments were included in the administrative branches where economies should have been practised. He wished to know what economies had been applied there and what economies were contemplated.

Count Katsura pointed out that the first question was controversial. Unless it were stated in some other form he must decline to answer.

Mr. Haseba thereat grew angry and said:—"It is not that you can not understand my points. It is that you can not answer. If you can not answer you need not. I don't want to press for an answer that can not be given."

Mr. Oishi Masami made a long speech, the gist of which was that before approving the

Budget it was necessary to have a definite understanding about six subjects, namely, the financial and economic situation of Japan, the aim of administrative and financial reform, the State's new undertakings, the naval increment, the increase of the land tax, and foreign policy. He claimed that the people's tax-paying capacity was exhausted, and that if naval increment was necessary, retrenchments must be effected in other directions. Was that to be done? On the contrary, it appeared from the Budget that while spending a hundred million *yen* on naval increment, they were to vote other large sums for railway extension, for telephone expansion and for sundry State enterprises. The people could not bear such burdens. The Government appeared to regard the tax-paying capacity of the people as inexhaustible. There their view differed radically from that of the speaker, and he wanted to know what the Cabinet thought of the state of local taxation. His policy was that money saved by administrative retrenchments should be devoted in the first place to lessening the people's burdens, and in the second to the prosecution of State enterprises. The Cabinet, on the contrary, appeared to think that its duty was done when it made arrangements for the speedy and successful prosecution of such enterprises. There was, in short, a distinct conflict of policies. By administrative reform he understood sweeping reductions of establishment. It was very well to talk of reforms aiming at accelerated discharge of business, but the first thing to be done was to cut down superfluous numbers. That did not mean loss of efficiency. The Nippon Yusen Kaisha had reduced its staff by 400 men, but he had not heard that the discharge of the Company's business had suffered. If those remaining after reduction could not carry on the work, let them be replaced by others. He then passed on to denounce the mistakes made in official estimates of the cost of public works, and to express surprise that the Government had the assurance to propose itself as the conductor of new works with such a record of failure. The nation wanted naval increment, but if its desire in that respect could not be satisfied except at the expense of paying a most unpopular tax, naval increment might share the unpopularity of the tax. As for foreign policy, the Prime Minister had asserted that a united nation was the chief essential, but for his own part he thought that governmental efficiency was not less important. The rendition of Manchuria by Russia had not been really accomplished. In China foreign Governments obtained all the valuable concessions, and the outcome of Japan's official management was that she got nothing at all. He denounced the granting of the settlement-building work at Tientsin to one firm, and he attacked the Cabinet on the subject of immigration restrictions in Australia. Finally he concluded a long speech of 1½ hours by vehemently denouncing the Budget as a disorderly compilation, unsuited to the times, and disfigured by reckless supplementary estimates.

Baron Sone said that Mr. Oishi had made a long speech, but the gist of it seemed to be that he declared the country's financial resources to be small; that he refused to approve the new works contemplated by the Government as well as the project of land-tax increase; and that he advocated the reduction of expenses as far as possible. The Government had not confined itself to proposing new enterprises. It had effected, on the one hand, whatever reductions were possible, and it proposed, on the other, to undertake only feasible public works. Mr. Oishi had made comments on foreign countries. Such things related to foreign policy. They need not be discussed before a Budget Committee. They might be quietly talked over in domestic circles but it would be better to avoid them in an examination of the Budget.

Mr. Oishi called this a very fine answer. He wanted to know why they should not discuss foreign politics and everything connected with government. How else were they to form an intelligent opinion about finance? What they wanted to know was the principles upon which the Government based its schemes of finance.

No reply was made by the Ministers present, and when Mr. Hitosugi, Government Delegate, rose to reply, the Committee would not listen to him.

Mr. Ishikuro Kwanichiro said that since they could not obtain general explanations from the Government about the Budget there was nothing for it except to pass to the discussion of the various sections. As to administrative reform, they would ask for the documents by which the Ministry had been guided.

The Prime Minister said that these documents could not be submitted.

Mr. Haseba pointed out that although his first question had failed to elicit a reply on the ground of being incomprehensible, his second question did not labour under any such defect and he would press for an answer to it.

Admiral Yamamoto, in reply, pointed out that in the year 1893, the question of reducing the staff of the Naval Department had been carried even to the Throne. Possibly there was room at that time for reduction, but what he asked the Committee to observe was that two large increments of naval force had been made since then, yet the establishment of the Department remained almost as it had been. In other words, the non-combatant personnel of the days when the tonnage of the Navy had only been sixty thousand, remained virtually unaltered for a Navy of 240,000 or 250,000. Not until 1900 had it been found impossible to carry on with such a staff, and a slight addition had then been made, the Diet consenting. The Government therefore thought that further retrenchment was impossible in that direction.

Mr. Haseba nevertheless considered that in view of the duties performed on shore by the Navy, its staff was too large.

General Terauchi, Minister of State for War, said that the policy of the War Department was to reduce the non-combatant branches to a minimum and to increase the combative. In pursuance of that policy they had effected retrenchments aggregating 2 million *yen*. He further explained with regard to sales of land by the Department, that they had been made for the purpose of acquiring land elsewhere to extend the areas of ranges for small arms and cannon, the old ranges not being sufficiently spacious to afford full protection to private property under the present circumstances of the Army.

Mr. Hara Kei, Chairman of the Committee, suggested that since the Government declined to discuss or reply to questions of a general character, and since evidently great differences of opinion existed between the Ministers and the questioners, it might be advisable to defer further queries until the sections to which they related came up for discussion.

The Committee unanimously assented, and the Chairman then submitted to the Committee a draft of the policy to be pursued in examining the Budget; namely:—

(1) That no appropriations should be sanctioned on account of undertakings which might be postponed until next year.

(2) That even in the cases of expenditures on account of works already commenced, the utmost possible reductions and retrenchments should be effected. Provided that in the case of fixed expenditures which required the Government's approval of any change, and in the case of outlays arising from the operation of laws, the due routine should be observed.

The Committee, having approved this programme, rose at 3.15 p.m., to meet again on the 15th instant.

The Budget Committee met again on the 15th instant, and proceeded to consider the Budget by sections.

Mr. Sugita Teiichi asked why a new programme of naval expansion should be undertaken while the former programme was still uncompleted. Further, it appeared to him that one object of the Anglo-Japanese Alliance was that each of the allies should supplement the other's deficiencies. Was it necessary under those circumstances that Japan should increase her Navy? Then again, instead of at once undertaking a

scheme of increment spread over such a long period as eleven years, would it not be better to wait two or three years, and then to proceed with greater expedition? Further, it appeared that from the year 1904 to 1930 a sum of 6½ million yen was to be set aside yearly for the maintenance of the Navy. What was to become of this fund if the expansion project were carried out? How, again, were the necessary staff of officers to be obtained, and how the requisite harbours to be provided? It appeared from the recent accidents to the *Musashi*, the *Yayeyama* and the *Shikishima* that the present officers were not everything desirable. Mr. Sugita wanted to hear the Government's views on that point. He approved the programme of naval expansion but could not approve the financial means proposed for carrying it out.

Admiral Yamamoto replied to these questions, and the substance of his answers as well as the manner of making them seem to have won universal approval. He commenced by saying that he should do his utmost to reply fully to Mr. Sugita's earnest inquiries, and to extend as far as possible the limits of open explanation, though he could not promise that reticence might not in some cases be imposed by the exigencies of the national interests. The formation of a navy in Japan commenced in the year 1896, and had been on a very small scale, so that 1894 found the country with an unarmoured fleet of only some fifty or sixty thousand tons. Meanwhile the attention of the world had gradually been attracted to the Far East, and the development of Japan herself began to impose new responsibilities. These things being recognised by the nation at large, and the gracious assistance of the Emperor having been given, the first and second *post-bellum* programmes of naval increment had been undertaken, and the country's sea forces had happily been brought to their present condition with the approval of the Imperial Diet. It now became necessary to consider the relative naval strengths of the various Powers in the Far East. He would lay before them figures compiled in January of the present year, namely:—

	tons.
Great Britain	560,000
France	240,000
Russia	190,000
The United States	130,000
Italy	120,000
Germany	120,000

Further, in spite of Russia's proposals for a universal peace conference tending to the reduction of armaments, all the Powers were adding to their fleets. Thus Germany, in 1898 had adopted a scheme for a total increment of 300,000 tons spread over 16 years. France had laid down an eight-year programme, beginning from 1900, involving an increment of 150,000 tons and an outlay of 200 million yen; Russia had set aside 230 millions in 1898 for an increase of 170,000 tons in 7 years, and by about the year 1907 England would have 990,000 tons. (N.B. These figures are variously given by different reports and are obviously incorrect.) Thus in 1907, the forces in the East would be:—

England	990,000 tons.
France	480,000 tons.
Russia	360,000 tons.
Germany	220,000 tons.
Italy	200,000 tons.

Japan, which has now the fourth place among the naval Powers, would fall to the lowest place in 1907 if her fleet remained as it is. The Admiral then pointed out the close connexion that exists between the expansion of mercantile marine and naval force, and insisted that if Japan was to keep her place among the nations, to preserve her prestige and to maintain the balance of power, she must increase her navy, though he affirmed most positively that such increment was not inspired by any belligerent purpose or had any aim save the preservation of peace.

Many questions were then asked, but the majority of them were mere repetitions.

In reply to a query pressed by Mr. Sugita, Admiral Yamamoto emphatically denied that the Anglo-Japanese agreement was intended to imply, or could possibly be construed as implying, that each of the high contracting parties was to supply

the other's deficiencies; Japan, for example, furnishing troops and England ships. He declined, however, to make any reply to a question as to what was meant exactly by maintaining the balance of power, and what standard of comparison the Government took in laying down the final lines of naval increment. But he recommended the members of the Committee to examine carefully the course of events in the Far East during the past 7 years, and the steps that the various Powers were taking. With regard to the building of the vessels contemplated by the new programme, 5 would be constructed in Japan and 3 abroad, the expenditures in each case being about the same. As to the naval maintenance fund of 6½ millions yen annually, it would be duly appropriated irrespective of the increment scheme.

Viscount Yoshikawa, Minister of State for Communications, entered into a detailed statement of the railways mapped out in the programme of his Department. He explained that although the estimates called for only 80 millions, the Government projected an outlay of 130 millions, but only the figures relating to the first-period roads were shown in the Budget. The remaining 50 millions would be included in future Budgets.

The Committee rose at 5.30 p.m.

The House of Representatives met at the usual hour on the 16th and proceeded at once to the Order of the Day, taking first the China-Japan Bank project. Various questions were asked, but before they had been concluded Mr. Ooka Ikuzo, Chairman of a Section of the Budget Committee, moved that the Order be changed for the purpose of reporting on the Bill providing for an Increase of the National Land Tax from 1904, and a Decrease of the Local Land Rate.

The motion having been voted, Mr. Ooka reported that the Sub-Committee had considered the Bill from 10.30 a.m. that day, and had put various questions to the Minister of Finance and the Minister of Home Affairs, the result being that a closed ballot had shown 24 votes against the Bill and 3 votes for it. The reasons influencing the majority of the Committee were that the Government had not carried out its promise of administrative reform, and that if adequate reforms were effected, funds for naval increment could be found without recourse to the land tax.

At this stage the Premier ascended the rostrum and earnestly insisted on the necessity of naval increment and on the fact that no better source of revenue could be found for the purpose than the increased land tax. He urged the committee to reconsider its Report.

Mr. Oishi Masami made a long speech attacking the Government. He repeated the arguments used by him when addressing the Budget Committee.

Admiral Yamamoto, Minister of State for the Navy, spoke strongly in favour of the Bill.

Viscount Yoshikawa spoke in support of the Cabinet's proposals for railway extension. It would be the worst economy, he said, to pause in prosecuting productive enterprises to which the country had put its hand.

Mr. Nakamura Yaroku made a speech in favour of the Bill, and Mr. Ozaki Yukio took the other side.

Mr. Taguchi Ukichi supported the Bill.

The closure was moved, and the House was about to vote when a message was received from the Emperor proroguing the House for five days' namely, until the 20th instant.

REVIVAL OF CURFEW IN AMERICA.

One of the interesting things that make an impression upon one who has been away from America for several years is the revival of the curfew custom. The following paragraph from a monthly paper for boys tells of the progress of the work:—

The National Curfew Association is trying to keep the boys and girls of large cities in the United States off the streets at night. It has been at work in this country for less than ten years, but already Curfew ordinances stand on the statute books of 2,000 cities. The ordinance provides generally for boys and girls

under 15 years of age, requiring that they be in their homes at 8 o'clock at night in winter and 9 o'clock in summer, unless accompanied by parents or absent by special permission from home. The officer arresting them must first take them home to ascertain the wishes of their parents. Many of the 2,000 cities report a decrease of 80 per cent. in arrests and the imprisonment of minors since the regulation went into effect."

I have become specially interested in the revival of this custom, because we are spending a year in a city where it is now put into practice. The city contains about 6,000 inhabitants, with its full proportion of young children. I have, therefore collected and present on this subject the testimony of some prominent ministers at Beaver Dam, Wisconsin:—

For several years we have had the bell of our City Hall rung at 9 o'clock in the evening as a signal to the children to be at their homes and to be away from the streets.

The Curfew bell has been an important help to parents and those in charge of children and has done much to promote regular hours for evening gatherings of the people.

From our experience in Beaver Dam, I would cordially recommend it to other towns and villages.

T. S. JOHNSON,

Pastor Assembly Presbyterian Church.

I am glad to contribute a word of sanction and appreciation of the curfew ordinance of our city.

It is without doubt a wholesome restraint to our boys and girls.

EUGENE W. J. REGNA,

Pastor M. E. Church.

In reply to your inquiry regarding the "curfew law", I should like to say that its effect in Beaver Dam has been very good. It is not kept with absolute strictness, as indeed would be almost impossible; but the city marshal and other citizens always have the right to insist that a child go home at once after nine o'clock at night, if it seems best that it should not be on the street. In fact children are kept off the streets fairly well at night, a marked improvement over the conditions before the law went into effect. I can speak for all the better citizens of Beaver Dam when I express unqualified approval of the law. Let me also add that I have known the law to be equally beneficial in several other towns.

J. FORSY R. CRAWFORD,

Pastor of the Baptist Church.

The system known as "The Curfew," which has been established in many of our American towns and villages, is so wholesome in its restraining effects on the conduct of youth, that I give it my unqualified endorsement. The universal adoption of the system would accomplish untold good in the direction of protecting millions of youth from those corrupting influences and associations which assail young people who are permitted to travel the streets at an untimely hour and without proper escort. In the interests of citizenship and of high moral and Christian character, the curfew must take rank with all other methods employed for the safety and welfare of the rising generation; for it is undeniable that millions of boys and girls have taken the first steps in vice at the time of their cruel exposure to the evils which, in the night hour especially, assault the citadel of purity and innocence.

T. J. MACONDRAY,

Minister First Presbyterian Church.

I have also interviewed the City Marshal and received his unqualified approval because it has so largely diminished his labours! He testified that it had a beneficial effect upon the children by removing them from the many kinds of temptation on the street late at night and by carrying them back to the quiet of their homes at a seasonable hour. He also testified that it had a beneficial effect, likewise, upon the "older folks" reminding them that it was 9 o'clock, when they would better be getting back to their homes! The curfew thus developed the habit of early hours.

The beneficial results of the curfew can be illustrated by an incident which came under my observation during the summer. It was the custom, during the warm weather, to give open-air band concerts on the main street of the city. These concerts naturally attracted crowds of young children, who thronged both sides of the street. But, just as soon as the curfew began to toll its warning, there was a "skeddaddling" of children in every direction, unless they happened to be accompanied by older people. Even the band had no attractions after 9 o'clock. Verily, "Curfew shall not [fail to] ring to-night."

E.W.C.

THE LITURGICAL USE OF THE APOSTLES' CREED.

[BY THE REVEREND HENRY SCOTT JEFFERYS, M.A., SENDAI, N.E. JAPAN.]

In a certain independent weekly magazine published within the radius of, say, 10,000 miles from 130 Fulton Street, New York, U.S.A., a discussion of the subject above appears in Vol. IV. No. 2805, dated September 25th, 1902, p. 2292 by the Rev. Theodore D. Bacon. Every native-born American citizen will admit the right of every other citizen to absolute freedom of religious belief, and its independent expression by voice, pen, and public press. This was the priceless heritage of the Pilgrim Fathers who landed on Plymouth rock. Of course they did not know how to use their religious liberty, and persecuted the Baptists and Quakers to their own hearts' contents: but, as our friend Rudyard Kipling says, "that is another story." What we are now dealing with is the liturgical use of the Apostles' Creed by the descendants of the people who crossed the stormy Atlantic and settled in the wilderness of America in danger of starvation to escape from the necessity of living in a land where the Apostles' Creed was in daily liturgical use, in spite of all their persuasive eloquence by fire and sword to prevent their neighbours from using it. If we had lived in the days of our fathers we would not have been partakers with them in the blood of the prophets; and since the spirits of the prophets are subject to the prophets let us compare notes to see how far we are ready to endorse the paper of this independent scribe.

And first he speaks out for the use of forms of devotion by these Christians who have been informal in their prayers. This is good. All old religions are formal.

Secondly he says that "few of us cannot unite heartily in the XXIII. Psalm and the Lord's Prayer," he likes them because they are more venerable than the Apostles' Creed. To this Jews, Catholics and Unitarians will all agree.

Thirdly he speaks out for modern forms like the hymns, "Nearer, my God, to Thee," and "Lead kindly Light." He says of the first that it was used at the interment of a Catholic dignitary although it is called a Unitarian hymn. Whatever it be called, if any one will calmly compare the two hymns he will find that "Nearer my God to Thee" breathes a deeper spirit of devotion than does "Lead kindly Light." The reference to the cross, the altar and the angels make it eucharistic in its spiritual intention, recalling the Trisagion, while "Lead kindly Light" is rather suited for the gropings of Lent. Nor is this strange when we consider its genesis and the Apologia. In fact, I see no good reason why the latter hymn should not fit the spirit of a Parsee fire-worshipper. Cf Gen. XV. 5 and 17. Heb. XII. 29.

Fourthly.—We can all agree with the independent writer in his aphorism "We believe also that truth will in the end bring unity."

"Let God be true, and every man a liar."
"Ever does truth come uppermost."

Fifthly.—He is right when he says: "When we attempt to assert our unity with another body of Christians by taking their creed and giving it a meaning which it cannot fairly bear, we place ourselves in an unfortunate, not to say humiliating, position."

Sixthly.—All Christians using the Apostles' Creed must agree with this writer when he says: "Where a statement is made, not only to set forth a general principle, but a particular form of it, and to exclude another form, it is certainly not fair for those who hold the form which is intentionally excluded by the grammatical meaning of the words to appropriate the statement and then claim that they agree with it, for substance of doctrine."

Of course people should not stand up in the presence of God, in the House of God, before the Man of God, among the people of God and say things with their lips about God that they do not believe in their hearts. Let them go into the outer darkness and say what they dare to those who are of the same mind.

Seventhly.—We agree with the writer when he says of the Apostles' Creed that a liturgical statement of common belief it has certain evident advantages; it is short, simple and apparently easily understood; it is of venerable antiquity; it contains no metaphysics, and its form is rhythmical, almost metrical.

So much for the agreement, now for the points upon which he files his protest.

First he objects to the title Apostles' Creed. He says it is an absolute misnomer. The creed has not even a remote connection with the Apostles, but in its earliest form belongs to about the middle of the second century. I have before me a work entitled, "An Exposition of the Creed by John Pearson, D.D., late Lord Bishop of Chester. New York, 1853."

So that even if the adjective "Apostles" be dropped there is no danger of a mistake. If a new title is needed let it be in the words of the writer himself "The form endorsed by the committee of the Congregational National Council." In fact the very first word makes any title unnecessary: *Credo*, I believe. It is strongly individualistic, recalling the well-known statement of the great American Statesman, Daniel Webster, who, when asked, "What is the greatest thought that ever occupied your mind?" said with great solemnity, "Sir, the greatest thought that ever occupied my mind is the thought of my personal responsibility to Almighty God."

When God spake of old to his people from the holy mount it was not merely to the chosen people, the congregation of the elect, but to each soul, "Thou shalt." All monotheists, Hebrews, Mohammedans and Christians obey that voice.

When we speak to God in the words taught us by our Lord it is, "Our Father," and this is true even in our most secret devotions, when the lips do not form the words, and the voice is dumb; we still gather up the common prayers of our brethren, and present them as a sweet smelling incense through the Great High Priest before the Great White Throne of the Ancient of Days. But when we speak out what is deepest in our hearts, in the presence of friends, and foes, seen and unseen, angels and demons, we say, standing up, and in a loud, firm voice, "I believe in God." This is our battle-cry. This is our banner. As Joshua said of old, so we in all the world say, "As for me, and my house, we will serve the LORD." We continue in the Apostles' doctrine and fellowship. The objection of the enemies of the creed to the term "Apostles" is founded upon the idea of the extinction of the Apostolate. This is a doctrine contrary to the word of God in Holy Scripture and the voice of the Church in all ages. Wherever the creed is recited in all lands you will find those who use it looking towards some living person in the flesh here present whom they reverence and obey as an apostle. So that their creed is his creed, and it is his creed as a sacred deposit received from his spiritual ancestors. The apostolate is perpetual because the Chief Bishop and Shepherd of our souls breathed on them when he sent them out and said, "Receive ye the Holy Ghost" and "Lo! I am with you always." If the apostolate died out it should be revived; and hence we have Irvingites and Mormons and various sects like that of Dowie blindly following the doctrines of men, because they believe these men to be apostles of a new dispensation and this also because they believe that the old died out.

The creed was rendered necessary by the command of our Lord to disciple the nations and to "baptize them into the name of the Father, and the Son and the Holy Ghost, teaching them to observe all things, whatever I have commanded you." Now all through the ages the Church has held and taught what had been received from the beginning and not anything new. In theology what is new is not true, and what is true is not new. Now the natural man receiveth not the things of the spirit of God, and therefore it became necessary in order to meet the ignorance of foolish men, and their profane babblings, to define the faith more clearly from age to age. This necessity was contemporaneous with the committing to writing of the Gospel or glad tidings that had been enshrined in the hearts and minds of those

who had been eye-witnesses of the majesty of the Eternal Word made Flesh. Therefore we find the Church producing various documents, the Epistles, the Gospels for the edification of the saints into a spiritual temple built upon the Apostles and Prophets; and "the form of sound words" II. Timothy 1 and 3 for the instruction of those that were without and candidates for baptism. In "Maclear's Introduction to the Creeds" (found in every respectable Christian library) on p. 8 there is a list of the Greek names of the primitive outlines of the creeds so far as they happen to appear in Holy Scripture.

So that since our Mother the Church gives us the book about the heavenly country and map of the road we should see that we fall not out by the way. In Blunt's Annotated Book of Common Prayer (to be found in every theological library), on p. 196 there is a table in which the New Testament references are given for every statement made in the creed; so that any one who denies any article of the creed denies also the New Testament and classes himself under the list of those who will not endure sound doctrine but heap to themselves teachers having itching ears. Now the spirit speaketh expressly that in the last times many shall depart from the faith, giving heed to seducing spirits and doctrines of devils, having their hearts seared as with a hot iron.

This writing is penned in the hope that people and especially Japanese students of theology who read these words may be persuaded to believe that which was written aforetime rather than what is "up-to-date;" that they may seek out the old paths, and walk in the straight and narrow way that leadeth unto life and not in the broad road that leadeth to destruction, under the guide of the blind leaders of the blind who are bound to fall into the ditch, yea the bottomless pit.

There is some pretty strong language in the New Testament that would apply, but I forbear; let every man take a concordance, and look out these things for himself in the Berean fashion comparing scripture with scripture.

Let me say in conclusion that I have found the use of the creed in the vulgar tongue understood of the people the very words of life for the conversion and quickening of dead souls, among not only those who use our mother tongue, but among Chinese and Japanese, and I would most earnestly exhort all missionaries to use it every day both orally (vide the Book of Common Prayer) and written on screens and *kakemono*. Why are we Christians at all, but because our ancestors heard these holy words of life, and had them written out for them by holy men as early as the seventh century in our mother-tongue in our father-land. Let us teach these words to others also that they may be wise unto salvation and may bear testimony, when we are lying in our graves, clean forgotten as a dead man out of mind.

LAW CASES.

HONGKONG AND SHANGHAI BANK v. HIYOKI.

On Friday afternoon, in the Yokohama Chiho Saibansho, the hearing was resumed of the suit brought by the Hongkong and Shanghai Bank against Mr. Hiyoki, the administrator of the estate of Mourilyan, Heimann C Co. The claim was for the return of certain money alleged to have been paid in error.

Mr. E. C. Davis, of Messrs Samuel Samuel & Co., was examined as a witness, after which the case was again adjourned.

THE JOVANSSEN CASE.

In the Yokohama Chiho Saibansho, on Saturday afternoon, before Judge Kato, the hearing was resumed of the civil suit brought by Mr. Adolphe Jovanssen against the Club Hotel, Limited, claiming yen 18,750 damages for breach of contract.

Mr. L. Cotte, who was formerly in the service of the Club Hotel, was examined as a witness. Asked among other questions as to the situation of the room occupied by Mr. Adolphe Jovanssen while he was in the Club Hotel, the witness at first replied that he did not know the room occupied by Mr. Jovanssen, but being pressed, he

made a number of statements as to the board and the lodging accommodation of the plaintiff in the hotel.

Mr. Sawada for defendants pointed out that some of the witness's statements were contradictory and asked that he should be re-examined.

The Judge saw no contradiction and declined to accede to the request.

Mr. Sawada repeated his application, and the Judge again refused.

Mr. Sawada then intimated an objection to the case being tried by the Presiding Judge on the ground that he was not impartial.

Associate Judge Matsuda intervened but without success, Mr. Sawada remaining firm in his objection.

The hearing was therefore adjourned pending a decision on Mr. Sawada's application.

VANDER HEYDEN v. STORNEBRINK.

On Monday in the Yokohama Chiho Saibansho before Judge Kano presiding and two associate judges was again heard the suit brought by Dr. Vander Heyden against Mr. L. Stornebrink claiming the division of their joint property.

Mr. R. A. Mees who acted as agent to the property in question for Dr. Vander Heyden during the absence of the latter, was examined as a witness.

The Judge—During the time when you were entrusted with the property in question was it a fact that the plaintiff and defendant had the account of the house rent and other things settled? Is there any writing about it?

Witness—Yes.

The Judge—(on Mr. Sawada's application): Was that account equally divided for both?

Witness—Yes.

The Judge—Were all the three buildings joint property?

Witness—The larger two are joint property and the smallest one belongs to Mr. Stornebrink.

The Judge (on Mr. Matsuda's application): Are all the accounts of the house tax, and expenses of repair etc., clearly settled?

Witness—The accounts up to 1901 are nearly settled, but Mr. Stornebrink still owes *yen* 100 at present.

The Judge—When the house occupied by Mr. Vander Heyden was let to another in his absence, an equal half of the income of the rent was given to Mr. Stornebrink. But when Mr. Stornebrink lent the house occupied by him to another in his absence, did you not receive an equal half of the rent of the house?

Witness—I did not receive it.

The Judge—Have the houses that are called the joint property by Mr. Stornebrink ever been let to others?

Witness—Yes, let to a Portuguese.

The Judge—When?

Witness—I do not know.

The case was then adjourned.

NAKAMURA v. SINGLETON AND BENDA.

The claim for salary brought by Mr. S. Nakamura against Messrs. Singleton, Benda & Co., was settled by a decision on Monday in the Yokohama Chiho Saibansho to the effect that the application made by the plaintiff is refused and the expenses incurred thereon are to be paid by the same.

THE CHRISTIAN DAIMYO.

CHAPTER XV.

The "San Felipe" affair.—A certain number of Religious and Christians are taken and condemned to death.—Death of the Taiko.—Appreciations on his reign.—The Japanese army recalled from Korea.—The increasing authority of Ieyasu, and his intrigues.—Ishida's opposition.—Death of Gratia Hosokawa.—Defeat and ruin of Ota Hidenobu.

All these reverses in Korea completed the exasperation of the Taiko, whom old age and a host of annoying incidents had rendered more and more distrustful and suspicious. Thus, in the month of July of the preceding year (1596), the galleon *San Felipe*, on its way from Manila to Mexico, was stranded at Urado (Tosa). Chosokabe, *daimyo* of this locality, immediately confiscated the ship, and informed the Taiko of

this capture. The latter sent Masuda Emon-no-jo to Urado in order that, in the name of the Taiko, he might take possession of all the cargo. One can imagine the despair of the Spanish Captain de Landa: in vain did he make the journey to Kyoto to remind the Taiko that, two years before, he had issued patents to the Spaniards, permitting them to land in Japan and devote themselves to commerce. In vain did he invoke the intercession of the Governor of Kyoto, reputed for his kindness to foreigners: all was useless;—the *San Felipe* and her cargo were declared the property of the Taiko. Then de Landa, thinking to frighten the Japanese, began to extol the great power of his king, whose possessions extended over the all earth. Masuda, struck by the story of so many conquests, asked the Spaniard by what means his king had possessed himself of all these countries? De Landa answered that the Religious had at first gone thither to preach, then that the Spanish troops had lost no time in following the preachers, and that these troops, assisted by the neophytes, had reduced the countries to submission to the king of Spain.

What exactly was de Landa's intention in giving utterance to these imprudent words, and to what point did they conform to the truth? Did he wish to drag down with him in his ruin the Portuguese, then subject to the same King of Spain, and enjoying much credit in Japan? The supposition is not without foundation, for persuaded as de Landa was that the Portuguese had excited the Japanese against the Spaniards, and encouraged the Taiko to seize the *San Felipe*, he hated them with his whole hatred, Jesuits as well as merchants.

In any case the accusation that de Landa had made against the Religious, as being the political agents of the King of Spain, is false: nowhere were the conquests of the Portuguese or of the Spaniards carried out in this manner. The conquerors, whether explorers or simple merchants, have always preceded the Religious, and the latter, far from making the natives revolt against their legitimate chiefs, always defended them against the rapacity of the conquerors. The jealousy, that the Spaniards then entertained for the Portuguese, could alone cause these regrettable words.

Without delay the Taiko was informed of de Landa's reply and the storm, long threatening, suddenly burst. The Taiko immediately gave orders for the arrest of such dangerous men, and, on that very evening (Dec. 9, 1596), the houses of the Franciscans and the Jesuits, in Kyoto and Osaka, were surrounded and watched. At the same time he caused a list of the Religious and the Christians to be drawn up, and the arrests commenced.

Kaempfer (51), and following him, several foreign authors attribute also a part of the Taiko's anger to the pride of the Bishop of Japan who, in 1596, meeting a councillor of State on his path, would not descend from his litter to pay his respects to this dignitary, who, feeling keenly this affront, complained on the subject to the Taiko. This reason is too clumsily invented; for Bishop Martinez was not any more than any bonze of the lowest position, obliged by Japanese custom to descend from his litter, under such circumstances. Besides, in his capacity of bearer of dispatches from the Viceroy of the Indies, this same Bishop would not have had to descend, even if it had been the custom. The best proof of the falsehood of Kaempfer's supposition is that the Taiko never exhibited the slightest dissatisfaction with regard to Bishop Martinez, whom he received with honour, and treated with deference, as long as he remained in Japan. (52)

On hearing the news of what had happened at Kyoto and Osaka, Takayama, whom the recent death of his father Dario had still more detached from the world, went to take leave of Maeda Toshie and repaired to Kyoto to die there for the Faith. John Naito, who had remained at Kyoto, since the unhappy issue of his negotiations with the Chinese, also resolved to give his life for the Christian religion, and wrote to

(51) Livre IV.

(52) *Lettera annua*, 1596. Bishop Martinez left Japan in the following year, by the same ship in which he had come.

his son Thomas, in order to give him his last recommendations. Paul Sakon, the eldest son of the Governor of Kyoto, wishing to share the fate of the Religious, hastened to Kameyama, his residence, since the Taiko had invested him with this daimyate. Thence, accompanied by eight *kerai*, as resolved as he, he went to Fushimi, where the Taiko then resided, and dressed himself as a Religious, in order to better attract the attention of the latter. Father Organtino had all the difficulty in the world in making him understand that such conduct could not be agreeable to God. Toshimune, Sakon's brother, was no less excited. Sakon's wife, a daughter of Hachisuka Iemasa, and converted shortly after her marriage, had become as fervent as her husband, and wished to die like him. Gratia Hosokawa already had the dress, she intended to wear at the moment of execution, prepared for her. Finally a crowd of *samurai*, coming from all directions, declared that they were ready to die with the Religious.

The Taiko, however, did not arrest any influential personage: he contended himself with throwing into prison six Spanish Franciscans, three Japanese Jesuits, and several Christians of inferior condition. On the 5th of February, 1597, these martyrs, to the number of 26, were crucified at Nagasaki. This was, so to say the Taiko's last act of authority: ill for a long time previous, his sickness finished by carrying him off on the 15th September 1598, at Fushimi, in his palace of the "Momoyama." All Japan drew a sigh of relief on his death. This death was in fact a deliverance: with the Taiko ceased this unfortunate Korean expedition which, without obtaining the slightest advantage for Japan, brought on her so many evils.

Feeling that his end, was approaching, the Taiko assembled for the last time the principal *daimyo* of Japan, and made them swear that they would remain faithful to his son Hideyori, then six years of age. These *daimyo* were, at first the five "Tairo" (53), or Ministers charged with the conduct of state affairs, to wit, Tokugawa Ieyasu, Maeda Toshie, Mori Terumoto, Ukita Hideie and Uesugi Kagekatsu. Then the five "Bugyo," (54) or Governors, Ishida Mitsunari, Asano Nagamasa, Maeda Motokatsu, Masuda Nagamori and Nagatsuka Masaie, charged with seconding the "Tairo" in the accomplishment of their functions. After having addressed to these dignitaries many recommendations on the subject of his son, the Taiko directed Maeda Toshie to take particular care of him and to be his guardian. Then, turning towards Tokugawa Ieyasu, he made him swear that he would take Hideyori under his tutorship, and that he would work unceasingly to preserve for him the supreme power. Ieyasu swore by all the gods known in Japan that he would do so, shedding tears of emotion, says history. Was the Taiko distrustful of these tears? At all events, in order to confirm this oath, he made Ieyasu undertake to marry his grand-daughter, then only two years old, to Hideyori. Ieyasu promised everything under most solemn oaths. These precautions taken, the Taiko received a few more visits, among others that of Father Rodriguez, whom he loaded with presents. Then he breathed his last sigh, at the age of 64 years.

Without sharing in the enthusiasm of the Japanese, who compare the Taiko to Cæsar or to Napoleon, one cannot deny, however, that he was one of the greatest men of Japan. He finished the work of Nobunaga and made of Japan, formerly divided into an infinity of petty independent states, a homogenous nation. Unfortunately his mind embraced too much to be able to grasp all, his aspirations were too lofty, sometimes even impossible to be realized. Did he not wish to become Emperor of China although his army had been beaten, even before setting foot on the soil of that country? Japanese in all the meaning of the word, he undertook much and finished nothing, versatile and suspicious as he was. The unfortunate expedition to Korea is the most striking proof of this. With troops like those at his disposal, he might have been able, in the space of a few months, to advance even

(53) Literally "great old men."

(54) Literally "Listen-execute," officials executing the orders they have listened to.

as far as Peking, and to impose his will on the Emperor of China. But instead of placing himself at the head of his army, as a Caesar or a Napoleon would have done, he preferred staying at home, amusing himself in the composition of bad poetry, in the playing of "go" (55), and in the building of palaces. And during this time his soldiers, abandoned in an enemy's country, died for want of food. This seven years' war might be regarded as the greatest disaster that Japan had ever suffered. More than 50,000 *samurai* died in it, and their ashes, says a Japanese historian, have become foreign soil, which is, for the people of the Far East, the last misfortune that can befall them. Moreover, the *daimyo* were ruined by this war, after having exhausted their estates. Shimazu was perhaps the only one to derive a certain profit from this expedition; he sent as many prisoners as possible into his states, in order that they might teach the Korean method of making pottery to his subjects. It is from this epoch that dates, in fact, the celebrated Satsuma pottery.

More than 500 junks were lost in the Korean seas and, by that very fact, Japanese commerce fell almost entirely into the hands of foreigners. If instead of exhausting the nation by war, and by useless buildings, the Taiko had directed towards commerce the efforts of this enterprising people, as the sovereigns of the European States then did, the Japanese would have become the masters of the Far East, and would not have to struggle so much to-day to get the chance which, in the 16th century, they so imprudently allowed to escape them.

Another reproach, which one cannot refrain from addressing to the Taiko, is that of having been the first to shake the confidence of the Japanese in their own strength. Mistrustful and suspicious he fancied he saw redoubtable conquerors in the few dozen Religious then in Japan. With hundreds of thousands of warriors, ready to accept the challenge of no matter what powers in the world, he had only to imitate Nobunaga's assurance; but instead of that, he feared the foreigner, and on his death-bed he bequeathed his prejudices to the entire nation.

The only excuse that can be offered for the regrettable faults, that marked the last years of so glorious a career, is that age had already dulled the Taiko's keen intellect. Among the Japanese, genius manifests itself at an early age, but only burns as a rule for a short time, after which a rapid decline must be expected. Unfortunately the Taiko remained in power for several years after this decline had begun, and hence the errors that marked the conclusion of his reign.

After the death of the Taiko, the first act of the five *Tairo* was to put an end to the war in Korea. The troops were immediately recalled to Japan, and the two *Bugyo* Ishida and Asano were sent to Nagoya to smooth over the difficulties that might arise on this occasion. There was indeed no end of complications for, even before leaving Korea, dissensions broke out in the Japanese army. Not that a single *daimyo* or *samurai* desired to continue this campaign, but they did not agree as to the manner of terminating it. Kato and with him Kuroda and Nabeshima insisted that a treaty should assure to Japan the half of Korea, while Konishi, Shimazu and Arima, knowing by experience that neither the Koreans, nor the Chinese would subscribe to such conditions, urged on the abandonment, as soon as possible, of this country of misfortune. Ishida declared for Konishi, while Asano joined Kato's party. To end the dispute, the question had to be referred to the five *Tairo*, who pronounced unanimously in favour of Ishida and Konishi. (56) The army therefore evacuated Korea, at the beginning of 1599, without making the least arrangements with the enemy. The only result of the expedition was that the Japanese completely and for ever ruined Korea. For this reason the Koreans hurled after their invaders all their maledictions, and swore to hate them with an eternal hatred. "The Japanese are so execrable," says one of their historians, "that Heaven has had to separate

them from the rest of humanity and relegate them to an isolated isle."

To have done with Korea, it was not until 1607, that Ieyasu obtained from this country permission for the Japanese merchants of Tsushima to settle at Fusan, where for three centuries they played a role like that which the Dutch played at Deshima (57).

The Korean question settled, the *daimyo* hoped to get a little rest, in order to attend to the administration of their domains, which had suffered by their prolonged absence. But the intrigues of Ieyasu were not to leave them to enjoy peace long. In direct violation of the dying Taiko's prohibition to contract political marriages, Ieyasu began by attaching, through such marriages, the *daimyo* Date, Fukushima and Hachisuka to his own family. By these and other violations it was soon publicly known that Ieyasu wished to supplant his pupil Hideyori. Therefore several of the most influential *daimyo* charged Ishida to avert this danger, by forming a party powerful enough to hold in check the growing ambition of the usurper. But the wily Ieyasu had already anticipated the steps of Ishida, and gained the majority of the *daimyo* over to his side. Wishing moreover to discredit entirely Ishida as well as the cause of Hideyori, he had the rumour spread that Hideyori was the illegitimate child of Ishida and Yodogimi. To make surer still, he brought from his own state thirty thousand *samurai*, and placed them in Osaka, where Hideyori resided. He installed himself in the castle of Momoyama with a strong garrison. Ishida found himself compelled to resign his position of *Bugyo*, and to retire to his castle of Sawayama (Omi).

Civil war was, for the moment, staved off, and quiet was reestablished. But this quiet was only momentary. The easy manner with which Ieyasu possessed himself, little by little, of the Government of Japan, without even consulting the other *Tairo*, caused general alarm. The death of Maeda Toshiie increased still more the audacity of Ieyasu, who no longer even took pains to conceal his ambitious views. Thus the disloyalty which the Taiko had formerly shown with regard to Nobunaga's grandson, Ieyasu was going to display in his turn towards Hideyori. In short, history simply repeated itself, and the most circumspect *daimyo* resigned themselves in advance to a state of things, which appeared to them inevitable. Those, who had but recently been proof against the blandishments of Ieyasu, hastened to attach themselves to his party, and from that time his prestige increased more and more. Nearly all the Christian *daimyo* ranged themselves on his side. Some, however, like Konishi, held out. Ieyasu had, however, neglected nothing to win over this brave warrior. He had even gone so far as to give his great grand-daughter in marriage to Konishi's eldest son. Konishi, while accepting the honour done to his family, declared however that he would never abandon Hideyori's party (58).

The more Ieyasu worked to assure himself of the help of the *daimyo*, the more his adversaries sought to overthrow his authority. Civil war had become inevitable and it was expected every day to break out. Uesugi Kagekatsu was to furnish the pretext for it. In disobedience to what had been decreed, this *daimyo*, in place of residing at Kyoto and fulfilling there his duties as *Tairo*, had withdrawn to his domains of Aizu, pretending that the Taiko had permitted him to pass there three consecutive years. Ieyasu, little reassured as to the intentions of his colleague, had at first enjoined upon him several times to present himself at Kyoto. But, as Uesugi had declared that he had no orders to receive from an equal, Ieyasu, having confided the fortress of Momoyama to one of his *kerai*, placed himself at the head of a numerous army, furnished by the *daimyo* of his party, and advanced to Oyama, in the province of Shimotsuke. But, scarcely had he withdrawn from Fushimi than the plot, that had been for a long time before brewing, burst. Uesugi had only been recalcitrant in order to draw Ieyasu into a snare. In effect, after the departure of the latter,

the *Tairo* Mori and Ukita, as well as all the *Bugyo*, with the exception of Asano, who alone remained faithful to Ieyasu, invited the *daimyo* to repair to Osaka, the centre of the opposition. It goes without saying that all this was done in the name of Hideyori, who was regarded as the chief of the party. Yodogimi and Ishida, the principal authors of it, were the organs by which the young chief transmitted his wishes to all his partisans.

Immediately *daimyo* and *samurai* flowed into Osaka. The castle of Momoyama was taken after a stubborn resistance and delivered to the flames, the Governor as well as the garrison being massacred. With one consent Ieyasu was declared to have lost his position of *Tairo*, and of tutor to Hideyori. A messenger sent to convey this decision to him was told to bring him at the same time an order to remain in his states, and not to appear any more either at Kyoto or at Osaka. Finally, to assure themselves of the help of the *daimyo* who had followed Ieyasu in his campaign against Uesugi, Hideyori seized their women and children, and held them as hostages in the fortress of Osaka.

It was on this occasion that Gratia Hosokawa met death in the most tragic manner. When the emissaries of Hideyori presented themselves at the residence of Hosokawa in Osaka to seize his family, the *haro*, Ogasawara, rushed into the apartments of Gratia and in a few words informed her of the danger which menaced her. He told her at the same time that Hosokawa, expecting a revolt, had ordered him, before his departure, to cut off his wife's head sooner than allow her to fall into the hands of the enemy. Gratia declared herself ready to obey the wishes of her husband. After having charged one of her servants, a Christian woman, with the mission of conducting her two daughters (59), Taryo, aged twelve years and Man aged only two, to the house of the Religious, she recited a last prayer and stretched forth her neck to Ogasawara's sword. Gratia was scarcely thirty-eight years old (60). After this execution, Ogasawara and the other servants of Hosokawa set fire to the house and committed *harakiri*. While they were still writhing in the convulsions of agony, the fire reduced all to ashes (Sept., 1600).

If the defenders of Hideyori had known how to profit by their advantages, they would have destroyed perhaps for ever power of Ieyasu. But they did not. Instead of marching at once against the latter, they lost their time discussing upon the plan to follow and upon the choice of a Commander-in-chief. Mori Terumoto claimed that post, but Ukita and Ishida, thinking him incapable, separated from him with the majority of the *daimyo*. Finally they decided to march against the enemy. After having taken by storm Zeze (Otsu), the castle of Kyogoku, who had joined Ieyasu's party, they lost nearly a month more in useless deliberations.

During this time Ieyasu, warned by what had just taken place at Osaka and at Momoyama, had entrusted to his eldest son, Hideyasu, the conduct of the campaign against Uesugi, whilst he and his other son, Hidetada, took the road to Osaka. The vanguard, led by Kuroda Nagamasa and Fukushima Masanori, soon arrived at Gifu, where Hidenobu, the grandson of Nobunaga, resided. Hidenobu had at first inclined to the side of Ieyasu, but Ishida having promised him all the province of Mino as well as that of Owari, the inexperienced youth had let himself be persuaded, without even consulting his *kerai*, and had embraced Hideyori's cause.

In this connection, one wonders from what sources several foreign authors have got the improbable opinion, that makes of Hidenobu the chief of a party seeking only to recover the rights of which the Taiko had so unjustly despoiled him, and that the Christian *daimyo*, seeing in him a Christian Shogun, or even a Christian Emperor, hastened to offer him their support. It cannot be doubted that Hidenobu desired to obtain possession of Nobunaga's inheritance, but that he pushed his delusion even to the point of counting on the

help of Hideyori's partisans to attain his end is an impossible hypothesis. He would have had even a greater chance to succeed in siding with Ieyasu rather than with the partisans of Hideyori, who only excited these troubles, in order to enable the Taiko's son to retain the supreme power.

Whatever Hidenobu's views were, his alliance with Hideyori caused his ruin: for he was the first to fall under the blows of the redoubtable Ieyasu. Kuroda and Fukushima succeeded in drawing him out of the fortress of Gifu, and at the moment when he thought he could himself take the offensive, he was surrounded by so great a number of enemies that he had to retreat. When he had regained his fortress, he found it already in the hands of Kuroda's soldiers. Hidenobu was made prisoner with his principal *kerai* and sent to Kiyosu, where Ieyasu had him kept until further orders.

A TRIP TO TURKEY.

READ BY MRS. W. KIRKLAND WILSON BEFORE THE YOKOHAMA LITERARY SOCIETY ON DECEMBER 12TH, 1902.

I will begin by briefly recounting the story of my voyage from the grey gloomy day in May, 1883, when we left England, to look for sunshine under the blue skies and along the lovely shores of the Mediterranean. My feelings were not all joyful, though a long-desired joy was to be mine, for I had always wished to travel: and now I was to do it, with my dearest friend and her old uncle: but our joy was of a very sober kind, as it was to seek for her the health so surely slipping away that the voyage was undertaken. We sailed from Liverpool Docks on the *Sidon*, a Cunard liner, which went down, with loss of life, two voyages later, off the coast of Spain; but I am glad to say she behaved with the utmost discretion and uprightness so long as we were on board. The weather was cold, muggy and wet, and not a glimpse of coast line to be seen till we reached Gibraltar, which we did in brighter weather, and about nine o'clock in the morning. The Rock itself seemed like nothing so much as a great watchful lion of stone looking proudly out to sea, and cooling his forepaws in the waters; but immediately on landing the majestic aspect of Gibraltar disappeared; the dirt, noise, and confusion in the narrow, ugly streets as we hurried to the Post Office for letters struck us most unpleasantly, the very mixed types of faces we met too were disappointing; but a visit to the famous glove-shop, and an intimate acquaintance with its dainty wares restored our usual feminine serenity; and by the time we had climbed some of the frowning heights above us and had seen the backward panorama, we were better able to catalogue the charms of Gibraltar. After that, our journey seemed to lie over waters blue and calm as lakes, with days of perpetual sunshine, and something new and foreign to be seen all the time: fleeting glimpses of the yellow coast line of Morocco, passing feluccas with their graceful sails and picturesque crews, flying fish that skimmed the waters almost like gaily-plumaged birds; and shoals of the queer, rotund, bottle-nosed porpoises, which seemed to race with the ship, and turned their Catherine-wheels like London street-arabs. A few days at sea, and at sunset one glorious evening we reached Malta; and I shall never forget those dazling yellow terraces of Valetta, rising tier on tier straight up from the sea, some innocent of all adornment, others crowned with the most lovely verdure, but all patrolled by moving human specks of scarlet, and, at every few paces, the dark blot of a cannon's yawning mouth. The harbour presented a very beautiful and animated scene, in the golden haze of the setting sun, the graceful Maltese boats darting about for passengers as a swallow picks up flies: and among the other British warships at anchor beside us was one which still bore mighty evidence of the siege of Alexandria. Bugle calls answered one another from the heights above; and when the well-known strains of "God save the Queen" came floating down, a

very big lump rose in my throat, for I was young and homesick. On shore, after dinner, we toiled up flight after flight of the yellow stone steps on which the mostly narrow streets of Valetta are built, and at every few steps were little images of the Madonna set high in niches in the wall. The gossips were gathered in groups about the wells at almost every street corner; cripples and beggars whining for help jostled us on all sides: herds of handsome goats were being led home by lovely little dark-skinned children: and women flashed their bright eyes like stars at us from beneath their ugly black silk mantillas on their way to the vespers, for which the bells were ringing. Priests passed us with rusty cassocks and bent heads, and almost every other man we met wore the uniform, that seen so far from home, made patriotic pulses leap. By the time we came out into the broad paths before the fine shops of Strade Reale they lay white in the moonlight that strove to dim the fairy lights which twinkled among the trees—great sweet-scented magnolias, white and pink, which grew in huge green tubs before café and palace alike. A band was playing in one of the squares: but Strade Reale lured us on, away from the crowds, up the great white street, till at last we stood before that superb example of Grecian Architecture, the Opera House, and far down beneath us, sheer down from our feet, lay the gleaming waters of the bay—a sheet of molten silver!

A few days later saw us anchored off Syra, one of the group of islands known as the Cyclades, in the Grecian Archipelago, where the picturesque inhabitants came off in boats to sell us Chanak Pottery, a rough ware of good shape but barbarous colouring. The Greek Bishop also called upon us, and at his invitation we dined that day at the Palace, after one of the loveliest drives I have even taken, up steep and winding lanes, through fields of waving yellow corn, past vineyards and olive gardens, past toiling oxen and quaint water-mills, and past crumbling walls where the gaily-striped lizards and vicious little scorpions were enjoying the sunshine, upward all the time till we reached the Bishop's palace, which crowned the island's summit, and brought away with us, after a delightful visit, a basket of grapes that for size and abundance reminded me of the tales of the Promised Land. The scent of Syra was indescribably delicious, though I could never ascertain why, unless the quantities of valonia grown there had anything to do with it.

Our next port was Smyrna, where we arrived at early morning, the waters outside the break-water breaking angrily; but inside the harbour the sea lapped our ship's sides as placidly as though Smyrna never knew a storm. The great barren purple hills rose like a wall behind the flat-topped square buildings of the city; and, while the quarantine officers and other officials detained us, I found ample food for amusement in watching the long strings of burdened camels, usually eight in a line, led by a donkey with a bell, for the camel is said to be too stupid to ever walk a crowded street without disaster unless led by the more astute donkey. Another sight which was full of interest for me was the embarkation of about two hundred army recruits, well-grown, clean-limbed young fellows from the interior, clad in the red cap and single blue linen garment of their mountain homes, each with a large gourd or water-bottle slung at his side, and looking for all the world like the pictures one sees in the Bible of the typical Eastern shepherd. During the Crimean War my father was brought in close contact with Turkish soldiers of this class; and I have frequently heard him bear testimony to their bravery, endurance, and general efficiency when under military discipline. Permission being at last given us to leave the ship, I and a party of twelve friends, two of whom were ladies and several recent invalids, cheerfully regardless of the unlucky number 13, set off with a Greek guide to the railway station, where after an hour's delay, we were able to engage a special train, consisting of an engine and one long first-class saloon carriage, upholstered after the manner of stage *boudoirs* in bright blue velvet with a plenitude of antimacassars and gilt-edged mirrors. It appeared to be the relic of

some royal visit, and seemed a curious anachronism amongst the purple hills and fields of white iris through which we sped to Ephesus. Arrived at the terminus we were ushered into a most forlorn hotel; I have since seen similar on some wayside station in Canada; the newest of new wood, not a door or window fitting, not a brush of paint anywhere: attenuated fowls in the fore, hungry dogs in the background, and surely no spot on earth ever produced a more villainous looking set of cut-throats than the people of the Hotel. We congratulated ourselves our stay would be short, tiffed on some of the attenuated fowls aforesaid, badly served with cucumbers boiled in grease and flavoured with vinegar; followed that up with some appalling cheese, and for dessert ate seedy figs and petrified raisins accompanied by some extremely thin claret. Then, having washed our hands in a rusty iron basin, avoided the soap, and dried ourselves on our handkerchiefs we set out again, this time on strong, lively ponies provided with something very agonising that the guide called a saddle, each followed by a yelling and almost naked Arab guide, who ran full-tilt behind us, belabouring the unfortunate ponies every time we were the least hopeful of their adopting a gait more suited to our sufferings, which were considerably aggravated by the fact we ladies were riding in thin short skirts which left our ankles wholly at the mercy of the giant thistles shoulder high which bordered the narrow path the ponies had to squeeze us through. Where the brush of olive, fir, and thistle parted the views were magnificent, the wild flowers many and luxuriant; and our spirits rose in spite of our hard riding.

As I was the only young lady of the party there were many jokes, that I was to be carried off that day as a brigand's bride, and other lively nonsense of the same sort. But the Greek guide did not seem to appreciate this fun, and kept muttering "they are a long *jomp* from here"—"a long *jomp* from here." By and bye we met a thick-set individual on horse-back, armed to the teeth, and with a business-like little carbine slung under his arm; suddenly he dismounted and stood aside to allow us to pass; and after that the Greek guide hurried us forward more than ever. The Baptistery of St. John; the Crumbling Pillars of Diana's Temple, classical fountains and graves of saints were galloped round, and gabbled over from the guide-book at lightning-speed, all looking to me remarkably like a collection of overturned doorsteps. But little cared I: for the blue of the sky, the flight of the stork, or the scent of the iris-beds was more to me in those early days than the most sacred spot on earth. At last we had to leave it all; and as we turned our faces homeward a haze was stealing over the marshy land; it settled gently over the heavy-scented iris-beds, and folding each regal white petal drew a curtain between us and them. In one vast circle round us rose the shadowy hills, now purple—now black against the crimson glow of the sun-set sky, then mounting up like flames in a fiery splendour that left us without words to describe it. The red-beaked, snowy-breasted herons, like ourselves, were on their homeward way; and the short Eastern twilight had already deepened into night when we got back to the ship. And then—what a commotion! We found that no sooner had we started for Ephesus than the authorities sent off to the ship to say that no passengers were to go into the interior without a strong military escort, as the brigands were astir in the neighbourhood, and had the night before at Bournabat, a suburb of Smyrna, cut a Frenchman up and strewn the body in small pieces all over his own garden; and had further carried off to the mountains two French subjects, and were threatening to cut off their hands if a very large ransom were not speedily paid for them. Next day two thousand Turkish soldiers were dispatched to search the mountains for brigands; and on my return to Smyrna a month later a number of the ring-leaders had been caught and executed. A few days after that we went to a garden-party given for us by a wealthy Greek gentleman we had met in Liverpool before starting. He lived in a beautiful house amidst his own large vine-yards, which

covered the island he lived on, outside Smyrna Bay; but alas! when we got there the whole place was filled with armed kavasses for our protection, as the brigands had been there a few nights before, attacking the house in an attempt to carry off his only child, a lovely little motherless girl of five, in hope of ransom. The twelve handsome pillars of his dining-room were cracked across with shot, and hardly a window pane remained intact.

The only two other incidents that stand out in my mind with any particular degree of distinctness during my stay in Smyrna are a tram-car ride I took, and my visit to Camel Square. The tram-cars have (or had) the short seats set across the car, very close together, facing the horses' tails and the seats were, I should think, of Turkish manufacture (judging by their exceedingly sketchy make) for no sooner had I sat down than the back of the seat gave way, and I fell helplessly into the very capacious lap of an extraordinarily greasy old Turk behind me, who far from being disgusted at the mishap seemed highly amused at the situation, shaking with laughter till time for him to get out, when he waved his hand to me in quite a genial and Christian manner. In Camel Square one sees more camels collected together all at one time than one can see in any other place in the world. Close on two hundred camels were there eating, drinking, snapping at the flies, feeding their funny little long-legged young, or simply waiting to be hired. They are anything but the mild pacific beasts their countenances might lead one to suppose, and maternal cares make them especially savage. The expression of their faces varies as much as the shade of their fur: and I have myself detected one or two striking likenesses to personal friends in camels I have known and been fascinated by. Well, the time came for us to leave Smyrna, and we next cast anchor in the beautiful gulf of Ismid. Our surroundings could not well have been more lonely, and far from suggesting the lading or unlading of cargo looked much more like a scene from one of Wagner's operas. Close to the reedy shore were floating beds of great white water-lilies spreading wide their golden centres in the brilliant sunshine; to and fro over the placid waters around us floated graceful snow-white wild-swans under a sky of cloudless blue: not a habitation could be seen on the flat yellow shore, upon which the only sign of life when we arrived was a train of camels majestically picking their way over the sand towards us to carry away later on the bales of cotton we had brought them. Throughout the day similar caravans crossed the horizon, while from time to time we heard these firing off rifles to scare marauders from their track; and late on in the afternoon a friendly Greek priest came off to pay us a visit, bringing under his arm as a present a flat bread-cake which he told us was the cake of peace. He spoke a little French, so we had a *limited* conversation; and he was delighted beyond measure when we gave him some music on my little piano, which we had up on deck, lashed to the stanchions in fine weather. It must have been a wild dissipation for the lonely old man, and he left us with evident regret when at sunset we weighed anchor, and sailed away to Constantinople, which we reached one June morning just before sunrise. We had deck-cabins, so that it was easy for us to fling on wraps, at the first word of land and we were comfortably established with our rugs about us on deck, as the sun emerged from the veil of mist before it, and the grey curtains of the morning slowly drew apart and disclosed a scene like fairy-land. I was not prepared for it, for my father had painted Constantinople to me in no flattering colours. But, looking on it for the first time, with all its myriad tapering minarets pointing up to the rosy sky, with all its countless mosques and glittering domes turning to gold as the sun rose higher and higher; with its stately marble palaces gleaming like snow among the lovely foliage right down to the water's edge, I thought I could never see anything more beautiful. Now I must ask my hearers to suppose they stand facing the mouth of the Bosphorus, that is the arm of the sea which divides Asia from Europe and connects the Black Sea with the Sea

of Marmora. You will then have on your right the continent of Asia; on the left, Europe. Following the arm of the sea, which is the Bosphorus, you will find on your left just beyond the mouth a gulf, or rather a very narrow bay, forming with the Bosphorus almost a right angle, and spreading for a few miles into the Continent of Europe in the shape of a horn, or horn of abundance; this is the Golden Horn, so named because when the capital of Byzantium was here the wealth or *gold* of three continents flowed through it. Stamboul, which is often thought to be the Turkish name for Constantinople, is really the name of the truly Turkish part of Constantinople; and Stamboul, like Rome, is built on seven hills: one side of it is bathed by the Sea of Marmora, the other by the Golden Horn. On the opposite point, washed by the Golden Horn and the Bosphorus lie Galata and Pera, the two Frankish cities; while from the Asiatic shore directly opposite the opening of the Golden Horn Skutari rises in all her beauty from the sea. To simplify all this one must fix in one's mind the picture of three great cities divided by sea. At the point of the triangle formed by the walls of Stamboul lies the famous Seraglio, so rich in those memories, tragic and romantic, which form the basis of most of the poetry and fiction of Turkey. Here may still be seen the slide down which, while the moon veiled her face, the strangled bodies of the fair frail ladies of the Imperial Harem were hurried into the dark waters below; the rooms where little unloved infants perished violently at the Imperial command; the marble terraces where Circassian beauties, torn by conquest from their parents' arms ate out their hearts in a gilded slavery their proud spirits abhorred! Turning one's back on this spot, so fair to see, so foul of memory, away in the distance lie the three isles of the Princes, to which steam-boats run every hour from the Bridge of Galata. Prinkipo, the chief of these three islands, if I remember rightly, is a very fashionable resort, Sunday being the great day there, when bands play before the different cafés in its beautiful gardens which are crowded with many nationalities, each in its gayest dress. It is the great place to study the many types of beauty to be found in Constantinople, the grey-eyed Armenian, the statuesque Greeks, the lively French and the voluptuous Turkish ladies are all to be seen here, and even twenty years ago the last named were much more lightly veiled than one is led to expect, as I will explain later on. All round Constantinople lie great crumbling walls broken at intervals by heavy forts. As a broad, but very uneven road runs along the top of these walls it is quite possible to make the tour round the city on horseback; but hearing it was a hard and a tedious ride I am sorry to say that I did not undertake it. The first thing that strikes one on looking at Constantinople is the immense number of mosques; San Sophia, mosque of Sultan Ahmed, mosque of Osman, Valideh Mosque and many others readily attracting the eye: the tall minarets invariably appearing beside the domes play an important part in the religious life of Constantinople: at the appointed hour daily—and there are five such hours canonically commanded—the muezzin priest whose office this is appears on the narrow gallery of the minaret. He stands motionless a moment; then raising his face to Heaven he chants slowly, in mournful high vibrating tones the call to prayer, which being interpreted is "God is great! There is but one God! Mahomet is his prophet! Come to prayer!" The chief characteristic of Skutari, which has been called the Golden City, is the bright colouring of its many villas, which are usually painted red and yellow: but as they have generally lovely gardens about them, and are interspersed with massive white barracks, luxuriant foliage and here and there a minaret this does not look nearly so garish as it may sound.

At the back of all its brightness there is a very sad spot for English people, for in the beautiful cemetery there lie numbers of England's heroic dead who fell in the Crimean War, nearly fifty years ago. A little further on, but still on the sea is Kadi Keui (the City of the Judge) which is a very fashionable quarter, built on the ancient ruins of Chalcedon. Its cypress groves are

quite a sight in themselves spreading down to the blue waters of the Bosphorus as they do and there I heard the nightingales in full song one evening when we dined with friends who had a lovely villa in their midst. The houses at Kadi Keui are all very European looking outside: but inside there were no wall-papers, no fire places, and the furniture was all of the lightest description. The Bridge of Galata, which connects the Pera-Galata side of the Constantinople with Stamboul and is a quarter of a mile long, is one of the great sights of Turkey; not only are the views from it magnificent, but the Bridge itself is all day long one huge moving kaleidoscope of types of an almost inconceivable number of nationalities. In the smart sedan-chair inlaid with silver and mother-of-pearl sits an attractive Armenian lady going to shop; beside it stride two dragomen in their embroidered zouaves begirt with many jewelled weapons. You are jostled aside by a slim Albanian in pleated white skirt, only to rub against a portly Turk in blue flowing caftan and white muslin turban. Bedouins in their white capes, dervishes in their camel's hair mantles and high conical hats, Persian soldiers in towering headgear of black lambskin; Hebrews in long yellow garments open at the sides, professional story-tellers in wizard's dress, African slaves, veiled women in the Maltese faldetta, great Turkish carriages drawn by bullocks and decorated with birds and flowers, all pass over Galata Bridge, and there may also be seen a wonderful collection of physical deformities simulated and real, for Constantinople is a great place for this class of beggar. How many times I crossed that bridge during my three weeks in Constantinople, but there was always something new to see, and I never tired of it. As Stamboul is the metropolis of the great empire I shall first describe all I saw on that side, before again going over the Bridge. Jostled by yelling and heavily laden blue linen clad porters, Greek, Armenian and Hebrew we landed on the quay, and through the prosaic medium of a tram-car soon reached the At Meidan, once the Hippodrome but now a large open square at the sides of which are many buildings full of historic interest. The first we entered was a distinct shock to me, it was so like the Chamber of Horrors in the Waxworks at home: it was the Museum of the Janissaries, which contains about 100 figures, and was built on the site of the famous Janissary Massacre. The figures represent the correct historical dress of each Imperial official of their time; and are neither rich nor beautiful: more curious than beautiful describes them. We then went on to the Philoxenes Cistern (still in the At Meidan) and reached it by descending suddenly down a "dive" such as we use at home to reach the underground railway, needless to say the place is used no longer for its original purpose: the damp and oozy roof is supported by 200 gigantic pillars and in the different gloomy parts of the Cistern, almost like side chapels, we found a body of alert faced Greek silk-spinners at work with all their busy spindles and wheels, singing the while, not unmusically, one of their own folk-songs. Turning our steps now to the other side of the great square of the Seraglio we found ourselves before the Fountain of Sultan Ahmed III., which has been likened to a square casket of rich Turkish art: hardly an inch of it but is adorned by some marvel of the sculptor's art. It is covered with arches, niches, and cupolas, inlaid with mosaics of every delicate colour, gilt tracery out-lining the mosaics. The fabric itself—like so many buildings in Constantinople is of white marble, and with all its rich ornamentation looks perfectly dazzling in the sun. In each of its four walls is a fountain, and round the whole runs the inscription, "Turn the key of this pure and tranquil spring and call upon the name of God, drink of these inexhaustible and limpid waters and pray for the Sultan." Here, I remember, we met with one of our fellow travellers, who had just indulged in the doubtful joys of a genuine Turkish bath: spent and weary he was still breathing forth fury at the indignities put upon him by the too energetic attentions of the Mulatto attendants, who had pummelled, rubbed and thumped him with a vigour quite surprising considering the state of the thermometer, and we all agreed un-

animously to abjure Turkish baths, at any rate in June. Near the At Meidan we went to see the partially burnt Column of Constantine, which was once surmounted by the statue of Apollo, the head, however, being a likeness of the great Emperor.

Another of our sight-seeing expeditions was to the Great Bazaar, which is reached by a populous district which extends from the Osman Mosque to Serasker Hill. Here lies the Valideh Mosque with fountain, and another wonderful sight on the way to the Bazaar is the great open market for fish; as we passed through it a great abundance of fish was lying on the large stone slabs; monster mullet, oysters, sprats and tunnies; turbot, sardines, and the loufer, a delicious fish which only allows itself to be caught by moonlight, together with many others whose names I did not know lay there in scaley shining heaps; but one of the many violent streets rows we so often witnessed being in progress we were not tempted to tarry. We next passed through Tobacco Street, a narrow way devoted solely to the sale of the fragrant weed and its accessories, most of the former being so pungent as to make it impossible to enjoy it save through the tubes of the bubbling narghileh, and even so, only served as a drug. Arrived at the Great Bazaar itself, an immense stone edifice built in the Byzantine style, a veritable city indoors, yet with carriages, horses, camels and porters laden with bales of goods hurrying to and fro as freely as out of doors—arrived there we turned our steps at once to the world-famed Hadji Baker's shop, and watched his white clad cooks concocting the real Rahatlakoom which renders all other so-called Turkish delight a mockery, a snare and a delusion. It is, I believe, mainly compounded of arrowroot-flour and honey flavoured with eau de cologne, or attar of roses and stuck full sometimes with chopped pistachio nuts. The cooks from time to time fed us with succulent morsels on the end of long handled toasting-forks; and we carried away with us quite a small cargo of drums of the sweet-meat. The whole Bazaar with its rows and rows of shops all divided off into districts each for the sale of its own particular commodity, smelled beautifully Eastern; by which I am not alluding to *daikon* or other agricultural perfumes we are familiar with in Yokohama; but am thinking of sandal and camphor wood, the scent of orange blooms and the fragrance of a dozen spices all delightful. We passed through one street full of nothing but shops for the sale of barbaric jewelry, and there I became the proud possessor of a great silver armlet clasped with the silver star and crescent. The next few streets displayed rare silks from Bagdad or Brousa, rugs from Smyrna where I had seen them being made, Indian shawls, Persian Cashmeres, gold and sequin embroideries, table covers ablaze with silken embroideries, wedding veils sparkling with silver, delicate white satin underwear, and all the lovely trappings of a Turkish belle. There was the pipe street with narghilehs of Bohemian glass, and amber mouthpieces set with precious stones; Perfumery street with every harem toilet-requisite; Shoe street with dainty pointed shoes from 5 to 1,000 francs a pair; Armory street, Old Clothes street, and Fez street, where fezes might even be bought with inscriptions from the Koran to ward off the evil eye. I was much struck with the apparent indifference of the Turkish shopkeepers as to whether we bought their goods or no; and it was also striking to find we were always offered coffee served very hot thick and sweet without milk, *before* we made any purchases. In the shops we saw many of the ladies of the Harem with their attendants, shopping as freely as ourselves—and had ample opportunity to study the construction of their yashmak or veil, which is in reality *two* veils, one bound round the head like a bandage covers the forehead to the eye-brows, is knotted just above the nape of the neck and falls over the back in two long ends reaching to the waist; the other covers the lower part of the face, and is tied in with the first in such a manner as to look like one veil. These veils are now represented by something very flimsy indeed, drawn farther apart and often leave almost unconcealed the face, neck, ears and hair. The Turkish ladies grow very stout; but the

chief defect in their appearance is their ungainly gait, which is the result of the abuse of the bath, and the peculiarities of their foot-gear. At home their amusements are monotonous and often quite childish, their ideas low, and their speech coarse, which is not to be wondered at as they are taught to believe they have no souls; and Turkish fathers do not scruple to send their young daughters to see and listen to any indecency in the low theatres or music-halls of Constantinople, though they are not allowed to visit such places later in life: they add a great deal to the picturesque in Constantinople, where really everything is picturesque. Even the soldiers, though the fine dress of antiquity is done away with, add another bright touch to the picture with their red trousers, scrubby little jackets and small fez, the last a very fruitful source of headache and ophthalmia. The water-sellers and date-sellers, the Turkish officials, are all wonderful figures in different ways, and every wayside fountain is a picture in itself. I wish I could show you the real Turkish houses, the upper story projecting far beyond the lower so that the houses sometimes really meet overhead. One of the most unexpected and beautiful features of Turkish life in Constantinople is the way bird-life is cherished there; many are the pretty superstitions the Turks have in connection with it. Swallows are encouraged to build in every roof, for they are considered a protection against fire; the stork is sacred to the Turks because they believe him to make a yearly pilgrimage to Mecca, and pigeons because they were the pets of Mahomet; the halcyon carries the souls of the blessed to Paradise, and the homely sparrow brings prosperity. The kingfisher, the sea-gull, and the raven each have some graceful fable attached to them; and the Pigeon Mosque with its circling flights of pigeons, white, opal-tinted and grey, is one of the most charming sights of the city. The birds are quite tame; they come at one's call to feed from one's hand, and seem to have no fear at all of strangers. The dove, even in Turkey, is regarded as the emblem of love; and they were carved in pairs, a little inappropriately, on the backs of the gilded chairs I saw in the rooms of the Harem when I visited the Sultan's Summer-Palace on the Bosphorus. But time grows short, and I have still the grandest sight in Constantinople to describe, namely San Sophia. Of its four minarets one was built by Selim the Second, two by Sultan Murad, and another by Muhammed the Conqueror. Seen at a distance this is perhaps the least imposing, though largest of the mosques; it does not *look* its size; and there is little to distinguish it from the others now that its crowning glory, the solid silver which once overlaid its largest dome, is gone! But onestand under that mighty dome in the full flood of the morning sunshine, and you will probably be dumb with awe as I was, and filled with a fuller sense of the Infinite than any other temple—save that not built with hands—can ever give you. It is impossible to explain what it is that creates the extraordinary impression San Sophia invariably makes on the first beholder, and it is possible that were it stripped of the wealth of historic association which still glorifies it in the eyes of the student we might then view it in a more dispassionate light. Had I devoted the whole of this paper, to-night, to the history of the building and conquest of San Sophia these pages would be all too few: and even to describe its walls in the most prosaic manner I must pass over the rest now without comment. The courtyards are entered from the Square by a heavily decorated and hooded gateway of Moorish aspect. Within its portals veiled women are seen passing to their vocations. Grave faced Turks perform their religious ablutions at the various troughs for the purpose; and clouds of birds circle among the ilex trees. Within the Mosque the central dome, on which is the defaced impression of the great figure of the Virgin, seated, first attracts the eye. The dome is 46 feet in height by 107 feet across. On one side of the central nave is a kind of pulpit where the rhatim, emaim, and muezzin, three dignitaries of the mosque, recite in turn the service: and on the other side is a gilded private box or balcony, protected by lace-like gilt gratings, for the Sultan's use. The roofs over the various domes are of pumice-

stone to economise the weight: and the bricks of which the walls are built came from the isle of Rhodes, each one weighing as much as five of ordinary weight. From the roof depend silk-cords from which are suspended bright green discs ornamented with golden hieroglyphics from the Koran, ostrich eggs, and crystal globes, also 1,000 curiously wrought bronze lamps which, swinging ceaselessly in that immensity of space, look like great flowers suspended from the roof. Priceless Persian rugs strew the great floors, and scattered about are cassia-wood reading desks inlaid with copper and mother-of-pearl, containing open copies of the Koran. A gilded gallery runs round the central nave emblazoned with dazzling letters twenty-seven feet high, the inscription being "Allah is the light of heaven and earth," which were the words Muhammad the Conqueror first pronounced in that awful moment when entering San Sophia the day Constantinople fell into the hands of the Turks. At the base of two of the beautiful columns shown in the picture stand immense jars of alabaster, brought by Murad the Third from the ruins of Pergamum. The side chapels built under the galleries are used as treasure-houses by wealthy Turks when taking long journeys: others are used as infirmaries for the sick, or even as places of confinement for the insane. Standing erect, with folded arms and bowed heads, numbers of the sons of the Faithful were at their prayers; and, to their credit be it said, that as we passed through their midst, not a head was lifted nor one curious gaze turned upon us, though the sight of English women abroad in the height of the hottest season must have been as rare as lunatics at large; for all the foreign ladies, (and many of the Turkish) had left Constantinople for Therapia, Skutari, the Sweet Waters of Europe and other summer resorts. In one or two of the vacant side chapels little groups of sweet, grave-faced little Turkish children were playing quietly, reminding me in their straight single linen garments of pink, green, pale blue or yellow, of the infant Samuel in the Family Bible at home. We saw the San Sophia Mosque once again; standing behind the famous leathern curtain in the Stranger's Gallery that time, at midnight, when it was ablaze with countless lights and paved with prostrate worshippers at one of the grandest Services, the fast of Ramazan, which is a twenty-eight days fast which occurs in the ninth month, or month of Ramazan. During this fast from sunrise to sunset the Faithful neither eat, drink, nor smoke. This last must be a terrible deprivation to them, but I cannot believe that wine has any temptation for the mass of the people, as during the whole of my stay in Constantinople I saw but one drunken man, and that I regret to say was an Englishman. To Therapia, the summer resort I mentioned just now, is a beautiful excursion by steamboat from Constantinople, and on one occasion when we went many of our fellow passengers, Turks, Greeks, and Armenians, looked on with smiling interest and evident pleasure at our unfeigned admiration of the beautiful scenery we were passing through: and an elderly but handsome Armenian lady crossed over to our party, and with a charming smile handed me a great bouquet of myrtle, orange blossom, and heliotrope she was carrying, saying in pretty broken English: "Will you not take these sweet flowers? For I am always in the Land of Flowers."

It was on another steam-boat excursion up the Bosphorus that we visited the Sultan's Summer Palace with its miles of gilt-framed oleographs and looking-glass ceilings, its gilt legged furniture and endless mirrors; its hideous magenta-striped upholstery, and its lovely gardens, over-grown and neglected, sloping down to the water's edge. The one thing that pleased us in that monstrous monument of bad taste was a great cool white marble room in the centre of the Harem, with no furniture save low divans of rose coloured satin, no decoration save waving palms, the light streaming through a skylight or dome of rose-coloured crystal, and in the centre of the apartment a large low bath of dark green porphyry with a silvery fountain playing in the centre. Attached to this Palace was one of the Sultan's many crazes, of which he had already tired, a

zoological garden which contained some starved lions and mangy tigers in ricketty cages, a house full of miserable diseased looking apes, and an ostrich-run where we were attacked by large and vigorous fleas, reddish in colour, and of marvellous agility; and were also disappointed to discover that the ostriches were brownish ugly creatures not at all like the snowy curling plumes we had been accustomed to associate with them. That same day we saw the Sultan himself leaning over a favourite balcony which overhung the waters at the beautiful Palace of Dolmabahcheh, also on the Bosphorus, opera-glass in hand as was then his wont, scanning the face of every passer-by in caique or galley. He was a heavy fallow-faced individual with a short dark beard, and wore the unpicturesque frock-coat and trousers of civilization, but with the addition of a red fez.

And now for a short space before I close I want to take you over the Bridge from Stamboul to Galata and Pera, the two Frankish cities. In Galata all the shops are modern: the real old Galata was destroyed by fire, which was an excellent thing from a sanitary point of view, and when the city was rebuilt it was a vast improvement on the old. There may be heard the French, Italian and Genoese languages, and it is there also that most people go to see the extraordinary dance of the Dervishes; but when I tried to do so it was a fast day, and there was no performance. But I *did* see the Tower of Galata, whose 300 steps or more all tourists ascend in order to obtain the best bird's-eye view of Constantinople. The Tower is a round, lofty building, dark in colour, with glazed windows, and conical copper-roof, and a gallery on which night and day watch is kept for fires, and where visitors are permitted to stand behind a wire grating. The Tower of Galata is almost the only relic of Genoese glory; from it hundreds of years ago floated the Genoese flag, and though the men it represented were but a handful in the land, they felt themselves every whit the equals of that proud race of Emperors who with this solitary exception ruled all Turkey. The only other place of interest I saw in Galata was a wonderful old-world Turkish cemetery, where are the graves of the Janissaries, each with his turban cut off in disgrace. On every Turkish grave is a mound of earth with a stone on the head and foot on which the two angels, Neker and Munker, are supposed to sit to judge the soul of the departed. The grave of a pasha may be known by its pillar surmounted by a big turban; and generally the graves of his family are about him, enclosed by railings. A little fish or fruit is often placed beside the grave as food for the departed; and the hole near the stone at the head is to let in the tears and sighs of the bereaved relatives. The Turks use their cemeteries as we our parks, and cows are even permitted to graze amongst the graves, and festivals are held there.

Still mounting upward as one leaves Galata, or taking the under-ground connecting railway to do so, one enters Pera, which stands three hundred feet above the level of the sea, and is the elegant European quarter. It has a bright, prosperous look, and here the Turks assume a meeker demeanour, feeling not nearly so sure of their own ground, as when they are met with in other parts of Constantinople. Here are all the handsome residences of the foreign ambassadors; and one of the distinctly Turkish features of Pera, which is the great Barracks of Shalil Pasha with its golden star and crescent on top and wide Parade Ground before it. At Pera we attended the dear little English Church, about half the size of the room I am speaking in, but large enough for the Church-going Britishers of Constantinople. During the last week of our stay my friend needed me so much that I was unable to take the longer excursions in the neighbourhood, but used to go every evening for a couple of hours on the water before dinner, sometimes along the Golden Horn towards the Sweet Waters, but oftener to float lazily in a caique along the Bosphorus and watch the sun set upon the rosy distant peak of Mount Ida. These caiques are built like little gondolas, carved and gilded, with ends shaped alike. They have neither rudder nor seat; and one sits on a cushion in the bottom.

And now, as we have come to the last picture I have to show you, the Entrance to the Black Sea, I must bring my paper to a reluctant conclusion. It was there we feasted our eyes for the last time on its beauties as we sailed away from Constantinople; and though one of us at any rate will never sail those fair blue waters again, to write about it all has been almost like re-visiting the scenes I have feebly tried to paint in their own bright colours; and if they have given my audience one half the pleasure they have given me I shall be more than satisfied.

YOKOHAMA AMATEUR PHOTOGRAPHIC SOCIETY.

The exhibition of photographs by the members of the Yokohama Amateur Photographic Society well merits a visit from foreigners interested in photography. It is held at the "Yokohama Kurabu" which will be easily discovered, being the largest building close by the Public Gardens. It is open daily from 9 a.m. closing at 4 p.m. The catalogue usefully shows the prices against each picture, in which respect it is a clear improvement upon previous exhibitions of a similar character. A little more order in the arrangement of the pictures would probably be desirable, but even as at present disposed they are decidedly worth seeing. A view of Negishi by O. Sugisaki is very effective; a Wave Study, by J. Hibino, is similarly striking; but it is difficult to understand what the latter artist means by describing No. 30 as "A Deep Mountain." No. 30 might possibly be called "In the Depths, of the Mountain." Mr. T. Nishikawa's "Mount Fuji" hardly appears to be a photograph, but the same artist's "Cat" is assuredly a masterpiece. Mr. S. Yamaguchi's "Stream" and "Water Mill" are very fine coloured scenes, and Mr. O. Ikeda's "Autumn" is a capital piece of work. "Early in Autumn" by Mr. K. Fujii, is another artistic delineation of fading foliage effects; Mr. K. Kashiwama's "Mount Fuji" is a fine combination of water foreground with the great mountain the distance; and Mr. K. Iso's "Kawaguchi" is another delicately toned picture. We recommend readers to visit this exhibition. But is it really an amateur exhibition that we recommend to them?

NEWS OF THE WEEK.

For the seven days ending Sunday, December 7th, there was a record of 111 arrivals of sea-going steamers in Hongkong Harbour (not including Canton and West River steamers). This is a record week for Hongkong. There were 23 arrivals on the 4th inst. (Thursday) and 22 on Sunday, the 7th inst.

Bad money is now very largely circulated in Java, and the quantity in the hands of the public is continually increasing. Guilders and half-guilder pieces are so skilfully counterfeited that only the ring betrays their spuriousness. Two and a half-guilder pieces are so closely imitated that only experts can tell them from the genuine article.

The Grand Master, H.R.H. the Duke of Connaught, has been pleased to appoint the Hon. W. J. Napier, D.C.M., District Grand Master of the Eastern Archipelago, in succession to the late W. Bro. J. P. Joaquim. The new D. G. M. has been W. M. of Lodge St. George, No. 1,152, and during his residence in the Straits has taken a keen interest in Free-masonry, occupying all the more important positions in District Grand Lodge. He follows such worthy predecessors, as W. H. Read, C.M.G., Colonel Dunlop, C.M.G., Sir Charles Warren and Sir Charles Mitchell. Wor. Bro. A. Knight, P.D.D.G.M., has been the acting District Grand Master.

The E. and A. steamer *Empire* (Captain McArthur), which arrived at Hongkong from Japan on Dec. 8th reported that at 4.30 p.m. on the 6th inst., while in lat. 27.54 N., long. 121.55 E., she picked up the crews of four fishing junks which had been blown off the land by a N. W.

gale. The crews were in a deplorable condition owing to cold and privation. No effects were saved, as darkness was coming on, and it required very skilful seamanship on the part of Captain McArthur to get alongside the native craft and rescue the occupants. The *Empire* made the run from Moji to Hongkong in 3 days 17 hours 48 mins. During the gale on the 5th inst., she behaved splendidly.

Writing on December 11th, the *North-China Daily News* said:—The many friends of Mr. Lewis Moore, and all who know him are his friends, will be glad to learn that the operation which he underwent yesterday afternoon and which consisted of the amputation of the leg a little below the knee, was quite successful, and that he was going on last night as well as could be expected.

Mr. E. A. Hewett, the agent in Hongkong of the P. and O. Company, has just received from the Emperor of Austria the Order of the Iron Crown of Austria in recognition of the services he rendered while Chairman of the Shanghai Municipal Council during the troublous times of 1900-01. The insignia of this Order is very pretty, and bears the initials of the Emperor Francis Joseph. Mr. Hewett had already received the Order of Orange Nassau and the Order of the Sacred Treasure of Japan for his services in 1900.

The practice game of Rugby football on Saturday afternoon was a decided improvement on the play of the previous week, the teams being better balanced. The forward work showed improvement and was far less scrawny than hitherto, while the three-quarter line on both sides showed an advance in tactics. The White team were the first to score, Stuart securing a try between the posts, which E. W. Kilby converted. After this the game was most determinedly contested and neither side could secure an advantage of the other, until almost the close of play, when Colours equalised the score, Kingdon breaking through and getting a try which Moss converted. The match therefore ended in a draw.

The Hongkong *Daily Press* is informed that the China Commercial Steamship Company, which was incorporated in Hongkong on 1st November, will inaugurate a service between Hongkong and Mexico at the beginning of March next. The Company's steamers will carry both freight and passengers, and a monthly service will be maintained between Hongkong and the Mexican ports of Mazatlan and Maxanillo, the places of call *en route* being Yokohama, Honolulu and San Francisco. Mr. J. S. Van Buren, well-known through his connection with the Pacific Mail Steamship Co., has been appointed agent and is presently in America completing the preliminary arrangements for the inaugurating of the new service. The capital is subscribed by Chinese and is to the amount of \$1,000,000, allotted in 9,980 shares of \$100 each with 20 founders. Mr. Eng Hok Fong is president of the new Company.

COLOMBIAN NAVAL FIGHTING.

The Colombian Government warship *Bogota*, formerly the *Jessie Banning*, but fitted out at San Francisco and largely manned by Americans, has entered upon active service with somewhat unexpected results. The following telegram to the *New York Herald* dated Kingston, Jamaica, Nov. 17th describes her first experience:—

The steamship *Atrato*, which has just arrived here from Colon, brings news that dissatisfaction has been felt by the Panama officials over the result of the recent efforts of the Colombian gunboats *Bogota* and *Chucuito* to engage the revolutionary war craft in battle.

Thirty officers and sailors of the *Bogota* were killed and wounded by being fired upon by the insurgents near Chitre. Among the killed were Richard Kain, an American, who was chief gunner, and a man named Parker was wounded.

The *Bogota* sighted a small revolutionary schooner near Chitre and fired upon her several times. Then two boats were lowered, one from the *Bogota* and the other from the *Chucuito*, to capture the schooner.

The rebels on the schooner got close to the coast and awaited the arrival of the small boats within range. The insurgents opened a tremendous fire from the schooner and shore batteries also poured in a heavy fire.

Most of the occupants of the small boats were either killed or wounded. They had been taken by surprise. The *Chucuito* arrived in Panama in the evening of that day with the dead and wounded. The Government officials maintained a mysterious silence regarding the affair. The insurgent gunboats *Padilla* and *Boyaca* were not seen. The *Bogota* and *Chucuito* are still in Panama harbour.

The chief point of interest about the *Bogota*, said *Harper's Weekly*, is that she seems to be wholly manned and officered by American soldiers of fortune. Her commander, Capt. H. H. Marmaduke, was a captain in the Confederate Navy. Lieut. Arthur H. Dutton, the second in command, is an Annapolis graduate and served with the rank of ensign on the converted yacht *Gloucester* through the Spanish war. Lieutenants Mitchell and Mantgis are also Annapolis men. Surgeon W. G. Graham has been through the Cuban, Philippine and Chinese campaigns. Colonel Gregory of the Colombian army also goes with the *Bogota*. Of her crew of forty, twelve were with Admiral Dewey at Manila, and it is said that several of them are missing without leave from the *Oregon*. Three graduates of the United States School of Gunnery are among the crew, while the ship's writer, B. C. Clark, was on the torpedo boat *Winslow* in the famous fight in Cardenas Bay.

CORRESPONDENCE.

SPORT IN YOKOHAMA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your issue of the 11th inst. there appears a letter signed "Former Owner" under the above heading—of which, although it has been attributed to me, I knew nothing till I saw it in the paper.

Though I am quite in accord in many matters with "Former Owner," I think it right to say that with regard to his charge against the Committee of discourtesy to Lady MacDonald, I am in a position to state that her Ladyship was both publicly and privately thanked by the Chairman of the N. R. Club for her kindness in presenting the prizes.

There are quite enough sins of commission to lay to the charge of the executive body of the N. R. C. without charging them with sins of omission such as laxity in presenting bouquets.

When "Former Owner" gets on to the handicapping question he is on stronger ground, and he has certainly made out a case which calls for an answer from some one on behalf of the Committee.

I shall endeavour to supplement your correspondent's proofs as to the absurdity of the handicaps.

Imprimis: Tenryu carries 145 lbs. and wins two races, and then in the Prix des Haras is let in with 143 lbs. or in other words has 2 lbs. taken off her back for having won twice. In sharp contrast to the Tenryu case is that of The Orb who also having won twice with 140 lbs is then raised to 150 lbs. thus getting 13 lbs. worse treatment than Tenryu.

Tasmanian starts with 150 lbs. and failing to win, is promptly handicapped at 137 lbs. but is reserved for the Champion Race which he wins. My own mare, Ojosama, with 140 lbs. runs second to Tenryu, and then on the third day is handicapped at the same weight whilst, Tenryu, the winner, gets in with 2 lbs. less.

Your racing readers will remember that Coronet having won six races had to run in the All Comers class at the last two meetings, but apparently the Committee, not satisfied with having had so many of their races reduced to practically walks-over by Mr. Norfolk's fine horse Imperial Mistral II., have in the skeleton programme for the Spring of 1903 now raised the number of wins which exclude to ten, so that will let the gallant Coronet back to smash the fields up once more. It may be said that Coronet will have to put up a penalty in some races, but the 1½ mile and the Champion, being only weight for scale, must be a gift to the lucky owner of this horse.

After the Spring Meeting of this year I ventured to criticize the starting. This meeting we had the pleasure of seeing three gentlemen with the starter's flag, and I must confess that I think that at all events the gentleman who officiated on the first day has very just reason to be dissatisfied with the Committee for shelving him for the remainder of the meeting. I very much question whether such a thing as a starter being removed during the course of a meeting (except on special grounds such as favouritism shown, etc.) has even happened.

That popular sportsman the owner of McMorse

may congratulate himself on the starting gate not having been in use.

In conclusion I would ask any man who has ever gone racing whether in all his experience he has ever known such Tom of Bedlam handicapping as we get in Yokohama.

My *nom de course* being well known I sign myself with thanks to you, sir, in anticipation.

Yours, etc.,

SATSUMA.

Yokohama, December 15th, 1902.

THE FUJIN JIZENKAI BAZAAR.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The Fujin Jizenkai (Japanese Ladies Benevolent Society) beg to express in this way, their thanks to all who have kindly contributed to the success of the Bazaar just held in aid of their charity hospital, especially to the Kings' Daughters Circle, to the ladies who contributed cakes and other articles; to Messrs. Lane, Crawford and Co., and to Messrs. Curnow and Co. for their aid.

The weather was most unfavourable, but the nett receipts were *yen* two hundred and eighty-two 27/100 (*yen* 282.27).

Respy submitted,

SUYE INAGAKI,

Hon. Sec., Jizenkai.

Yokohama, Dec. 16th, 1902.

THE JOVANSSEN CASE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your report of the Jovanssen Case in the *Mail* of the 15th instant, I find it stated that Mr. Sawada, the counsel for the defendants, pointed out that some of the statements I made as a witness in the case were contradictory. The Judge, of course, saw that that was not so and refused the re-examination that Mr. Sawada had asked for. This is quite enough to show that Mr. Sawada was mistaken, but I beg you will permit me to explain how the mistake arose, as otherwise there might be some who might think that I was not quite impartial.

I was asked how many rooms Mr. Jovanssen occupied in the Club Hotel; I replied I did not know as I had never been in his rooms. In reply to a second question I said I *believed* he had two rooms. Asked how I arrived at that belief, I stated that on one occasion Mrs. Jovanssen's child was ill and that she came down and asked me to make some milk soups for it. I said I would do so at once and in about five minutes I sent up the soups with a Japanese boy. In about 15 minutes Mrs. Jovanssen came down again and asked me again to make the soup. I said I had sent it up some time ago. Shortly afterwards she came down again and thanked me, saying that the Japanese boy had taken it up to Mr. Jovanssen's room instead of to her room.

That is how I arrived at the very natural conclusion that Mr. Jovanssen had two rooms, and how Mr. Sawada could see a contradiction between that statement and my former statement I am at a loss to understand.

Thanking you for the space kindly granted me, I am, Sir,

Yours very truly,

L. COTTE.

Yokohama, 16th Dec., 1902.

AUTOMATIC PISTOLS.

TO THE EDITOR OF THE "JAPAN MAIL."

CHER MONSIEUR,—J'ai lu avec beaucoup d'intérêt l'article relatif aux pistolets automatiques, paru dans les colonnes de votre estimé journal, de ce matin.

Sachant l'intérêt que vous portez à tout ce qui a trait aux perfectionnements des armes de guerre, je prends la liberté de vous envoyer ci-joint un extrait paru dans la *Revue Militaire Suisse*, 1900.

Si d'autres détails pourraient vous être agréables, je les tiens à votre entière disposition.

Agréez, Monsieur l'Editeur, avec mes excuses pour ces lignes, l'assurance de ma parfaite considération.

Votre tout dévoué,

HELVETIA.

Yokohama, le Decembre 12, 1902.

PISTOLETS AUTOMATIQUES.

Depuis quelques années les inventeurs ont cherché à remédier aux nombreux inconvénients des revolvers, à celui entre autres "qui résulte de l'utilisation déficiente des gaz produits par l'inflammation de la poudre; ils ont été amenés petit à petit à abandonner le système du barillet pour rechercher la solution du problème dans un pistolet à répétition utilisant pour cela les progrès réalisés dans les fusils à magasin. Quelques techniciens eurent l'idée de rendre automatique le fonctionnement de l'arme en empruntant au recul la force motrice nécessaire Le Pistolet Automatique était Créé."

"C'est une arme à répétition dans laquelle la force d'expansion des gaz est utilisée après chaque coup pour ouvrir la culasse, extraire et expulser la douille, armer le système de percussion et pour

comprimer un ressort récupérateur qui, en se détendant, produit le chargement d'une nouvelle cartouche et la fermeture de la culasse."

"Un grand nombre d'inventeurs se sont intéressés à la question des pistolets automatiques, et ont fait breveter des dispositifs très-ingénieux, décrits dans des articles de journaux et des brochures spéciales." "Des expériences officielles furent faites dans certains pays. La Suisse qui a toujours marché en tête du progrès en ce qui concerne les armes de guerre, n'a pas voulu rester en arrière."

"Une commission fut nommée pour l'étude des pistolets en Juin 1897; cette commission procéda à des essais de tir avec quatre systèmes différents de pistolets, savoir: (par ordre alphabétique.)

BERGMANN-BORCHARDT-MANNLICHER-MAUSER.

Les trois premiers présentés par des maisons allemandes, le dernier par le "célèbre inventeur de Vienne."

Tenant compte des objections faites à leurs divers systèmes, les inventeurs cherchèrent à perfectionner leur arme, les uns se bornèrent à des modifications de détails, d'autres établirent des types entièrement nouveaux."

Les travaux ayant duré à peu près une année les représentants de "diverses fabriques furent invités à se présenter à Thoune le 23: Novembre 1898 pour y exposer devant la commission, les transformations, et perfectionnements apportés à leurs armes et pour y procéder à de nouveaux essais."

Cinq Systèmes étaient en présence, Savoir:

Mausier-Bergmann-borchardt Manlicher-Roth.

Ce fut le pistolet Borchardt qui obtint le plus grand nombre de points et sortit premier avec une avance assez considérable sur ses concurrents-classés dans l'ordre suivant:

- 1 Borchardt.
- 2 Roth
- 2 Mannlicher.
- 4 Bergmann.
- 5 et dernier Mauser.

Le 1 Mai 1899 la commission se réunissait de nouveau à Thoune-po procéder à de nouveaux essais avec les deux pistolets restant en présence Borchardt et Manlicher, consistant en:

Essai de durée 500 coups.

Tir Avec Douilles Entamées

Essais de pénétration Contre Sapin et Chêne:

Le résultat comparatif entre les deux armes fut le suivant: Borchardt 48 coups en 28 secondes; soit 103 coups en une minute (aucun dérangement dans le mécanisme, extrateur des douilles très-régulière durant les épreuves); Mannlicher 48 coups en 49 secondes; soit 59 coups en une minute—(Extraction irrégulière-etc)

Sur 500 coups tirés par les membres de la commission aucun nettoyage "pendant la durée du tir.

Borchardt—Après les 500 coups l'arme fonctionne comme au début, la précision n'a pas changé. Encreusement très-restreint, presque nul.

Mesure de la vitesse Initiale:

Borchardt-Moyenne 323,58 mètres
Mannlicher 290,56 "

Données numériques du pistolet Borchardt Calibre 7m/m 65; Rayures 4 concentriques; Direction des rayures à droite constantes; Poids de l'arme 855 grammes; Portée Maximum sous un angle de 27° 1800 mètres; Magasin (système Lee contenant huit cartouches placées les unes sur les autres.

Renseignements puisés dans la *Revue Militaire Suisse*.

MOSQUITO YACHT CLUB

The annual general meeting of the Mosquito Yacht Club was held on Dec. 12th and the report and accounts for the year were presented and adopted. The retiring committee were re-elected.

The report is as follows:—

In submitting this, the seventh, Annual Report of the Mosquito Yacht Club, your committee are glad to be able to say that the year has been very successful, more particularly as regards the finances, which are now on a sound footing, owing to the alteration in the rules last January.

During the year, 24 new members joined the club, the membership now being.

Active 70
Absent 65
Honorary 8

The club has had the misfortune of losing three members by death. Messrs. J. F. Lowder; N. A. Walter, and E. C. Swan.

There were twelve races resulting as follows:

10th May.....Abunai Cup.....won by
24th May.....Yigao Cup.....Vixen
31st June.....Vice Commodore's Cup.....Edna
5th July.....Mr. Blad's Cup.....Pele
19th July.....Mr. Kingdon's Cup.....Edna

19th JulyMr. Fertig's Cup.....Pele
 2nd Aug.....Commodore's CupEdna
 16th Aug.....Mr. Thorn's Cup.....Edna
 30th Aug.....Messrs Pumfrett and Ran-
 kin CupVixen
 30th Aug.....Mr. Thompson's CupEdna
 13th Sept.....Mr. Warming's CupSodeska
 17th Sept.....Vixen CupEdna

6 } Races won by { Edna
 3 } Vixen
 2 } Pele
 1 } Sodeska

In addition to the regular programme the club, in conjunction with the Yokohama Yacht Club, arranged a sailing regatta in commemoration of the Coronation of King Edward VII. the prizes for which were presented by British residents. The race for the twenty-one rater class was won by *Edna*. The thanks of the Club are tendered to the donors of the Prizes, and also to Mr. Biagioni, for his many kind hospitalities. The committee were pleased to welcome the addition of two yachts to the fleet, *Pele*, built by Messrs Gunn and Abel, and *Vixen* owned by Messrs Thompson and Morton, but with regret have to report the loss to the register of *Dryfe* and *Abunai*; the latter being sent to Kobe early in the season, owing to the departure of her owner, Mr. Macvicar, for China. Since the close of the season *Sodeska* has been sold to a Kobe yachtsman, but her place will be filled by a new yacht, to be built by her former owner, Mr. Hall, in company with Mr. Thompson. It is hoped that rumours of the building of other new boats may be confirmed, and that next season may see several ready to compete in the races. The flagship *Aborigine* had some alteration made to her forefoot which so improved her sailing qualities, that it was decided to enter her in the Yokohama Yacht Club races for her class, whenever her duties would permit her to sail, so that members who were not boat owners might have practice in racing. Unfortunately on the only days she was able to sail there was no wind; so that she was not successful. In addition to the above mentioned alteration she was thoroughly overhauled. She has been beached for the winter on the compound of the Yokohama Dock Co, and is fully insured. The Temple at Tomioka was again rented, and continued to give satisfaction. A verbal arrangement has been made for its use next year.

The weather during the season has been unusually adverse to sailing, owing to the many calm days; but every advantage has been taken when there seemed any prospect of a breeze. The departure of Mr. Macvicar for China caused a vacancy on the committee, which Mr. Morton was elected to fill. The Hon. Secretary, Mr. Pumfrett, also left Yokohama during the spring, and Mr. Eddison was elected to fill the vacancy. The typhoon caused considerable havoc to the Mosquito fleet. *Nandeska* was wrecked on the Bund wall; *Sodeska* & *Yugao* both sank at their moorings—fortunately the damage sustained was not such as to prevent their being speedily repaired. Your Committee consider that some steps should be taken to improve the arrangement of moorings, attention to which was called in one of the local papers. Your Committee are pleased to report the substantial Credit Balance of yen 236.03, and suggest that a sum should be set aside to form a reserve fund. The book value of *Aborigine* has again been written down, although she has been improved and thoroughly overhauled. Trusting the Club will continue to meet with prosperity, your committee beg to tender their resignations.

H. KESWICK,	F. J. HALL,
Commodore.	Vice Commodore.
P. R. SCOTT,	E. EDDISONS,
Honorary Treasurer	Honorary Secretary.
H. GUNN	N. B. MORTON.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

VENEZUELA TRUCULENT.

London, December 12.

Violent demonstrations took place at Caracas on Tuesday evening on receipt of the news from La Guayra. A crowd burned the British and German flags and attempted to burst in the doors of the German Legation, shouting "Death to the Germans!" The police did not interfere.

The Government have placed an embargo on British and German owned railways.

President Castro has proclaimed an amnesty and called all Venezuelans to arms.

Mr. Cowen, the U.S. Minister, representing British and German interests, has obtained the release of the principal British

and German prisoners, and is insisting upon the release of the remainder.

All the Venezuelan warships except one, which claimed to be French property, were sunk.

General Ferrer with 1,200 Venezuelans is marching on La Guayra.

President Castro has issued a manifesto describing the acts of the allies as barbarous, ignoble, and treacherous. He summons all adjacent states to join in defending Venezuela's sacred soil.

THE VENEZUELAN TROUBLE.

London, December 13.

The rest of the prisoners at Caracas have been released.

General Ferrer's force with eighteen guns has arrived at La Guayra. The British and German landing parties re-embarked after rescuing the British and German prisoners at La Guayra. There was no collision with the Venezuelan troops.

Excepting the *Indefatigable*, the British warships have all left in search, it is believed, of the rest of the Venezuelan Fleet.

The sinking of the Venezuelan ships has not up to the present been explained and is being adversely criticised. It is irritating public opinion in the United States.

President Castro is enforcing his levy on men and boys of all ages from fifteen to sixty.

THE FRENCH FLEET.

The French Chamber has restored the war credits for the Mediterranean fleet.

SIAM AND THE GOLD CURRENCY.

The Siamese Government has definitely refused to consider the claims of the foreign banks in Bangkok for compensation in connection with the reform of the currency.

VENEZUELA.

London, December 14.

The Venezuelan Government has asked Mr. Bowen to propose to Great Britain and Germany that they submit the questions at issue to arbitration. It is unlikely that the allies will agree to this proposal at the present juncture.

ANGLO-JAPANESE ALLIANCE.

At a dinner given by the Union Club, at the Hotel Cecil, Lord Lansdowne said that closer acquaintance with our new ally since the conclusion of the alliance had led us, and he hoped Japan, to form a larger respect for each other. The more great powers knew of, and co-operated with, each other, the better for the interests of all.

THE SIAMESE CURRENCY.

The foreign banks at Bangkok have settled with the Siamese Government and have approved of the scheme for putting the tical on a gold basis. It is expected that business will be resumed to the general satisfaction.

SOMALILAND.

The rumoured murder of the Mad Mullah is seemingly disproved by the receipt of an arrogant letter from him suggesting peace, but on condition of conceding to him a free port through which he could secure the importation of arms.

THE VENEZUELA TROUBLE.

Two more British warships have gone from Bermuda to Venezuela. Italy also is sending two ships.

It appears that only the Germans sunk two of the Venezuelan vessels, which they had captured. The British utilized those that they captured.

GERMAN TARIFF BILL PASSES.

London, December 15.

After an all-night debate, unprecedented

in Germany, the Reichstag passed the Tariff Bill by a vote of 202 to 100.

VENEZUELA.

The German man-of-war *Vineta* has captured the Venezuelan ship *Restouran*.

A mob at Porto Bello seized the English steamer *Topaz* on the 10th, but subsequently released her.

President Roosevelt and Mr. Secretary Hay have agreed that the United States is not involved in the Venezuelan complication unless serious developments take place.

VENEZUELA.

London, December 16.

Failing to receive satisfaction, the British warship *Charybdis* and the German warship *Vineta* bombarded the port of Puerto Cabello.

Later.

President Castro has changed his attitude. While still protesting against the action of the Powers, he has ordered reprisals to cease and restored the British and German railways and telephones. He also visited the wife of the German Minister, who is lying ill at the Legation, and offered her the hospitality of the Palace, while he sent a message to Puerto Cabello ordering the authorities to give the satisfaction demanded. This message arrived too late.

NEW AMERICAN MINISTER TO JAPAN.

Mr. L. C. Griscom, United States Minister to Persia, has been appointed American Minister to Japan.

BRITISH COLUMBIAN ACTS.

Later.

Several British Columbia acts relating to the employment of Japanese, and including coal mines regulations and immigration acts, have been disallowed by the Dominion Government. They will all undoubtedly be re-enacted in the coming session.

SUNK BECAUSE UNSEAWORTHY.

London, December 17.

According to a German semi-official statement the Venezuelan war vessels sunk were so unseaworthy that their possession would hamper the movements of the foreign warships.

ARBITRATION.

The arbitration proposal is strongly endorsed by the United States. Mr. Hay, Secretary of State, has informed Germany that the blockade should not apply to American ships and that he disapproves of the stoppage of ships generally. He quotes the precedent of the peaceful blockade of Crete in 1896.

Italy takes part in the blockade.

THE EDUCATION BILL.

The House of Lords has passed the Education Bill.

THE VENEZUELAN BLOCKADE.

Later.

The British and German Governments have decided on further coercion and that it is necessary to blockade Venezuelan ports. It is not intended to land a British force, still less to occupy territory.

THE MARSEILLES STRIKE.

The strike at Marseilles has collapsed owing to the other unions deserting.

THE DUKE AND DUCHESS OF CONNAUGHT.

The Duke and Duchess of Connaught have left Suez.

UNITED STATES AND VENEZUELA.

London, December 18.

Mr. Secretary Hay is pressing for a reply to the arbitration proposal. The Roosevelt

Cabinet discussed the Venezuelan question yesterday and arrived at no conclusion modifying the attitude hitherto assumed.

The U. S. Senate, in a temperate debate, commended the attitude taken by the United States.

(RECEIVED AT THE LEGATION OF FRANCE.)

THE MARSEILLES STRIKE.

Saigon, December 12.

The registered marines at Marseilles reject the arbitration of Admiral Rouvier. They appeal to the other corporations, in view of a general strike.

VENEZUELA.

Germany and England have sent an ultimatum to Venezuela to obtain the settlement of various claims, and have occupied Guayra. The naval forces of England and Germany have taken possession of three vessels, which have been sunk.

Venezuela declares a wish to resist. Two hundred and fifty Germans and English have been arrested at Caracas.

THE MARSEILLES STRIKE.

Saigon, December 15.

Workmen of the port at Marseilles and the bakers have decided to go on strike. There were some disturbances during the afternoon. Severe orders have been issued.

On the 13th 2,000 workmen of the port were at work. Everything is calm.

FRANCE AND SIAM.

The *expose* of the motives of the Franco-Siamese convention says that since the signature of the convention, the Siamese Government has decided to institute a sanitary service and a bacteriological institute directed by French engineers and physicians; to engage French professors for teachers, and to reserve to the French vast areas of teak forests, and to subsidise a French company so as to inaugurate a service of bi-monthly mail-boats between Bangkok and Saigon.

THE MARSEILLES STRIKE.

Saigon, December 15.

The Secretary of the League of Registered Marines at Marseilles has been arrested without resistance, on a charge of exciting to revolt. A man named Castellani, President of the Popular National Committee, has also been placed under restraint. Most of the bakers continue to work. Calm prevails.

MARSEILLES STRIKE.

Saigon, December 17.

The registered marines at Marseilles have decided not to impart to the strike a political character. A certain number of them have returned on board their ships. The port hands and the bakers have resumed work; calm prevails and the strike is considered to be terminated.

The S. S. *Salazie*, of the Messageries Maritimes, manned by state seamen, has started for the Far East with 154 passengers.

VENEZUELA.

Saigon, December 18.

The English and German Squadrons have bombarded the fort and custom-house at Puerto Cabello. The ships have established a blockade along the coast of Venezuela, with the assistance of the Italian squadron. The Europeans arrested at Caraccas have been released.

(FROM THE "JAPAN HERALD.")

AUSTRALIAN RAILWAYS.

London, December 11.

The Government of South Australia has called for tenders for the construction of a railway between Adelaide and Port Darwin.

THE P. & O. COMPANY.

December 12.

Sir Thomas Sutherland, at the annual meeting of the Peninsular and Oriental Steam Navigation Co., announced that it had been decided that when the new steamers were ready, the mail service would be concentrated at Tilbury, the cargo vessels remaining at the Albert Docks.

IMMIGRATION INTO BRITISH COLUMBIA.

London, December 15.

The Government of the Dominion of Canada has disallowed three enactments passed by the British Columbia legislature.

The first of these enactments debarred the entrance of immigrants who were unable to write a European language; another forbade the employment of Japanese and Chinese on works holding provincial franchises; and the third prohibited the employment of Chinese or Japanese in mines unless they spoke English.

THE VENEZUELAN AFFAIR.

London, December 17.

Mr. Balfour, speaking in the House of Commons, said that a blockade, if necessary, will be carried on at different portions of the Venezuelan coast, the two fleets not acting as one force.

Sir Charles Dilke inquired whether the United States had declined to submit to the position of a neutral power where there were no belligerents.

Mr. Balfour replied that the question referred to the controversy as to whether the principles of international law recognised that a pacific blockade involved a state of war.

(FROM THE "JIJI SHIMPO.")

THE VENEZUELAN AFFAIR.

London, December 10.

President Castro of Venezuela has arrested all British and German subjects. The British and German fleet in co-operation have captured the Venezuelan fleet, consisting of 4 ships.

President Castro has sent no reply yet to the ultimatum of the British and German Powers, and they have therefore extended the period of grace for fourteen days from yesterday.

It is rumoured that a fresh rising has taken place under the command of Matos. Seven American warships under Admiral Dewey in Venezuelan waters, are watching the trend of affairs. America will probably demand the cession of land (?)

An Italian cruiser has arrived at La Guayra.

THE VENEZUELA BUSINESS.

London, December 11.

The allied fleet has destroyed three Venezuelan men-of-war. The French Consul claimed that another warship should be committed to the hands of the French. The allied fleet is searching for other Venezuelan warships along the sea coast; 500 marines have landed and released the British prisoners. Excited by the above fact, President Castro declared that the whole nation was in arms. The rebels who had previously been liberated are watching many British and German subjects. A Venezuelan warship arrived at La Guayra and the people of the place are attacking the Consulates during the crisis.

The British and German diplomatists have started for Trinidad.

THE ASSOUAN WORKS.

A ceremony to celebrate the completion of the Assouan works took place in the presence of the Khedive and 2,000 guests.

SIAM AND THE GOLD STANDARD.

The Siamese Government has declined to compensate the loss suffered by foreign bankers from the carrying into practice of the new coinage system.

THE VENEZUELA BUSINESS.

London, Dec. 12.

President Castro of Venezuela has asked U. S. Minister Bowen for intervention. The Venezuelan soldiers are prepared to protect the forts at several important points in La Guayra and are to protect Caracas. Several generals of the rebels have offered to command the Venezuelan Militia.

It is made public in the City of Washington that the British and German ambassadors have guaranteed Minister Hay that they will act by all means in the corporative method already intimated to the Minister.

The principal British newspapers have doubts as to the reason why the allied fleet destroyed the Venezuelan warships.

THE STRIKE IN FRANCE.

London, December 13.

The trouble at Marseilles has become more serious. The labourers at the docks are also so careless that they do not attend the landing of goods from mail steamers. The military forces are now being brought to serve for their suppression.

THE VENEZUELA AFFAIR.

The United States has recognized the landing in Venezuela of the British and German troops. The three British and German warships at La Guayra are prepared to seize the Custom House in the port, and two others to seize that in Puerto Cabello.

President Castro has steadily rejected the British and German ultimatums.

The remaining Venezuelan warships have been seized, and British marines have been put on board the ships.

VENEZUELAN AFFAIRS.

London, December 15.

Owing to Venezuela having seized the British steamer *Topaz*, the British warship *Charybdis* and the German warship *Vincel* bombarded Puerto Cabello on Saturday evening for 45 minutes. The fort of the port fired in reply but was immediately silenced. The walls of the fort were reduced to ruins, but there was no damage in the town, except that a few of the citizens were wounded. The commander of the garrison at the port has been arrested by the allied forces.

The steamer *Topaz* has now been released, but after the time allowed to apologize for the seizure.

The people of Caracas are making menacing movements. President Castro hopes to make them effective.

THE AMERICAN PACIFIC CABLE.

The laying of the American cable in the Pacific has been commenced at San Francisco.

JAPANESE BONDS.

Japanese 4 per cent. public loan bonds have risen to £88½.

A BRITISH EXPLANATION.

London, December 16.

Lord Lansdowne, the British Secretary for Foreign Affairs, in reply to a question in the House of Lords to-night, declared that England and Germany have determined to blockade the coast of Venezuela, but have no intention to land British troops.

AMERICAN MEDIATION.

America has communicated to England and Germany the application by President Castro for the intervention of America, the United States Government at the same time intimating its willingness to mediate.

THE MARSEILLES STRIKE FINISHED.

The strike at Marseilles has been brought to a close.

(FROM THE "ASAHI SHIMBUN.")

THE SOMALILAND AFFAIR.

London, December 12.

A Reuter's telegram from Berbera dated the 8th says that preparation for an advance have been made and Colonel Carlelow(?) with 2,800 men, food for 4 months, and 2,000 camels has joined the main body. The Mad Mullah has been fatally stabbed with a spear while praying.

SOUTH AMERICAN AFFAIRS.

London, December 14.

The U.S. Government has recognized the combined movements of England and Germany in Venezuela, but several American newspapers disapprove of the behaviour of Germany in connexion with her sinking of a warship in the act of seizure.

THE ARCHBISHOP OF CANTERBURY ILL.

The Archbishop of Canterbury became suddenly unwell while discussing the Education Bill in the Upper House, and is in a critical condition.

LORD LANSDOWNE ON VENEZUELA.

The Marquis of Lansdowne, Minister for Foreign Affairs, has spoken at a banquet at the Union Club. He said he was very glad of the allied movements of the British and German squadrons and although the rumour of an alliance between England and France was unfounded yet the tendency of the opinions of both countries might be discerned.

(FROM THE "N.-C. DAILY NEWS.")

NO NEW DOCK AT HONGKONG.

Hongkong, December 8.

At the extraordinary general meeting of shareholders in the Hongkong and Whampoa Dock Co., Ltd., this morning, there was a full attendance, and the scheme for building a new dock brought forward by the directors was rejected by a large majority.

CAPTURE OF THE MURDERERS OF MR. EVANS.

The pirates who murdered Mr. Evans on the Canton River have been arrested and sent to Canton on information supplied by a woman who was tempted by the reward which the British Consul-General, Mr. James Scott, induced the Viceroy to offer. Articles stolen from Mr. Evans were found in their possession.

A NEW RUSSIAN LINE TO THE PERSIAN GULF.

London, December 9.

The Russian Steam Navigation Company has approved a draft agreement with the Government for the establishment of regular and frequent sailings between Odessa and the Persian Gulf.

BAD NEWS.

Famine and typhus have appeared in Finland.

There is great distress in the South-west of Russia and the Caucasus.

END OF A KING'S HOLIDAYS.

The King of Portugal has left England for home. The greater part of his stay was occupied by private visits to various country seats.

OBITUARY.

Mr. Harry L. B. McCalmont, C.B., M.P. for Newmarket, has died in his 43rd year.

GOOD NEWS FOR THE STUMP-TURNERS.

London via Bombay, December 10.

The Captains of the first-class counties in England have decided, as a concession to the bowlers, to increase the width of the wicket one inch by increasing the diameter of the stumps.

SHIPPING SUBSIDIES IN ENGLAND.

London, December 10.

The report of the Committee on Shipping Subsidies deprecates the adoption of a general system of subsidies, but advises subsidising a line to East Africa, where the foreign subsidised lines handicap British trade.

VENEZUELA.

London, December 11.

It is stated at Trinidad that Great Britain will blockade the whole coast eastward of La Guayra, and Germany westward: and they will not seize the Customs.

THE CURRENCY OF MEXICO.

The report as to the intention of Mexico to introduce the gold standard is denied.

THE GREAT DAM OF THE NILE.

The Assouan Dam was formally opened yesterday. The Duchess of Connaught laid the last stone in the presence of the Khedive, who opened the first sluices. The party returned to Assouan by steamer, traversing the navigation lock.

ANGLO-RUSSIAN DISPUTE AT TIENSIN.

Tientsin, December 11.

The railway siding dispute is now in Mr. Detring's hands for the final decision of the only point which still remains undecided.

THE SOMALILAND EXPEDITION.

London, December 12.

A Reuter dispatch dated Berbera, the 8th inst., says that everything is in readiness for an advance. Garrero has been converted into an advance base with four months' supplies for a force of 2,800 men with 2,000 camels.

It is rumoured that the Mad Mullah has been assassinated by a spear thrust while at prayer.

THE DEATH OF MR. KENSIT.

McKeever, the man who assaulted Mr. Kensit, has been acquitted of the charge of murder at Liverpool.

FOR BABY'S SKIN
SCALP AND HAIR

Something for Mothers to Think About

EVERY CHILD born into the world with an inherited
or early developed tendency to distressing, disfiguring
humours of the skin, scalp, and blood, becomes an object
of the most tender solicitude, not only because of its suf-
fering but because of the dreadful fear that the disfigura-
tion is to be lifelong and mar its future happiness and
prosperity. Hence it becomes the duty of mothers of
such afflicted children to acquaint themselves with the
best, the purest, and most effective treatment available,
viz., THE CUTICURA TREATMENT.

Warm baths with CUTICURA SOAP, to cleanse the skin of crusts and scales
and soften the thickened cuticle, gentle anointings with CUTICURA OINT-
MENT, to instantly allay itching, irritation, and inflammation, and soothe and
heal, to be followed in the severer cases by mild doses of CUTICURA RESOL-
VENT PILLS (see below), to cool and cleanse the blood, are all that can be
desired for the alleviation of the suffering of skin-tortured infants and
children and the comfort of worn-out, worried mothers. A single set is
often sufficient to cure when the best physicians fail.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for
cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for
softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings,
and chafings, in the form of baths for annoying irritations and inflammations, or too free
or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many
sanative, antiseptic purposes which readily suggest themselves to women, especially
mothers, and for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are prepared to meet the wants of
delicate women, and sensitive children, and are pure, sweet, and tasteless. They are
beyond question the most successful blood purifiers and humour cures yet compounded.

CUTICURA REMEDIES are sold throughout the world. Australian Depot: R. TOWNS & Co., Sydney. British
Depot: 27-28, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, DECEMBER 27TH, 1902.

SUMMARY OF NEWS.

FIRST snow of the season fell in Yokohama on Sunday morning about a quarter past nine. It was a mere sprinkle in quantity and lasted only a few minutes.

COUNT OKUMA will give a tea-party at his residence on the 25th inst. to which he has invited members of parliament belonging to the Progressist Party.

It has been announced in the Reichstag that Germany's deficit for the current year is 150 million marks. It will be met by increased taxation on beer and tobacco.

MR. HAYASHI SANSUKE, Japanese Minister to Korea, arrived at Fusan by the *Keijo Maru* on the 22nd inst. He at once visited the war-vessel *Tsukushi* and then left for Japan.

THE annual meeting of foreign residents at Kobe to receive the report of the Advisory Committee was held on Dec. 19th. The report which was a review of the proceedings of the Committee during the year, was adopted. Mr. E. H. Gill

was re-elected a member of the Committee and Mr. E. H. Hunter was elected in place of Mr. F. J. Bardens whose term of office expires.

THE Russian cruiser *Rurik*, the U.S. battleship *Oregon* and the Siamese royal yacht *Mahachakri* dressed ship in Yokohama harbour on Friday and flew the Russian ensign at the main in honour of the name-day of the Czar.

THE French Foreign Office estimates contain provision for the establishment of a Vice-Consulate at Swatow, and for a considerable increase in the number of student-interpreterships in the China branch of the Diplomatic and Consular Service.

THE remains of the late Mr. A. E. Buck, U. S. Minister in Tokyo, were on Tuesday afternoon conveyed from the U.S. Naval Hospital to the P.M. steamer *Korea* by a squad of bluejackets under the command of an officer.

A MAN named Torakichi has been arrested at Kobe charged with the theft of a piece of silver plate from Messrs Arthur and Bond in Yokohama the other day. He is suspected of having committed other burglaries. The Kobe police have sent him to Yokohama.

MR. F. J. NORMAN, who has made quite a name for himself through his pamphlet on the Kasuza system of well-boring, has arrived in Calcutta, where he intends introducing the system to the notice of Indian agriculturists and others.

THE next meeting of the Yokohama Literary Society will be held in Van Schaick Hall on Monday, December 29th, at 8.30 p.m. sharp. The programme will be of the nature of a miscellaneous concert and some of the most popular amateurs in Yokohama will appear.

FIRE broke out in a house occupied by Hasegawa Kanejiro, Yokokawacho Honjo, Tokyo, early in the morning of the 22nd inst. Only the house in which the fire originated was destroyed, but after it was extinguished the dead body of the eldest son of Kamejiro, aged eleven years, was found in the debris.

THE well-known pick-pocket, Hashimoto Torao, living at Takecho Shitaya, Tokyo, was arrested by the police at Omori station on the afternoon of the 22nd inst., charged with stealing a bag containing yen 30 and three cheques of the value of at yen 146, belonging to Kiba Masagoro of Yamabukicho, Yokohama.

ADOLF von Menzel, the noted painter, has finished a painting of "Frederick the Great in the year 1778," the year in which Frederick recognized American independence. The painting is inscribed, "Dedicated to Free America." Von Menzel has arranged to reserve the rights of reproduction for the benefit of German-American hospitals.

THE Methodist Episcopalians of the boroughs of Manhattan and Bronx, Greater New York, have undertaken to raise a fund of \$1,150,000 for the praiseworthy purpose of wiping out every debt and mortgage existing on the denomination's property and providing for the relief of superannuated preachers. The movement promises to be successful.

REV. J. M. CALDWELL, pastor of the Union Avenue Methodist Church Chicago, has introduced a brass band in his service, and is pleased with the success of the innovation. The band, which was stationed in the rear of the church, was organized by Professor W. E. Watt, principal of the Graham School, from among the members of the church

Sunday-school, of which he is the superintendent. All the members of the band are under 14 years old, some of them being girls.

A FEW years ago Jamaica was in deep industrial and financial distress and on the verge of rebellion. It is now said to be prospering unprecedentedly. The revenues of the island increased \$250,000 during the first half of the year. The British Government helped the colony to tide over its financial difficulties, which proved the first agent of relief. This was subsequently supplemented by sugar bounties, and a profitable banana trade has been established with England. Business confidence has been restored and disloyalty to the crown is now said to have disappeared.

THE indifference with which British colonial interests are regarded by Sir William Harcourt and other Liberals is not justified, says a London dispatch to the New York *Tribune*, by the statistics of trade of the last nine months. These disclose an increase of over \$50,000,000 (gold) in exports to the colonies and a decrease of \$100,000,000 to foreign countries. Since 1900 the exports to Canada alone have increased \$10,000,000. The losses in trade with Germany, Japan, France and Argentina have been wiped out by gains in exports to the United States.

ON the 4th inst., at Government House, Hong-kong, the Hon. Dr. Ho Kai was formally invested with the insignia of Companion of the Order of St. Michael and St. George, conferred upon him on the occasion of the Coronation. There was a very distinguished assembly to witness the ceremony, which was preceded by dinner to which twenty sat down. Among the guests present were H. E. Major General Sir W. J. and Lady Gascoigne, Admiral Grenfell, and Commodore Powell. H.E. the Governor congratulated Dr. Ho. Kai and conferred the decoration upon him.

DURING Friday and also on Thursday night, says the *Nagasaki Press*, a number of arrests were made in Nagasaki on charges which are sure to produce a trial of great local interest. The Hamano-machi police have up to the present taken into custody sixteen Japanese, some of whom are said to have been working together, and all of whom are alleged to have offended against the law in the same way. We are unable to secure full particulars of the nature of the offence charged against these men, beyond the fact that it had to do with the advancing of money under conditions other than those prescribed by law, and that in certain cases forms of official registration of loans are said by the police to have been forged. We hear that other arrests will probably be made in the same connection.

WE take the following tragical story from an exchange. M. Reichart, a gentleman of means, residing in the Rue de la Pompe, Paris, while playing at billiards one evening in his house, hit a ball so hard that it bounded from the table and through an open window, falling through the glass roof of a drawing-room in the next house, and smashing a valuable Sevres vase. The crash so alarmed an Angora cat sleeping on the table close by that the animal sprang up and knocked over a lamp, which set fire to some tapestry, and necessitated the calling out of the brigade, causing a great deal of damage by water. M. Reichart was engaged to the niece of the invalid lady occupying the house in which the damage was caused. The commotion, however, had so disastrous an effect on the old lady's nerves that she died shortly afterwards. On learning the indirect cause of her aunt's death, the young lady refused to marry M. Reichart.

THE POLITICAL SITUATION.

Saturday, Dec. 20.

It is now generally believed that immediately after the suspension of the Diet on the 16th instant, Baron Kodama, Governor-General of Formosa, proceeded to Yugawara and consulted with Marquis Ito as to the feasibility of a compromise. The Marquis explained that he had no desire whatever to return to power, and that he would much prefer to see the present Cabinet remain in office if he could approve of their policy. But with regard to the question of the land tax his opinion was unalterable. He fully admitted the importance of naval increment, but he believed that one or two years' delay in undertaking it would not signify, and he held that funds for the purpose should be obtained by cutting down the railway programme and by effecting administrative retrenchments. Baron Kodama, finding no hope of conciliation in these views, returned to Tokyo *re infectâ*, and reported frankly that, according to Marquis Ito, the situation could not be resolved except by the Ministry's surrender.

The *Jimmin* gives an interesting analysis of the state of the House of Peers, which is now regarded as the citadel of conservatism in Japan. There are six sections in the House, namely:—

The *Kenku-kai*, which contains 70 members. This is the strongest body in the House. It is under the leadership of Marquis Kuroda, and it may be regarded as unequivocally favourable to the present Cabinet, and opposed to the immediate institution of government by party.

The *Doyo-kai* (Saturday Society), which has 62 members and is under the leadership of Prince Nijo, includes in its ranks such men as Viscounts Tani and Soga. It is frankly opposed to the present Cabinet.

The *Mushozoku* (unattached). These number 44, and are led by Viscount Matsudairâ. They include Baron Ozaki and Mr. Samejima, and are said to be more or less affiliated with the *Kenku-kai*, though their attitude towards any particular question can not be foretold.

The *Chawa-kai*, with 33 members, is under Baron Funakoshi, and its sympathies are entirely with the present Cabinet.

The *Mokuyo-Kai* (Thursday Society) has 27 members, at whose head stands Baron Senge, and is friendly to the Cabinet, but its friendship is more or less temporizing.

The *Teiyu-Kai* (named after a cyclical year) numbers 21. It consists mainly of representatives of the highest tax-payers, and its support would be given to the *Seiyu-kai*.

It will be seen from this analysis that a *Seiyu-kai* cabinet would have to reckon with a hostile majority in the Upper Chamber. The *Jimmin* claims, however, that the Peers have modified their views about the Lower House and about political parties: they will not again be found implacably hostile. Moreover, our contemporary alleges that the above six sections are not divided by lines of principle, and that reconstruction with regard to political issues is on the tapis. It must be remembered that the *Jimmin* here predicts a state of affairs which would be very welcome to the party represented by that journal.

Monday, Dec. 22.

On Saturday morning the public remained completely in the dark as to the issue of the political situation. It transpired on the preceding day that Prince Konoye, President of the House of Peers, had made an

attempt to effect a compromise. Having ascertained that the Minister President of State and the members of the House of Peers shared his opinion, namely, that the question at issue between the Government and the Representatives is altogether too trivial to cause a Ministerial crisis, the Prince intimated his desire to meet Mr. Kataoka, President of the Lower House. The result of the meeting, which took place at Prince Konoye's residence, was that the *Seiyu-kai* and the Progressists appointed a committee to consult with Mr. Kataoka, the Progressists sending Mr. Oishi Masami and the *Seiyu-kai* Messrs. Ozaki Yukio, Ooka Ikuzo, Honda and Matsuda and Baron Suyematsu. These gentlemen at once raised a question as to the propriety of Prince Konoye's intervention. His position as President of the Upper Chamber appears to have constituted a fatal objection in their eyes, and as that conception could not be dispelled, the Prince's endeavour proved futile.

That is the version of the affair given on Saturday by all the Tokyo newspapers. If it be correct, it certainly does not redound to the credit of the political parties. Their mood must be singularly implacable if they refused even to listen to Prince Konoye on the ground that he is President of the House of Peers.

It is alleged that Prince Konoye was not authorized to formulate any terms of compromise. What he sought to learn was simply whether compromise would be acceptable to the parties, and as he had previously assured himself that it would be acceptable to the Government and to the House of Peers, the parties have now the responsibility of having refused the olive branch tendered to them.

On the 19th instant the Prime Minister repaired to the Palace and had audience with the Emperor. This step was interpreted to mean that another suspension would be ordered on the 20th, and the prospect elicited quite an outcry in some quarters. The *Chiuo Shimbun*, for example, became almost hysterical in its protests against a postponement which would furnish opportunities for corrupting the members. Undoubtedly Japanese journalists are delightfully naïve. One can scarcely imagine the *Daily News*, for example, protesting against the prolongation of a debate in the House of Commons as the time thus gained would subject the members to temptation. The *Chiuo Shimbun*, generally a sober, level-headed journal, virtually takes the position at this juncture that nothing keeps the *Seiyu-kai* loyal and honest except lack of opportunity to be corrupt and treacherous. However, political partizans must not be taken too seriously at moments of crisis.

One feature of the commotion is that no one can have an independent opinion without exposing himself to be called a traitor and corrupt. Some six members of the *Seiyu-kai* ventured to think that there was no question worthy to cause a rupture between the Government and the House. They were promptly expelled from the Party, and, in common with some waverers on the Progressist side, they are now gibbeted by the press. That is all quite human. Perhaps these troubles may consolidate the parties and teach them the value of discipline.

On the whole the general view on Saturday morning was that when the House met on Sunday—it never sits on Sunday except under very exceptional circumstances—there

would be either a prolongation of the period of suspension or an order of dissolution. If the former, then compromise would follow; if the latter, then the Cabinet would resign before the new House came together.

Baron Kodama, speaking through the columns of the *Yomiuri Shimbun*, ridicules the theory advanced recently by some observers, namely, that Marquis Ito's hand is gradually being forced by his followers, and that, like the elder Saigo, he will be ultimately drawn into rebellion. That is certainly a fine fear. The notion of Marquis Ito in rebellion is supremely ridiculous. Seekers of historical parallels are sometimes betrayed into strange notions.

The publication on Sunday of Prince Konoye's report to the House of Peers, explaining the motive and cause of his procedure, shows that he was primarily animated by a desire to avert dissolution which would necessarily cause great inconvenience and loss. Having therefore ascertained that the Prime Minister also was desirous of avoiding dissolution, and having obtained the concurrence of the six sections of the Upper House, the Prince arranged a meeting with Mr. Kataoka. He took care to explain that he approached the latter in Mr. Kataoka's capacity of President of the Upper House, not in his capacity of a member of a political party. What ensued may be briefly summarized. Mr. Ozaki Yukio and Mr. Oishi Masami very soon became prominent as mouthpieces of the Opposition, and that fact is in itself sufficient to suggest that no possibility of compromise was likely to be discovered. Some attempt was made to base the Opposition's obduracy on a theory that intervention by the President of either House in such cases could not conduce to the smooth working of the constitution, inasmuch as failure would be likely to embitter the relations between the two Chambers. But the plain truth soon showed itself, namely, that the idea of compromise would not be entertained. Prince Konoye therefore abandoned the attempt, and in his report to the House of Peers he stated that further intervention on his part was out of the question.

Mr. Kataoka's report, made at a social gathering of the *Seiyu-kai*, is substantially the same as that of Prince Konoye. It shows, first, that Mr. Ozaki Yukio, acting as representative of his Party, declared compromise to be out of the question in view of the Government's attitude and assertions; and secondly, that, in answer to Mr. Oishi's objection about establishing an unconstitutional precedent, Prince Konoye replied that whereas interference from outside might be unconstitutional, he failed to see how any such argument could apply to action taken by the President of one of the principal constitutional assemblies. There the matter ended, the Opposition being determined not to show any sign of yielding.

Mr. Oishi Masami, in his report to the Progressists, assumes the credit of having made the initiatory declaration as to the impossibility of compromise. He represents himself as having said, when questioned by the *Seiyu-kai* leaders, that as the difference of opinion was fundamental, and as issue had been publicly joined, all attempts at intervention must be considered unconstitutional. His version of the difficulty connected with mediation by the President of the House of Peers is that he made a friendly exposition of his views to Prince Konoye; namely, that as the Upper Chamber virtually

occupies a position of conciliation between the Ministers of the Crown and the majority in the Lower Chamber, it is inadvisable that the President of the Peers should divest himself of his official character for the purposes of mediation.

It will be observed that each of the reports varies as to the distribution of responsibility, and that each of the leaders seeks to shift from his own shoulders the blame of having shown needless obduracy or resentment.

Dr. Hatoyama, commenting on Mr. Oishi Masami's report, declared that it perfectly expressed the sentiment of the Progressist Party. Unless the Government recognised that it had made a mistake and withdrew the objectionable bill now awaiting the Lower House's decision, there could be no change in the situation, and to attempt to effect a change by the aid of third parties was a course that could not be commended.

The latter part of the Progressists meeting derived special interest from an explanation offered by Mr. Hiraoka Kotaro. This gentleman was suspected of attempting to win over members of the Opposition to the Government's side and he was accordingly invited to make a statement. He did so at some length. The substance of what he said was that, in his opinion, his Party's enemies were, not the Government, but the *Seiyu-kai*. He considered that it would be simply suicidal for the Progressists to allow themselves to be absorbed into the ranks of the *Seiyu-kai*. If the *Seiyu-kai* alone openly fought the Ministry, a rupture would inevitably take place in the ranks of the big Party. But if the Progressists united their forces with those of the *Seiyu-kai* to attack the Cabinet, the latter must fall before such an onset, and the whole advantage would then remain with the *Seiyu-kai*. He had fruitlessly urged these views upon Messrs. Oishi and Inukai, and he had endeavoured to induce Count Katsura to abandon the land-tax scheme. But he denied that anything of the acts otherwise attributed to him was true.

On Saturday evening the Government announced that the period of suspension would be prolonged for seven days. This decision has elicited various opinions. Some see in it the creation of a further opportunity to corrupt members of the Lower House. We need scarcely say that such a view is taken chiefly by Opposition journals, but it seems to find more or less credence in independent quarters also. Others urge that as the failure of Prince Konoye's intervention has proved the hopelessness of compromise, the Government ought to dissolve at once, instead of taking half-hearted measures. A few, however, see in the Cabinet's action a conviction that the rank and file of the political parties are not as implacable as their leaders, and that a little further leisure for reflection will open the door to a better understanding. The *Jiji Shimpō* contends that the Ministry itself should inaugurate negotiations with the Parties instead of placing upon the latter's shoulders the whole responsibility of revising their views.

There can not, we think, be much difference of opinion about Mr. Oishi Masami's contention that the President of the House of Peers is not a proper person to act as mediator between the Government and the majority in the Lower House. It is only necessary to recall the names of Baron Nakajima Nobuyuki, Mr. Hoshi Toru and Baron

Kusumoto. Every one of these men, when President of the House of Representatives, frankly lent his aid to effect compromises or conciliations, and the party politicians in the Lower Chamber had nothing then to say about unconstitutional procedure. Why should what is proper and becoming on the part of the President of the Representatives be unbecoming and improper on the part of the President of the Peers?

Our readers will understand the kind of folks that accuse the Cabinet of resorting to corruption when we say that they are led by the *Yomiuri Shimbun* and the *Chiuo Shimbun*. We observe with surprise that the *Japan Times* also is in the same camp. But considering that suspension of the Lower House has been frequently resorted to in the past by Japan's greatest statesmen, and considering that it is a recognised constitutional resource, we do not perceive why the Katsura Cabinet alone should be suspected of abusing it. Nevertheless it is certain that the standing Committee of the *Seiyu-kai* have expelled from their ranks five members of the Diet against whom they declare that they have obtained proofs of receiving bribes. Five men out of three hundred! What a Herculean task the Ministry are suspected of having undertaken! Count Katsura and his colleagues may be as unscrupulous as their worst enemies represent them to be, but is it conceivable that they should be so utterly fatuous as to attempt, by the aid of money which they do not possess, to win over a majority out of three hundred men in 7 days, when their efforts during five days are supposed to have won 5 members only, and when even that achievement involved an open scandal?

There is of course a rumour that the Cabinet Ministers are divided among themselves, Admiral Yamamoto and Baron Sone being in favour of conceding the land tax question, whereas Barons Hirata and Kioura advocate dissolution. That is mere conjecture, we take it.

Marquis Ito returned to his Oiso villa on the 19th instant, and is expected to be in Tokyo by the 27th to attend a banquet at the British Legation.

Tuesday, Dec. 23.

The Opposition journals continue to insist that the purchase of members of the Diet is proceeding apace. That is an obvious device to restrain defalcation. If the members know that any weakening on their part, whatever be its real motives, will entail an accusation of corruption, they must hesitate to incur such opprobrium. Meanwhile the Standing Committees of the Parties are endeavouring to hold the members in Tokyo. The Lower House will re-assemble on the 28th instant. That means that at soonest the New Year's recess can not commence before the 29th, whereas it usually commences on the 25th. Many members will be very seriously embarrassed if they can not return to their provincial homes in time to make their arrangements for the New Year. The Standing Committees have nevertheless proclaimed that no member must leave Tokyo before the 28th without having obtained the permission of the leaders in the House.

The *Jimmin*, which is regarded as the organ of the Kwanto section of the *Seiyu-kai*, affirms that the Government expects to win over to its side some 50 or 60 members of the *Seiyu kai*, some 30 or 40 of the Progressists, and some 70 or 80 of the Imperialists and Independents, thus com-

manding from 150 to 180 votes in the House. But as that would not suffice, strenuous efforts are now being made to acquire another score or two. The *Jimmin* certainly pays its Party a high compliment when it calmly assumes the corruptible character of the members.

Baron Suyematsu is represented as saying that unless the Cabinet withdraws its land-tax bill there is no possible margin of compromise. If the bill be withdrawn, he adds, the Budget Committee undertakes to show very promptly how funds can be obtained for purposes of naval increment.

It has been announced in the name of the President of the House that the members will be asked on the 28th instant to decide in favour of a vote by closed ballot on the land-tax bill. That decision, if it ever comes to be taken, will indicate clearly the nature of the voting on the bill.

Mr. Hara Kei was deputed by the Standing Committee of the *Seiyu-kai* to convey to Marquis Ito a report of the Committee's action in the matter of the Konoye-Kuroda proposal for compromise. Marquis Ito approved of the course the Committee had adopted. One can not help speculating what would have happened had the Marquis disapproved. Considering that the *Seiyu-kai* Committee and the sections of the Party decided upon the cardinal lines of their policy without consulting their leader, and considering that they disposed of the question of compromise without consulting him, it appears to us either that they intend to ignore his vetoes while taking advantage of his sanctions, or that the Marquis preserves for himself the position of being able to disavow and condemn. There must of course be many remarkable features in the exceptional conjunctures we are now witnessing in Japan. Not the least notable is the relation between the *Seiyu-kai* and its leader.

Wednesday, Dec. 24.

It is generally believed that Baron Kodama, Governor-General of Formosa, is endeavouring to act as mediator between the Cabinet and the Parties. In consequence, apparently of the Baron's visit to Marquis Ito, the latter summoned to Oiso Mr. Matsuda Masahisa, leader of the *Seiyu-kai* in the Lower House; Mr. Hara Kei, Chairman of the Budget Committee, and Mr. Kato Takaaki. The reasonable inference is that some kind of conference will be arranged, but as yet there does not appear to be much hope that a satisfactory line of compromise can be discovered.

Count Matsukata, who has gone to Kyoto in company with his newly married son and the latter's bride, is represented as telling a reporter of the *Osaka Asahi Shimbun* that he sees no hope of compromise. The House of Representatives, His Excellency is reported to have said, overtly admits the necessity of naval expansion and is covertly conscious that no better source of revenue can be found for the purpose than the land tax. Hence its opposition must be attributed to some independent cause, and the prospect is that unless the Cabinet resigns, dissolution of the House is inevitable.

Mr. Kato Takaaki has expressed some very drastic views upon the subject of administrative reform. As usual he goes to the heart of the matter and speaks in the most unequivocal terms. He would reduce the number of officials to one-third of the

present establishment; he would adopt a new financial principle for the State, namely, total abstention from all undertakings not directly concerning it; and he would gradually decrease to a vanishing point the subsidies given to steam-ship companies. Speaking from his own experience of twenty years' service, he declares that many Japanese officials in the higher grades have virtually nothing to do, and that their presence or absence would not make any difference to the conduct of private business. Neither does he see what occasion there is for the Government to spend national funds upon enterprises like plate-glass making, bank establishing, and so forth. It is the people's function to undertake such works. He is unequivocally of the opinion that the Katsura Cabinet's manner of approaching the problem of administrative reform is temporizing and perfunctory, and that its tendency to meddle in enterprises which do not concern it is fatal to sound finance. In short, he appears to be radically opposed to the present Ministry.

Thursday, Dec. 25.

There is as yet no definite news about the political situation. A meeting is to take place between representatives of the political parties and of the Cabinet, but it is impossible to say whether any basis of compromise will be discovered. The general impression seems to be that Marquis Ito regards the consolidation or disruption of political parties and the Cabinet's retention or resignation of power as comparatively trifling questions. What has real importance in his eyes is the problem of administrative reform, and concerning that matter his views differ radically from those of the Ministry, so far as can be judged from appearances, since the Marquis holds that sweeping reductions of the establishment are possible, whereas the Cabinet is supposed to hold that readjustments and amalgamations are the most feasible steps. We ourselves believe, however, that the interval between the opinion of Marquis Ito and the opinion of Count Katsura and his colleagues is very much less than the public at large imagines. Both statesmen are agreed that large diminutions of the administrative staff might be effected without impairing the efficiency of the machine. But it is natural that the painfulness of such a task should be felt more keenly by the persons asked to perform it than by the persons advising its performance. There is such a thing as humanity even in the conduct of State affairs. No Government would be acting wisely if, for the sake of achieving an economy not instantaneously imperative, it dismissed from the public service at a moment's notice and deprived of their means of livelihood thousands of men who have served faithfully at least, though not brilliantly, for a greater or less tale of years. A reform of that nature ought to be gradual: its cruelty ought to be softened as far as possible by the aid of time. Besides, it is not mere diminution of numbers that is requisite. Another essential need of the situation is that officials should be better paid. The salaries they now receive are not nearly sufficient to attract good men, or to retain them after practical experience has revealed their worth. Looking at the matter as outsiders, we should say that complete remodelling of the administration is undoubtedly necessary, but that if it were carried out on the basis most beneficial to the public service, the pecuniary saving would not be large.

Prince Konoye is said to have presented to the Premier a memorial embodying the views of a majority of the House of Peers. Briefly stated the memorial advocates withdrawal of the land tax bill, and the provision of funds for purposes of naval expansion by effecting a reduction of about 5 per cent. in the ordinary expenditures, postponing all Government enterprises that are not of an imperative character, and cutting down all grants that admit of reduction. It thus appears that the Upper House has approached very close to the Lower, the only difference between them being in the degree of immediate importance that each attaches to administrative re-organization. The Lower House would obtain from that source the greater part of the funds needed for the Navy, whereas the Upper House does not advocate such drastic changes in one direction only. Prince Konoye and his fellow-thinkers are said to be persuaded that dissolution of the Representatives would not conduce to the national interests.

On the whole the tendency at this moment is towards an understanding. That much at least may be said.

Mr. Ozaki Yukio, speaking through the columns of the *Fiji Shimpō*, makes three declarations: that the question of naval increment should be deferred until the country's foreign policy is definitely determined; that the house-tax problem should be postponed until administrative reconstruction has been effected; and that a grand combination of political parties should be made. As to the first of these points, Mr. Ozaki's meaning, indicated by his previous utterances, is that Japan should come to an understanding with Russia, when, of course, the necessity for increased armaments would assume a new aspect. As to the second point, it is merely an embodiment of the *Seiyū-kai's* avowed policy. And as to the third point, it is supplemented by an explanation that whatever individual members of the Lower House may think, politicians in general should welcome dissolution, since two or three consecutive dissolutions would effectually consolidate the parties. This last statement sounds very like an admission that the gulf which separates the parties from the *Meiji* statesmen is not yet sufficiently wide, in Mr. Ozaki's opinion. It is not a gulf of principle but a gulf of sentiment.

CHINESE NEWS.

Saturday, Dec. 20.

The principal official engaged in the task of revising the Criminal Code of China, is said to have urged that the first step taken should be the insertion of laws dealing with the question of religion. Nothing is stated as to the nature of the statutes that Mr. Lu Hai-kwan advocates.

The system of selling offices is reported by the *Fiji's* Peking correspondent to have been revived in Shantung, in spite of the Emperor's proclamation against it. This method of raising money dates from very old times in China.

The Peking University was reopened on the 17th instant.

Monday, Dec. 22.

The telegraph says that although Viceroy Yuan has been appointed to be president of the C.N.S.S. Company, in place of Taotai Shêng, the officials of the Company are ordered to consult with Shêng for business

purposes as before. One would imagine that if the Throne sought to create an impossible situation it could not have gone to work more effectually.

It was reported in one of our recent issues that for the sake of introducing uniformity in the organization of the Chinese telegraphs and expediting the transmission of messages, the Government proposed to buy up all the private lines. The *Asahi's* Peking correspondent now says that the prices offered by Viceroy Yuan, through whom the purchase is to be effected, being considered quite insufficient, the owners are anxious to sell their property to foreigners.

Wei Kwan-tao is said to have endeavoured to refuse the appointment of Viceroy of the Liang-Kiang, on the ground of inability, but his excuses were not considered by the Throne.

In spite of official denials, a belief is said to prevail in Peking that Prince Chun's younger brother will soon be raised to the position of Prince Imperial.

At length the evacuation of Shanghai seems to be about to become an accomplished fact. Three hundred German soldiers left on the morning of the 20th; the British were to follow on the 22nd, and the French on the 24th or the 25th.

The Hongkong Chamber of Commerce is about to hold a meeting to consider the adoption of the gold standard. Rumour attributes to a majority in the Chamber the view that so long as China remains a silver country Hongkong need not alter the basis of her currency.

The Great Northern Telegraph Company is said to have increased its rates, but the amount of the increase is obscure.

Tuesday, Dec. 23.

It has been decided that the Chinese Government shall pay a sum of 700,000 taels by way of compensation for property belonging to Roman Catholics which was destroyed in Shansi.

Work is said to be progressing rapidly on the Chin-ting and Tai-yuen Railway: that is to say, on the Hsiang branch of the Lu-Han Line.

Chang Chih-tung is said to have memorialized the Throne in the sense that the organization or management of the new Peking university is open to objection. It appears that Chinese high officials have little hesitation in denouncing one another's work—a result, doubtless, of the censor system.

A telegram from the *Asahi Shimbun's* Peking correspondent says that, according to a report from Viceroy Yuan, the Taku wharf and its appurtenances, recently restored by Russia to the Chinese authorities, were found to be absolutely intact. With reference to this report Yung Lu is said to have urged upon the members of the Board of War that intercourse with China's neighbour, Russia, should be conducted on a friendly basis, as her conduct in this matter had been worthy of a great Power.

Berlin telegraphs to the *Asahi Shimbun* that the budget for Kiao-chow next year is 52,876,000 marks, of which sum the home Government provides 12,420,000 marks, and

Kiao-chou itself contributes only 450,000 marks. Nothing is said as to the source from which the rest of the money is to come. Possibly there is a mistake in the figures.

After all that has been heard about navigating the upper waters of the Yangtse, it seems almost humiliating to learn from the report of Mr. Acting-Consul Willis at Ichang, that attempts to run merchant steamers between Ichang and Chungking have been abandoned, for the present at all events. Some twenty years ago this subject received much attention. The English public was not a little entertained by the evasive reasons that the Chinese Authorities advanced against the navigation of the Upper Yangtse, one of those reasons being the danger of monkeys rolling stones down the gorges on the decks of steamers. Of course the greater the reluctance shown by the Chinese the keener became the desire on the British side to insist upon the implementing of treaty privileges, and at last a steamer started up the rapids. She was called the *Pioneer*, and in 1900 she passed into the possession of the British Government for transport purposes elsewhere. That same year a German steamer, the *Sui-hsiang*, was wrecked near the Kung-ling rapid, and thereafter the idea of steam navigation appears to have fallen into disfavour, though the *Woodcock*, as well as a French gun-boat, the *Amiral Obry*, subsequently succeeded in reaching Chungking safely. Mr. Willis says that beyond doubt specially-constructed steamers can do the voyage at certain seasons of the year, but the profits of the enterprise are problematical, in spite of the high rates of freight earned by the junks that now do the carrying business. A better plan, according to expert opinion, is to provide mechanical means of hauling native craft over the rapids and organizing a system of towage between.

One of the things impossible for China is to be right in the eyes of some of her foreign critics. She has been much abused for not organizing and equipping her land forces on uniform and enlightened lines. But now that she is about to make the attempt, she is accused of being influenced by a sinister motive, namely, the repetition of the scenes of 1900 on a wholesale scale. The project of transferring all the telegraphs to the possession of the State is attributed to the same evil purpose: that is to say, she will take care not to permit the transmission of any news conducive to the protection of foreign life and property, or tending to interrupt the prosecution of her own wicked purposes. Whatever she does is wrong.

From the text of the decree about army reorganization we find that the scheme is substantially the same as that telegraphically reported to Tokyo, namely, that the divisions of the Peiyang (Chili) and of Hupeh are to be taken as models, and that officers are to be sent from the other provincial divisions to study with these troops. The Peiyang will serve as a training ground for the men of Honan, Shantung and Shansi; and Hupeh will perform a similar office for the forces in Kiangsu, Anhui, Kiangsi and Hunan.

Wednesday, Dec. 24.

The mouth of the Peiho is frozen and navigation is suspended. This obstruction comes somewhat late in the present season.

The long-talked-of *Chili Gazette* is to be published during the current month, says the Peking correspondent of the *Asahi*

Shimbun. He adds that Viceroy Yuan himself is expected to do the writing of leaders. That is incredible, of course.

It is alleged that Prince Sü has memorialized the Throne in the sense that a Chamber of Commerce should be organized in Peking, and that it should send envoys throughout the provinces with the object of inquiring into local trading conditions and endeavouring to introduce greater uniformity. The Emperor and the Empress Dowager are said to have approved of the proposal. Doubtless the measure would be more or less useful, but what China really wants for purposes of any kind of uniformity is improvement of transport facilities. A well known writer has said that a man can always locate himself geographically in the Middle Kingdom by the price he has to pay for salt.

The Chinese Government is reported to have issued orders for estimating the value of the China Merchants' S. N. Company's fleet, with a view to its purchase by the State, and subsequent transfer to the control of Viceroy Yuan.

Thursday, Dec. 25.

The Russian Representative in Peking is said to have presented to the Foreign Office a demand that an independent commissioner of customs should be stationed in Dalny to deal with the collection of duties on goods travelling by rail; and that matters connected with the overland customs and the posts in Manchuria should be under Russian control. These radical proposals are said to have thrown the Foreign Office into a state of perturbation and to have elicited a strong protest from the British Government.

KOREA.

It is alleged that Li Yong-ik has been pardoned and restored to his old office, Chief of the Imperial Estates Bureau. But, under the pretext of proceeding to Annam for the purpose of buying rice, he has embarked in a Russian man-of-war, with the connivance of the Japanese Minister, and has gone to Port Arthur, where he will remain until the clouds have rolled by. Meanwhile the Cabinet has been reconstituted as it was before these troubles, with the sole exception of the portfolio of finance, which goes to Kim Song-keun, in succession to Li Yong-ik. Who succeeds to the other offices filled by Li we do not yet know.

The Seoul correspondent of the *Kokumin Shimbun* sends to that journal a telegram suggesting that in spite of Mr. Stein's disavowal of any political purpose in connexion with the asylum granted to Li Yong-ik at the Russian Legation, such disinterestedness must not be wholly credited. An incident hitherto unpublished is mentioned by the correspondent, namely, that fifteen Russian marines were landed and brought to Seoul on the 15th inst. to serve as a guard for Li on his way to Chemulpo. It appears, according to the correspondent, that Mr. Stein called on Mr. Hayashi, the Japanese Representative, and informed him of the intention to employ these marines, the reason assigned being that the citizens of Seoul might offer some opposition to Li's departure from the city. In the sequel no signs of such opposition made themselves apparent, but the marines discharged the duty for which they had been summoned, and Li Yong-ik left the Korean capital escorted by Russian

man-of-war's men, to embark at Chemulpo on a Russian war vessel. Of course if these details prove correct, the conclusion will be inevitable that Russia has carried to a remarkable extent her interference in Korea's domestic affairs. But it will be wise to suspend judgment until full particulars are available. From the very fact that such procedure requires much explanation one may infer that explanation will be forthcoming.

Mr. Chalmers' Report shows that the foreign trade of Korea grew from 7,042,224 yen in 1892 to 27,481,775 yen in 1901; that is to say, it nearly quadrupled itself in 10 years. What makes the figures for 1901 more remarkable is that the close of the year was marked by serious trade depression owing to failure of the rice crop—the failure which revived the old trouble about arbitrary prohibitions of grain export. It will be remembered that the extent of the shortage was said to have been much exaggerated by the Koreans. The information given on this point by Mr. Chalmers' report is therefore specially interesting. It may be briefly summed up thus:—In two north-eastern provinces and two north-western, poor crops; in two west-central provinces, only one-fifth of the average rain-fall, and consequently a general failure of the rice crop, producing a condition that approximated to famine though subsequently relieved by supplies from other provinces and from abroad; in the remaining two provinces, an abundance of rain but an indifferent yield, other injurious factors being at work. Mr. Chalmers arrives at the conclusion that the proclamation prohibiting export was timely and useful at first, but that its withdrawal on Nov. 15th did no harm, the price of rice in Korea having risen by that date to a point higher than the price in Japan.

Gold figures largely in the exports from Korea. In 1892, the quantity that left the country was 852,751 yen, and in 1901 it rose to 4,993,351 yen. The mining syndicates are evidently obtaining good supplies of the metal. It is of course probable that considerable quantities were smuggled out of the country in addition to the above figures.

If commodities alone be considered, Korea ought to be undergoing a steady drain of the precious metals. Her imports largely and uniformly exceed her exports. Thus the figure for imports in 1901 was 14,026,470 yen, and the figure for exports (excluding gold) was 8,461,949 yen. The revenue obtained from duties in that year was 1,325,414 yen. It appears, therefore, that Korea is much more fortunate in her customs collection than either Japan or China used to be, for she levies an average of nearly 4¾ per cent, on her total trade.

The foreign shipping trade of the little empire is carried on almost entirely by Japanese steamers. The total tonnage of vessels entered in 1901 was 985,309, and out of that aggregate Japanese steamers stood for 807,190 tons. Japan also took nearly all the gold exported, namely, 4,857,201 yen out of 4,993,351 yen. The rest went to China.

Mr. Minoda Saburo of Yokohama has received a commemoration medal for the North China Affair from the Emperor of Germany through Vice-Consul von Hagen. Mr. Minoda lent his land at Hachioji-yama Honmoku, to the German Navy on which to build a hospital.

ANGLO-JAPANESE BANQUET IN TOKYO.

On the evening of the 17th instant a hundred and forty officers of the Japanese Navy and British residents of Tokyo sat down to a banquet given in the Imperial Hotel by the *Tobō-Kyōkai* (Oriental Countries Association) for the purpose of welcoming Admiral Ijuin—now Sir Goro Ijuin, K.C.B.—and the officers of the Squadron which recently visited England on the occasion of the Coronation. The chair was taken by His Highness Prince Konoye, President of the Society. On his right sat Admiral Ijuin and on his left Sir Claude MacDonald. During the dinner the band of the *Asama* played some excellent music.

The health of His Majesty the Emperor of Japan was proposed by Sir Claude MacDonald, who received an ovation when he rose. He said:

EXCELLENCIES AND GENTLEMEN,—It gives me sincere pleasure to have the honour of proposing the health of His Majesty the Emperor of Japan; a toast which, I am sure, will be drunk with the utmost enthusiasm and loyalty by His Majesty's subjects, and which, I can affirm, will be drunk with not less enthusiasm by my own countrymen, for His Majesty is the Sovereign not only of a friendly country but also of a country which is our ally.—(Loud applause.)

The toast having been drunk with hearty cries of "banzai," Prince Konoye briefly but in warm terms proposed the health of His Majesty King Edward the Seventh, which elicited from the Japanese guests a hearty demonstration. Mr. Kato Takaaki then rose to propose the health of the guest of the evening. He said:—

EXCELLENCIES AND GENTLEMEN,—On behalf of this Society I have to express gratitude for the attendance this evening of His Britannic Majesty's Minister and of the other English gentlemen present. I assure you that we deem it a great honour. The British Foreign Secretary, Lord Lansdowne, speaking recently at the meeting of a Society in London, said that since her alliance with Japan, England's respect for her ally had increased as her knowledge of that ally grew more intimate. This news having been sent across the wires, is necessarily much abbreviated. We know nothing of the context in which the words were uttered, but I have no doubt that they truly express the general tenor of the speech. The Japanese people have always had high respect for the English, and since the two countries became allies, that sentiment of respect has unquestionably ripened into one of complete confidence. It is the sincere and unanimous wish of the whole of the people of the Japanese empire that the advantages of the alliance may be felt more and more by the two countries, that it may contribute to the preservation of the world's peace, and that their union may be long continued. (Loud applause). I am sure that His Britannic Majesty's Minister is fully cognizant of this. We all wish that our English allies may be animated by the same hope, and in pursuance of that aim two of our men-of-war went to England to take part in the Coronation Ceremony. They were commanded by a man of proved ability whom we could trust to adequately represent his country's progress as well as its sentiments, and the officers, warrant-officers and blue-jackets belonging to the Squadron were all picked men certain to do honour to Japan. Unhappily His Majesty King Edward was suddenly attacked with an alarming malady. We can imagine how poignant must have been the anxiety of his subjects, to say nothing of the bitter disappointment caused by His Majesty's illness at such a time. All nations sympathised with and shared their grief, and I venture to say that in no country was the feeling of sorrow and consternation more profound than in ours. Most joyfully were the tidings received of His Majesty's recovery, which proved to be so rapid that the *Asama* and the *Takasago* were enabled to remain long enough to take part in the review at Spithead. We were not a little proud to learn that the two ships proved to be as fine types and as well equipped as any unit of the great fleet assembled on that occasion. Here it is a pleasure to be able to refer to the extraordinarily warm reception given to the officers and men of the Squadron at place after place in the British dominions. They were feted and feasted wherever they went, and if their presence at the review was intended to be an evidence of Japan's sentiments towards England and of our people's desire to take a prominent part in festivities so important to Englishmen, the manner of their

reception served equally to demonstrate to the Japanese nation the depth and extent of Great Britain's friendliness towards us. It is only just to conclude that the continuously hearty nature of the welcome given to Admiral Ijuin, his officers and his seamen, was in some degree due to their own demeanour and evident proficiency in their duties, and that they worthily represented their country on that historical occasion. Let me also add a word about the band of the *Asama*, which, as I observed in several English newspapers, was much praised for the skill of its performances and was invited to play on many occasions. We may congratulate ourselves on the fact that if the ships, their equipment and the men commanding and navigating them, displayed the progress Japan has made in the arts of war, the music discoursed by the band of the *Asama* constituted an equal evidence of her progress in the arts that grace peace and tranquillity. If, gentlemen, we believe and hope that the journey of the two vessels, their presence at various places in Great Britain, the quality of their officers and the excellent conduct of their seamen did much to enhance Japan's credit, we also believe and not less earnestly hope that they helped to strengthen the Anglo-Japanese alliance and to assist in securing for it the permanency that we should all welcome. (Loud cheers). I ask you therefore to join with me in drinking the health of Admiral Ijuin, his officers and the seamen of the squadron that he commands, in thanking them for their exertions and in wishing them long life and prosperity. (Loud applause.)

Admiral Sir Goro Ijuin, who was loudly cheered on rising, thanked Mr. Kato in his own name and in the names of the officers and men of the squadron which it had been his honour to command, for the very kindly sentiments contained in Mr. Kato's speech, and further thanked all present for their manner of receiving the toast. He disavowed altogether any title on his own behalf to the eulogies pronounced by Mr. Kato, and declared that whatever success had attended the visit of the Squadron to England must be attributed in the first place to the gracious wisdom of the Sovereign under whose beneficent administration they lived, in the second to the zeal and assiduity of the officers and men, and above all to the goodwill of the English people. It was impossible for him to speak in too grateful terms of the treatment that he, his officers and his seamen had received at the hands of the British people everywhere. Alike on the journey to Europe, during the course of which they had been frequently reminded of the greatness of the British Empire, and after their arrival in England, they had everywhere found a welcome such as they could never forget. They ventured to attribute these demonstrations in a large degree to the sincere friendship which the English people felt towards Japan; friendship which the Japanese most heartily reciprocated. But they knew also that much was due to the kind foresight of His Excellency Sir Claude MacDonald, whose good offices had been earnestly exercised in their behalf. He wished to assure Sir Claude that his kindness was understood and appreciated, and that it deepened the sentiment of friendship entertained by the officers and men of the Japanese Navy towards a country which had always been their model and was now happily their ally (Loud applause). On his own behalf and on behalf of his officers he desired to repeat their expressions of profound gratitude for the undeserved honour paid to them that evening, and he begged, in conclusion, to invite them to drink the health of the *Tobō Kyōkai*, with best wishes for its long and prosperous career.—(cheers).

This toast having been drunk amid "banzais," the party broke up shortly afterwards, but several of the naval officers and their British friends subsequently repaired to the Tokyo Club where the alliance was cemented over many a cup of kindness into the small hours of the night.

THE SIAMESE PRINCE ROYAL.

The Emperor visited the Crown Prince of Siam at the Shiba Detached Palace on the 18th instant, and presented to His Royal Highness the Grand Order of the Chrysanthemum. In the afternoon the Prince visited the Japanese Imperial Ministers and the Ministers of State, and in the evening His Royal Highness witnessed a top-spinning performance by Matsui Gensui. Before the Emperor's visit the Prince was entertained with fish-netting in the lake of the Palace. On the 19th instant he was present at a review of the Guards on the Aoyama Parade Ground, and he subsequently lunched at the Austro-Hungarian Legation.

After the review in the morning and luncheon at the Austro-Hungarian Legation, the Prince Royal of Siam received the Ministers of State and the Foreign Representatives at the Shiba Detached Palace on Friday. In the evening, the Prince gave a banquet to their Imperial Highnesses Princes Fushimi, Kacho and Nashimoto, and to the Ministers of State.

On the 20th instant, the Prince visited the barracks of the Guards and subsequently inspected the Koishikawa Arsenal, after which he lunched in the Koishikawa Park, and in the afternoon he proceeded to the Officers College, the Middle Elementary School and the Elementary School of the military establishment. In the evening the Prince dined at the official residence of the Minister of State for Foreign Affairs.

The Nagoya citizens are laying themselves out to give a great entertainment to the Prince on his return journey through that city. They propose to hold a grand ceremony for consecrating the site where a temple is to be erected for the accommodation of the celebrated Buddhist relics; but unfortunately the site has not yet been definitely settled, several land-owners being anxious to have the honour of offering the required space.

On the 21st instant, the Siamese Minister and the Staff of the Siamese Legation were invited to the Palace for duck-hunting sport, and subsequently they lunched with the Prince, the guests including three of the Imperial Princes, Field-Marshal Marquis Oyama, Field-Marshal Viscount Nozu and other distinguished personages. In the afternoon, there was a performance of wrestling within the Palace grounds. The Prince Royal is to leave Tokyo on the 24th.

It is stated that the King of Siam has addressed to the Emperor of Japan a strongly worded telegram expressing thanks for the courteous welcome extended to the Crown Prince.

The visit of the Prince Royal seems likely to add another to the numerous associations already existing in Japan. The new society will call itself the *Nissen Kyōkai* (Japan-Siam Association). Its promoters are Messrs. Inukai Ki, Minoura Katsudo, Kammuchi Tomotsune, Professor Tomizu, Yokoyama Magoichiro, Shimaji Mokura (a renowned Buddhist priest), Mr. Kono Hironaka and others. They held a meeting in the Imperial Hotel on the 20th, and decided that as Siam and Japan have so much in common, a society should be formed for the purpose of making the two nations better known to each other.

On the 22nd the Crown Prince of Siam visited Yokosuka and Uraga and inspected the dockyards at both places. In the evening His Royal Highness dined at the Maple Club in Japanese style. On the evening of the

23rd, the Representative of Siam in Tokyo entertained the Prince and all the Foreign Representatives at dinner in the Imperial Hotel. In the forenoon His Royal Highness visited the Imperial University and lunched at the *Seiyo-ken* in Ueno Park.

The Crown Prince of Siam left Tokyo for Nikko on the 24th instant in the afternoon, thus bringing his official visit to an end. His Royal Highness is expected to return to Yokohama on the 26th, but the remainder of his stay in Japan will be unofficial. He has yet to visit Kobe, Kyoto and Nara. Japanese newspapers say that he will spend New Year's Day on board the Siamese cruiser.

The enterprise of American journalists has been remarkably displayed in connexion with the Crown Prince of Siam. A rumour having been circulated that the Crown Prince is to marry a Japanese Imperial Princess, the American paper not only publishes the story as an established fact, but also inserts a photograph of the alleged Princess, together with a photograph of a tea-party Her Imperial Highness is alleged to have given to a number of her lady friends. The picture of the Princess is the portrait of some common Japanese female who is about as close to the Japanese Imperial Family as the *New York Journal* is to truth, and the ladies entertained by Her Imperial Highness at tea are a bevy of *geisha*. Did the compiler of the paragraph in this interesting newspaper know that he was penning a falsehood? Obviously he did, for though he might have been deceived by the rumour of a marriage between the Siamese Prince and a Japanese Princess, he can not possibly have imagined that photographs purchased at random represented the Princess and her lady friends. The *Fiji Shimpō* notices this incident, and applies very strong epithets to the barefaced mendacity of the *New York Journal*. No epithets can be too strong. We talk about Oriental untruthfulness, thereby laying to our souls the sweet unction that we ourselves may be thankful for not being as the Eastern is; but in point of fact the audacity of journalistic lying in the Occident throws everything Oriental into complete shade. It is impossible to live long in the East without discovering that abstract truth possesses a smaller value among Orientals than it does among Occidentals. The Eastern creed in this matter is a creed of convenience. A man is morally justified in resorting to concealment or falsehood if the consequences of truth or frankness would be comparatively disastrous to himself or to others. This code is merely an extension of the social *convenances* recognised and observed in the West. It is permissible even among Puritans to plead imaginary indisposition as an excuse for some omission or refusal that would otherwise be a rudeness, and the laws of social intercourse sanction a number of small subterfuges as alternatives to offensive solecisms. An Oriental pushes the principle a little farther: that is all the difference there is. But a totally distinct category must be found for the newspaper reporter who deliberately applies himself to hoodwink the public, with the object, first of obtaining money himself and, secondly, of putting it into the pocket of his employer. There is no conceivable extenuation for that sort of performance. It is the worst kind of blackguardism, for in addition to deliberate falsehood there is the reckless selfishness of playing fast and loose with the

reputations of other people in the interests of one's own purse. It is not to be doubted that were the "fourth estate" entirely abolished, nations would have a much better chance of living at peace with one another; neither is it to be pretended that while Occidental journalism remains what it is the smallest pebble can be thrown at Oriental want of veracity.

THE SCHOOL-READERS AFFAIR.

Saturday, Dec. 20.

This trouble is growing larger. The police have arrested Mr. Hara Yoichiro, head of the *Kinkido*, and Mr. Anami Hisashi, Secretary of Kagawa Prefecture. Three Managers of the *Kinkido* have also been apprehended, and some thirty or forty documents seized by the police in the sequel of their search, are said to furnish evidence incriminating a number of persons. We do not clearly understand what accusations are preferred against the booksellers. They are said to have used bribes, it is true, but although an official is prohibited from taking bribes, a private person can not be punished for giving them. It would appear, therefore, that the offences charged against the proprietor of the *Kinkido* and others of his profession are giving false testimony (*gisho-zai*) and concealment of evidence (*shoko-yenmetsu-zai*) offences committed for the purpose of shielding officials who, in consideration of *douceurs* from the book-stores, recommended the adoption of certain readers.

It will probably occur to many that abuses of this nature might be prevented by organizing in the Department of Education a Committee for examining school books, with a proviso that no book unapproved by the Committee may be used at public schools. There is such a committee, and it performs exactly that function. But evidently its power is limited. It can pronounce a book serviceable but it can not pronounce a book to be the only one serviceable. It puts its *cachet* on every good book presented to it, and thereafter each prefecture is at liberty to choose for itself which of the books thus franked shall be used at the schools within its borders. It is for the purposes of the latter choice that undue influence is brought to bear.

Monday, Dec. 22.

There is a good deal of sympathy with Mr. Hara Ryoichiro, proprietor of the *Kinkido*, who has been arrested on a charge of concealing proofs of corrupt practices on the part of officials of the Educational Department. Mr. and Mrs. Hara are noted in Tokyo for acts of charity. It is alleged that they support about a hundred of their poor relatives, to say nothing of large sums given independently for benevolent purposes.

There have been more arrests, notably that of Mr. Takata Otani, School Inspector of Toyama Prefecture, and that of Mr. Nishitomi Toraji, Principal of the Sendai First Middle School. It is further reported that a warrant has been issued, or is about to be issued, for the apprehension of a high official of the Educational Department. On the 19th instant, the proprietors of ten restaurants and five *machi-ai-jaya* were summoned by the police to give evidence and for the purpose of having their books examined to show what convivial meetings took place between sellers of readers and officials competent to influence the sale. This affair is creating

great excitement in Tokyo. It will probably lead to the enactment of some severe regulations by the Educational Department. The profits resulting from the adoption of a reader at the schools in even one prefecture are so large that wholesale bribery is financially possible. The problem is one of very great difficulty. Perhaps the best plan would be to have readers compiled by a committee of scholars in the Department of Education, and to forbid the use of any other books at the public schools.

Wednesday, Dec. 24.

There has been another police search, extending in this case to twenty houses, some of them book-stores, others official residences. The search resulted in ten arrests, nine of them being officials and one an ex-official now in the service of the *Kinkido*. It is undeniable that a hot-bed of corruption has been discovered and is being vigorously stirred up. The Educational Department is, of course, primarily responsible for the cleaning of the Augean stable, for it can not be doubted that the police acted in the first instance at the suggestion of Baron Kikuchi, directly or indirectly. Probably the wholesale and vigorous steps now taken will have the effect of checking the abuse temporarily. Only temporarily, however, we apprehend. So long as such a great temptation exists, there will be men unable to resist it. Evidently the motive of the Authorities in granting to public schools the freedom of choice which has now been so flagrantly abused, is to promote competition, and open the field of reward to men of literary talent. But if such corruption results, the Department will have to assume the whole duty of compiling and franking text books. That system has its disadvantages, but it is a choice between two evils.

Thursday, Dec. 25.

There are now sixteen persons in the Tokyo House of Detention in connexion with the text-book scandal and six more are under arrest. There has been a third police search, this time of three houses. It is a great opportunity for the newsmongers. Some abominable stories are circulated, even a journal like the *Nippon* lending its columns for the ventilation of statements which ought to procure for their inventor a course of public scourging and a career of compulsory scavenging.

THE KOBE ADVISORY COMMITTEE.

In the annual report of the Kobe Advisory Committee the following statement appears:—

The Advisory Committee had several interviews, both collectively and through its Chairman, with the Municipal officials of Kobe regarding the proceedings that were being taken to enforce payment of the tax by distraint. The Advisory Committee found itself unable to agree with suggestions of the Municipal officials, that it should urge the foreign leaseholders to pay the tax under protest, first, because it appeared that there was no recognized means of making a formal protest; and secondly, because it was held that the enforcement of distraint would make the protest against payment of the tax more forcible.

It is certainly to be much regretted that the absolute futility of insisting upon distraint could not be brought home to the minds of either the Kobe residents or the Yokohama residents. The Advisory Committee speak as though some form of protest on the part of the individual foreigner was essential. Did the members of the Committee ever ask themselves what purpose would be served by such protest? A protest has one object and one only, namely, to preserve a

legal remedy. There was no question of legal remedy in the matter of the house tax. The remedy lay in diplomatic action, and diplomatic action had already been taken. No foreign resident entertained the remotest idea of appealing to a Japanese tribunal of justice against the Japanese Government's rendering of an international treaty. No Japanese tribunal of justice has competence to adjudicate such a question. Therefore a protest on the part of the individual foreigner was a frivolous superfluity, and to insist upon such an extreme form of protest as the suffering of restraint must be described as merely vexatious.

Another quotation from the same report is this:—

At the same time it is only just to say that the local authorities, who, of course, were acting under orders from Tokyo, showed every desire to avoid friction, and throughout the proceedings the measures taken for enforcing restraint were carried out with as little inconvenience to leaseholders as possible. The whole matter has now been referred to The Hague Tribunal, and it would be out of place to say anything further upon the issues involved. Whatever decision may be arrived at by that Tribunal we feel sure will be loyally acquiesced in by all the parties concerned, and the arbitration which is now in progress will, we hope, prove the means of settling a controversy which undoubtedly at one time tended to raise most unfortunate friction between the foreign community and the Japanese authorities.

This paragraph is permeated with just the spirit that the Kobe community might be expected to show, judging by their previous record. For they have usually proved themselves thoroughly anxious to impart a friendly and sympathetic tone to their dealings with the Japanese. It might have been confidently anticipated that Anglo-Saxons, at all events, would loyally acquiesce in the decision of the arbitral tribunal. Nevertheless we are glad to find such an avowal in the Kobe Committee's report, for it contrasts agreeably with the statement recently made by the leading Kobe newspaper, namely:—

Japan is now about to submit to The Hague Arbitration Court a question which, if it is won on technical points, will be won at the expense of antagonising a large body of foreign residents, and if it is lost will involve loss of "face" that will certainly not be to the credit of Japan.

Commenting upon this last utterance, three months ago, we wrote:—

Is that the spirit with which Englishmen approach the arbitral tribunal? Do they intend, if the issue be against them, to condemn it as a mere concession to technicalities, and to maintain their conviction that they have been harshly and unjustly treated? We have never observed anything warranting such an insult to Englishmen's sense of fairness. They will approach the arbitral tribunal with a very different mood, unless their habits of thought should greatly change within the next twelve-month. They will approach it with the frank intention of accepting its judgment, just as they have accepted its intervention, loyally and unreservedly, and the last prompting of their disposition will be to descend to the littleness of discounting the other side's victory by attributing it to technical pleas, or citing their own success as a reproach to Japan.

It is plain from the language of the Kobe Committee's report that our estimate of their mood was correct.

Another point made by the Committee has reference to the procedure in paying the so-called "land-rents." The money having been collected, is forwarded to the Central Government, which in turn, transferred the greater part of it to the municipal officials. In the opinion of the Committee the fact that foreign residents contribute to municipal funds is obscured by this method, and many Japanese learn to believe that the money coming from the Central Government to the municipalities is a species of subsidy entirely independent of the

sums paid by foreigners. The objection has probably some force, but we are inclined to suspect that the Committee fail to distinguish between national and local taxes. The former are invariably transmitted to the Treasury, and as the land tax which forms part of the "rent" is a national impost, the manner of its collection and its destination are necessarily fixed. With regard to the language of the treaty, namely, "the common funds and property, if any, belonging to such Settlements, shall be transferred to the Japanese authorities"—that is to say, the authorities competent to assume municipal obligations and duties—, it is difficult to see that such language necessarily bears the interpretation assigned to it by the Committee. For there is no indication as to the agency by which the transfer is to be made. Certainly the meaning can not be that the foreign land-renters are to make the "transfer." The simple import of the clause seems to be in cases where under the old system, funds were handed to foreign municipal bodies, such funds shall hereafter be handed over to Japanese communal officials. Most assuredly the land tax, which forms part of the "rent," can not be included in the "common funds." Yet it would be so included according to the Committee's interpretation of the treaty.

SUGAR IN FORMOSA.

The *Japan and America* contains the following note:—

The Island of Formosa will soon become, under the wise economic administration of Baron Kodama and Dr. Goto, one of the great sugar producing regions of the world. Conditions are entirely different in the Orient, and it is only a remote contingency that beet sugar will ever compete seriously with the product of cane. In Europe and in the United States beet sugar may eventually drive out of the market, by force of low prices, the cane sugar of Louisiana, Hawaii and the Antilles, but even here there will probably always remain a certain demand for cane sugar, because of its peculiar qualities. In the Far East, on the other hand, the culture of the sugar beet has not even been begun. The only rival to cane sugar is the sugar produced from the sweet potato, as it is made in Formosa. There is an almost unlimited market throughout the Eastern world for sugar, and the Japanese administration in Formosa is wisely availing itself of the splendid opportunity for developing and supplying this market. It is estimated that at least one-half of the island is adapted to the growing of the sweet potato for sugar manufacture. The climate is moist and favorable, and the soil is as fertile as that of the Hawaiian Islands or of Java. The range of temperature is from 75 to 100 degrees Fahrenheit. The sugar section extends from the middle to the southern end of the island, and in this section rain occurs every day from May until the latter part of September, which is the growing season, and then there is no rainfall whatever until the following May, affording a perfect season for harvesting. The first sugar company was established about two years ago. In 1901 the product of sweet potato sugar was 20,000 bales, and this year it is estimated that it will reach 60,000 bales. A navigable river and good harbors afford fairly good transportation facilities, and a railway is in course of construction that will further develop the sugar district. The profits of the industry are encouraging, as one acre of land will produce 40,000 pounds of potatoes—worth about 80 yen, or \$40—and the manufacturing expense is only seventy-five cents for 1,000 pounds of sugar. Wages are low, a laborer receiving only about twelve to sixteen cents a day. In such circumstances there is no reason for astonishment at the rapid development of the industry. The competitors of Formosan potato sugar are the cane sugars of Java, the Philippines and Hawaii. These, however, cannot rival the Formosan sugar in cheapness of production, and it is claimed for the latter that it is fully equal in quality to the best cane sugar of the tropics.

LAWN TENNIS IN TOKYO.

The results of the Men's Singles in the Tokyo Lawn Tennis Club Tournament were as follows, the game being 90 up:—

FIRST ROUND.

Count Hirofusa (x17) beat Mr. Kirby (x25) by 90 to 73.
Mr. Kabayama (x3), beat M. de Man (x10) by 90 to 84.
Prince Koudacheff (x15), beat Mr. Ferguson (x28) by 90 to 61.
Mr. Lefroy (scratch) beat, Mr. Kawakami (x27) by 90 to 63.
Mr. Chapman (scratch), beat Mr. Brindley (x12) by 90 to 66.
Mr. James (x17), beat Captain Marsh (x17) by 90 to 89.
Captain Brinkley (x15), beat Mr. Strange (x28) by 90 to 47.
Mr. Takagi (scratch), beat Mr. Birnie (x15) by 90 to 69.
Mr. Tanaka (x10), beat Mr. Lay (x18) by 90 to 83.
Mr. Messayedoff (x15), beat Mr. Mitsui (x30) by 90 to 85.
Mr. White (x20), beat Mr. Vickers (x17) by 90 to 85.
Mr. Panafieu (x15), beat Viscount Dejean (x20) by 90 to 87.
Mr. Von Erckert a Bye.

SECOND ROUND.

Mr. Chapman (scratch), beat Mr. Von Erckert (x20) by 90 to 59.
Captain Brinkley (x15), beat Mr. Lefroy (scratch) by 90 to 76.
Prince Koudacheff (x15), beat Mr. Messayedoff (x15) by 90 to 57.
Mr. Takagi (scratch), beat Count Hirofusa (x17) by 90 to 59.
Mr. Kabayama (x3), beat Mr. White (x20) by 90 to 70.
Mr. Tanaka (x10), beat M. Panafieu (x15) by 90 to 44.
Mr. James a Bye.

THIRD ROUND.

Captain Brinkley (x15) beat Prince Koudacheff (x15) by 90 to 86.
Mr. Kabayama (x3) beat Mr. James (x17) by 90 to 79.
Mr. Takagi (scratch) beat Mr. Tanaka (x10) by 94 to 81.
Mr. Chapman a Bye.

FOURTH ROUND.

Mr. Kabayama (x3) beat Captain Brinkley (x15) by 90 to 84.
Mr. Takagi (scratch) beat Mr. Chapman (scratch) by 90 to 70.

LAST ROUND.

Mr. Takagi (scratch) beat Mr. Kabayama (x3) by 91 to 78.

Thus the tournament was won by Mr. Takagi, who played splendidly throughout, his volleying, half-volleying and back play being equally excellent.

CENTRAL SANITARY BUREAU.

The Central Sanitary Bureau has achieved the feat of issuing in English its report for the year 1897, a copy of which by the courtesy of the Director, Dr. Morita Mokiichi, we have before us. Though it is an old story, some of the information is not without interest. How many people, for example, are aware that vaccine lymph is made by the gallon, like *sake* or beer? In 1897 the total quantity obtained, including 1621.6 gallons carried over from the previous year, was 63,604 gallons.

Another item to be noted is that the deaths from poisoning numbered 277 and the cases 601, but we are left in the dark as to how many of these were accidental and how many with suicidal intent. It may be concluded that the cases attributed to the *fugu* or glove-fish (*tetrodon*) belonged to the former class, 108 persons falling ill after eating this hazardous delicacy and a large proportion (66) dying. Lobsters and shrimps appear to have been less deadly, for of 55 persons affected, four lost their lives. There is much more which might be extracted but it is discouraging to deal with statistics five years old.

THE JAPAN SOCIETY.

The Japan Society continues to flourish in London. Its programme for the season 1902-3 is as follows:—

1902.

Tuesday, Oct. 14th—"On Journalism in Japan," by Motosada Zumoto, M.J.S., Editor of *The Japan Times*, and late Private Secretary to His Excellency the Marquis Ito, Hon. M.J.S.

Wednesday, Nov. 12th—"A Woman's Tragedy," by Professor Lafcadio Hearn, Imperial University, Tokyo, Hon. M.J.S.

Wednesday, Dec. 10th—"Some Japanese Artists of To-day," by John H. Dixon, J.P., F.S.A., M.J.S.

1903.

Wednesday, Jan. 14th—"The Dawn of Western Influence in Japan," by Wilson Crewdson, M.A., F.S.A., Member of Council, J.S.

Wednesday, Feb. 11th—"The Finances of Japan," by R. A. McLean, F.R.G.S., Member of Council, J.S.

Wednesday, March 11th—"Some Features of Japanese Architecture," by F. Yeats Edwards, Member of Council, J.S.

Wednesday, April 8th—"A Gossip on Japanese Art," by M. Tomkinson, D.L., J.P., F.R.G.S., Member of Council, J.S.

Wednesday, May 13th—"Some Striking Female Personalities in Japanese History," by T. Hamaguchi, B.A., (Cantab), M.J.S.

Wednesday, June 10th—Annual General Meeting. After which a Paper "In Memory of Will Adams, the first Englishman in Japan," will be read by A. Dioso, F.R.G.S., Chairman of Council, J.S.

A Conversazione will be held during the Session, the date and other particulars of which will be duly announced.

Meetings of the Council will be held on the first Wednesday in each Month, at 4.45 p.m.

Twelfth Annual Dinner—Thursday, May 14th, in the Whitehall Rooms, Hotel Metropole, His Excellency the Viscount Hayashi, LL.D., D.C.L., President, J.S., in the Chair.

SILK.

Tokyo newspapers comment on the development of the silk trade during the year now drawing to a close. From January last up to the 20th of the present month, the aggregate value of the silk exported was 71,862,844 yen, and it is confidently expected that the close of the year will see a total of 75 million yen. The figures for each month are given as follows:—

	Yen.
January	6,727,921
February	5,299,862
March	2,670,726
April	5,075,809
May	4,705,792
June	1,191,563
July	7,302,969
August	11,125,229
September	9,735,444
December (to 20th).....	6,667,344

The comparative figures for the past 11 years are.

	Yen.
1892	36,269,744
1893	28,167,411
1894	39,353,156
1895	47,866,257
1896	28,830,602
1897	55,630,460
1898	46,047,411
1899	62,627,721
1900	44,657,029
1901	74,667,311
1902 (to December 20th)...	71,862,844

NOTES ON CURRENT EVENTS.

The *Fiji Shimpō* has an article commenting most favourably on the very easy terms offered by *The Times* to Japanese purchasers of the "Encyclopedia Britannica." It says:—"If even as much as one person, having obtained the book on the system of deferred payments, violates his engagement, Japan's credit will be impaired. *The Times*, on its side, regards the Japanese in the same light as Europeans and Americans and is willing to place the same trust in

them. Of, course the persons that buy the Encyclopedia in Japan will be chiefly scholars and students, who may be relied on not to violate their engagements, but should any one fail to observe his promise, it will be not only a disgrace to himself but also an injury to Japan's credit and a disappointment to the expectations of foreigners. Thus the consequences of any want of faith would be wide, and though there is probably no occasion to feel uneasy, we venture to write thus on the subject."

The great Morgan railway trust is not to complete its wholesale scheme without opposition. A lawsuit has been commenced against Mr. Morgan by the Railway Commissioners of Kentucky. They claim that his intended fusion of the railway systems of the southern states will have the result of giving to one man absolute control of the transport facilities in ten states having a population of sixteen millions. That is a direct challenge of the legality of trusts. It raises an issue of the highest interest.

News has been received in Tokyo of the death on the 14th instant in Washington of Mrs. General U. S. Grant. The Empress of Japan has addressed a message of condolence to the family.

In reports of competitive tenders one generally hears only of the prices set forth in the tenders and the usual assumption is that the business goes to the lowest tenderer. That is not the rule in England, however. Last month the Leicester Town Council had to discuss the acceptance of tenders for tramway material—4,800 tons of rails and 170 tons of fish plates. Fourteen tenders had been received, one half from foreign firms and one half from British. The lowest foreign tender was £30,485 and the highest £32,579, whereas the lowest English tender was £32,325. In fact the cheapest English firm did not offer better terms than the dearest foreign. Nevertheless the Town Council recommended the acceptance of the English tender on the ground that although it was £1,840 higher than the lowest foreign offer, "foreign rails were not to be compared with English for either quality or durability," and the higher tender "would give the best value for the money." That is a point worthy of attention in this country.

A curious illustration of the old and the new in combination is furnished by Messrs. Neale and Wilkinson, who, while addressing us in "Jeddo," as though time had reverted to the days of Kämpfer and Coxinga, send us simultaneously a copy of their "A.B.C. Tariff of Rates," showing that they carry parcels to all parts of the world at rates cheaper than those charged by the post office. A great advantage of the circular is that it enables one to find at once the cost of forwarding a parcel to any given place, according to weight and dimensions. There is in fact no limit of size or avoirdupois, but of course these things have an important bearing on charges. We learn from the Tariff that a parcel not exceeding one cubic foot or weighing more than 20 lbs. can be sent from Japan to any part of England for 3 pennies per pound—nothing less than a shilling being charged, however—and that a parcel measuring 7 cubic feet and weighing 140lbs. costs 14 shillings. These are the rates for "Express Goods Service." There is also a "Special Through Service" which costs more and is faster.

The farewell to Mrs. Buck brought toge-

ther a great number of friends of all nationalities, and profound regret was evidently felt at parting, under such sad circumstances, from a lady who has endeared herself to all by kindness and hospitality, and whose deeds of charity have been universal and untiring during the years of her residence in Tokyo. Doubtless it was a wise choice to bid good by in the comparative quiet of the Legation rather than face the ordeal of such a demonstration as must otherwise have taken place at the railway station on Wednesday. We venture to express a hope that Mrs. Buck may be able, by and by, to revisit a country where a hearty welcome always awaits her, and where the memory of her noble husband will remain green for many generations.

Miss McClean has thoroughly won the heart of the officers and men of the Japanese Navy. She is spoken of as the "Mother of the Navy." In spite of her 70 years of age, she showed the greatest activity on the occasion of the visit of the *Asama* and *Takasago* to England. Day after day she conducted large parties of the men all over London, showing them the sights and obtaining facilities of every kind for them. The seamen made a beautiful gift of artificial flowers to show their gratitude, and it is now announced that the Emperor has bestowed upon Miss McClean the Sixth Class of the Sacred Treasure.

The atelier and work-shops of the renowned sculptor, Mr. Takamura Kōun, Sendagimachi in the Komagome suburb of Tokyo, were destroyed by fire at 11.45 a.m. on the 21st instant. Apparently the conflagration had its origin in a defective stove. All Mr. Takamura's models, including those designed for the Osaka Exhibition, and many sculptures of his father, Tōun, were burned. The loss is irreparable. It is not stated whether there was any insurance.

There is not yet any prospect of rest for the renowned Buddhist relics. The Nagoya committee shows no disposition to pay the debt to Kyoto, and the citizens are said to have concluded that they had better refrain from sinking a large sum of money in the building of a sanctuary for relics the very acquisition of which has caused so many complications. Their coin, they think, might be better employed for educational or sanitary purposes. Hence the relics are not unlikely to make another journey to Kyoto. Meanwhile the goods and chattels of the celebrated temple of Aki-ha in Totomi have been seized in execution of the Kyoto debt, the abbot of that temple being the vice-chairman of the Nagoya Committee.

The London *Spectator*, which never tires of demanding that there should be an understanding between Russia and Great Britain and of declaring that no understanding must be entered into by the latter with Germany, published on Oct. 25th a letter from which the following is an extract:—

A few years ago some sailors landed from a German warship at Singapore, got drunk, committed assaults, and were locked up by authority. The captain of the man-of-war landed a company of marines, broke the prison door, and returned with the prisoners in triumph, in defiance of the Governor's protest.

The writer of the letter, who signed himself "Cantus," affirmed that this is a "perfectly authentic" example of Germany's "scornful hostility" towards Britain. The attention of the *Straits Times* being drawn to the story, that journal scoffs at it, and declares that there is no record of such an occurrence.

THE POLITICAL SITUATION.

BARON KODAMA proceeded again to Oiso on the 21st instant and was still there at the time of writing this—Monday forenoon. It is generally supposed that he is endeavouring to discover some line of compromise. Opposition journals maintain that the Cabinet is prepared to reduce the proposed rates of land tax, or even to withdraw the bill altogether should no other course prove sufficient to placate the political parties. It is plain, of course, that the withdrawal of the bill would not seriously jeopardise the programme of naval increment. The present rate of land tax continues to be leviable until the close of 1903, and the small appropriation—2½ million *yen*—required for the purposes of naval increment in the year 1903-4, is independent of the land tax. So far, then, as next year is concerned, the issue of the dispute between the Ministry and the House of Representatives will not be conclusive of the fate of naval expansion. But, on the other hand, it is plain that the Government can not order ships, thus pledging itself to heavy future payments, unless some certain source of revenue is in sight. If, then, the Parties are anxious, as they to be, profess, to save the naval programme, it would be for them to effect changes in the Budget of such a nature as to provide the requisite funds without drawing upon the land tax. That might be partially effected by cutting down the Cabinet's proposed appropriations on account of railway and telephone expansions. But the money thus obtained would, on the one hand, be insufficient and, on the other, would involve abandonment of projects which, whatever professions party politicians may make, are really desired by the constituencies. Thus in the end it becomes necessary to fall back on administrative retrenchment. It appears to us that since the Parties are convinced of the feasibility, and even the advisability, of such retrenchment, the best plan would be to form a committee consisting of members of the Ministry and party leaders with Marquis Iro at the head, of all, and to entrust to them, under authority of the SOVEREIGN'S mandate, the duty of mapping out a scheme of administrative reorganization, leaving the land-tax question in abeyance for the present. Speaking legislatively, there is no reason why a land-tax bill should be discussed by the Diet this season. Next session would be quite time enough. The only difference would be that if the matter were postponed until the 1903-4 session, the increased rates could not become operative until April 1st, 1904, instead of January, a delay of 3 months. In the meanwhile the re-organization committee would have had ample time to draft for presentation to the Diet at the close of 1903 a measure of administrative retrenchment such as might perhaps warrant the Government in dispensing altogether with land-tax increment. Thus considered, the points in dispute between the Ministry and the parties

are seen to be of the most trivial nature. There is no basis broad enough for erecting a political crisis of appreciable dimensions. Publicists allege that the land tax is the real crux of the situation. It is not. It is only the nominal crux. The whole question pivots on the possibility of effecting large retrenchments of administrative outlays. The Cabinet now in power denies the feasibility of such retrenchment. A considerable section of the public, headed by Marquis Iro and Count OKUMA, declare them feasible. Is not the formation of a committee of inquiry the best exit from the dilemma? If, on the other hand, the Cabinet considers that its dignity would be fatally compromised by associating itself with any measures of administrative retrenchment, then its natural and proper course seems to be resignation. Count KATSURA has won for himself in the ranks of Japanese statesmen a position which ought not to be compromised by unseemly clinging to office. As a point of political tactics it might be wiser for him to throw entirely on the shoulders of his opponents the burden of effecting retrenchments to which their asseverations have now irrevocably pledged them, and which will certainly make a host of enemies. But in the interests of the country it would be better that such retrenchments had the endorsement of all parties in the State.

SHANGHAI.

THE British garrison left Shanghai on the 22nd, so that the question of evacuation may now be regarded as finally settled. Why Great Britain sent soldiers to Shanghai at all has been from the outset a perplexing problem. If she considered that the Yangtse Viceroys, who had shown themselves so trustworthy and so competent, could not be fully relied on to preserve order and protect the lives and properties of foreigners, one or two vessels of war stationed in the river would surely have sufficed to make the situation secure, and would not have provoked any international complications. But the sending of troops materially altered the complexion of affairs. So long as "spheres of influence" are not definitively converted into protectorates, there is always room for an aggressive State to thrust itself between the Power exercising influence and the native authorities. International jurists, indeed, recognise it as a distinctly unfriendly act that a third party should endeavour to supplant the country which has succeeded in establishing influence. But the British Government must be well aware that there are European Powers animated by strong expansive tendencies and not specially restrained by considerations of intangible friendship. These Powers are waiting to seize anything that is not firmly held, and are ready to interfere actively whenever Great Britain attempts to invest her responsibilities with a tangible character. The sending of a garrison to

Shanghai lent itself to be interpreted as such an attempt, though its real motive was the protection of foreign life and property; and, at the same time, it furnished a most convenient pretext to jealous Powers who might reasonably contend that the duty of protecting their nationals could not be entrusted to England alone. Therefore the very exceptional step taken by England in garrisoning the Settlement with a military force could scarcely fail to produce complications. It was, in our opinion, an error of diplomacy, and it has entailed consequences which must be called regrettable, for Germany's very palpable effort to supplant Great Britain in the Yangtse sphere has intensified a feeling of umbrage which all level-headed Germans and Englishmen must desire to dispel.

THE BANK OF JAPAN'S RESERVE.

The Bank of Japan's specie reserve has reached the unprecedented figure of 130 million *yen*. Its loans at present aggregate only 37 millions and its margin of note issuing power is 15 million *yen*. This state of affairs appears to be regarded with satisfaction by some Japanese journals, but others justly consider it an evidence of business depression. As a matter of fact the stagnation in business circles is about as bad this winter as anything we can recall during the past thirty years. Small tradesfolk who usually have their hands full of work, are altogether idle, and signs of straitened circumstances are everywhere visible.

THE BOOKSHELF.

A Maker of the New Orient, Samuel Rollins Brown, by WILLIAM ELLIOT GRIFFIS, D.D.; Fleming H. Revell Co., New York, Chicago and Toronto.

IN bringing out a biography of the Rev. Dr. S. R. Brown, Dr. Griffis has plainly laboured under a serious disadvantage. The material resulting from his four years' residence in this country and collected subsequently by reading and by correspondence with friends in Japan was largely drawn upon for his biography of Dr. Verbeck, and the effect of this is seen in the character of the comments with which he connects the letters, extracts, etc., of which this later work in a considerable degree consists. Also he has found it necessary to repeat his accounts, slightly varied, of several incidents that are mentioned in the earlier work. Take the action of the *Wyoming* at Shimonoseki. This was at first written of in a moderate tone, being described as a "most wonderful exploit"—which indeed it was; but in the work now under notice it is declared to have been "the most brilliant action of a single commander in a single ship in all the annals of the American navy." It may have been so, but we should like to have that on better authority than Dr. Griffis'. We are quite at one with the biographer when he says that of the many agencies and influences stimulating evolution in Japan during the past half century none were more potent than the personality and work of the American missionaries. Of these Dr. Brown was one of the most prominent figures. Born in 1810 at East Windsor (Conn.), the subject of this work spent his boyhood at Manson, (Mass.), whither his parents had

removed, receiving his education at the local academy during the winter months. At the age of seventeen he began teaching school, and he entered Yale as a member of the class of 1832. There he eked out his scanty means by splitting wood, but being accomplished in music and having a good voice he laid down the axe for the tuning fork and the saw-buck for the baton (by the way is it usual for persons desisting from the operation of sawing wood to lay down the saw-buck?) and graduated in due course; taught school again for three years and afterwards entered the Theological Seminary at Columbia, S.C., continuing to earn money by holding classes for vocal and instrumental music. It is interesting to note that one of his pupils was Miss Martha Bulloch of Georgia, who afterwards became the mother of President Roosevelt. Having graduated, Dr. Brown offered himself as a missionary to China, but was eventually engaged on behalf of "The Morrison Education Society" (formed in memory of the great missionary who laboured for twenty-seven years in China) to teach the Chinese; married on Nov. 10th and ordained on Nov. 17, 1838, and at once sailed for China. He taught in the Morrison School at Hong-kong till (apparently in 1846) the state of his wife's health compelled him to return to the United States. For three years he was principal of Rome (N.Y.) Academy, then he accepted a call to the Reformed Dutch Church of Sand Beach, Owasco Outlet (N.Y.). He took a leading part in the founding of the first chartered woman's college in America, at Elmira (N.Y.), and when the Reformed Dutch Church determined to plant a gospel mission among the Japanese he volunteered, was accepted and sailed in 1859. Arrived at Kanagawa he went to live with his wife and two daughters (one of whom became Mrs. J. F. Lowder), in a Buddhist temple, and after preaching in the American Legation from a Bible given to him by Mr. Harris, the Minister (probably the first in the English language to be brought to Japan, in 1857) settled down to preach the gospel and to learn the Japanese language at Kanagawa. Of Dr. Brown's labours in this country, of his work of translation and teaching the biographer writes at great length but we are unable to follow him through the twenty years of the veteran missionary's career in this country. We could have wished that Dr. Griffiths had presented in a more attractive form the material at his disposal with reference to this part of Dr. Brown's life, and that he had made a better attempt at depicting the intense spirituality of the man; but to some extent one can appreciate the difficulties that he had to surmount. Yet something in the way of literary grace seems to be wanting. Dr. Brown was ordered to leave Japan in 1879 in consequence of his health's state, and in June, 1880, in Monson, where he had spent his boyhood, he passed away. He shares with Dr. Hepburn the glory of pioneer labours in the field of translation, and his efforts to promote a knowledge of English among Japanese and to spread the principles of Christianity will be long remembered by the people of this country.

The book is very handsomely got up and is certainly a credit to the publishers.

A Secretary named Yamada Yeiji, employed in the Shizuoka Shaiibansho, attempted to murder a woman named Tsuchiyama Hisa in a restaurant at Shimo Okeyamachi, Shizuoka, on the morning of the 23rd inst. He cut her throat and breast with a knife. The woman is not expected to recover.

THE POET'S CORNER.

"PEACE ON EARTH."

A vision passed me in the hush of night—
A woman clad in white and trailing robes
Embroidered o'er with rubies red, and pearls
That glimmered like the foam on summer seas.

Upon a storm-cloud rode she, blacker far
Than mourning night bereaved of her stars.
Yet though her raiment was so fair to see,
Pale was her face, as though continual tears
Had washed away the rosy flush of youth;
And wild her eyes, as though the Vulture
Care

Gnawed ever at her more than deathless brain.

I marvelled much that one so filled with grief
Should be so moved by empty vanities;
But as she nearer came I saw her pearls
Were every one a sad, warm human tear,
And every ruby was a drop of blood.

And nearer still she came; and then she spake,
And all things listened spell-bound to her voice.

"My name is Peace," she cried, "Eternal Peace,
And Earth my home, among her sunlit fields

Where daisies grow, and where the sweet thrush sings;
But men, who think that Joy will better dwell

If I, his spouse, am driven from their doors,
Have sent me far to wander from the world;
Yet, like a restless ghost, I ever long
To come to Earth, which is mine heritage.
Oft have I tried, but vain my best essay;
For men again have sent me from my rest."

She paused. And of a sudden from the cloud
A brightness burst, as if a thousand suns
Of more than earthly splendour pierced its gloom.

Upward I looked again. Pale Peace was gone:
And in her place there stood a dazzling form,

Of beauty, fairer than the western star,
Clasping in rapture sweet a new-born Babe.

Bright clouds of golden glory rolled in waves
About her feet. And, oh! her face was lit
With light divine, so that the whole world shone

With heavenly radiance which her presence shed.

Expectant Earth in deathlike silence lay:
Then of a sudden voices rose from air,
From sea, and from the smiling far-flung fields;

Blest voices of immortal spirits gone,
That in sweet tones, more joyous than the sound

Of rushing bells upon a summer night,
Sang forth a song which filled the hearts of men

With keen wild hopes and burning ecstasy:
A Song of Heavenly Peace new-born on Earth.

M. K.

A CHRISTMAS CANTICLE.

Lo! a pure Maiden, meek and mild,
Yearns to embrace a new-born Child;
Whose limbs her tenderest touch might win—
Yet thrill they with the God within.
She gazes! and what doth she see?
A gleaming Infant on her knee!

She pauses! can she dare to press
That glory with a fond caress?

Yes, 'tis her flesh—that Form so fair!
Her very blood is bounding there!
The Mother's Heart the palm hath won,—
It is her God! It is her Son!

Hers the proud gladness mothers know,
Without a thrill, without a throe;
And Mary, Mother undefiled,
Claims for her breast that God-like Child!

SACERDOS CATHOLICUS.

IN DIE NATIVITATIS.

"Wellcome, my Lord, Syr Christēmasse!"—
OLD TUDOR CAROL.

Welcome, Lord Sir Christēmasse,
Welcome all both more and less,
Welcome, welcome, merriness:
Gloria tibi Domine!

Jesu born of Mary maid,
In an oxen stall is laid,
Nowell! sing we all abrayde:
Gloria tibi Domine!

Shepherds heard their flocks among
Music of the heavenly throng,
Angel carol, angel song:
Gloria tibi Domine!

Forth they went to Bethlem town,
Found the child and knelt them down,
Homage to their King did own:
Gloria tibi Domine!

Magian pilgrims from afar
Gaspar, Melchior, Baltazar,
Read the riddle of His star:
Gloria tibi Domine!

Brought Him gifts of spice and gold,
Mystic signs of Orient old,
Saba's gifts by Psalmist told!
Gloria tibi Domine!

Nowell! Nowell! all men call,
Jesu save our souls from thrall,
Merry make, we pray you all:
Gloria tibi Domine!

C. W. STUBBS.

THE FELLOW WHO FIGHTS ALONE.

The fellow who fights the fight alone,
With never a word of cheer.
With never a friend his help to lend,
With never a comrade near—
'Tis he has need of a stalwart hand
And a heart not given to moan—
He struggles for life and more than life,
The fellow who fights alone!

The fellow who fights the world alone
With never a father's smile,
With never a mother's kindly tone
His sorrowful hours to guile,
Who joins the fray at the dawn of day
And battles till light is flown,
Must needs be strong, for the fight is long—
The fellow who fights alone?

Ah, bitter enough the combat is
With every help at hand,
With friends at need to bid godspeed,
With spirits that understand;
But fiercer far is the fight to one
Who struggles along unknown—
Oh, brave and grim is the heart of him,
The fellow who fights alone.

God bless the fellow who fights alone,
And arm his soul with strength!
Till safely out of the battle rout
He conquering comes at length,
Till far and near into every ear
The fame of his fight is blown,
Till friend and foe in the victor know
The fellow who fights alone:

DENIS A. MCCARTHY.

A CHRISTMAS BREAKING-UP.

A very delightful time was spent on Saturday afternoon by those fortunate enough to receive invitations to be present at the breaking-up entertainment of Mrs. Cahusac's High School. The Van Schaick Hall was the scene of the rendezvous and a very large audience assembled. The first part, consisting of a carol, recitations, songs, and calisthenics went along with a capital swing, the children displaying an aptness which speaks highly for the ability and assiduity of their teachers. The calisthenics were particularly gracefully done, and it made us regret that the little lads and lasses could not have had our experience and taken part in similar exercises in a big drill-hall along with 300 others. Those were drills and evolutions which will never fade from the memory. The second part of Saturday's programme was perhaps the most charming portion of the entertainment, being a musical setting of that most delightful of all fairy tales, "Cinderella." "Cinderella" was a classic in the land of Egypt before the days when Joseph ruled the empire of the Pharaohs as Grand Vizier and Cornmerchant Extraordinary, but it will never lose its freshness and attraction so long as childhood remains what it is. The pleasant play was all too short, so capitably did the children perform their parts, and at the close the little band were recalled again and again. One of the duets had to be repeated—the duet by *Sir Holiday* and *Sir Hector*, "The world is wide"—being most spiritedly sung and acted. Altogether Mrs. Cahusac, Miss Leach, Miss Ross, Miss Kilby, and the other teachers are to be heartily congratulated upon the success of their pupils. We must not forget to mention that Miss Elsie Blundell played all the incidental music for "Cinderella"; that three hearty cheers for Mr. and Mrs. Cahusac brought the formal part of the entertainment to a close; and that when the older folks had dispersed the children indulged in some nursery games and dances, bringing their term of hard lessons and scholastic exercises to a glorious close. The following was the full programme:—

PART I.

1. Christmas Carol... "The First Noël"
THE CHILDREN.
2. Recitation... "No Thank You, Tom"
MISS FLOSSIE EAGLING.
3. Song... "The Postillion"..... *W. Taubert*
THE CHILDREN.
4. Recitation... "Le Corbeau et le Renard" *La Fontaine*
MISS BERTIE CAHUSAC.
5. Calisthenics..... Indian Club Drill
6. Recitations... (a) "Lucky Dogs"
MISSSES AMY UNITE AND SOPHIE CAHUSAC.
(b) "How to Catch Fish"
MISS ISABEL UNITE.
(c) "Second Thoughts are Best"
MISS EDITH UNITE AND MASTER BARRY CAHUSAC.
7. Song... (a) "Frère Jacques"
(b) George's Song ... In Gotz von Berlichen.
MISSSES DOROTHY & NORAH STONE AND MASTER
BASIL CAHUSAC.
8. Recitation... "One, Two, Three"..... *H. C. Bunner*
MISS DORIS HILL.
9. Recitation... "An Incident of the French. *R. Brown-*
Camp"
MASTER BASIL CAHUSAC.

PART II.

"CINDERELLA."

A musical play, words by Marion Adams, music by Stephen R. Philpot.

DRAMATIS PERSONAE.

- Cinderella Miss Bertie Cahusac.
 Proudie..... Miss Maydie Cahusac.
 Crosspatch.. { Her Sisters } ... Miss Elsie Esdale.
 Fairy Godmother Miss Winifred Hill.
 Prince Charming..... Miss Norah Stone.
 Sir Holiday... { Courtiers } ... Miss Dorothy Stone.
 Sir Hector ... { } ... Master Basil Cahusac.
 Herald..... Master Barry Cahusac.
 Chorus of Fairies... { Misses Sophie Cahusac, Flossie
 Eagling, Doris Hill, Isabel,
 Amy and Edith Unite.

MISSIONARY ASSOCIATION OF CENTRAL JAPAN.

Resolutions adopted at a meeting of the Missionary Association of Central Japan held in Osaka December 16th, 1902.

Whereas Thomas Theron Alexander, for twenty-five years a faithful Ambassador of Jesus Christ to the Japanese, entered into rest in the city of Honolulu on the fourteenth day of November, 1902, be it

Resolved: that this Association expresses (1) its deep sense of personal loss in the death of one held in such high esteem and such tender affection; (2) its heartfelt sympathy for the bereaved wife and children; (3) its belief that the Missionary body in Japan has lost one of its most sympathetic, self-sacrificing and efficient members, one who preached not himself but Christ Jesus as Lord and himself a servant for Jesus sake.

Resolved: that a copy of these resolutions be sent to Mrs. Alexander, to the Presbyterian Board of Foreign Missions in America and to the press in Japan.

At a meeting of the Missionary Association of Central Japan held in Osaka December 16th, 1902, the following Memorial and Resolution were adopted: We, the members of the Missionary Association of Central Japan, feeling deeply the sense of our loss in the removal from our midst by death of His Excellency Colonel Alfred E. Buck, U.S. Minister to Japan, beg respectfully to express the same to his bereaved wife, Mrs. Buck, together with the assurance of our sympathy and prayers in her behalf; and we wish also to express our appreciation of his kindly and oft-expressed interest in all forms of missionary work and the influence he has exerted in its behalf, officially and otherwise, which have deeply impressed us and endeared him to us.

Resolved: that this minute be entered on the records of the Association, that a copy be sent to Mrs. Buck and that it be published in the local newspapers.

Committee { J. D. DAVIS.
T. C. WINN, Chairman of the
Association.
C. B. MOSELEY, Vice-Chair-
man.
H. LANING, Secretary.

FOOTBALL NOTES.

I have, in these notes not yet touched upon the duties of a full-back. But after all there is not much to add in a general way to the remarks made already as regards "fielding," "kicking," "saving," and "tackling." Let us, however, take these points *seriatim* and discuss them shortly as far as a full-back is concerned. A bad fielder at full-back is, perhaps, the most serious drawback a team can have, if only for the reason that there is no one behind him to retrieve his mistakes. Firstly then, with reference to fielding, a full-back should never, unless he is absolutely obliged to do so, wait to take the ball on the bounce. A few words on the subject from Gregor Macgregor, Scottish International in 1890, 1891, 1893, 1894 and the present captain of the Middlesex Cricket Eleven:—"The full-back should never, if he can possibly avoid it, allow the ball to bounce. He should endeavour to catch it as it is falling, for, owing to the formation of the Rugby ball, it is impossible to say with any certainty, when once it touches the ground, in what direction it will twist. I once had a very sad experience at Bradford, which has impressed itself on my memory. It occurred in one of the first matches in which I ever figured as full-back. The London Scottish was the team in which I was included, and I was standing in my own twenty-five when the ball was kicked to me. I waited, foolishly, to catch it on the first bounce; but the ball, with that maliciousness peculiar to Rugby footballs, instead of coming straight to me, shot off at an entirely opposite angle. After it I ran, and just as I thought I had gathered it, it bounced again and back it went to the place I had first come from. How long I should have pursued this refractory piece of leather it is impossible to

say, but the hunt was rudely disturbed by a Bradford forward, into whose arms it sprang, rushing off and gaining a try without my ever having touched it at all. I hope this story will be a warning to youthful players who are liable to put their trust in the philanthropic nature of a Rugby football."

Now to kicking. Punt always in preference to a drop-kick. It is far safer and the direction can be, in nine cases out of ten, assured. I wonder if it is necessary to say that when playing against the wind always kick into touch—perhaps it is. Once more I would say that "fly kicking" is just as unpardonable in a full back as it is in a half or three-quarter. There is no excuse for this, yet we saw a good deal of it on Saturday from those behind the scrums. "Saving" is the most difficult thing in a full-back's duties, just as it is in the duties of a half or three-quarter. I have already explained how to avoid (partially at any rate) the element of danger in "saving" but would add one word to the timid and that is that if you go about it in a half-hearted way you are likely before long to be seriously hurt. Nothing encourages opposing forwards more than the faintest indication of want of grit on the part of the back division. In tackling, a full-back must always tackle low, and when attacked by two or more opponents it is his bounden duty to go for the man with the ball. The reasons for this are plain. Firstly, the back may tackle so quickly that he secures both man and ball before any pass can be made, and secondly, the back's rush may cause a faulty pass. While on the subject of tackling I must confess that I was a little disgusted at some of the "kid-glove" tackling on Saturday; no man can stop another by giving him a pinch with the thumb and forefinger. To the forwards I would give only a word of warning; don't hang in front of the ball when you have overrun it, you are out of court at once, so get in again by promptly whipping round. To the halves I would say (for this occasion only) don't part with the ball until you see to whom it may be passed. I mean by this don't pass to where a three-quarter ought to be, because, and I mean it in no unkind spirit, the three-quarter line, as at present constituted, has a very great deal to learn in the art of keeping one's place. To the three-quarters I would repeat the admonition not to slacken up; it is such a waste (there is no other word) of force to do so. To see a heavy three-quarter going at full speed suddenly slacken up because he *thinks* there is a man in front whom he cannot pass is enough to make anyone cry. That is all. Now may the best side win.

OLD HEATHEN.

Christmas Eve.

P.S.—Yokohama won the match by a try to nothing

LAW CASES.

CLAIM FOR RETURN OF MONEY.

On Friday afternoon, in the Yokohama District Court, judgment was given in the suit brought by the Hongkong and Shanghai Banking Corporation against Mr. Hiyoki, the administrator of the bankrupt estate of Messrs. Mourilyan, Heimann and Company. The suit, which was for the return of money alleged to have been paid in error, was dismissed with costs.

SATO v. THWAITES.

In the Yokohama District Court on Friday before Judge Kano, the hearing was resumed of the case brought by Mr. Sato Rennosuke against Messrs. Thwaites & Co. to recover damages in connection with an exhibition of illusions lately given in Tokyo.

Evidence was taken on behalf of plaintiff as to various payments he had made for advertising, buying materials, etc., while the taking of expert evidence was adjourned till January 16th next.

On the 7th inst., in the Nagasaki Chiho Saiban-sho, judgment was delivered in the suit brought by twenty-three Jewish grogshop-keepers of Nagasaki, against Mr. W. H. Lewis, editor of the *Nagasaki Press*. The plaintiffs demanded the withdrawal of certain statements made in the columns of that journal, alleging that these

statements had been prejudicial to their trade. The Court dismissed the plaintiffs' petition, and furthermore ordered them to pay all the cost of the case.

A few days ago the Tokyo Court of Appeal delivered judgment in the appeal brought by Dr. C. H. H. Hall against the judgment of the Yokohama District Court. The Tokyo Court of Appeal dismisses Dr. Hall's case, refuses his claim for co-habitation, and decrees that Dr. Hall must contribute 100 yen a month towards his wife's maintenance, during her life, from April 1901, and that Mrs. Hall is entitled to execution against him for this allowance.

THE CHRISTIAN DAIMYO.

CHAPTER XVI.

Battle of Sekigahara.—Conduct of Mori and of Kato. —Were all the Christian *daimyo* partisans of Hideyori?—Ieyasu absolute master of Japan.—Death of Konishi and fall of his family.—Apostasy of So Yoshitomo.—Misfortunes befall Ota Hidenobu, Otomo, Mori Hidekane, Akashi Kamon, the Ukita, Maeda Sakon, the Tsukushi and John Amakusa.

In the meantime, the two opposing armies had advanced, each on its own side, to the valley of Sekigahara, a village situated in the province of Mino. That of Hideyori mustered 140,000 men, of whom Ukita, Ishida, Shimazu, Konishi, Ankokuji, Kobayagawa Hideaki, Hideyoshi's nephew, were the principal chiefs. Mori Terumoto had remained in Osaka, at the head of 40,000 men, in order to guard this city against surprise, and to be able, at the same time, to lend effective help, at a given moment. Ieyasu's army only comprised 75,000 combatants, but their discipline and unity of command gave them a considerable advantage. On the 21st of October, at 8 o'clock in the morning, the encounter took place, in the valley of Sekigahara. If the reader calls to mind the animosity that reigned between the two parties, he will have an idea of the fury of the combatants. Treason was destined, however, to give Ieyasu the victory. In the middle of the battle, Hideaki passed with all his *samurai* to Ieyasu's side. Feminine jealousy had led to this disloyalty. Mandokoro, the principal wife of the Taiko, had from the commencement hated with a hearty hatred Yodogimi and her son Hideyori. For the same reason she had, without hesitating an instant, embraced Ieyasu's party, and induced all her relatives to follow her example. Her favourite nephew, Peter Kinoshita Katsutoshi, had drawn down on himself all her resentment, for having abandoned Ieyasu's cause, and taken up a neutral attitude, during these troubles.

Hideaki's example was followed by five other *daimyo*, so that the confederates, believing in general treason, commenced to give way. Several sought safety in flight, whilst others, above all those who could not place any trust in the clemency of the conqueror, fought to the death, or performed *harakiri*. At four o'clock in the evening the combat was over, and Ieyasu was the victor in this celebrated battle, the most important in the history of Japan. Hideyori's partisans had been literally crushed; more than 30,000 of their men strewed the field of battle. Covered with wounds, Konishi, who had neither wished to fly, nor to commit *harakiri*, constituted himself prisoner of Kuroda Nagamasa. Ishida and Ankokuji had followed his example. Kuroda, thinking that Konishi had surrendered to him, only in order that he might try to get Ieyasu to pardon him, seemed at first to be very much embarrassed by his capture. But Konishi reassured him, declaring that he would demand only the single favour, which their community of faith gave him a right to ask, namely that he would procure for him, before his death, an interview with a Religious. This request Kuroda at once granted.

Shimazu with some sixty *samurai*, who remained to him, escaped from the disaster by cutting a way through Ieyasu's army. Reaching Osaka, he threw himself into a junk and hastily regained his estates. Ukita had likewise found means to escape the pursuit of the conquerors, and to fly to Osaka. Profiting by the hospitality of Shima-

zu, he accompanied the latter to Kagoshima, where he remained concealed during the space of three years, whilst public opinion counted him among the dead on the field of Sekigahara.

The conduct of Mori Terumoto during this battle was inexplicable. With his 40,000 men he should have attacked the enemy's left flank, towards which, indeed, he marched, when all at once, without even striking a blow, he made a volte-face and fell back on Osaka. There he had neither the idea of retiring into the fortress, which was furnished with provisions for years, nor even the prudence to imitate the example of Shimazu, and return as quickly as possible to his own dominions. In his foolishness, he encamped outside the precincts of the city, and humbly awaited Ieyasu's orders.

As to Kato Kiyomasa, the much vaunted type of chivalric bravery, he prudently remained at a great distance from the field of battle. Although a declared enemy of Ieyasu, he rallied nevertheless to the latter's standard, and basely abandoned the cause of his cousin Hideyori, only to satisfy his personal rancour; he hoped, in doing so, to get a last chance to triumph over Konishi Yukinaga, his detested rival. For this reason, as soon as Konishi had left Udo for Osaka, Kato found nothing better to do than to devastate the latter's domains. He had already advanced to Udo, the principal castle of Konishi, and had laid siege to it. Hayato, Konishi's brother, knowing in advance that the conqueror would treat him without mercy, defended the place with desperation. Kato, unwilling to expose himself to the dangers of an assault, wrote to the two Religious, who were shut up in the place, in order to obtain through them the surrender of the fortress. He also addressed himself to Father Valignani at Nagasaki, praying him to support his proposition. But the latter, as well as the two Jesuits of Udo, answered him that, as Religious and as foreigners, they had no right to mix themselves up in an affair of this kind. (61) Thus matters stood, when the news of the disaster of Sekigahara reached Udo. Hayato, understanding that all resistance was henceforth in vain, consented to enter into negotiations. Kato promised to spare the life of every member of the garrison, save Hayato, who would be put to death. The latter accepted the conditions without hesitation. The two Religious were at first imprisoned and maltreated, on account of their recent refusal to comply with Kato's demand, then, on the intervention of Kuroda Yoshitaka, Kato had them sent to Nagasaki, where they died a short time after. The fall of Udo was the signal for a general rout. James Wakasa (62), governor of the citadel of Yatsushiro, took refuge with 500 men in Shimazu's territory, where he died in 1602. Kato, left conqueror, only sought now of offering his homage to Ieyasu.

A last incident of this civil war was the useless attempt made by Otomo Yoshimune to recover the dominions, of which his own incapacity had deprived him. On the advice of Mori Terumoto, to whose house he had retired, he had with 4,000 men set out from Yamaguchi, traversed the sea, and invaded Bungo. The castle of Kizuki, then belonging to Hosokawa Tadaoki, was about to fall into the hands of Otomo, when Kuroda Yoshitaka and Ito Sukeyoshi (63) routed him. Moreover Otomo was made prisoner, and confined in the Nakatsu castle, Kuroda's residence.

A rather widely circulated error has it that, at the battle of Sekigahara, the Christian *daimyo* had all embraced Hideyoshi's cause, and that it was especially on account of this, that Ieyasu afterwards displayed so much hostility to the Christian religion. But this is another of these hypotheses, that several authors, either through antipathy for the Christians, or out of complaisance for the founder of the Tokugawa dynasty, have invented in its entirety. Much more, these same authors, probably in order to reinforce their arguments,

(61) Pages, p. 29.

(62) In Pages, p. 29, designated under the name of Mimasaka.

(63) Ito Sukeyoshi being yet a child at this period, it must be understood that his *kerai* only joined Kuroda.

delight in reckoning, among the Christian *daimyo*, declared Buddhists like Ishida, Masuda Nagamori and even the bonze Ankokuji. Now, there were at that time more than twenty Christian *daimyo*, and of these Ota Hidenobu, Konishi Yukinaga and Mori Hidekane were the only ones who declared openly for Hideyori. Other *daimyo* like Tsukushi Hirokado, Kinoshita Katsutoshi and Maeda Sakon, son of the Governor of Kyoto, maintained either neutrality, or after the example of the non-Christian *daimyo*, sent representatives to both parties (64). But the great majority of the Christian *daimyo* had embraced the cause of Ieyasu. Such were the Kuroda, father and son, Hachisuka, Asano Yukinaga, Kyogoku Takatomo and his eldest brother Takatsugu, then still a catechumen. Further, Arima, Omura, Terazawa, Goto, Sō, Tsutsui, the sons of Hosokawa and their uncle Okimoto, Mori Takamasa, the Ito, the Tsugaru and the Gamo were all partisans of Ieyasu.

One is really grieved to see so many Christian *daimyo* on the side of Ieyasu, for it was not that of loyalty. Whatever may be said against Hideyori's partisans, they faithfully defended the rights of a wronged child, their master. Ieyasu, on the contrary, was at first a perjurer, having fore-sworn himself at the Taiko's death-bed, and then he finished by becoming an usurper. Thus considered, it may be that Ishida and his followers, among whom were Shimazu, Satake, Uesugi, Mori, the flower of the actual nobility, were not at all the vile intriguers, history accuses them of being. Consequently, Ieyasu was not that righteous defender of justice, he is generally believed to have been. Perhaps one day, some impartial Japanese historian will show his countrymen how egregiously they have erred in this matter.

The victory of Sekigahara inspired such terror among the adversaries of Ieyasu, that they only thought henceforth of winning his mercy, by submitting themselves entirely to his will. Thus, with the battle of Sekigahara, ended the civil war, and Ieyasu, henceforth absolute master of Japan, constituted himself supreme judge over all the *daimyo* and *samurai*, and convoked them to his tribunal. With a few rare exceptions, all those who had raised their arms against him, were dispossessed or exiled, some even condemned to death. Those who had, on the contrary, sustained his cause, were recompensed according to the degree of zeal, which they had displayed during these last troubles. There was not a single *daimyo* whose conduct was not minutely scrutinized and judged in consequence. As a matter of fact, *daimyo* and *samurai* accepted the decrees of this new master with the same servility as they had lately shown towards Nobunaga and Hideyoshi.

Of all the *daimyo* judged guilty towards Ieyasu, Konishi, Ishida, and the bonze Ankokuji received the severest punishment: they were condemned to be beheaded. Ieyasu showed himself inexorable in their regard, and rejected all the supplications of their parents and friends. He even inflicted on them the most infamous penalty that a *daimyo* could incur: he had them marched shamefully through the streets of Osaka and Kyoto. It was in this last city that they were decapitated. At the moment of the execution, the chief bonze of Kyoto hastened to offer his services to the three condemned men, offers which Ishida and Ankokuji, both pious Buddhists, at once accepted. But Konishi thanked the bonze and declared to him that, being a Christian, he placed all his confidence in God. As Ieyasu had remained deaf to the request of Kuroda Nagamasa, on the subject of a Religious to assist Konishi in his last moments, the latter excited himself to contrition by keeping his eyes constantly fixed on a holy image, which he had received from Catherine, the sister of Charles V. Reaching the place of execution, he offered up a last prayer and stretched forth his neck to the executioner. His head only fell at the third blow of the sword. The execution took place in the dry bed of the Kamogawa, between the "Rokujo" and the "Shichijo" bridges. The heads of

(64) Nabeshima Naoshige was for Ieyasu whilst his son Katsushige followed Hideyori. Maeda Toshinaga of Kanazawa was for Ieyasu, and his brother Toshimasa for Hideyori, &c.

the executed were exposed on the "Sanjo-bridge," the most frequented of Kyoto. The Christians having obtained permission to take away Konishi's body, wrapped it in a shroud of silk and carried it to the residence of the Jesuits, where the funeral service was held. All the Society of Jesus deplored the death of Konishi Yukinaga, one of its greatest benefactors, and at the same time, one of the greatest Christian *daimyo*. (65)

Konishi involved his family and his vassals in his fall. From the day, on which he was condemned to death, all his people, henceforth regarded as proscribed, had quitted his domains to seek an asylum elsewhere. His wife and his children had to conceal themselves like malefactors. His eldest son, scarcely fifteen years of age, was the one whose life was most menaced. Konishi's vassals, trusting in the solemn promises of Mori Terumoto, sent the child into the latter's domains, believing that he would find there a secure asylum. But Mori, who had in the meantime received the order to return to his home, and to await there his punishment, forgot promises and friendship, and only thought of mollifying the anger of the redoubtable Ieyasu. With this object in view, he caused Konishi's son to be brought to Osaka, where he had him decapitated. As a pledge of his entire devotion, he sent the child's head to Ieyasu. The latter could not contain his indignation at such baseness (66), and he did not diminish in the least Mori's punishment; instead of the ten provinces, that this *daimyo* had up to that time governed, Ieyasu left him only two: Nagato and Suo, the others were given to *daimyo* judged more worthy of them.

More revolting still, than the baseness of Mori, was the cowardice of Sō Yoshitomo, *daimyo* of Tsushima and son-in-law of Konishi. As soon as Sō learned the issue of the battle of Sekigahara, he feared that his relationship with Konishi would get him into trouble, and he therefore publicly repudiated his wife Mary. He hoped by this means to show Ieyasu that he had broken the last tie that bound him to Konishi. Was it for this reason that Ieyasu increased Sō's revenues? or did he simply wish to recompense the devotion this *daimyo* had shown to him, from the commencement of the civil war. However that may be, Konishi's unfortunate daughter had to tear herself away for ever from her children, and go to die in exile. She took refuge with the Bishop of Nagasaki, who procured for her an asylum among the Christian virgins. She died there, five years after, broken-hearted and worn out by sadness. It is needless to add that Sō, in repudiating his wife, also renounced the Christian faith. Acted upon entirely by the influence of his surroundings, like all feeble characters, he deposed his religious convictions as easily as he had adopted them. His children, still too young to remember long the teaching of their mother, ended by forgetting that they were Christians.

Magdalen, Konishi's aged mother, always in Mandokoro's service, was so overwhelmed by the misfortunes of her family, that she died in the course of the same year.

Finally, the vassals and *samurai* of Konishi, who had survived their master's disaster, saw themselves in the most trying situation. Those of them that did not wish to offer their services to their conqueror, had to go into exile and seek elsewhere a means of existence. Now, as the greater part of Konishi's domains had fallen to Kato Kiyomasa, his declared enemy, it may well be imagined that the *samurai* showed little enthusiasm in going over to this new master. It was not, however, encouragement that was lacking. At first Kuroda Yoshitaka, who had been very closely connected with Kato, exhorted the Christian *samurai* to accept the new state of things, promising them the favour of the new *daimyo*. Then the Religious, among whom must especially be mentioned Martin Hara, ex-ambassador, and much in Kato's favour, foreseeing the complete desertion of this flourishing Christian community, which included nearly 100,000 neophytes, did all they could to retain the *samurai*, whose good example influenced so much the common people.

towards the vanquished. He assured them that he had displayed hostility to the Christian religion, only through hatred of Konishi, but that henceforth not only would he permit the Religious to preach freely in his estates, but he would even become their protector. All was useless: nearly all Konishi's *samurai* preferred to go into exile. Among the few, who consented to remain, were John Naito, the ex-*daimyo* of Kameyama and his son Thomas. From Konishi's time the latter had occupied the castle of Umemi (67), and Kato left him to govern this place, and also granted him the revenues that were attached to it.

After Konishi, Ota Hidenobu was the Christian *daimyo* who had the cruellest lot. From Kiyosu, Ieyasu exiled him to the monastery of Mount Kōya, where he had to meet Masuda and Chōso-kabe, both celebrated in connection with the "San Felipe" affair. Hidenobu died there without leaving any descendant. The time of his death, as well as the manner in which he quitted this life have remained mysteries. It is not impossible that poison or the sword may have played a certain part in the disappearance of the young *daimyo*.

Otomo Yoshimune had been condemned to death. But, once more Kuroda Yoshitaka obtained his grace. Ieyasu commuted his punishment into exile, and sent him into the province of Dewa. Later on, he granted him full pardon for his fault, and permitted him to return to, and take up his residence in Kyoto. There, abandoned by all, Yoshimune soon fell into absolute destitution. Father Organtino took pity on this wreck of so much greatness, and procured him where-withal for his subsistence. It was probably to show his gratitude to this Religious that Yoshimune became converted anew and for the last time, for he died in 1605, at Kyoto itself. (68) Before expiring he asked pardon of all whom he had dragged down with him into misery, thanks to his incapacity. His son Fulgence Yoshinobu, on bad terms with his father for many years back, had even before Sekigahara followed the fortunes of Ieyasu, who recompensed him for it, by admitting him into the number of his *hatamoto*, a position which the descendants of Yoshinobu filled till the fall of the Tokugawa.

Simon Mori Hidekane was despoiled of his daimyate of Kurume, and obliged to ask the hospitality of his nephew Mori Terumoto. His wife and his children followed him. Hidekane did not long survive his misfortunes: he died in 1601, a fervent Christian (69). His eldest son, Francis, had at first offered his services to Kuroda Nagamasa, and the latter, who had become for the moment the protector of the Christians, received him and his *samurai* co-religionists. But as Nagamasa changed little by little in his disposition with regard to his *protégés*, several Christian *samurai*, who had taken refuge with him, had to quit his domains. Francis was of this number, and in 1603, he retired to the house of his relative Mori Terumoto, who granted him a revenue of 6,000 *koku*. The annals of the Jesuits tell us that Terumoto, becoming more and more hostile towards the Christians, Francis had to suffer much for his faith. He was even threatened with exile but, thanks to the exhortations of Maxence, his pious mother, he persevered in spite of all. Nothing is known of his end nor of the fate of his descendants, if there were any. It is to be supposed that this family became in the sequel confounded with the elder branch of the Mori family.

Another exile, who found refuge with Kuroda Nagamasa, was John Akashi Kamon, brother-in-law and first *karo* of Ukita Hideie. He also had taken part in the battle of Sekigahara, at the head of 3,000 *samurai*, who had nearly all perished in the combat. Akashi only thought, after that, of meeting death as quickly as possible. Covered with wounds and with blood, he made his way through to the place where Kuroda was, and begged the latter to give him the *coup de grâce*. Touched with pity, Kuroda dismounted from his horse, and made Akashi get into his

saddle. He promised him besides that he would ask pardon for him of Ieyasu, and would take him into his service. Akashi accepted this proposition and, as Ieyasu pardoned him, he went with his family and some hundreds of *samurai* to live with Kuroda Nagamasa.

As to the other members of Ukita's family, they became dispersed in all directions. Hideie, concealed in Shimazu's domains, escaped the search by an error. After the battle of Sekigahara, his corpse had long been sought for. A severed head, more or less re-embled, his had been responsible for his being numbered among the slain. His son, Hidekatsu, still a child, was about to be condemned to capital punishment, when his maternal uncle, Maeda Toshinaga, *daimyo* of Kanazawa, obtained pardon for him. But Hidekatsu was entirely stripped of his possessions. When, three years after, Ieyasu had discovered, through the spies, whom he maintained at the residence of all the *daimyo*, Hideie's retreat at Shimazu's, he still wished to condemn him to capital punishment, but Shimazu and Maeda Toshinaga managed that he was only sent into exile. It was thus that Hideie, his son, his cousin Romanus and several other members of his family were transported to the island of Hachijo (Izu). Romanus was the only one who was to again see Japan, the other exiles remained at Hachijo till their death. Their descendants could not even leave this island, so long as the rule of the Tokugawas. The Maeda of Kanazawa sought to alleviate the discomforts of these unfortunate exiles, by sending them, every year, some supplies of provisions. It was also owing to the solicitations of this family that the Ukita, were rehabilitated, at the time of the Imperial Restoration, in 1868.

To finish with the Christian *daimyo*, who incurred the anger of Ieyasu, Maeda Sakon, eldest son of the Governor of Kyoto, was deprived of his daimyate, for having refused to join Ieyasu's party. He died in 1602, without having lost either his exaltation or impetuosity. His brother Munetoshi shared at first his disgrace, but the steps taken by his father obtained for him the goodwill of Ieyasu, who named him *daimyo* of Kameyama and of Yagami.

For the same reason, Kinoshita Katsutoshi was deposed and completely abandoned by his father and by Mandokoro. He consoled himself for this, by retiring with his wife to Kyoto, in a little house, near that of the Religious, and delivering himself entirely to poetry and prayer. His wife, revolted at first by the indifference with which he accepted these misfortunes, changed her opinion little by little, and when, in 1605, she became converted to Christianity, she quite resigned herself to her lot.

The Tsukushi of Yamashita, (Chikugo) lost their lands and had to go into exile. They retired to the house of Fukushima, who had just inherited the province of Aki, with his residence at Hiroshima.

John Amakusa, a vassal of Konishi's, was confided to Hideaki, the traitor of Sekigahara, who received as a recompense the states of Ukita Hideie, with his residence at Okayama.

Such was the fate of the Christian *daimyo*, who had had the misfortune of attacking an adversary, whom everything seemed to summon to preside over the destinies of the Japanese people. More than a hundred other non-Christian *daimyo* were also stripped of their estates, and exiled. The number of masterless *samurai* also became so considerable, that it was thanks to them that Hideyori was able, 15 years later, to make a last attempt to overthrow the usurper, Ieyasu.

NEWS OF THE WEEK.

"Iolanthe" was to have been produced by the Shanghai A.D.C. on Dec. 16th, with repeats on Dec. 20th and Dec. 23rd.

Several Japanese junks were wrecked or damaged by a heavy gale at Hakodate on the 23rd inst.

the world, was awarded to M. Private Deschanel, a Professor at the Lycée of Orleans.

\$50,000 (gold) are to be spent by the U.S. Government in establishing a new naval hospital at Cañacao, in Manila Bay.

The Rt. Rev. Bishop Awdry, D.D., of South Tokyo, is returning to Japan by the N.Y.K. steamer *Sanuki Maru*, due at Kobe on Jan. 7th.

Prince Komatsu Akihito, who is staying at his villa at Mishima, Sunshu, is so ill that Dr. Hashimoto visited him on the evening of the 22nd inst.

The Grand Chamberlain and eight members of the suite of the Crown Prince of Siam have received decorations of the First Class of the Sacred Treasure or of the First Class of the Rising Sun.

"Osaka and the Exhibition, 1903" is the title of a little book that has been published with a view to its being circulated among foreigners and so of interesting them in the Osaka Exhibition. It is in the nature of a guide to the chief places of note in Osaka and its environs and is profusely illustrated.

The many friends of Mr. Lewis Moore, of Shanghai, will learn with very deep regret that his condition is causing great anxiety. It appears, says the *N. C. Daily News*, that the gangrene has extended to the stump of the amputated leg, and it is feared that Mr. Moore is not strong enough to undergo another operation; nor is there any certainty that another operation would have better results than the last.

This is the time of year when Japanese stores in Yokohama who number foreigners among their patrons send out diminutive parcels of Christmas presents conveying the compliments of the season. By some strange fatality, they seem all to have struck the same idea this year, with the result that one lady of our acquaintance up to noon on the 23rd was the unhappy possessor of five brocade card-cases!—all sent her by different shop-keepers.

There is a widespread belief, says the *London Chronicle*, that blackberries should not be plucked after Old Michaelmas day. In some parts it is because Satan on that day sets his foot upon them, while in others it is thought he spits upon the berries. In Scotland the devil throws his cloak over them; in Ireland he marks the berry with his cloven hoof. In some rural parts it is believed spiders spread their webs over the bushes as a warning that the devil had thrown his cloak over them.

In view of the oft-repeated stories as to the Czar and Czarina being in ill-health, the following telegram from Washington dated Nov. 25th may be re-assuring:—

Count Cassini, the Russian Ambassador, speaking to-day of the reports contained in the press despatches from St. Petersburg, relative to the Tsar, said: "The statements contained in the press despatch from St. Petersburg, pertaining to the Tsar, can have no foundation. As for the Tsar's health, I received despatches only yesterday, which state that he is in the best of health."

In France a portable electric fire pump has been introduced. It consists of a centrifugal pump driven by an eight horse-power motor, which draws current from any electric light or power wire in the vicinity. The feed and return wires, which are each about 650 feet long, are wound on reels placed on the wagon carrying the apparatus. The equipment can be put in operation in one minute and throws ninety-two gallons of water per minute through a 0.7-inch nozzle attached to 650 feet of hose. The pump, motor and accompanied by two men, weigh, all included, 2,300 pounds.

Singapore advices record another shipping disaster, the vessels concerned being the *Kian Yang* owned by Khoo Tiong Pan and the *Boon San II* owned by the Opium Farmer. The vessels had collided near Pulau Pisang light, and in a few minutes the *Kian Yang* sank, many lives being lost—the number was estimated at about 30. The *Kian Yang* was a boat of seventy tons

nett and one hundred and twenty gross, was built of wood at Hongkong in 1891 and was 110 feet by 18 feet by 7 feet. She was of 35 horse-power and was commanded by Captain Chopard, who had a crew of 32 natives.

Colonel Edward Letchworth, F.S.A., the well known Grand Secretary of English Freemasonry, has received the honour of Knighthood. Sir Edward Letchworth is a Governor of the Foundling and Bartholomew's Hospitals, and was one of the originators of the Volunteer movement, in 1859. He is a hard working official in many Masonic Institutions, and generally devotes himself to charitable works with a zeal that many a younger man might envy.

It is announced that a scheme is being formulated to combine the collieries of the United Kingdom under a syndicate similar to the great German rings, with a view to regulating prices and wages, and resisting the encroachments of American trusts. The basis of co-operation is a pooling arrangement under which, in the event of collieries being closed in any district owing to a strike or excessive production, owners will be compensated out of the profits placed to a national reserve, as the movement is based on patriotic lines, to keep trade in English hands. The co-operation of miners is expected.

At a postage stamp sale in London last month there was offered for sale a remarkable mint block of black penny English stamps, unused, issued in 1840. The block is the lower half of plate 1, and contains 119 stamps (one stamp is missing), all in excellent condition and with full margin. The set was purchased at £112, or a fraction under £1 per single penny stamp. The marginal printed informations have a very quaint reading at this time of the day. "Price 1d. per label, 1s. per row of 12, £1 per sheet. Place the labels above the address and towards the right-hand side of the letter. In wetting the back be careful not to remove the cement."

One of the most serious conflagrations that has ever visited the city of Cebu, Cebu Island, Philippines, destroyed four blocks in the wholesale district, breaking out at 9 a.m. on the Dec. 8th. The loss, a despatch to the *Manila Cablenews* states, is more than a million dollars. This district was occupied almost entirely by Chinese, two of whom were killed in trying to save money from a burning building. All of the sleeping children were rescued. To this end the natives were forced to lend their assistance. The local clubs made arrangements to provide for the destitute. The Constabulary did excellent work in preventing the extension of the conflagration. The loss was enormous. When the message was sent off it was impossible to learn the amount of insurance carried on the buildings and property destroyed.

Says the *Shanghai Mercury* of Dec. 17th:—Many a poor sailor far away from Shanghai will feel a pang of genuine regret when he learns that Mrs. Mary Berry, better known here as "Black Mary," is no more. She was a black woman with a white heart if ever there was one, and during the long period of her residence in Shanghai, extending we believe over some 35 or 40 years, it is safe to say that she never refused a sailor a meal, or a drink for that matter, when he wanted it badly, and Mary could possibly provide it. Many and many a hapless and destitute beachcomber has Mary fed and sheltered without a thought of payment or reward, and innumerable are the acts of quiet, tactful kindness towards her poor neighbours recorded to her credit in Hongkew, where she dwelt for so many years. Every old resident of Shanghai knew her at least by appearance and reputation and all who knew her will regret her. She was a native of Alabama, U.S.A., and was well past her sixtieth year. She died of fatty degeneration and was buried in the presence of a large concourse of mourning friends.

The following occurs in a letter written by Mr. John Palmer Landon, midshipman on H.M.S. *Ocean*, to a relative in Tiverton:—

"On Saturday night (Sept. 6th) the barometer fell rapidly and the wind did the opposite; and from Sunday 2 a.m. till Monday 4 p.m. we were in a lovely (?) typhoon. It was something awful. Our

sea chests below took to charging; the gun-room piano and electric fans and all smaller articles were smashed up; and the air down below was absolutely poisonous. We got very little sleep and less food, as most of the fires were out. The ship was rolling from 28 to 34 degrees each way, and you could not stand up without holding on to something. The damage done to the ship in that period was about £3,000, including the whole of our stern walk, two torpedo nets, and two boats washed away, besides four others broken up. It was very awe-inspiring, the sea rising sixty or eighty feet high, and some of the waves looked as if they would break right over the whole ship. Of course a great deal of minor damage was done to crockery and glass; but that comes out of our pockets in the mess-bill. We had several accidents—one poor fellow had both thighs jammed against some iron, and probably will have to have both his legs off. One or two others had arms broken. At five o'clock Sunday evening we had the worst time of all, as we got in the dangerous semi-circle, but after that we got away from it. In the 36 hours we made good 66½ miles, of which we were set 60 miles by the current, so that we really made good only 6½ miles with our engines, though we were steaming enough revolutions for six knots an hour. We arrived at Nagasaki on Wednesday, the 10th, nearly 48 hours overdue."

We are informed that at an extraordinary general meeting of the Grand Hotel, Limited, held on Wednesday afternoon, it was decided to replace the present stone building by a steel structure, five stories in height, with provision for extending the building over the space now covered by the frame building when occasion may require. (The foregoing summary of the gist of the meeting is furnished by the Secretary of the Co.)

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

In the *Taiyō* Dr. Ariga Nagao, who, it will be remembered attended the St. Petersburg great meeting of the Red Cross Society, states his views on the question of the Asiatic affinities of the Russian people. He sets out by informing us that before going to Russia he had frequently heard the remark that Russia is more Asiatic than European, but that he had never gone into the question until he found himself in a position to test the matter at St. Petersburg in as far as limited time and opportunities would allow. He reaches the conclusion that the theory is based on fact. The dominant race in Russia undoubtedly came originally from India, says Dr. Ariga, and unlike other European nations Russia developed slowly, so that even to-day many Indian customs are common among the people and the Russian language is closer allied to Sanscrit than ancient Greek. When the question is tested is ethnologically it is found that the number of broad-headed people in Russia is greatly in excess, showing that the nation has more affinity with the Mongolians and Chinese than with the Indo-Aryan races of Europe. Is it not owing to the Asiatic affinities of the Russians that they are able to extend the empire with such ease in the whole Eastern world? asks Dr. Ariga. The habits and ideas of the Chinese, the Koreans and the Russians are so much alike that they can live together and transact business with little or none of that friction and feeling of estrangement which is apt to exist between other Europeans and Asiatics. This fact helps Russian rule in no small degree. If it be true, continues Dr. Ariga, that there is this affinity between Russians and Asiatics, if we Japanese were to approach Russia in the proper spirit, should we not find that there are numerous points on which the tastes and feelings of the two nations agree? I am not concerned with the political aspect of the question at all, he continues, but what I contend is that ethnological affinities count for a great deal in the intercourse between nations and this question of our race relations with Russia hence deserves to be thoroughly investigated.

* * *

In a magazine called the *Tai-i'u* (Physical Education) Mr. Hirao Nobutoshi, a War Office employé, furnishes a table of statistics bearing on the average relative weights of young men in

Europe and Japan. In Europe the average weight of young men of 20 is 17,300 *momme* (160 *momme*—about 1½ lb. avoirdupois) while in Tōkyō by choosing out the strongest young men only was it found possible to obtain men averaging 13,300 *momme*.

The statistics given in the table below may be said to be thoroughly reliable. They were collected by the Conscription Bureau of the War Office, and the men referred to are all soldiers:—

Districts of Tōkyō.	No. of men examined.	Average weights in <i>momme</i> .	Men whose weights were below 10,000 <i>momme</i> .
Azabu	296	13,200	3
Akasaka	127	13,200	2
Kōjimachi	220	13,300	6
Yotsuya	204	13,400	2
Ushigome	299	13,400	5
Koishikawa	353	12,800	7
Kanda	753	13,100	3
Nihonbashi	628	13,100	4
Kyōbashi	629	13,500	5
Shiba	744	13,200	7
Fukagawa	562	13,200	3
Honjo	771	13,100	5
Asakusa	977	12,800	17
Shitaya	611	13,500	11
Hongō	409	13,000	4
Suburban Districts (<i>Kōri</i>):			
Toyotama	537	13,300	7
Kitatama	953	13,300	—
Nishitama	713	13,300	22
Minamitama	830	13,100	20
Yebara	986	13,300	12
Kita Toshima	800	13,400	4
Minami-Adachi	427	13,200	3
Minami-Katsushi	811	13,600	4

The average weight for the suburban districts was 13,300 *momme*, against 13,100 for the city districts.

* * *

A writer signing himself "Tokushosei" (A Reading Student) contributed to the *Fiji Shimpō* a little time ago three interesting articles entitled *Fūryū no Kyōiku no Gaidoku* (The Evils of the Education now in vogue) which, epitomized, express the following sentiments. We live in an age of pretence and artificiality. Great efforts are made on every hand to make things appear other than they are. Certain classes of people go in for vain display and showiness of all kinds; others, whose love of simplicity is by no means real, mimic the ways of the deservedly popular unsophisticated type of Japanese. These avowed enemies of ostentation and false show are guilty of the same kind of deception that they denounce in others. Some there are who go further than the imitation of mere manners and affect virtues the alleged possession of which they know to be conducive to popularity. In this part of the world it is far too much the fashion to make a parade of the four great virtues, *Chūko Jingi*, in order to recommend causes or persons to special notice. It frequently happens, as is conspicuously the case in China at the present time, that the louder the protestations of superior virtue the less there is of the real article. Repeated assertion of readiness to die for the Emperor at a time when there is no occasion whatever for the sacrifice of life on the altar of loyalty savour of hysteria; and there seems to be no end of this hysteria among school-teachers and students at the present time. A large number of these persons seem to have no conception of the kind of virtues which a time of peace requires. This exaltation of military courage and feats of war above the practice of the less showy but far more valuable virtues of everyday life is a habit against which, with his usual keen discernment of the relative value of moral qualities, Tokugawa Ieyasu raised his voice. "In late years," said the great Shōgun, "the country has been so much disturbed that men have grown to think that merit is to be measured by the amount of blood found on the point of the spear, but this is not the highest state of attainment (lit. righteousness or integrity), which is to take care that in peaceful times we do nothing to justly excite the umbrage of the general public." The practice of filling children's minds with tales about ancient heroes who made wonderful sacrifices to the exclusion of other kinds of moral teaching is a decided evil. Extreme cases such as those usually quoted are not what children need to hear about most. Since no occasion is ever likely to occur on

which the acts applauded could be repeated even on a small scale, the effect of hearing these tales of heroism on the daily acts of boys and girls is practically nil. In a certain book much perused by the young the conduct of a child of 13 whose step-mother was ill is much praised. This child, in order to propitiate the god to whom it was praying, poured cold water on its body in the winter time. This act is foolishly singled out for praise. If the child had set to work and earned money to buy medicine for its step-mother its conduct would have been worthy of being held up as a model for imitation. The whole tendency of the educational system followed in this country is to create an unnatural state of mind in the boys and girls who attend school. A certain class of precocity mixed with priggishness is developed; and hence it is we find boys of 12 or 14 years of age assuming the blase airs of a man who has become morbidly pessimistic. "Tokushosei" gives several specimens of juvenile compositions in order to show how very unboyish and hence unreal are the thoughts of the lad that has passed through the moral mill at work in the Japanese school. Boys of 14, and even boys of 12, write about the evanescence and sadness of life. Here are the words of a lad over whose head only 12 summers have passed; *Sono mukashi wo kayeri-mireba, ware wa osanaki koro no waga mama wo hiroku yurushi tamaishi oya no on-ai, katajikenaku mo, namida no tane naranu wa nashi*. "When I come to look back on the waywardness of my childish days, though I cannot but be grateful for the parental love which so liberally forgave it all, I find abundant cause for tears." Another youth of 14 is found mourning over what he calls the "pitiable evanescence of human life." If, says "Tokushosei," at the very threshold of life boys' heads are filled with these sentiments, is it surprising that they grow up utterly indifferent to the interests and the welfare of the nation to which they belong? He goes on to say that one effect of the education now imparted is to drive all the animal spirits out of a child and to lay the foundations of premature decay. It is high time, concludes "Tokushosei," that we gave up manufacturing prigs by our system of teaching and encouraging morbid sentimentality, and sham virtue by filling the minds of children with ideas that are quite out of place there, and which do no small amount of harm.

* * *

In the *Hōritsu Shimbun* (*Law News*), Mr. Mori Sakutarō writes on "The Revision of the Law of Inheritance" in the following strain. The power given to the eldest son by the present law is felt to be too great. It is not open to a father to bequeath his property to all his children equally. According to the existing law of entail the eldest son is entitled to quite half of the property. In ancient times this law did not exist. Fujiwara Fuhito (the son of Fujiwara Kamatari, Regent A.D. 645-649) had a number of children, among whom he divided his property in equal portions. The law of entail in favour of the eldest son came into existence some centuries after this. The abolition of the law in civilised countries is almost universal and Japan's retention of it is attended with great evils, of which the following are the chief:—(1) *The existing law is opposed to the spirit of free competition prevailing throughout the civilised world*. When the eldest son inherits all the father's property, his brothers and sisters are largely dependent on him for a living and find it difficult to shape their own courses in the world. (2) *The existing law is a hindrance to the natural economic development of the nation*. For sundry kinds of business capital is needed. When the younger sons of a family are all compelled to start in life without any capital the nation suffers serious loss; as progress cannot be so rapid when there is no money to start with. In some cases young men are so discouraged by the situation in which they find themselves in early life that they grow desperate and take to licentiousness of various kinds. The struggle seems to them hopeless. (3) *The present law is largely responsible for the difference that exists between the state of*

the rich and that of the poor. The way to increase the number of well-to-do people is to remove all obstacles to the free distribution of property. Instead of a few very rich houses it is better for a country to have a very large number of moderately rich families. Existing social distinctions with all their attendant evils are to a considerable extent the result of the monopoly of property encouraged by the State. (4) *The moral effects of the present law are distinctly bad*. It is rightly considered an injustice that children of the same parents should be treated so differently. It is contrary to reason to place the firstborn in a position so immensely superior to the other members of the family. The present law causes jealousy and heart-burning on the one hand and haughtiness and arbitrariness on the other. It is a ceaseless cause of discord among brethren. (5) *The present law creates a false standard by which to judge men*. Men ought to be esteemed on account of their personal qualities, but as things now are their position in society depends largely on the family to which they belong. They inherit a social status owing to the existence of the present law which in a great many cases they are not worthy to possess. (6) *The present law constitutes a serious obstacle to the elevation of women*. The law forbids the inheritance of property by women unless in cases where there is no male issue. These cases are of course comparatively few. Hence the majority of our women are without property of their own. This largely accounts for their slavish dependence on the stronger sex and for a large number of the weaknesses of Japanese women. It is useless clamouring about high class female education and such things as long as our law places woman at such a disadvantage at the beginning of her career in life. There is only one reason given for the delay in abolishing the present law of inheritance, and that is the fear of hurting the sensibilities of the conservative school of thinkers. But surely this is not a sufficient cause for sanctioning a practice that is condemned by all thinking people in every civilised country.

* * *

The *Shakai Zasshi* has the following on the decrease of farmers. The causes of the phenomenon, briefly stated, are as below:—(1) The current methods of farming require no intelligence in the farmer. He works very much like an animal in a purely mechanical fashion. Hence lads with minds are attracted to trade and industry. (2) The universality of education has increased the number of intelligent men among the lower classes and this has made farmers discontented with their lot. (3) City life offers many attractions to active-minded persons and hence in Japan as in the Western world there has been a steady flow of country people towards the towns. The statistics published on this matter show that whereas in 1889 the proportion of townspeople to the total number of inhabitants was 15 in every 100 persons, in 1898 it had risen to 18. This accounts for the scarcity of farm labour, which has constantly been complained of in recent years.

* * *

Baron Ōtori Keisuke contributes to the *Tōyō-gakugei Zasshi* an article on Japan's intercourse with foreigners, of which we give the substance below:—Japan's non-official foreign intercourse is in many respects of greater importance than her official dealings with the representatives of foreign Powers. The Japanese as a nation seem to be somewhat deficient in public spirit and lacking in foresight in their intercourse with foreigners. They often sacrifice the greater to the less, that is, for the sake of some temporary advantage they make permanent friendship impossible. The following points connected with our foreign intercourse call for special attention. (1) In their intercourse and trade dealings with foreigners Japanese must be careful not to break their word. In the matter of the fulfilment of contracts they must be punctual to the day and the hour. (2) More attention must be given to the study of foreign languages. Among these English and Chinese are the most urgent. Among the Chinese dialects the Peking; Shanghai and Kwangtung dialects are the most important. (3) Travelling on the part of Japanese ought to be undertaken to

a greater extent. The countries which more immediately concern us and about which we know comparatively little are China, Korea and Siberia. (4) In travelling care must be taken not to offend local susceptibilities or to speak lightly of local customs. (5) In travelling by ship or rail Japanese must be particular about their behaviour. They are too apt to lie down, occupy a whole side of the carriage and not move when foreigners enter. In eating, too, they disregard the comfort of other passengers by throwing things about the floor. They smoke close to ladies in a most disagreeable manner. It is a universal foreign custom to give a seat to a lady if she enters the carriage later than male occupants of the seats. Japanese should conform to this custom. Changing garments in a railway carriage is quite unallowable in the presence of ladies. Reading aloud in a railway carriage is apt to be annoying to other passengers. Since there are a good many foreigners who know Japanese, remarks that are disrespectful to foreigners should not be made in their presence. (6) In calling on foreigners meal hours must be avoided. (7) Japanese who accept invitations to foreign houses should take the trouble to acquaint themselves with foreign etiquette at meals. (8) Japanese are in the habit of borrowing money from each other on all occasions, making use of their friendship to suit their convenience, but foreigners are extremely averse to this practice, and think that if a man wants to borrow money he should apply to a bank, which exists for the purpose of accommodating customers. There are numerous other particulars which call for attention in our intercourse with foreigners, but the above include the chief points.

* * *

In the *Chūōkōron* there is an article entitled *Taben no Kokumin* (A loquacious nation) which touches on certain acknowledged weaknesses of a certain class of Japanese. Here is the pith of the article. The Japanese as a nation have mouths, but no hands or feet. They are a talking, rather than an acting, people. Mr. Chinda, the present Vice-Minister of Foreign Affairs, is said to have been very much impressed with this fact when acting as Japanese Consul in San Francisco. He says that the disputes between labourers and employers in California were so frequent that an American once asked him whether the Japanese authorities had not been sending barristers to America to do the work of coolies. There is a strong disposition among Japanese coolies to dispute over trifles and to do themselves and their Japanese fellow-workers much harm thereby. Wherever Japanese labour has been unsuccessful it is largely owing to this cause. The competition in labour is very great all over the world, and it is desirable that when Japanese compete they should not be handicapped by contentiousness. In the matter of contentiousness the coolies working side by side in the great centres of the world's trade and industry differ very much according to race; and the degree of civilisation to which nations have attained is to a certain extent revealed by the degree of habitual disputatiousness shown by the representatives of the various races. It is said that in this particular the negro takes the palm. He is the most contentious of all labourers. The Indian coolie perhaps comes next. He is strong and diligent, but far too fond of arguing over trifles. From time immemorial the tendency to division caused by useless disputes in India has been so strong that a united, independent India has become an impossibility. Here in Japan the love of disputing is by no means confined to the lower orders. It permeates the political, educational, and religious worlds and renders union for even the best of objects next to impossible. And in trade and industry we constantly read of enterprises being wrecked owing to the refusal of parties to yield to each other.* Our people need to be reminded that though endowed with two eyes, two ears, and two hands, we have only one mouth, in order that compared to what we see, hear, and do our words should be few.

* * *

In the *Yomiuri Shimbun* no less than six consecutive articles have appeared under the title

of *Kojin Shugi* (Individualism) in which the writer maintains that the proposed Japanese naval increment is absolutely necessary in order to insure the carrying out of this principle. The author of the articles writes a great deal about the different methods of expansion followed by various countries; some aiming at state expansion only and others placing more value on race expansion. According to this writer Germany, Russia, France, Italy and Japan are to be reckoned among the former class and England and America among the latter. In the above-named European countries the love of home life, home connection and pedigree is very strong. The sentiments of Japanese have a strong leaning in the same direction. Individualism can perhaps never be as popular here as it is in England and America. Our family connections and the strong feeling we have as to our duties to parents constitute a serious hindrance to colonisation, which to be successful must be carried on by people who are prepared to cut off their home connections altogether and start new, independent homes in their adopted countries. Japanese who go abroad for the most part, like the Chinese, intend to return to their country after a certain number of years, that is, they go abroad simply as a means of making money without taking any real interest in the country to which they go. As long as they do this they never can effect much as colonists. Japan has to choose between the State expansion practised by countries like Russia and Germany and the natural, gradual and race expansion of the English and Americans. In England and America Government interference with this expansion is discouraged. Free scope to individual effort and enterprise is given, with the most satisfactory results. The Germans are brought up to expect State aid in all their enterprises. The English learn to depend on their own efforts. This accounts for the fact that in so many parts of the world the English merchant does better than the German. Nothing could be worse for the future of our emigration and colonisation than the adoption of the German protective system by our Government. It is important to observe that the type of Imperial expansion followed by Russia, France and Germany involves the maintenance of huge armies. England and America manage very well with navies only. Their armies are quite insignificant compared with those of the great Powers. England with 11 million square miles of territory and 400 million subjects to defend until very lately only had a standing army of 100,000 men, while France with not one-tenth of the territory which England has possesses an army 6 times the size of that of Great Britain. America with its 70 million people only finds it necessary to possess an army of 65,000 men. It is generally thought that the chief object of keeping such large standing armies is the acquisition of new territory when opportunity offers. The action of Russia and Germany leaves no doubt on this point. Even France, whose population is decreasing, still keeps up her huge army and never loses a chance of adding to her foreign possessions. England's acquisition of the Transvaal was not brought about in the same way as the arbitrary seizures perpetrated by Germany and Russia, being the result of a series of events of a peculiar kind. The State interference and State control practised by certain European countries should be avoided by us. Individualism and free competition are essential to rapid progress and the full development of man's faculties. Though as a nation we have grown accustomed to rely on the State for everything, there is nothing to prevent our adopting the opposite principle, and as a matter of fact our future success depends entirely on whether individualism prevails among us or not. As yet we have reaped no benefit from the possession of Formosa nor from the ports that were thrown open to us as

* It is the opinion of a good many Japanese that the tendency here complained of is largely the result of the educational system followed, which attaches more importance to reasoning than to facts. The text-books that encourage logic-chopping should be forbidden. Disputatious lads of 12 are the product of the educational methods hitherto followed in this country, say these critics.—(WRITER OF SUMMARY.)

a result of the China-Japan war, simply because as a nation we have not taken to colonisation. The State can do nothing in this matter unless it is backed by the nation.* For colonisation we need a navy only. Our army may be reduced considerably and still suffice for home purposes. The possession of a strong navy is a matter of life or death to us. The Anglo-Japanese Alliance is only a temporary arrangement after all and should not be allowed to interfere with our permanent policy as a Sea Power. Besides, England only promises help when we are attacked by more than two Powers.

* * *

It would seem from published statistics that the Japanese are shorter lived than foreigners. On this account some foreign Insurance Companies have, we believe, charged higher rates for Japanese, but other Companies, it is reported, make no difference between Japanese and Europeans or Americans. We gather these particulars from the *Asahi Shimbun*, which has recently called attention to the subject in the following terms. With the growth of Life Insurance business it is most important that Japanese and foreign companies alike should possess reliable statistics as to the amount of mortality there is in Japan compared to other countries. The present head of the Daiichi Seimei Sōgo (相互) Hoken Kaisha (The First Combined Life Insurance Company), Mr. Yano Tsunetarō, an acknowledged expert in insurance matters, has compiled a most valuable table showing the rate of Japanese mortality during 8 years dating from 1892 at ages ranging from 15 to 101. As the statistics are based on official records of a thoroughly trustworthy character, for the information of foreigners generally we transcribe them here:—

Ages.	No. of the Survivors.	No. of Deaths.
15	100,000	538
16	99,462	596
17	98,866	658
18	98,208	719
19	97,489	772
20	96,717	812
21	95,995	858

61	51,219	2,067
62	49,152	2,133
63	47,019	2,196
64	44,823	2,258

* Germany is to a certain extent suffering from the same difficulty as Japan. For every German that settles in a German colony there are three or four who go to English Colonies or to the United States, that is to say, the German State is not backed by the nation as a whole in respect of colonisation and therefore is not able so far to make a thorough success of colonisation.—(WRITER OF SUMMARY.)

Ages.	No. of the Survivors.	No. of Deaths.
65	42,565	2,317
66	40,248	2,371

92	257	93
93	164	63
94	101	41
95	60	26
96	34	16
97	18	9
98	9	5
99	4	2
100	2	1
101	1	1

It will be seen by the above table that between the years of 20 and 23 there is comparatively great mortality. What is the reason of this? Mortality again takes a leap up at about the age of 40. The cause of this is not apparent.

* * *

To the *Tōkyō Kyōiku Jihō* Dr. Kitazato Shibasaburō supplies the following information respecting the amount of lung disease there is in Japan. In reference to the prevalence of lung diseases in Europe, the proportion of those who die from this cause amounts to about $\frac{1}{6}$ or $\frac{1}{7}$ of the total number of deaths. In Japan in 1899 the total number of deaths was 920,380, out of these those that died of diseases affecting the lungs or respiratory organs was 184,488; of these 75,796 were pronounced cases of lung disease. In 1900 the total number of deaths was 910,517 (9,863 less than the year before) yet the number of the number of those who died of respiratory or pulmonary complaints was 190,844, pronounced pulmonary cases numbering 78,972. It cannot be said that our statistics are quite so accurate as those collected in European countries where post mortem examinations are more frequent than they are here; so that it is possible that deaths ascribed to other causes may occasionally have originated with weak lungs, but at any rate we may say that every year some 80,000 persons succumb to pulmonary disease, and some 190,000 to complaints of the respiratory organs. Investigations made in the army; show that in 1895 out of every 1,000 men 24 died of lung disease. In 1900 the number went up to 45 in 1,000. It is still worse in the navy where 3 or 4 years ago the deaths from lung disease amounted to as many as 100 in every 1,000 men. The Kaigunshō has given great attention to this matter, and as a result the number has decreased to about 70. But the fact remains that lung disease is alarmingly prevalent among us.

AERIAL PHENOMENA.

Several observers have affirmed that on Monday evening at a time variously fixed at from 7.15 to 7.30 p.m. a meteorite descended somewhere between Yokohama and Kamakura. The visitor seems to have come from the north and, passing over or near Yokohama, to have struck the earth near Zushi.

Another matter of observation has been the extraordinary brilliancy of the sunsets for two or three days past. People in Yokohama glancing westward long after the sun has left the horizon, have been led to conclude that large fires raged in that direction.

LITERARY GOSSIP.

Great is the industry and fertile is the imagination of Guy Boothby, the English novelist. In less than eight years he has published some twenty-six books, the majority of which have achieved more than ordinary success. Mr. Boothby is a South Australian by birth and is thirty-five years of age.

The appraiser's report on the estate of Paul Liecester Ford, the author, who was murdered by his brother Malcolm on May 8 last, has been filed in the Surrogate's office, New York. The gross personalty is \$214,691, the larger part of which will go to his child, Lesta Ford, who was born a month after her father's death.

George Brandes, the well-known Danish writer, gives an interesting account of a visit recently paid by him to Ibsen. The "recluse of Norway" has sensibly aged, and, as the result of a late illness, walks with difficulty. But his mind is as youthful and vigorous as ever. He has grown less sombre and severe, and his kindness, so sternly repressed for many years, has become more marked.

Professor Knight has prepared reminiscences of "Some Nineteenth Century Scotsmen," who have been distinguished on their century's record-roll in various ways. He includes the men whom he has known personally, and inserts only what has not hitherto been said about them, except in quarters where few are likely to see it. The list of names opens with Thomas Chalmers, Principal of the New College, Edinburgh, 1780-1847, and ends with the late Lord Rutherford Clark.

It is reported from Wiesbaden that plays which can be witnessed by young ladies without any offence will be advertised on white posters, and those suitable for older people on red posters. People are cautioned—"cautioned" is distinctly good—that red posters will not mean that there is anything objectionable in a piece, but that the subject of it will be somewhat freer than the other. Why not carry this principle further? Blue, green, yellow and black posters, also have their possibilities.

The U.S. Secretary for War has been disposing of the tons of useless documents which have been accumulating for twenty-five years. All this was offered to the highest bidder, and the large price of 4s. 8d. a hundred pounds was bid. The successful bidder is the dealer who had the contract with the department for the purchase of the waste paper which accumulates daily, but for this he only pays 1s. 3d. a hundred pounds. Why the old paper should be worth so much more, remarks *Geyer's Stationer*, is puzzling.

Mr. Unwin is publishing in his Colonial Library a novel by Madame Tosti, wife of the well known song-writer. It is entitled "The Heart of Ruby" and it is the autobiography, told in a diary, of a French girl who after being brought up in luxury is cast adrift on the world, and becomes a circus rider. She attains great notoriety and at the zenith of her fame discovers an old lover whom she had thought dead; but the lover proves unfaithful and the story ends in a tragedy.

Booth Tarkington and Winston Churchill, two famous candidates for political honours, were both elected to office on November 4. Mr. Tarkington wins his seat in the Indiana legislature, and Mr. Churchill will help represent New Hampshire in the state legislature. "As the days of the modern historical romance are already numbered," comments the *Chicago Tribune*, in facetious vein, "Messrs. Churchill and Tarkington are to be congratulated upon their good luck in selecting a new field of labour and meeting with success therein."

A good example of modern journalistic enterprise is afforded by a novel scheme just announced by the "Wide World Magazine." This journal has despatched a special commissioner to Spain to travel right through that most romantic of countries as an amateur tramp. The tramp knows not a word of the language, and carries no outfit beyond a camera and a revolver. It will be seen

that the trip opens up all sorts of exciting possibilities. The tramp's account of his experiences—which have already proved distinctly eventful—will be published in the "Wide World" month by month.

The success gained by Messrs. George Newnes' "Thin Paper" editions of such classics as Burns, Shelley, Keats, &c., is not to be wondered at, for they could not well be beaten with regard to beauty, convenience, or economy. The type of each elegant and compact volume is large and clear, and the limp leather binding remarkably attractive whilst the photogravure frontispieces and title pages are printed on Japanese vellum from drawings by Mr. Edmund J. Sullivan and Mr. A. Garth Jones. The artistic end papers also merit mention, and, on the whole, the dainty volumes are equally suitable for the library and the boudoir.

A new volume in Mr. Unwin's Colonial Library is a novel entitled "A Lady's Honour" by Bass Blake. The book is a romance of the times of Marlborough, and the scene is laid partly in England and partly in the Low Countries. The hero is a country-bred young man of good family who falls in love with his cousin before ever he sees her. When his father has been murdered by some unknown hand, the thought of meeting her in Brussels takes him out to the wars of the great Duke of Marlborough. Cathcart, his handsome, dissolute comrade, likewise falls in love with the lady and resolves to win her but shamefully. The hero has his work cut out to save his wilful cousin from the desperate wiles of his rival, and hairsbreadth are the adventures in which the three take part.

As may be supposed, the late Mr. Henty had many correspondents. He had letters from boy admirers all over the world, but still more from girls, and especially American girls, asking for his autograph and offering criticisms of his books. Some of the letters were very cute. In a story of the Peninsular War he made two boys disguise themselves by staining their faces with iodine. Shortly after the book was published, he received a letter from a boy who said he was a chemist's assistant, stating that while that special incident was represented as taking place in 1808, iodine was not discovered until 1811—three years after! Mr. Henty in his stories never touched on the love interest. Once he made a boy of twelve kiss a little girl of eleven, and he received a very indignant letter from a Dissenting minister.

A writer in the *Pall Mall Gazette* has fallen foul of Mr. Elliot Stock's opinion to the effect that the novel is not likely to die yet awhile. The well-known publisher and bookseller is an expert, and we quite agree with the view he takes. But, says the *Pall Mall Gazette*, "when we remember how other forms of literature, for example, the stilted plays of the Augustan age, or the albums of the beginning of the last century, had their doom and their ending, we see no reason to suppose that the novel will be exempt from the common fate." The answer to this, we think, is that the forms of literature alluded to were all round very bad indeed, and this can by no means be said of the fiction of to-day, in spite of what the *Pall Mall Gazette* calls "its gross and absurd bulk." We have good writers enough to keep fiction from the speedy decease predicted for it in some quarters.

CORRESPONDENCE.

MEGURO LEPERS' HOME.

TO THE EDITOR OF THE JAPAN MAIL.

SIR,—I wish to bring to the notice of the public, through the columns of your paper, our Lepers Home, situated near Meguro, a suburb of Tokyo. It was founded and has been sustained thus far almost entirely from gifts and contributions from abroad; but as the applicants are increasing we feel that there may be many here in Japan, who if they knew of this institution, would gladly lend a helping hand, towards making the lives of those who practically are outcasts in our midst more comfortable. This is a Christian home, (undenominational), under the auspices of the *Kōzensha* (a philanthropic society in Tokyo.)

Dr. Kitazato, Japan's famous bacteriologist, gives

treatment to our patients gratuitously; so if any place could hold out a hope of recovery it is this "Ihaiin" (Lepers Home) under Dr. Kitazato's constant investigation: with happy comfortable surroundings and with the consolation that our blessed religion affords. Contributions of money, good reading matter, such as historical novels, biography, etc., as well as religious literature will be thankfully received (in the Japanese language only.)

We want to start a reading room for our forty patients, which have lawyers, chu-gakko teachers, ex-officials, children under fifteen, among their number. Suitable reading matter in the dark cold days of winter when they are shut in, would bring many hours of sweet forgetfulness of their wretched condition.

A few games for the children would bring joy at this Christmas time even in the Lepers' House. Any one desiring information as to putting patients in the Home, or wishing to contribute, can do so by addressing the Superintendents, Mr. Otsuka, 956 Ebaragori, Shimo, Meguro, or Rev. Shinowara, 27 Tsukiji.

Thanking you in advance, I am sincerely yours,
MRS. J. K. McCauley.
(Member of Executive Committee).
17, Tsukiji, Dec., 17, 1902.

AUTOMATIC-PISTOLS!

TO THE EDITOR OF THE "JAPAN MAIL."

Sir:—I have read with interest the letter that appeared in to-day's *Mail* under the above heading, and the account of the trials that subsequently led to the adoption of the Borchardt Pistol by the Swiss Government.

From Swiss papers that have come under my observation during the year it seems however that "la Suisse qui a toujours marché en tête du progrès en ce qui concerne les armes de guerre" has not been very fortunate in introducing the above mentioned automatic arm. Appended I take pleasure in handing you a translation of an article that appeared in the *Buendner Tagblatt* on the 6th May, 1902, hoping it will give your readers material to form a judgment on this subject.

Thanking you in anticipation, I beg to remain,
Yours very truly,

Tokyo, December 17th, 1902.

THE SWISS SELF-LOADING PISTOL M/1900.

The serious accident which occurred on the 20th. of April on the shooting-place at Wattwil and which must be attributed solely and entirely to the faulty construction of the new ordinance pistol M/1900 directs public attention to this piece in the armament of our army.

The pistol came triumphant in May, 1900, out of a so-called competition and the semi-official pens did not know how to praise sufficiently the wonderful kind of thing they had acquired. At this competition in Thun other systems were represented, of which several were at least as good as that exhibited by Messrs. Borchardt and Lueger, but it appears that the Commission wished from the first to select only this latter. At any rate "Kaisertreu" writes in his work "Die prinzipiellen Eigenschaften der automatischen Feuerwaffen" (page 54) (Vienna 1902):—"I learn from quite reliable sources in Switzerland that the Swiss Rifle Commission let the Roth system have the most flattering recognition imaginable; since however the taste of the Commission led them—to take the principles of loading for example—to only adopt an automatic pistol with the Lee magazine, so must their choice have in any case fallen on the Borchardt system."

This accident in Wattwil is principally attributed to the fact that the pistol M/1900 has no hammer. Indeed according to the statement of the inventors this is even claimed as an advantage of the weapon. They also assert in their advertising pamphlets that no hammer is any longer found on modern fire-arms in general. With regard to rifles this may be the case, but not with regard to pistols. Of the latter the Belgian Ordinance Model Browning is constructed without a hammer. And this hammerless pistol has already caused bloody sacrifices.

As far back as November, 1900, the "International Review of the Army and Navy" said:—"The pistol has no hammer, this must be regarded as a defect for it is not possible to know at once if the weapon is on the cock or not. This arrangement has led to the addition of an automatic catch which, fixed on the handle of the pistol, effects the stopping of the lock as soon as the hand releases the weapon. An automatic catch is always a doubtful affair and can never replace the old triggerstop. But the federate commission which had to examine the competing recoil loaders has acknowledged this fact while they have invited the makers of the Borchardt-Lueger pistol to fix a second catch to the weapon. This is a lever-catch which on its side again releases the automatic catch from the pressure of the hand hold-

ing the weapon. The construction of the pistol has not gained therefrom in simplicity."

They are convinced nevertheless in responsible quarters that only this pistol is a complete work of art and a serviceable weapon in war. It is said, and the truth of the report may be depended upon, that all the papers of the commission were given to the Dutch Rifle Commission. Perhaps this was done in order to lead to the adoption of the Borchardt-Lueger Pistol in Holland, perhaps not. In any case the proceedings would be calculated to prejudice the interests of other inventors.

The fact that the pistol model 1900 is without a hammer is not its only drawback. It happens very often that the lock does not shut; a failure to go off is therefore the natural consequence. This failure is easily explained. The mainspring must be rebent at the end of the forward motion of the lock. If the weapon is once allowed to get rusty in certain places serious derangements in its working might happen. The pistol can, however, also discharge a shot without that straightening of the knee-joint which ensures safe locking fully taking place. The advertising pamphlet of the inventor admits this indirectly and several practical people are also well aware of this fact. They extricate themselves from the difficulty by beating "automatically" with the left hand on the knee-joint in order to stretch it.

The oft-mentioned automatic catch requires that the firer holds the handle of the weapon in a certain manner and presses it strongly. If he does not do this the shot does not go off. Whether he remembers "automatically" the peculiar manner of holding the pistol when in the agitation of a hand-to-hand fight is nowhere certified. Should however the comparatively weak shoulder of the firing pin break, the shot will go off in spite of the automatic catch; this should make it quite clear that the firer as well as those around him is in constant danger. The arrangement of the magazine with regard to the method of filling is quite old-fashioned. It is really incomprehensible how the commission at the time could be inspired after they had seen the excellence of the charging system in our rifle.

It may finally be added that the pistol with all its many springs, parts, etc., is much too complicated and put together with too little constructive talent to claim to be really complete. In the endeavour to give the army something new which had not been adopted by other armies the examinations of the "Self-loading Pistols" have been conducted too hurriedly and a pistol has been adopted which in every respect must be regarded as not serviceable in war.

The first victim of the "Para Bellum" Pistol rests in his cold grave. It is to be hoped that no more will follow him before it has been decided to discard this arm which owes its only renown to flaring advertisements, and to replace it by a really serviceable system.

A PUBLIC DANGER.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir:—Public attention having been recently drawn to the Race Club and its management through the medium of your columns, and interest being doubtless keenly alive to the subject, the present seems an opportune moment to ventilate a kindred matter that has been on my mind for a long time.

I allude to the practice during the training season of walking strings of race horses, many of them more or less "bobbey" animals, along the Bluff high road to the imminent danger of passers-by. The road, as is well known, is narrow, devoid of sidewalks, and without a harbour of refuge of any kind, unless perhaps a friendly gateway. It is certainly due more to good luck than good guiding that a serious accident has not long since happened to some foreign child, or possibly grown-up person, and we know as a fact that a Japanese child was kicked and nearly killed not far from Jackson's hill last year. Why the recognised authorities for the protection of the public, whom I take to be the police, allow the dangerous practice to continue has always been a puzzle to me, especially as I happen to know that the matter was represented strongly to the Head of the Police Department more than a year ago, without, however, any steps being taken to stop it. We know that official circles move slowly and I refer to the matter thus early so that the necessary rules and regulations may be issued for the prevention of the grievance complained of in time to have it stopped before next training season comes on. I feel quite sure if Governor Sufu's attention is once called to the objectionable, because dangerous, practice, that he will soon find a way of stopping it, and if a round-robin to endorse and strengthen my complaint were started I am equally sure that it would be signed by practically every Bluff resident, except possibly the owners of race horses. Nor would it be any great hardship to them because I judge that a man who is wealthy enough to indulge in a racing stable ought

to be able to afford to have that Stable in the neighbourhood of the Race-course, or at all events out of the Bluff and Settlement, so as to do away with the practice of which I, in common with so many of my fellow residents, have to complain.

Thanking you for giving publicity to this letter.

Yours, &c.,

PREVENTION.

"THE END JUSTIFIES THE MEANS."

TO THE EDITOR OF THE "JAPAN MAIL."

Sir:—At the end of your article on "The Political Situation" in to-day's *Japan Mail* you ascribe to the Catholic Church the fine doctrine, "The end justifies the means." Against that statement I do most emphatically protest. I was always taught just the reverse, viz. that both the end and the means must be good, that *non sunt facienda mala ut eveniant bona*. The ignorant or the malicious have, I know, made use of the Machiavelian motto against the Catholic Church, but you, Mr. Editor, ought certainly to know better. It is just as true as the belief that Catholic Priests have horns and the Pope is cloven footed, as has been and perhaps is still taught to children in enlightened England. The very stupidity of the doctrine "the end justifies the means" should have put you on your guard against attributing it so lightly to Catholics, who are after all sensible people.

I have here about 500 volumes on Theology, Philosophy, Morals, etc., all of which are at your disposal. If in any of them you find anything in support of the so-called Catholic doctrine, then you will be entitled to a *merite blanc*.

I remain, sir, yours truly,
A. PETTIER.
Yokohama, December 19th, 1902.

Décembre 20, 1902.

MONSIEUR LE REDACTEUR,

Veuillez me permettre un mot à propos d'une pointe que je trouve dans votre journal au sujet de la doctrine catholiques.

Le principe "la fin justifie les moyens" est malheureusement trop souvent appliqué par gens et nations de toute religion ou sans religions; mais on enseigne dans toutes les écoles catholiques depuis des siècles un principe tout contraire: non facienda sunt mala ut eveniant bona. Loin de moi la pensée que l'église catholique ait le monopole de ce dernier principe. Je souhaite simplement qu'il soit appliqué plus souvent et par plus de gens.

Recevez, Monsieur Le Redacteur, mes salutations.
UN CATHOLIQUE.

A STRANGE PHENOMENON.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir:—On opening my window at 5.30 this a.m. I was surprised to see a light in the sky all around, especially bright over Kanagawa way. I knew it was too early for daybreak, and could not understand it. I have mentioned this fact to several others whose work causes them to be early risers, and they also had noticed it. I am told that when the last mail left Honolulu, one of the volcanoes on an adjacent island was very active. May this have anything to do with it, as the appearance of the sky was much the same as it was during the eruption of Krakatoa in the Sunda Straits some years ago? Can you give any explanation and have the meteorological authorities in Tokyo noticed the matter at all?

Yours, etc.

CURIOUS.

Yokohama, December 23rd, 1902.

[We have no explanation to offer our correspondent, but we notice an American journal of recent date says:—"It will be remembered that for nearly two years after the volcanic explosion of the island of Krakatoa rosy sunsets were conspicuous phenomena throughout the northern hemisphere growing out of the distribution of volcanic dust through the earth's atmosphere around the globe. These rosy sunsets are again in evidence, and are doubtless due to the volcanic dust discharged this year into the earth's atmospheric envelope by the eruptive cones in Central America and the West Indies.—Ed. J.M.]

ST. SOPHIA IN CONSTANTINOPLE.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir:—I am sure that all readers of the *Mail* had great pleasure in the gracefully written story of Mrs. Wilson's Journey to Turkey. One point struck me, however, when I read what she had to say of the great desecrated "Church of the Eternal Wisdom," which was to ask why it was spoken of in the lecture as "San" Sophia? Why, indeed, should this Spanish form of the word "saint" be chosen for a lecture in English about an edifice commonly known as St. Sophia? It occurred to me then, also that not only might I not ask this question in your columns (by your favour) but also take the occasion to say a few words more definitely about the Church itself than the writer of the lecture could, owing to the need of speaking of many things.

In the first place then, the Church was not erected in honour of any "saint" but in honour of our Lord

Himself, the Holy and Eternal Wisdom of God. We might compare the name St. Sophia, thus, to the form not uncommon in England of St. Saviour.

It was erected in the reign of Justinian, and under his direct and constant oversight. It took somewhat less than six years to complete, and, when consecrated on December 26th, A.D. 537, was so magnificent that the Emperor exclaimed, "Glory be to God, Who hath accounted me worthy of such a work:—I have conquered thee, O Solomon!"

Earthquakes, however, overthrew the eastern part of the Church, and Justinian began to repair it in the thirty-second year of his reign, raising the roof, and was so happy as to celebrate the second consecration from Christmas Eve to Epiphany in 561.

Thus the present beautiful building was completed, and displayed rich and varied colours in its fabric, porphyry, marble and jasper—pale, rosy, purple with silver flowers, green, veined red and white, black, dusky green. There were solid masses of gold, the floor was of marble, and the roof of the richest mosaic, crystal, precious stones and amber,—in the midst of the dome our Lord in Majesty, and in the spandrels, four great Cherubim, still plainly to be seen notwithstanding the defacing of the Turks. The doors are of bronze, carved in floriated crosses, and the wall between the doors of variegated marble adorned with richly wrought alabaster.

The great dome was called aerial by the Greeks, because its convexity corresponds to that of the sky. It rises from four massy piers or blocks of freestone braced with iron and soldered with lead. Four prodigious buttresses rise in the exterior to the spring of the dome, which rises to a height of an hundred and eighty feet from the pavement. The roof is made of pumicestone and Rhodian bricks: the stone being light enough to float on water, and the bricks being but one-sixth the weight of ordinary bricks. There are four original spectators and historians, Procopius, Paul in the Silentiary, Agathias, and Evagrius, besides a chain of later writers through the ages, so that the history of no great Christian church is better known.

We can only add that we hope the time will come, and come speedily, when once more it shall be used for its original purpose, Christian worship, and that the choir—now useless—shall be filled again with priests, and the glorious Triumphant Hymn shall again peal forth in rich and thrilling harmony.

Yours, etc. SACERDOS CATHOLICUS.

WRECK OF THE "ELINGAMITE."

A SURVIVOR'S GRAPHIC STORY.

The *Sydney Telegraph* of the 15th ult. gives from the narrative of a survivor from the wrecked steamer *Elingamite* who was brought to Auckland, N.Z., by H.M.S. *Penguin* the following particulars. As might have been expected, the survivors were found to be very weak and exhausted, but the reporters were able to obtain a connected story of their experience and sufferings.

Steven Rabone Neale, one of the motor men brought over by the Electric Tramway Company, was the most advanced towards recovery. He was sitting in an easy chair in a sheltered part of the main deck of the warship, while all the other survivors were in the "sick bay." Neale wore a very weather-beaten appearance, his face being very much tanned by exposure to the sun and salt spray, while his hands and feet were all swollen.

He said:—"I parted from my wife and child before I left the wreck. Assisting other women and children, I did my duty as a man, and am thankful now that they are safe. We left the wreck on Sunday night. Since then we had practically no food or water. There were 16 all told. We existed for four days and four nights on two apples—one eighth of an apple each, in fact. All I had was a sixteenth of an apple. There was a keg on board but it did not contain a drop of water. We kept it on the raft for three days, the stewardess using it to sit on until she was not able to sit up any longer. We then threw it overboard.

"The *Elingamite* struck between 10.30 and 11 on Sunday morning, and immediately began to sink. I was the last, bar Captain Attwood, to leave the sinking steamer. No one knows more about it than I do. A couple of foreigners caused some trouble in one boat. I helped to get the women and children into one of the boats, putting my wife and child in one. That was the hardest part of it all to have to go away and leave them. There were about eight of us on the raft when she first got away, but we picked up others and altogether we had nineteen. The purser's boat came up to us through the fog and took off three men, leaving us with 16. The purser's boat could take no more, being then very full. Wetherell was on the raft and acted like a real man. We made him captain of the raft. He remained in charge until he lost his memory for a short time on the morning before we were picked up. Then we had to take the command out of his hands.

"When the purser's boat came up I asked what we should do. He told us to try and get to the lee of the island. We then had one oar, and one scull, but only one rowlock. We improvised another out of a piece of rope. With these it was altogether impossible to make any headway, and to add to our misfortunes the scull broke in half. We had then only one oar and half an oar left to propel the unwieldy craft. What could we do with these. We soon lost sight of the purser's boat. We then saw another boat and besought their assistance, but they did not respond, though it seemed to me that they had room. We sighted the island several times and on one occasion passed it within 100 yards or 150 yards, but could not reach it. The raft was terribly overloaded with 18 men and one woman. The cylinders were more than half-awash, with the result that we were partly in the water. The raft was so low in the water and so heavily laden, that we were quite unable to propel it against the current, which ran very strong, and we could not cover the short distance between us and the shore. We drifted about all night, and when morning broke we were out of sight of land.

"That day (Monday) was a terrible one. We had two apples on the raft, but absolutely nothing else in the way of food, and there was not a drop of water. During the day we divided the first apple, keeping the other apple for future necessities. It was maddening for us, in a condition of imminent starvation, to remember that when in the vicinity of the wreck on Sunday, tons of fruit drifted past us, and we did not secure any more than two apples, expecting to reach land almost immediately. On Monday night, Mr. Dickson, one of the passengers, died from exhaustion. We kept his body on board until morning hoping to sight a boat or land. It was a fearful experience we went through that night. The weather was fair but foggy, and the sea moderately smooth, but there was a bit of a swell on. The night was very cold. We were terribly hungry, but the agonising thirst was even harder to endure. We strained our eyes through the fog, hoping against hope to pick up a light.

"When morning dawned two more of our little band lay dead beside Mr. Dickson, one a man whose name I do not know, but who is connected with the steel trust, and another, with whose name I also am unfamiliar, but who told me that he lived in Auckland, and that his father owned a yacht. I took the coat worn by the man belonging to the trust and gave it to the fireman who had got off the wreck with nothing on his body but a singlet and trousers. I myself had only a shirt, coat, and trousers, but the rest were fairly well clad. We kept other articles of clothing belonging to all the bodies for the purposes of identification. There were three dead men on the raft, and Dickson's body was already in a state of putrefaction. There being no land or vessel in sight, it was decided to push the bodies overboard. Dickson had been a mate of mine. I could not bring myself to consign his body to the sea in such an unceremonious style, but pushed the other two bodies overboard. Someone else pushed Dickson's body into the sea. Our experiences on Tuesday were aggravated by a repetition of the sufferings we endured on the previous day. That day the desire for water was overpowering and some people on the raft began to drink salt water. Despite all that could be said of the terrible consequence that must ensue, it was very hard indeed to resist temptation, with the ocean all round us, and dying of thirst. Several times I had to shut my eyes and hide from my view the tempting sight.

"During Tuesday night we saw the light of a steamer, and raised as loud a shout as we could. They must have heard us, because they lowered a boat and put a masthead light in the bows, and pulled in our direction. The boat passed within 40 or 50 yards of us. Although we again shouted as loud as we could, they did not hear us, and went back to the steamer, which eventually disappeared, leaving us to our fate. After this occurrence one of the passengers who had been drinking salt water became insane, and jumped overboard. His Christian name was Herbert, but his surname I am not acquainted with. No attempt could be made to stop him going, because he went quickly overboard without giving the slightest inkling of his intention.

"Wednesday morning came in with our number reduced to 12. Before night it was destined to be further lessened. Most of the party had now become very despondent, but Wetherell did his best to cheer them up. I was like a hypocrite. I told them everything would be all right, that the Auckland people were not going to allow us to drift about there without doing everything in their power to rescue us. I told them also that Steve Neale (myself) was not going to die. We managed in this way to cheer up a little. During the day we divided our last apple evenly among 12, but it did not go far to stay the pangs of our hunger, as you may guess. I chewed and ate a handkerchief, which though not a very digestible morsel, for the moment somewhat alleviated the pangs of hunger. When we first

got on the raft, which was a very small one, there was not sufficient room for all of us to lie down. We were sitting in all sorts of cramped positions, with our feet and portions of our bodies under water. The deck of the raft was actually under water, consequently we were never dry. To this fact I believe we owe our lives, our bodies acting as a sort of condenser and absorbing a little of the moisture. We could have found comparatively dry places on the cylinders of the raft, but there we would have been in imminent danger of being washed off. The raft was much lightened by the throwing over of the dead bodies, and consequently the deck rose slightly. Pretty, one of the passengers, became light-headed before nightfall, and ended his sufferings by jumping overboard and disappearing without a word. The same night we lost Muirhead, a passenger. I had noticed that he was becoming light-headed, and spoke to him, saying we would be all right, that we were sure to be picked up, and to stick to it. He shook hands with me, and assured me he would. Ten minutes later I heard a faint voice saying from the water, 'I'm going.' I threw a lifebelt, which fell within a foot or two of his hand. He pushed it away. He was singing a tune as he drifted away to his death.

"On Thursday morning Miss M'Quirk, the stewardess, died in my arms from sheer exhaustion. She bore up very bravely, and was plucky till the last. Ellis, the second saloon steward, was the last to go. Four times I caught him attempting to drink salt water, and had great difficulty in preventing him from going the way of Muirhead. I had to hold him back several times. When he thought I was dozing he attempted to get the water. He died in my arms with his head on my breast. Soon after that his body was committed to the deep. Had he lived a few hours longer he would have been picked up alive, for a few hours later we were picked up.

"In the afternoon we sighted the *Penguin*. I was standing on the raft and saw her yards rise up over the sky line. I could see no smoke and thought it was a four-masted ship. I said to the others that she was a wool vessel. Wild hope throbbed within us, and when we found we were sighted and the vessel was making towards us our joy was unspeakable. It was about 4 o'clock in the afternoon when our boat was picked up. I tell you this is like heaven aboard this ship after the terrible experiences we passed through. They were like what we read in fiction, but I never expected such adversity to fall to my lot. The horror of it will never pass from my memory, though I do not want to think of it. As the *Penguin* steamed up to us we were heartily cheered by her crew. All assembled on the deck to get a glimpse of us. Weak and exhausted as we were we raised a responsive cheer as the *Penguin* came level with us, which would have done no disgrace to eight hale, hearty men. The warship's whale boat was lowered from her side, some 30 yards away. The delight of the rescue put new life into us, but all were terribly weak and emaciated. Most of us managed to struggle to our feet and got into the whaleboat with the assistance of the sailors. Our delight was unbounded when we found in the boat, hot bovril and brandy. Anything so delicious we had never tasted in our lives. We were quickly transferred to the warship, where we were received with the greatest kindness. Nothing was left undone to secure our comfort and return to health. All through the experience was a terrible one, which few men have to go through, and none would desire.

THE CHRISTMAS PLUM-PUDDING.

That such a peculiarly British institution as the Christmas plum-pudding should have a history reaching back only two centuries, seems beyond belief. It is true that Rabisha, in his "Whole Body of Cookery Dissected" (1675), gives a recipe for plum-pudding, but he does not connect it with the winter festival, so that references in the "Tatler," and in "Poor Robin's Almanac" (1750), give us, perhaps, our earliest dates. Yet there are reasons, based partly on analogy, and partly on the records of cookery, for the conviction that the pudding is of an ancient lineage. The analogical evidence is this: customs, of which the origin is popularly ascribed to comparatively modern times, are often found to have rude counterparts in far distant ages. Thus, there is a tradition that the pyramidal Christmas tree, with its toys and wax lights, was introduced by Martin Luther, but antiquaries affirm that the tree is a relic of Roman Saturnalia, carried to Teutonic homes by the conquering legions. It is even suggested that the object has some connection with the palm, bearing twelve shoots, symbolical, to the Egyptians, of the completed year. The mistletoe, again, takes us back to Scandinavian Eddas; the Christmas box is reminiscent of the rural festivals of the Romans; the Yule log sheds a reflection of the Teutonic feast of the winter solstice; the loving cup

is the successor of the wassail-bowl; and waits and carol-singers have their pre-Norman representatives.

The annals of cookery supply stronger testimony of the probable antiquity of the dainty, for there are three known dishes, each of which may have been a forerunner. There is, first, the old English frumenty or furmety, made of clear wheat, "creed" or soaked in water, and cooked with milk, yolks of eggs, and dried fruits. Since, however, frumenty continues in favour, side by side with the more expensive delicacy, the way is open either to assume a common origin, or to look for the source of the pudding in some old, world dish now in disuse. In support of the latter conclusion, we have the fact that the ingredients of the pudding vary exceedingly. In Kent, wheat, carrots, and turnips, are sometimes used by the poorer classes in making plum-pudding. The same indifference to a typical recipe is known elsewhere, but the implied necessity of sugar, fruits, and spices is common. Whatever calling Englishmen may follow, and wherever they may find themselves—soldiers under the blazing sun of India, fishermen in Icelandic seas, sheep-farmers in the Queensland bush, or ranchers on the Western prairies—a Christmas pudding must be made, and the components of it tend to a similarity in aroma and flavour.

The second claimant for ancestry is the minced or "shred" pie, which, however, besides such sweet materials as currants, raisins, lemon peel, and spices, had a large admixture of eggs, tongue, ham, and other flesh meats. Meat apparently formed an essential part of the pie. Like frumenty, mince pies are still in vogue, so we turn to the third supposed source. This was the old English plum-porridge, or pottage, which, in Tudor times, always formed the first course of the Christmas dinner. Hence the allusion in the "Tatler," previously mentioned: "No man of the most rigid virtue gives offence by an excess in plum-pudding or plum-porridge, because they are the first parts of the dinner."

We get an earlier reference in "Sheppard's Epigrams," 1651, to "plomb-porridge," and Misson's "Travels in England" states that the English "also make a sort of soup with plums, which is not at all inferior to the pye (that is, minced pie) which is in their language called plum-porridge." The usual mode of preparing the delicacy was to make a broth of mutton or beef, thicken this with brown bread, and, after adding a mixture of raisins, currants, prunes, cloves, mace, and ginger, give the concoction a thorough boiling. Brand speaks enthusiastically of a "tureen of rich, luscious plum-porridge," which he enjoyed when dining at the chaplain's table at St. James's Palace, on Christmas Day, 1706. Those who are sufficiently curious to learn the contents of this porridge will find the recipe in Timbs's "Garland of the Year." Among the constituents are, 40lbs. of veal, 150 lemons and oranges, six dozen each of sack, sherry, and old hock, besides huge quantities of fruits and spices. In 1791, a Mrs. Frazer, who is strangely described as the "sole teacher of the art of cookery in Edinburgh," gave modes of preparing both the porridge and pudding. A generation later, in 1823, we find Harriet Dunn, "of the Boulevard," gaining a high reputation in Paris for her plum-puddings, but her wares, owing to French prejudices, were bought only by English residents.

"The Frenchman," we read, "will dress like an Englishman, swear like an Englishman, and get drunk like an Englishman; but if you would offend him for ever, compel him to eat plum-pudding." Other times, other manners. Yet Louis XVIII., as if to show disdain for national narrowness, always had plum pudding on his table on Christmas Day. Incidentally, one recalls the Puritan antipathy to this kind of fare, in this case, of course, on religious grounds. Macaulay speaks of the "horror which the sectaries felt for cards, Christmas ale, plum-pudding, mince-pies, and dancing bears." The feeling was thus satirised in Needham's "History of the Rebellion":—

"All plums the prophet's sons deny,
And spice broths are too hot;
Treason's in a December pie,
And death within the pot."

Consequently, when Sir Roger de Coverley saw a dissenter eat pudding on Christmas Day he thought there was some hope for him. Reverting to French ideas, a comical story bearing on the subject is given in the *Times* for November 20, 1801. An English gentleman, being unable to obtain a real English plum-pudding in Paris, ordered an apothecary to compound one in a mortar, weighing everything with scrupulous precision. The recipe was given in medical Latin, the quantities were indicated in troy weight, and the whole was signed with the name of the celebrated John Hunter. The apothecary was obedient but puzzled himself to know whether the mixture was for a wound or a disease, and whether he should bottle it or spread it upon leather. A professional brother, coming into the shop, pronounced decidedly that the prescription "was not a Cataplasm, but a Remede, which he had frequently

administered in cases of Lock-jaw. The Pudding was therefore ticketed *Enema*," and the apothecary at once carried off the preparation to the patient personally.

Quite as amusing is the story of the French king, who, wishing to present the French ambassador with a Christmas pudding, as a great compliment, got a recipe for the purpose. His injunction to the cook concerning the weights of the ingredients, the size of the copper, the amount of water, and the time of boiling, were carried out rigorously, but, to the utter astonishment—politely unexpressed—of the ambassador, the wonderful mixture was served as a thick soup. The cloth had been forgotten; unconsciously the cook had reproduced the older plum-porridge. The pudding and porridge, indeed, have always been mysteries to foreigners. Sir Thomas Roe, speaking of the Venetian Statutes of 1626, remarks that they principally regard the English, "whom they thincke so inamored with plum-porridge, cakes, and pies, as they will with currents swallow any thing." Be this true, or not, the Christmas delicacy is dear to English people. It is connected with the choicest traditions. It is embodied in our literature, recalling the essays of Howitt, Lamb, and Washington Irving; the "Christmas Carol" and "Silas Marner"; Dr. Johnson eating his Christmas fare in company with the faithful Boswell, and Sir Roger de Coverley sending out seasonable gifts to his tenants and neighbours.

REGINALD ON CHRISTMAS PRESENTS.

I wish it to be distinctly understood (said Reginald) that I don't want a "Coronation" Prayer-book as a Christmas present. The fact cannot be too widely known.

There ought (he continued) to be technical education classes on the science of present-giving. No one seems to have the faintest notion of what anyone else wants, and the prevalent ideas on the subject are not creditable to a civilised community.

There is, for instance, the female relative in the country who "knows a tie is always useful," and sends you some spotted horror that you could only wear in secret or in Tottenham Court-road. It might have been useful had she kept it to tie up currant bushes with, when it would have served the double purpose of supporting the branches and frightening away the birds—for it is an admitted fact that the ordinary tomit of commerce has a sounder aesthetic taste than the average female relative in the country.

Then there are aunts. They are always a difficult class to deal with in the matter of presents. The trouble is that one never catches them really young enough. By the time one has educated them to an appreciation of the fact that one does not wear red woollen mittens in the West End they die or quarrel with the family, or do something equally inconsiderate. That is why the supply of trained aunts is always so precarious.

There is my Aunt Agatha, *par exemple*, who sent me a pair of gloves last Christmas, and even got so far as to choose a kind that was being worn and had the correct number of buttons. But—*they were nines!* I sent them to a boy whom I hated intimately; he didn't wear them, of course, but he could have—that was where the bitterness of death came in. It was nearly as consoling as sending white flowers to his funeral. Of course I wrote and told my aunt that they were the one thing that had been wanting to make existence blossom like a rose; I am afraid she thought me frivolous—she comes from the North, where they live in the fear of Heaven and the Earl of Durham. (Reginald affects an exhaustive knowledge of things political, which furnishes an excellent excuse for not discussing them.) Aunts with a dash of foreign extraction in them are the most satisfactory in the way of understanding these things, but if you can't choose your aunt it is wisest in the long run to choose the present and send her the bill.

Even friends of one's own set, who might be expected to know better, have curious delusions on the subject. I am not collecting copies of the cheaper editions of Omar Khayyam. I gave the last four that I received to the lift-boy, and I like to think of him reading them, with Fitzgerald's notes, to his aged mother. Lift-boys always have aged mothers; shows such nice feeling on their part, I think.

Personally I can't see where the difficulty in choosing suitable presents lies. No boy who had brought himself up properly could fail to appreciate one of those decorative bottles of liqueurs that are so reverently staged in Morel's window—and it wouldn't in the least matter if one did get duplicates. And there would always be the supreme moment of dreadful uncertainty whether it was *creme de menthe* or *Chartreuse*—like the expectant thrill on seeing your partner's hand turned up at bridge. People may say what they like about the decay of Christianity; the religious system that produced green Chartreuse can never really die.

And then, of course, there are liqueur glasses and crystallised fruits and tapestry curtains and heaps of other necessities of life that make really sensible presents—not to speak of luxuries, such as having one's bills paid or getting something quite sweet in the way of jewellery. Unlike the alleged Good Woman of the Bible, I'm not above rubies. When found, by the way, she must have been rather a problem at Christmas time; nothing short of a blank cheque would have fitted the situation. Perhaps it's as well that she's died out.

The great charm about me, concluded Reginald, is that I am so easily pleased. But I draw the line at a Coronation Prayerbook.

SAKI.

GERMAN FIR TREES.

The first sight, almost, which welcomed me to Germany was a fine timber skeleton house, just finished by the carpenters and waiting for its brick and mortar, and on its gable a gallantly beribboned little fir tree. A carpenter's tree like this had been the object of my longing when a child; fancy if one could have one (off a roof, of course) for one's *very own*! Something of this longing after the unattainable, heightened, perhaps, by the recollections of radiant German Christmases and their mysterious, resin-scented preparations, seems to awaken in me at the thought of distant views of German fir woods. There was, for instance, a certain hill covered with fir woods which tantalised me lately at the time I stayed at that old castle of the Hapsburgs. Below, and within easy reach, were wonderful forests of beech, just touched with yellow, and sweeping with their silky skirts the dewy emerald grass; orchards moreover, garlanded and festooned with rosy apples; but what I wanted was the fir-clad hill. It lay back behind lower grassy slopes, very far and very high up: a dark, soft mass; and in its midst, making the tall trees stand out like a ragged mane, a great clearing, wide and vivid green. Day after day I walked up and down the lime-tree terrace by the *Rittersaal*, looking down from the rocky castle hill; and every time, day after day, my eyes were drawn by that unattainable forest. Such are the fir woods which beckon and murmur and draw one along all through German poetry, good, bad, and indifferent, from Walther von der Vogelweide to Heine.

For the woods (we have no word which really renders the meaning of that great singular *Der Wald*). Woods are more intimately connected with the life of Germany than with that of other countries. Even apart from the enormous proportion of forestland which strikes one if, for instance, one happens to cross Germany from north-west to south-east, from Holland to Venetia, the woods are much nearer than in other countries (I count Switzerland and Tyrol as being German) to the haunts of men. In the centre and the south, at least, the forests actually surround the towns, holding their bit of valley, their fields and meadows, enclosed in their unchanging, evergreen mystery. So that the natural, almost the only, walk is into the forest, which thus becomes associated with all holiday-making, with rest from work and small amusing adventures. It is from the *Wald* that the bands of citizens and apprentices are returning, and with Faust and Wagner behind, escorted by the eerie, circling poodle, through the spring twilight. That scene came vividly home to me, and seemed almost present, one Sunday that I had descended from the old castle: people from the little town were going to and from the woods, whole families; and deep in the green depths a lot of well-dressed children were playing shrilly. For the woods are the playground, real or imaginary, of the Teuton child—much as the sand and shingle are of the children of other countries, and, alas! as gravelled gardens with Punch and Judy are of other children still. They are the scene of escapade of bigger boys, instead of the river to fish in as in England or France, or the hillside with atrocious fowling-huts as in Italy. And have we not all seen the portly, spectacled German burgher, adorned with forest-green braid and little falcon's feather, bringing a woodland quality, an echo of *Freischütz* horns, even on to tramcars and into museums? Let us not laugh—far from it. It merely means that the woods have rooted in the German heart and that they sprout and sough in every line of German poetry and every bar of German music. But it is the essential quality of the German woods not to show traces of this commerce with man. No other places exist so wholly for themselves, so lonely, so different from human things. I am not thinking of great forests, really remote—say, of the Tyrol, fragrant wildernesses of fir and larch, where every clearing lets in the view of the great blue, jagged mountains veined with snow or veiled with vapours. The fir woods I am thinking of are, as I said, those surrounding towns, and from whose depths the wild men, petticoated and crowned with leaves and carrying leafy clubs, had but a very little walk to go when sitting for their portrait on coat-of-

arms or sign of hostelry. For instance, the woods round about Eisenach, under the Wartburg. I saw them first, a hurried glimpse, before going to my inn on a clear autumn day, the frost just melted on the grass and on the yellow bushes; but I brought back an impression of infinite silence and remoteness, of a valley, far, far away, bright green meadows tipped with crocus, and steep slopes of dense black fir. The next day I had more time, but did not need to go much further. For sitting on the dry, brown, needle-covered ground I had my fill of woodland stillness. The high masts of the firs, with their bannerlike boughs, are so close together as to make a concentrated light—a light quite special, meaning enclosure, almost sanctuary, in which all colour—the rose of the beechmast, the green of the moss in patches and ridges—takes a solemn vividness. Further along there was a little plantation of beech saplings, growing in high shafts with bunches of pale, yellowing leaves against the gaps of white, watery sky, and round them the firs once more, motionless, unruffled, though there ran through them a sigh as of the distant sea, gathering at times to a deep sound—a sound ubiquitous, mysterious, and baffling, like those paths which one's eye makes everywhere between the tree-trunks. By the side of that Eisenach forest what a poor piece of cardboard operatic romance was not the Wartburg! The poetry of Germany was not in it and its Minnesingers, genuine or spurious, but in the fir-trees below.

But there are fir woods more lyric still, and in a neighbourhood so profaned by mankind that I dare not whisper its name for fear of making you incredulous. Suffice it that, not a mile off, people sit by the hundred, on blue and red wicker chairs, chattering, while a band brays and clashes in front and electric trams clatter and shriek all round. But the woods know nothing of it. They have precipitous, downhill places, very dark, where one sees only the great grey boles and hillocks, where the pennons, the masts, and rigging of the firs stand black against the sky; and little valleys with old, isolated trees grown immense, and stumps and tiny sprouting things deep in the moss and bilberry; clearings with stacked-up wood, filling the warm air with delicious aromatic scent. And, most delightful of all, hollows packed with bright green saplings, making one understand the adjective spruce, each shooting up to its little green cross, extending its stiff little branches halfway up, and letting the lowest boughs barely touch the grass, like the brocade farthingale of some baby princess. For these plantations of saplings bring the delightful thought of what these vivid green, symmetrical, erect, and cheerful little trees have each and all a chance of becoming—Christmas trees like those I can see with my mind's eye in the market-place at W—, things one intrigued as a child to go near when taken a walk, and about which, while dragged along by the impatient nurse, one wondered what size, indeed which, among those green, stiff, varnished-looking trees, would be one's own. It is good to think of such Christmas trees of the past and the future. It is good also to think that if the little sapling does not end in such radiant premature death, it may grow into one of the solemn pennoned troopers of that great forest army; or grow into the mast of a great ship, helping to mimic a forest in the docks; or be cut into children's toys, horses with arched necks or dolls with apple cheeks; or, again, form part of the carpenter's scaffolding for a house, maybe covered with paper bouquets and streamers, and planted triumphantly on the gable of the half-finished building.

And here I must pause. For singing the praises of fir-trees (as of friends, lovers, and native place) is a pleasure by no means always communicated to the listener and therefore to be gratified only at intervals and by insidious methods. Let me but note that the last of these Teutonic be-ribboned carpenters' trees which greeted my sight six weeks ago while crossing Switzerland, was near the station of Olten, and on the top, alas! of the iron boiler of a new factory of imitation *Sunlight Soap*! But close behind was a bend of the Aar, glass green, brimful, majestic, with its fringe of russet scrub and sedge; and the Christmas tree, from the top of its boiler, can talk with the great river about the great woods.—*Vernon Lee.*

CHRISTMAS FURMITY.

Washington Irving, in his description of Christmas at Bracebridge Hall, relates, as may be remembered by those who still read and enjoy that pleasant picture of an old English Yule-tide, how Squire Bracebridge on the night of his visitor's arrival "made his supper of frumenty, a dish made of wheat cakes boiled in milk, with rich spices, being a standing dish in old times for Christmas Eve." Bracebridge Hall, it should be remembered, was in Yorkshire; and it was to the northern counties that the custom of eating this dish at Christmas time was practically

confined. A Christmas song of somewhere near a century ago, celebrating the good cheer of the season, chants praises

To the stout sirloin,
And the rich spiced wine,
And the boar's head grimly staring,
To the frumenty,
And the hot mince-pie,
Which all folks were for sharing.

A writer in the "Gentleman's Magazine" of 1811 says that in the North Riding of Yorkshire, in those days, feasting began on Christmas Eve. "Every rustic dame," he continues, "produces a cheese preserved for the sacred festival, upon which, before any part of it is tasted, according to an old custom, the origin of which may easily be traced, she with a sharp knife makes rude incisions to represent the cross. With this and furmity made of barley and meal, the cottage affords uninterrupted hospitality." Another Yorkshire writer of some forty years ago gives frumenty, apple-pie, cheese, and ginger-bread as the constituents of a Christmas supper; and old-fashioned folk in the great northern county still know Christmas Eve as "Frumity Night," and celebrate it by eating the time-honoured dish.

"Frumity," or "furmity"—both forms are of almost equal antiquity—is genuine old English fare. More than five hundred years ago a romancer wrote of "frumentee noble"; while the author of one of the quaint fifteenth century books of cookery and etiquette talks of "fatte venesonn with frumenty"—a combination which would hardly appeal to modern palates. Washington Irving describes the Squire's supper dish as made of wheat cakes boiled in milk, with rich spices. The cakes are not essential. The dish is usually described as made of hulled wheat boiled in milk, and seasoned with sugar, cinnamon, &c., to taste. A good authority shows that the preparation of furmity is somewhat elaborate. A quantity of wheat of the best quality, after being thoroughly softened by prolonged steeping in water, is rubbed between cloths or pounded in a mortar, or the like, in order to remove the bran or husk. The grain thus obtained is next boiled slowly, or "creed," as they say in the North, until each corn is quite soft and swollen to about double its normal size. Then comes the final process. The "creed" wheat is boiled again with milk, raisins, currants, nutmeg, sugar, and any other spice that may be deemed palatable, until the desired degree of consistency is reached, when the furmity is ready for the table.

These details suggest a rather toothsome dish, and it is somewhat to be lamented that so thoroughly English as well as so thoroughly wholesome a preparation should have gone out of fashion. Many rural folk in the North, doubtless, still make and eat furmity at Christmas-tide, as well as at other times of the year, but it has dropped out of the ordinary bill of fare. The "plum porridge" which used to be consumed at Yule-tide all over England in the days before the plum-pudding was perfected, seems to have had something in common with the Christmas furmity of Yorkshire. It contained some of the same ingredients, and was served in the same way. Plum-pudding came in at a comparatively late date.

Although furmity is traditionally a Christmas dish in the North, the warm and spicy compound is well-known at other seasons of the year in many other parts of the country. If the "facetious" Tom Brown may be believed, it was hawked by street-sellers in London two hundred years ago. He says of a certain Bess:—

And one thing more I had forgot,
Hot furmety and rice-milk hot
She never let me want; for why,
It was her trade the same to cry.

Until a much later date it was regularly sold in the autumn at Covent Garden, and could be had at the coffee-houses.

In the west country furmity is well known. Readers of Mr. Thomas Hardy's fine novel, "The Mayor of Casterbridge," will remember that in the scene at the fair with which the book opens, the "furmity-woman" and her wares play a conspicuous part. At fairs and rural junketings of all kinds furmity always used to be a popular dish, and in many districts it was as customarily associated with the Sunday in Mid-Lent, popularly known as "Mothering Sunday," as in the north it was with Christmas Eve. A writer in the "Connoisseur" of 1754 speaks of mince-pies being as "essential to Christmas as pancake to Shrove Tuesday, tansy to Easter, furmity to Mid-Lent Sunday, or goose to Michaelmas Day." Charles Knight, in his account of his own life, says that on the fourth Sunday in Lent he regularly feasted on furmity; and Mrs. Gaskell, in "My Lady Ludlow," describing the quiet, ordered life at that old world mansion, Hanbury Court, tells how Lady Ludlow and her household always had "furmenty on Mothering Sunday."

Various events in the rural year were of old celebrated by feasting on furmity. Farmers on the Lincolnshire wolds provided plenty of "frummaty," as they called it, for the "clippins" or sheep-shear-

ing time, and Aubrey tells us that in the days before the Civil War, "furmetrie" with other good things, accompanied by much strong beer, was always supplied for the sheep-shearing feasts among the peasantry on the Wiltshire and Hampshire Downs. In the Eastern Counties the dish was eaten when the wheat was sown. Old Tusser says—

Wife, sometime this weeke, if the weather hold cleere

An end of wheat-sowing we make for this yeere.
Remember you therefore, though I do it not,
The seedecake, the pasties, and furmentie pot.

Good Friday was also a customary day for the dish, and at the present time in Suffolk plain rice boiled in milk, which looks like a modified kind of furmity, is still often eaten for breakfast on Good Friday.

It is thus evident that furmity has long been a much appreciated delicacy in most parts of England, and although its traditional connection with this or that special season may be fading out of recollection, so that before long the old standing association between furmity and Mothering Sunday or Christmas Eve may be entirely a thing of the past yet the dish will probably continue to be eaten in many country places in Old England, as it is still at the present time by the New England descendants of the first English settlers.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

VENEZUELA.

London, December 19.

It is announced at Washington that the United States will not resist the blockade of the Venezuelan coast, if the Powers in enforcing the blockade recognize that a state of war exists. Mr. Bowen, the United States Minister to Venezuela, owing to pressure of work, has instructed Admiral Dewey to send a competent officer to Caracas as Assistant Minister, on board a destroyer, which would serve as a despatch boat in the event of the cable being cut.

GREAT BRITAIN AND JAPAN.

Later.

The King's Speech proroguing parliament mentions the agreement with Japan by which, he says, the two governments bound themselves to assist one another in certain eventualities for the defence of their respective interests. His Majesty thinks that the agreement will be to the advantage of both, and that it will conduce to the maintenance of peace in the East. He said that the commercial treaty with China, which promises to secure not only British commerce but also the commerce of the world, affords valuable facilities and advantages. The Treaty also contains some provisions of great value which, unlike others, do not require the assent of other Powers.

FRANCE AND HER CLAIMS.

London, December 20.

France has notified the Powers that any provision for settlement (?) must recognize the preëminence of the French claims.

[This is a puzzle. We know nothing of any French claims pressing for satisfaction.—ED. J.M.]

BRITISH COLUMBIA AND NATURALIZED JAPANESE.

The judicial committee of the Privy Council has delivered judgment upholding the right of British Columbia to exclude naturalized Japanese from the franchise.

[Note—This refers to the now well-known Tommy Homma case.—ED. J.M.]

VENEZUELA.

President Castro has invested Mr. Bowen, the American Minister, with full powers to effect a settlement. This and other indications seem to show that Venezuela is disposed to yield. The news has been received with satisfaction, in England where the co-operation with Germany is greatly disliked.

The British Government has replied to the American suggestion in the sense that

it regards arbitration in a manner rendering a satisfactory settlement probable but that England will only deal with America, ignoring President Castro entirely.

Germany and Italy have replied similarly.

Extensive exchange of views regarding the conditions is proceeding among the Powers preparatory to giving a joint reply.

RUSSIA AND AFGHANISTAN.

London, December 21.

A *communiqué* published from the Russian Foreign Office declares that the settlement of the frontier with Afghanistan was arranged prior to the Boer War. Russia has addressed no request of any sort to Great Britain, but has simply notified her desire and her intention to enter into direct relations with Afghanistan.

THE EMBASSY AT ROME.

Lord Currie, G.C.B. has resigned the embassy at Rome on account of ill-health.

JAPANESE IN BRITISH COLUMBIA.

Later.

In spite of the disallowance mentioned on Dec. 16th, 19 Japanese were imprisoned in Vancouver for non-compliance with the educational test. They have since been released at the instance of the Government.

THE CRAWFORD FRAUD.

The whole of the Humbert family concerned in the notorious Crawford fraud have been arrested in Madrid.

ACCOUCHEMENT OF THE PRINCESS OF WALES.

London, December 22.

The Princess of Wales has given birth to a son. Both are doing well.

VENEZUELA.

Great Britain and Germany have proclaimed a blockade, which will not be relaxed until Venezuela has given some guarantee of her *bona fides* and her readiness to satisfy the claims of the Powers.

It has been suggested that President Roosevelt should be arbitrator. The suggestion has been submitted to President Castro, who has accepted it.

Three Venezuelan schooners have been already seized by the British under the blockade.

WIRELESS TELEGRAPHY.

London, December 23.

Marconi has established wireless communication between Cape Breton and Cornwall. A number of inaugural messages have been transmitted, including one from Lord Minto to King Edward.

This is the first time that messages, as distinguished from single letters, have been transmitted.

BRITISH WARSHIP AGROUND.

The British sloop of war *Fantôme*, one of the blockading squadrons, is aground at Baviane in the Orinoco.

DESTRUCTIVE EARTHQUAKE.

Later.

An earthquake occurred at Albijan on Dec. 17th, by which it is estimated 16,000 houses were destroyed and 2,500 people were killed. The rumblings continue. Excavations in the ruins are proceeding. Despite Government assistance the inhabitants are undergoing the utmost privations.

VENEZUELA.

The Italian third-class cruiser *Giovanni Bausan* has captured a Venezuelan schooner.

VENEZUELA.

London, December 24.

The *Gazette* issued at Trinidad contains the official declaration of war against Vene-

zuela. It is formally intended to legalise the blockade.

OBITUARY.

The Archbishop of Canterbury and the Dean of Winchester.

A EUROPEAN SCANDAL.

A sensation has been caused in Dresden by the official announcement that the Crown Princess of Saxony secretly fled abroad on Dec. 11th. She is supposed to have been in a morbid state of mental excitement, and to have gone to Geneva. The cause is attributed to family differences.

(RECEIVED AT THE LEGATION OF FRANCE.)

THE HUMBERTS.

Saigon, December 23.

The newspapers make long comments on the arrest of the Humbert family. The latter are to arrive in Paris this week. Nothing has been discovered in their house at Madrid except some jewels and a few thousands of francs.

(RECEIVED AT THE FOREIGN OFFICE.)

MEXICAN AFFAIRS.

The Japanese Representative in Mexico telegraphs that the Minister of Foreign Affairs submitted the Budget to the Chamber on the 16th instant, and that a long speech made by him on that occasion seemed to indicate that Mexico has not at present any intention of adopting the gold standard.

VENEZUELA.

It is telegraphed from Venezuela that a blockade of that country's ports was established by Great Britain and Germany on the 20th instant.

THE EVACUATION OF SHANGHAI.

A part of the German garrison left Shanghai on the 20th instant; the whole of the British garrison was withdrawn on the 22nd, and the French garrison will follow soon.

CANADA AND IMMIGRATION.

Montreal, December 15.

The Immigration Regulations enacted by the Legislature of British Columbia on the 21st of June, together with the Industries Regulations—these two sets of Regulations are approximately the same as those which the Canadian Government refused to sanction in September of last year—and the Coal Mine Regulations, which closely resemble those that became inoperative some years ago owing to a decision of the English Privy Council, have been disapproved by the Governor-general of Canada.

THE MARSEILLES STRIKE.

Saigon, December 21.

The registered mariners at Marseilles have resumed work, and the service of steamers has become normal.

THE HUMBERT FRAUDS.

Saigon, December 22.

All the members of the Humbert de Rignac family have been arrested at Madrid, where they have been living since May 9th last. They have been placed at the disposition of the French Embassy.

(FROM THE "JAPAN HERALD.")

THE INCREASE IN THE JAPANESE FLEET.

London, December 16.

The *Standard's* Odessa correspondent remarks that the Russian service journals are pressing upon the Government the absolute incumbency of creating a Pacific fleet able to prevent Japan from establishing her naval supremacy in the Far East. The steady increase in the Japanese fleet is viewed at St. Petersburg with serious misgivings.

INDO-CHINA.

London, December 22.

The appointment of Consul Hardouin as general Secretary to the Indo-China Government is regarded as indicating renewed efforts to promote trade and political relations with Hunnan and Kwangsi.

DEATH OF ARCHBISHOP OF CANTERBURY.

London, December 23.

The Archbishop of Canterbury is dead.

[The Rev. Frederick Temple, P.C., D.D., LL.D., was born in the Ionian Islands in 1821. He was appointed Archbishop of Canterbury in 1896.]

(FROM THE "JIJI SHIMPO.")

VENEZUELA AND THE POWERS.

London, December 17.

The United States Government has drawn the attention of the allied Powers to the arbitration proposed by the Venezuelan Republic. The Italian Government forwarded an ultimatum yesterday, demanding £120,000 damages from Venezuela. The Italian Minister quitted Caracas to-day.

During the bombardment of Puerto Cabello, the *Charybdis* received a shot in the bow and the *Vineta* also received two shots. It is rumoured that a German officer was killed in the engagement. The United States Squadron commanded by Admiral Dewey is at Puerto Rico.

THE VENEZUELAN TROUBLE.

London, December 18.

According to an announcement made at Caracas, it has been decided to submit the controversy to arbitration and preparations are being made accordingly. The Venezuelan Government is reported to have proposed Mr. Bowen, the United States Minister, as arbitrator.

The blockade of the Venezuelan Coast is enforced only against Venezuelan vessels.

IMMIGRATION INTO BRITISH COLUMBIA.

Nineteen Japanese have been prosecuted at New Westminster, British Columbia, for contravention of the Immigrants' Regulations.

THE ANGLO-JAPANESE ALLIANCE.

Parliament has been prorogued. The Royal speech was optimistic with regard to the advantages of the Anglo-Japanese alliance.

THE MONETARY SYSTEM IN THE STRAITS.

Shanghai, December 19.

The Committee of the Singapore Chamber of Commerce has consented to the proposal for the adoption of the gold standard in the Straits Settlements.

The Penang Chamber of Commerce has also unanimously passed the resolution favouring its adoption.

RUSSIA AND AFGHANISTAN.

London, December 20.

A statement appears in the *Novoe Vremya* to the effect that Russia has intimated to the British Government its desire to open direct intercourse with Afganistan.

THE VENEZUELAN TROUBLE.

The interested powers have consented to submit the Venezuelan Affair to arbitration in accordance with the proposal of the United States.

The blockade of the coast is to be enforced from this evening.

THE FOREIGN TROOPS AT SHANGHAI.

Shanghai, December 20.

About 300 German soldiers left here this morning. The British troops are to leave by the *Clive* next Monday, and the French troops will leave for Kwangchao Bay on the 24th or the 25th inst.

THE MONETARY SYSTEM AT HONG-KONG.

The committee of the Hongkong Chamber of Commerce will meet on Tuesday to discuss matters relating to the adoption of the gold standard system in the colony, when it is expected they will announce the undesirability of altering the present monetary system unless the Chinese Government alters its system. A gene-

ral meeting of the Chamber of Commerce to consider the question will therefore not take place.

INCREASE IN CABLE CHARGES.

The Great Northern Telegraph Company has raised its charges 70 cents per word.

WIRELESS TELEGRAPHY ACROSS THE ATLANTIC.

London, December 22.

At the celebration in honour of the opening of wireless telegraphic communication between Cape Breton, Canada, and Cornwall, Mr. Marconi announced that telegrams sent by the Governor-General of Canada had been received by King Edward and the King of Italy.

THE VENEZUELAN AFFAIR.

A rumour is current that President Castro has been taken ill. President Roosevelt has been requested to arbitrate between the Powers concerned with regard to the Venezuelan trouble, but it is not yet certain whether he will comply with the request or not.

(FROM THE "ASAHI SHIMBUN.")

AMERICAN AFFAIRS.

Berlin, December 15.

The declaration of war by Venezuela is expected to be made public to-morrow by England and Germany. The Italian men-of-war are in alliance.

The British and German fleets succeeded in seizing Puerto Cabello. The report of a claim made to Venezuela by Germany individually is untrue.

The American Ministers to England and Germany have suggested to both governments intervention. It seems however that America does not involve herself closely in the matter.

THE GERMAN TARIFF.

Count von Bulow is blamed by the Liberal newspapers for his action with regard to the Tariff Bill. The German Emperor, on the contrary, conferred on him the decoration of the Hohenzollern Family Order. He also received from the King of Saxony a telegram of congratulation upon the passage of the Bill.

GERMANY AND THE POPE.

The German Minister to Peking had audience with the Pope on his way back to Germany.

GENEROSITY OF THE KRUPPS.

Owing to the wishes of the late Herr Krupp's family, the prosecution of the men who accused the late Herr Krupp has been stopped.

FLOOD IN ITALY.

It is reported that great inundations have taken place in Italy.

SOUTH AMERICA.

London, December 18.

Mr. A. J. Balfour, the Premier, speaking in the House of Commons, in reply to a question of a member, announced that the dispute between England and Venezuela has resulted in a state of war being declared; if this had not been declared it would have been impossible to have seized the Venezuelan warships or to blockade the harbours. Asked if the Government has agreed to exclude the U.S. warships from the provisions of the blockade, Mr. Balfour replied that no necessity existed to consult with neutral Powers in the matter.

London, December 19.

The Venezuelan Government is awaiting the U.S. Government's reply whether it will undertake the arbitration; if the U.S. accepts, Mr. Bowen is expected to go to Washington.

ITALY AND THE RED SEA.

The Italian Parliament has rejected a motion, brought forward by the Republicans, to withdraw troops from the Red Sea littoral.

HOLLAND AND BELGIUM.

London, December 20.

General Den Bear, of the Court of Arbitration at The Hague, has given his opinion on the advisability of making a treaty of alliance between Holland and Belgium. His opinion, it is said, is not only welcomed in Dutch Government circles, but is cordially supported by Queen Wilhelmina.

VENEZUELA.

Berlin, December 20.

England and Germany have refused the request of the Venezuelan President to arbitrate the present dispute. The offer of arbitration by the U. S. Government, is still under consideration, but meanwhile the blockade continues.

THE GERMAN TARIFF.

The Diet of the German Confederated States has received the Customs Duty Bill which recently passed the Imperial Diet. The Government is prepared to open negotiations for the revision of commercial treaties with every country in the new year, but has no intention of abandoning its position.

RUSSIA AND THE MACEDONIAN QUESTION.

From fear of an uprising in the new year the Russian Minister of Foreign Affairs is now paying visits to the capitals of Bulgaria, Servia and Austria.

THE VENEZUELAN BLOCKADE.

A blockade, similar to open war, has been declared against Venezuela by England, Germany, and Italy.

(FROM THE "N.-C. DAILY NEWS.")

RECALCITRANT VENEZUELA.

London, December 16.

In the House of Commons, during a debate on the Venezuelan question, Lord Cranborne said that the attitude of the United States was reasonable and sensible. It was recognised there was no infringement of the Monroe doctrine and that we were absolutely driven to the course adopted. The whole coast would be blockaded if Venezuela continued to be unyielding. Sir Henry Campbell-Bannerman complained that we were bound hand and foot to Germany, of whose claims the House of Commons was unaware.

London, December 17.

The German man-of-war *Panther* has gone to Maracaibo to capture the remainder of the Venezuelan fleet.

Venezuela has replied to the Italian note, which is not an ultimatum, in the same terms as to England. The Italian Minister is at Caracas.

London, December 18.

A series of questions were addressed to Mr. Balfour in the House and elicited replies, implying that the Government regards a state of war as existing with Venezuela.

Mr. Balfour remarked that without a state of war you cannot seize vessels and added that if necessary the fleet would blockade the coast.

Mr. Healy asked whether the United States Government assented to the exclusion of its vessels by the blockade. To this Mr. Balfour replied that neutral Powers are not consulted when a state of war exists.

FRENCH AND ITALIAN SWORDSMEN.

London December 19.

A duel has taken place at Nice between two famous Italian fencers, Messrs. Vega and Pessina, and two Frenchmen, Messrs. Kirchoffer and Merignac. Both the Italians were wounded.

THE PROGRESS OF MR. CHAMBERLAIN.

London, December 17.

Mr. Chamberlain has visited Nair Obi, and witnessed a war dance of the Masai.

THE DESTRUCTION OF ANDIJAN.

London via Bombay, December 18.

The town of Andijan in Ferghana (Turkestan) was destroyed by an earthquake yesterday morning. The loss of life is at present unknown.

[Andijan is a town in the southern part of Turkestan, close to a branch of the Syr Daria. Its population, according to the "Statesman's Year-Book" was 45,680.]

THE SUGAR CONVENTION.

Mr. Balfour stated in the House that he could see no reason to defer the ratification of the Sugar Convention. We shall ratify it on the distinct understanding that it rests only with us to penalise our colonies. We should regret the granting of bounties by our colonies, but we should not penalise them.

EVACUATION EXTRAORDINARY.

London via Bombay, December 17

Reuter's correspondent at Peking telegraphs that Russia is establishing her own Customs and postal service in Manchuria, independently of the Chinese Maritime Customs.

THE STRIKE AT MARSEILLES.

London, December 30.

The Marseilles Chamber of Commerce in a strong letter to the Government demands the enforcement of the law against the naval reservists whom it characterises as deserters.

LORD LANSDOWNE ON THE SITUATION.

At the dinner of the Union Club, Lord Lansdowne, Foreign Secretary deprecated inveterate antipathies. He was glad that German and British sailors were acting side by side. He regretfully denied the imaginative statement that every difficulty between France and Great Britain was on the eye of settlement; but such reports, he said, indicated that the wind of public feeling was blowing in the right direction. He added that Italy is giving us invaluable facilities in Somaliland.

CHRISTMAS FARE FOR WIDOWS AND ORPHANS.

London, December 15.

Her Majesty the Queen will give a Christmas Dinner to the widows and orphans of London soldiers and sailors who died in the Transvaal war.

THE GERMAN TARIFF BILL.

It was only by the help of the new rules of procedure in the Reichstag, permitting the voting of the whole Tariff *en bloc*, that the Bill could be carried. The Socialist member, Herr Antreck, spoke eight hours in the debate.

(FROM THE "OSTASIATISCHE LLOYD.")

NEWS FROM EUROPE.

Berlin, December 15.

It is expected that Germany and Great Britain will to-morrow officially declare the blockade against Venezuela. Most likely also Italian men-of-war will take part. The bombardment of Puerto Cabello by S.M.S. *Vineta* and H.M.S. *Charybdis* has had a very wholesome effect and, before all, proved that the report, according to which strong measures against Venezuela had been demanded by Germany alone, is untrue. Likewise all reports relating to interventions between Germany and Great Britain, and Venezuela, are absolutely unfounded. The only fact is that the American Ambassadors in Berlin and London have communicated the wishes of the Venezuelan Government regarding settlement of the matter by arbitration. The Washington Government is keeping aback in every way.

The attacks of the Liberal Press against Count Bülow, made in consequence of the latter's measures about the tariff bill, have had the only effect that H. M. the Emperor has conferred upon him the chain of the Hohenzollern Hausorden, Count Bülow having declined a higher distinction. The King of Saxony has also sent his congratulations on the occasion of the latter's success in the tariff question.

The German Minister in Peking, Dr. von Mumm, has been received in audience by the Pope.

The well-known ship-owner Andreas Rickmers, of Bremen, has died.

According to the request of the Krupp family the proceedings on account of the slanders against the late Mr. Krupp have been discontinued by the Attorney-General.

Large inundations are reported from Italy.

Berlin, December 17.

The Macedonian question has reached a new stage. Count Lamsdorff is going to Belgrade, Sofia, and Vienna in order to confer personally with the Governments interested in the matter.

THE PANAMA CANAL.

The following telegram, from Washington on Nov. 25th gives the latest news about the Panama Canal negotiations:

At to-day's Cabinet meeting, Secretary Hay presented the subject of the Panama Canal negotiations, but was not able to report any progress during the past week. In fact it appears that the negotiations have come to a dead stop, and that, while no such thing as an ultimatum has passed, the Colombian Minister here, Senor Concha, has distinctly informed the State Department that he cannot, on behalf of his Government, accept the last proposition of the United States as the basis of a Canal Treaty. The State Department has already let it be known that it has come to the end of its concessions, so the chances of a renewal of the negotiations in the near future are not very bright.

One of the statements of fact in connection with the Panama route for the canal which has been brought to the attention of the State Department is that the original canal concession will expire in 1904, and it has been suggested that the Colombian Government has that fact in mind and is disposed to refrain from making a treaty now, in the expectation that the franchise will lapse and it thus may be in a position to build the canal itself, or to sell a new concession. Such a course would raise a very serious question before the Colombian Government, the Panama Canal Company, the French Government, and the Government of the United States as to whether or not a supplementary decree, extending the concession ten years from 1904, was valid.

White Java and Penang	6.70 to 7.50
White Refined	8.80 to 10.70

EXPORTS.

RAW SILK.

Holders of raw silk have been very strong and prices have slightly advanced. This has to some extent checked purchases and settlements are not so large as in the previous week. Probably there may be a little ease during the last few days of the year, for holders will require money as usual for the O-misoka.

BOVRIL ISN'T DEAR,

in fact, value for value, it is one of the cheapest drinks, and one of the most economical foods that can be obtained. A cup of hot Bovril costs less than a drink of whisky, and while giving a more genuine and lasting warmth than the latter, contains, in addition, the nutritive principles of beef worth many times its cost.

Old fashioned beef teas and meat extracts, whether known as such, or disguised under more pretentious modern names contain none of the NUTRITIVE properties of beef. Baron Liebig himself admitted this fact; there is not a doctor to-day disputes it. Used as a nourishment Meat Extract is probably the most expensive article one can buy. Bovril one of the cheapest.

Skin-Tortured Babies AND TIRED MOTHERS Find Comfort in Cuticura

INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and rest for Tired Mothers in warm baths with CUTICURA SOAP, and gentle anointings with CUTICURA OINTMENT, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, and the BEST toilet and BEST baby soap in the world.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated Liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses.

CUTICURA REMEDIES are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27-28, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. FOTTER DRUG AND CHEM. CO., Sole Props., Boston, U. S. A.
